GMA Garnet™ FINE & SUPER FINE ABRASIVES

GMA Micronized Garnet Products
for Precision Applications

GMA Fine and Super Fine Abrasive products are processed using state-of-the-art technology to ensure consistent high quality.

The combination of high mineral purity, total grain angularity and consistent sizing ensures high performance precision cutting, cleaning, etching and polishing.

AVAILABLE MESH SIZES

GMA Garnet™ Fine & Super Fine Abrasives

A high quality GMA Garnet™ abrasive is now available for any delicate surface preparation applications, ready in stock worldwide.

GMA Fine Abrasive

- Precision waterjet cutting: glass, plastics, composites, textiles, ceramics, aluminum, thinner alloys
- Fine abrasive blast cleaning: graffiti removal, stone/brick/timber restoration
- Marine, Aerospace, and Automobile maintenance, restoration and new fabrication
- Internal and external pipe cleaning, fiberglass top-coat removal, mill-scale removal (less than 10 micron profile)
- Blast etching: glass frosting, galvanized coatings, stainless steel, aluminium, alloys, fiberglass, denim jeans
- Others: filler in wear-resistant cement for coarse non-slip particles, scouring pastes, soot cleaning, additive for textural paint.

GMA Super Fine Abrasive

- Delicate blast cleaning: turbines, castings, plastics, graffiti removal, stone/brick/timber restoration, automobile, aerospace and boat restoration and new fabrication.

Examples:

- Removing gloss from plastic before applying a coating
- Removing paint from old cars one layer at a time without causing heat affected zones on the metal surface
- Removing mill-scale (less than 5 micron to no profile)
- Blast cleaning around valves and gauges in refineries and production plants
- Blast etching: glass, aluminum, plastics, composites
- Scouring/de-burring/polishing – masonry, castings, lapidary
- Others: additive for masonry products, mold remediation.

Packaging

GMA Fine & Super Fine abrasives are available in either 55lb paper bags or 2200lb & 4400lbs bulk bags.
