

SPACE SAVING BUCKET STACKER

Stack and save space with the Bucket Stacker! Features include:

- White PVC coated steel
- Designed to stack two 5-gallon buckets
- Bottom of 5-gallon bucket nests into top of bucket stacker
- Holds up to 70 pounds of liquid
- Built for stability
- Allows chemical to be drawn from two different buckets
- Lid accommodates up to a 3/4" suction hose

Elevating your bucket off the floor with the Bucket Stacker helps to prevent freezing.

Want more floor space in your chemical room?

It's easy with the Bucket Stacker!

The 5-gallon Bucket Stacker provides easy access to the chemical in the bottom bucket allowing you to draw solution from **two different buckets, but only using the footprint of one 5-gallon bucket, saving you floor space.**

With the Bucket Stacker, the top bucket sits securely on the bottom bucket and can accommodate suction hoses up to 3/4" in size.

Don't wait any longer, maximize your space with the Bucket Stacker.
