

ADF manufactures a *complete line* of parts washing equipment, evaporators, downdraft tables, oil-water separators and other accessories related to cleaning operations.

DIVERSITY

This literature highlights various types of equipment manufactured by ADF.

PARTS WASHERS

MODEL 200

The model 200 is a high volume-low pressure top load model.

Recirculating spray booths provide great flexibility in part size and weight to be cleaned. Available in carbon steel or stainless and sized to your needs.

SPRAY BOOTH

FRONT LOAD

For flexibility in part size and height. Available in low pressure, shown, and high pressure models.

MODEL 900 & 930

Pass through style for excellent flow and material handling. Available in high pressure, shown, and low pressure models.

TOP LOAD

Model 800 high pressure top load model. Provides easy loading and small foot print.

MODEL 11 DUNKER

The dunker is for parts or baskets of parts that require immersion for cleaning.

We offer an extensive list of options and accessories for our parts washers allowing the user to tailor the washer to his needs. If one of our standard models will not work for your application, we will design and build a custom washer for you.

DISTINCTION

STANDARD OR CUSTOM MEETING YOUR REQUIREMENTS

ADF equipment is used in a cross section of industries including automotive, aerospace, medical, pharmaceutical, and can be found cleaning metals including stainless steel, brass, copper, carbon steel and others. Our equipment is also used in cleaning ceramic, glass, plastic and other composites.

MODEL 550

A manual type parts washer using high pressure for versatile and precision cleaning.

MODEL 710 T TUMBLER

High pressure performance excellent for small parts, blind holes, parts that nest and those with internal threads.

CUSTOM BUILT MODELS

DOWN DRAFT TABLES

The open mesh table draws air and contaminants like grinding dust, welding fumes and smoke away from the operator.

MODEL 990

Drawer washer designed for heavy loads, such as large dies, gears, transformers, castings and large baskets of parts.

CONVEYOR

Conveyor washers are built to order and sized to your parts, volume, and stages required.

MODEL 750

The ADF two station rotary basket washer features spray, immersion, and soaking capabilities with rinse and dry options.

AUGER

For high production flow of parts that need to be tumbled or moved for cleaning and drying.
