

AT HOME IN TOUGH ENVIRONMENTS

With many models from which to choose, there is a cart for every job and industry. Easily and safely push, pull, maneuver and dump loads up to 1,500 lbs.

All CECOR carts are efficiently designed to offer the most capacity with the smallest footprint. Our carts are built to last and feature heavy-gauge steel construction with fully welded seams that don't leak, melt, split, bulge or burn. Mounted on durable industrial casters, our carts roll smoothly and maneuver easily even when fully loaded.

HEAVY-DUTY CARTS

CECOR carts come in a variety of useful profiles and sizes. Capacities range from 4.9 – 27 cubic feet with load ratings from 500 – 1,500 lbs.

Dumping methods include rotational, hydraulic and manual/tilt. Pair with CECOR's patented dumping frame for elevated dumping (some exceptions apply). Options include drain plug, hinged drain screen and more.

EVERY TYPE OF CART:

- Low profile
- Self-dumping hoppers
- Stock picking & putaway
- Cube trucks
- Tilt trucks
- Bulk containers
- and more

TILT TRUCKS

Designed for collecting and hauling bulky, light-density loads, these carts park where scrap is produced for easy collection. Non-marking wheels are strategically placed for balanced loads.

Ergonomic two-stage dumping with reinforced dumping knees allows for complete, controllable, safe emptying by just one worker at the floor or dock level. Or, pair the DA Series with CECOR's patented dumping frame for elevated dumping.

Capacities come in 18, 27 & 40 cubic feet with load ratings of 360, 540 & 800 lbs. Options include tow link, cover, drain plug and more.

FOR EVERY TYPE OF JOB:

- Material handling
- Collecting
- Hauling
- Sorting
- Segregating
- Transporting
- Dumping

WHY CECOR CARTS & CONTAINERS?

CECOR's carts make better use of space! Both of these carts hold ½ cubic yard, yet notice how CECOR's cart fits tighter and better – especially valuable in machine shops where floor space is limited.

- **Experience** – CECOR has designed and manufactured industrial carts since 1955.
- **Quality, Durable Workmanship** – Our products are proudly made in the USA. All our carts feature heavy-gauge steel construction with fully welded seams that don't leak, melt, split, bulge or burn.
- **Variety** – CECOR offers assorted profiles, capacities, load ratings, dumping methods and options to fit any purpose.

THERE'S A CART FOR EVERY TYPE OF JOB.

CECOR offers a wide range of industrial carts and containers. Maximize capacity while minimizing footprint! Choose from combinations of profiles, capacities, load ratings, bin dimensions, lip heights, dumping methods and options. No limit to purpose or industry.

- **Unique Dumping Design** – CECOR dumping system allows for elevated dumping from forklift or overhead hoist.

Multi-position settings control container speed for safe and thorough dumping. Cart rotates 360°. Empty cart returns to upright position and automatically locks into place for return to floor.

SUMP SHARK® POWER

CECOR also designs and manufactures Sump Shark® sump cleaners.

POLY-BINS OFFER STACKABLE, SPACE-SAVING STORAGE

- Molded-in pallet with two-way entry for forklift transport
- LLDPE plastic weighs less
- Non-stick surface easy to clean
- Withstands temps from -20° to 150°F
- Available in variety of colors
- Options: stacking lids; USDA- and FDA-approved, anti-microbial plastic and transport dolly
