Ebbco Bag Vessel Filtration Systems are designed for Part Washer or Rinse Applications. By incorporating a Carbon Steel Bag Vessel (Stainless Steel Optional) you can Reduced Maintenance Costs By Running A Cleaner More Efficient System These systems are designed for a Continuous Operation.

An Eductor Packaged is placed inside you wash tank, this allows the particles to keep in suspension and pushed toward pump suction, the filter pump pull the fluids though a strainer basket for protection, then fluid is pumped through a Bag Vessel containing your choice of bags. Clean Fluid is then returned to the washer via the Eductor package.
