## New Product Announcement

NEW-390 • 12/2023  
Page 1/5

### HOLEMAKING

#### Diameter Range

0.4724-1.0197"  
12.0-25.9 mm

#### Geometries

FPF (Flat Bottom)

#### Grade

IN2205

#### Materials

- Steel
- Cast Iron

# TWISTSPEED™

### 3-Flute Geometry for Flat Bottom Drilling Applications

- » Improved productivity and cost reduction by reducing a two-step process to one
- » Phenomenal hole accuracy and surface finish
- » Reduced cycle times with the 3-effective design
- » Can be used with existing TwistSFeed bodies (3xD, 5xD, and 8xD)

# New Tip Improves Productivity and Reduces Cycle Times

Ingersoll's new FPF (flat-bottom) geometry, for the **TwistSFeed** product family, is designed to improve productivity and reduce costs by reducing the normal two-step process down to one step.

FPF is especially suited for drilling cavities for socket head cap screws and guarantees excellent performance in steel and cast iron applications.

## Features & Benefits

- Phenomenal hole accuracy and surface finish for all flat-bottom applications
- Improved productivity and cost reduction by reducing a two-step process to one
- Reduced cycle times with the 3-effective design
- Can be used with existing **TwistSFeed** bodies (3xD, 5xD, and 8xD)
- Centering point geometry for high tolerance hole precision
- IN2205 multi-layer coating provides high wear and chipping resistance equaling increased tool life

Universal Flat Shank (FD) • 3xD, 5xD, 8xD

Cylindrical Shank (FD) • 3xD, 5xD, 8xD

## Reduce a Two-Step Process to One

## Series FPF

Note: Feed and speed recommendations are starting operating parameters. They are only guidelines from which further optimization should take place. Operating parameters are influenced by many machining variables. These variables may cause for reductions in feeds and speed or dramatic increases. Additionally, DOC and WOC may need to be revised to optimize the tools performance.
