

Reduce Reuse Recycle

A "greener" business does not necessarily mean an increase in operating costs. Environmental concerns should first and foremost be about re-using resources - making more with less. A lot of money can be saved by reducing water-consumption, re-using cutting fluid and recycling consumables.

On the road to ISO14001, you can reduce consumption of cutting fluid and water; reduce the amount of waste fluid collected and disposed of; and, end fluid leaks that create potential health & safety issues.

Cost-cutting and
optimization for the
machining industry

Visit www.wogaard.com for more information on how to increase profitability and reduce fluid waste by using the Woguard Coolant Saver.

Coolant Saver

AHB Tooling & Machinery, Inc.
Complete Metalworking Solutions
Roseville Saginaw & Jackson, MI

ISO Certified
(800) 991-4225

customerservice@ahbinc.com

- Save up to 50% on cutting fluid
- Save up to 90% on fluid waste costs
- Save time and money on fluid handling

Cut the costs of cutting fluid by up to **50%**

The Wogaard Coolant Saver collects the cutting-fluid that is normally wasted through the machine tools automatic chip conveyor. The cutting fluid is reclaimed from the chip-container and returned to the machine tool's main tank for re-use.

Compact and easy to install

The Wogaard Coolant Saver is easy to install and is virtually maintenance free. It is driven by the machine tool's onboard coolant pump, so no external energy source is required.

Savings

The Wogaard Coolant Saver can save up to 90% on the costs of waste coolant disposal. Furthermore, it saves the considerable time spent by employees handling the cutting fluids. The chip-containers are dry when emptied, which prevents any spillage.

The investment

The Wogaard Coolant Saver is a low-cost solution, ensuring an ROI well below 6 months*.

Increasing costs?

Considering the long-term developments in the price levels of oil, water, energy and disposal, it pays to invest in a better utilization of cutting-fluids. The instability of many oil producing nations can cause sudden and significant changes to the cost of oil-based products, including cutting oils and coolants.

Wogaard online

On our website www.wogaard.com you can find detailed product information, contact us or calculate your potential savings using our online savings-calculator. This gives you an estimate of the savings you could achieve by using the Wogaard Coolant Saver.

Support

Few installations are completely identical. When in doubt you can contact Wogaard for assistance and support on your specific installation.

Made in Denmark

Wogaard products are manufactured in Denmark. Maintaining quality and supporting a sustainable future is a key focus of our manufacturing team.

Award winning product

- For use on Soluble coolant/emulsion
- Typical use CNC M/CS with conveyors plus more eg Bandsaw, EDM
- Neat Oil Version now available (contact us now for working parameters)

*Actual savings depend on multiple parameters. See www.wogaard.com for details
