The Ebbco Sludge Wrangler is Designed to Remove Sludge and Swarf from Machine Tool Coolants on any Machine Too. By Removing the Harmful sludge and particulate and depositing them in an inexpensive replaceable filter bag it will extend coolant life, increase tool life and decrease odors and dermatitis.

This Compact system runs strictly on shop air and comes complete with Suction and Discharge Wands. By placing the suction wand in the coolant sump it removes the sludge and swarf filters it through a filter bag and returns the clean coolant back the sump. This system is easily serviced without shutting down the machine. Used In All Machine Tools. In Tank Sweeper Packages Available
