Oil Transfer Pump Upgrade - (Required upgrade for cutting oil) Cost must be added to the unit costs shown above and only for filtered Units			\$1,250
Modular Base Unit with Mounted Chiller Pump(s) Upgrade - (Required upgrade for cutting oil) Cost must be added			\$2 500

Units with mounted chillers require separate power drops

Unit Specifications

Fixed Flow Or Variable Flow - 9gpm / 36lpm

Pressure - 1,000psi / 70bar

Base Unit Footprint: W 35" x L 57" x H 63" / W 889 x L 1448 x H 1600

Power Connection Built to order - 230VAC, 460VAC

Available Offic Options. Add Option Cost to Base Unit		
Chiller & Mist Collector Pre-Wire Kit - Preps the base unit to accept a retrofit chiller and mist collector		
Up to four pre-set pressures - Requires additional Machine Mcodes		
Auto-Priming Standpipe Assembly	\$1,610	
CoolMag Magnetic Pre-Filter		
Optional additional High Pressure Outlet: Up to 6 can be added	\$650	

Swiss Manifold Outlets Kit - 4 Port / 8 Port - Manifold to Tool Stations - Call for quote

Features

Onboard 65 gal / 250L Clean Tank

2+2 Crossover Quad high capacity "Quick-Change" Filters - 10um Filtration:

Full Color HMI Display

Two High Pressure Outlets - 3 to 8 outlets available

Grundfos Onboard Feeder Pump

Can run water-based coolant or oil - Oil must be specified and MSDS information provided for review ia Free filtration is not to be used with cutting oil

Hi/Lo Kit Included with Units sold on Lathes - One Kit per turret

Power and control harness with machine side connector Electrical Cabinets built to UL / CSA / CE Standards

Benefits

Improved flushing and breaking of chips

Faster feeds and speeds

Longer tool life

Filtered coolant to your turret or spindle

Installation & Warranty

Base Unit Standard Installation	
Modular Unit With Mounted Chiller or Mist Collector	Installation \$2,590

1-year warranty Parts & Labor.
