

Recycling . . .

It's efficient

It's cost effective

It's environmentally friendly

We Want Your Used Garnet

Landfills add to global pollution.

- Reduce your pollution foot print without any investment or additional cost.

How can you recycle and save money?

- Disposal costs are becoming increasingly expensive, particularly in major cities. Recycling provides a real cost benefit for the end user.
- You can reduce your disposal costs by sending your used garnet to Reserve for recycling.

Why recycle with GMA?

- GMA operates the world's largest garnet recycling facility in Reserve, Louisiana. We've developed in-house expertise and technology to convert spent garnet, often contaminated with excessive fines, rust, paint flakes and other debris, into clean reusable garnet products.

Accepting Material Now

Used sand blast, waterjet, water filtration, garnets accepted.
