

RESHARP SPECIAL

Precision Cutting Tools' re-sharpening service is here to help reduce your overall tooling costs during these difficult times. We know that budgets are being cut in Q2 and machine shops are being asked to cut costs and still produce efficiently. All done in our plant in Southern California, our re-sharpening service reconditions your tools to provide you the reliable performance you expect from PCT tooling. And for a limited time, we will match other OEM's regrind pricing to provide you the service of consolidating your shipments of tools to one vendor to help streamline your supply chain.
