

STOP WASHING YOUR MONEY DOWN THE DRAIN!

Save Water & Cash with a Chiller!

Benefits:

- Contaminate Free System
- Extended Life for Water-Cooled Consumables
- Reduce Water and Sewage Costs
- Absolute Temperature Control

By Dimplex Thermal Solutions

How to Size a Chiller?

$[\text{Water Flow in GPM} \times 500] \times [\text{Temperature Rise}] = \text{Thermal Load}$

$\# \text{ TONS} = \text{Thermal Load} / 12,000$

Using a closed-loop system eliminates costs associated with increasingly stringent local & federal water regulations. Savings realized from reduced water and sewage bills can pay for an entire chiller in no time!
