

SUPERPURE®

Eliminate rancid coolant odors

Innovative way lubricant

SUPERPURE® is an innovative lubricating oil chemistry designed to optimize ALL coolants performance no matter whom the manufacturer.

A real success

THOUSANDS of customers have experienced the **SUPERPURE** advantage in machining centers across North America for more than 20 years!

SUPERPURE® stops ODOR problems like the ones you can have Monday morning in your coolant sump!

NO ZINC
NO PHOSPHORUS
NO SULFUR

How can SUPERPURE® save you MONEY?

Extends Coolant Life

Less down time for DCR's, Lower disposal costs, lower coolant consumption.

Machinability :

Will not leach important additives out of the machining coolant, therefore maintains the integrity of the cutting fluid in the sump.

Machinability :

SUPERPURE® is EPA friendly. It doesn't contain conventional extreme pressure additives (heavy metals) such as phosphorus, sulphur, and zinc.

Clean :

SUPERPURE® cleans out the build up that conventional oils leave behind in both lines and check valves allowing for better way lubrication and less maintenance.

Testimonials

A manufacturer of Stainless Steel food processing equipment in Northern Ohio made the change to **SUPERPURE®** about one year ago. This customer, only changing the way lubricant, has extended the soluble oil coolant sump life 2-3 times. The coolant life was extended from 3-4 months to now almost a full year. They are seeing the **SUPERPURE®** difference in extended coolant life, lower coolant consumption, less downtime for cleanouts, and low waste disposal costs.

10-year customer Kevin Demott at Black Clawson Converting Machinery made the switch to **SUPERPURE®**. Kevin was cleaning both the injectors and check valves on a routine basis prior to using **SUPERPURE®**. Since Kevin made the change he has not had any plugged lines, check valves, or injectors.

SUPERPURE

HYDRAULIC OIL

derived from similar innovative chemistry as **SUPERPURE®**! **SUPERPURE** provides same advantages as **SUPERPURE** in cases where you have hydraulic oils leaking into your coolant.

A COMPLETE RANGE

A wide range of viscosity available

GRADES	32	46	68	100	220
