

Precision Machining Replacement Cartridges

Part Number : E729-(Micron Size)

2 per Case

Microns Available : 1, 5, 15, 25, 50

Product Description

The Ebbco 729 filter cartridge is a large and structurally strong cartridge. With 60 square feet of filter surface, it allows up to 84 lbs. of solids holding capacity. This cartridge can be used on process water and oil fluids. (Not to be used on potable water.)

Product Features

- Pleated media single layer resin impregnated cellulose fiber.
- Corrosion resistant steel jacket, end caps and center tube.
- Epoxy bonding material assures a permanent leak-proof bond between media, caps and outer jacket.
- Seals are large flat buna-n gaskets to optimize seal of element to vessel.
- Recommended replacement pressure: 40 PSID; collapse 60 PSID; maximum
