

Ozone Generator - OZ-Series

Self-Pumping Ozone Generator

Model: AHB – 200

The AHB ozone generator is compact and powerful. It can produce up to 300 mg/hr of ozone. The distribution of the dissolved ozone through the diffuser makes it ideal for machine tool sumps and EDM dielectric tanks where harmful biocides cannot be used.

Features:

- *Instant ozone production
- *Diffuser stone
- *Ozone compatible tubing and check valve
- *115 volt
- *Liquid tight enclosure
- *Continuous duty
- *Includes 5 foot long cord
- *Compact design
- *Light-weight-2 pounds
- *Low 12w power consumption
- *Economically priced
- *200-300 mg/hr ozone production
- *One- year warranty

Applications:

- *EDM Dielectric tanks
- *Machine sumps
- *Anolyte tanks
- *Open top contact tanks
- *Storage tanks
- *Fountains

Benefits:

- *Extends coolant life
- *Reduces coolant disposal cost
- *Eliminates Monday morning odors
- *Eliminates Bacteria, mold and algae
- *Long dependable service life
- *Improved coolant performance
- *Reduce dermatitis
- *Improves work environment
- *Low cost
- *Quality tool
- *Easily maintained
- *Eliminate the need for dangerous biocides
- *Quick return on investment
- *Eliminate sump slime
