## CM SERIES

CMII75DG • CMII100DG • CMB150CNC

▶▶▶ **THE CMII75DG & CMII100DG** offer a new Dyna Guide technology, that is not available in any of the other conventional machines. The Dyna Guide technology enables excellent cutting surface finish, and high precision cutting, by utilizing the combination of a servomotor and a highly rigid saw head.

**STANDARD FEATURES** CMII75DG • CMII100DG

- DYNA GUIDE
- WIRE BRUSH
- CNC CONTROL
- INCLINE TABLE
- AUTO TRIM CUT
- CHIP CONVEYOR
- SORTING DEVICE
- WORK SUPPORTER
- SELF-DIAGNOSTICS
- CUT PIECE COUNTER
- ANTI-BACKLASH DEVICE
- CARBIDE STABILIZER PADS
- CONTROLLED MIST SYSTEM
- AMMETER MONITORING MAIN MOTOR AMP DRAW

**OPTIONAL FEATURES** CMII75DG • CMII100DG

- MIST COLLECTOR
- VISE PRESSURE CONTROL
- SIGNAL TOWER (3 steps)
- EXTENDED WARRANTY = Regular 1 year + Additional year Total 2 years

Specifications may change without notice at the sole discretion of Amada's Engineering Department.

**◀ DYNA GUIDE**

- New technology, reduces the undulation on the cutting surface by increasing the rigidity when circular saw blade engages the material. Moreover, Dyna Guide achieves high precision cutting by suppressing vibration and swinging of circular saw blade.
- Adopts horizontal linear guide system for new saw head mechanism.
- Servomotor and ball screw are utilized as the feeder mechanism.

## A PERFECT MATCH WITH AMADA BLADES

Amada also offers another unique advantage in supplying Circular Saw blades for our line up of the Amada CM Series Saws. This allows the customer to precisely match the characteristics of the blade to the machine to achieve optimum cutting performance, no matter what material you're working with.

Because Amada offers our own blades, we're able to ensure we've got the right blades, in stock, when you need them.

Using oblique-slide cutting and a cemented carbide pad (to dampen vibration), the service life of the saw blade can be greatly increased, reducing your cost per cut and longer blade life.

For each application AMADA offers the appropriate tool. Like the machines, the saw blades are continuously improved and advanced. By using AMADA Blades on AMADA Machines a perfect cutting result is always given.

## BLADES FOR CIRCULAR SAWS

BLADE TYPE	CHARACTERISTICS
TCB-CB	<ul style="list-style-type: none"> <li>■ Carbide Teeth</li> <li>■ Universal tool for use in changing material qualities</li> </ul>
TCB-CR II	<ul style="list-style-type: none"> <li>■ Cermet Teeth</li> <li>■ Tool for non-alloyed steels and steels with a carbon content between 0.15 to 0.45 %</li> </ul>
TCB-TI II	<ul style="list-style-type: none"> <li>■ Carbide Teeth + TiN coating</li> <li>■ Tool for alloy steels with a carbon content &gt; 0.45%, but not stainless or heat resistant steels</li> </ul>
TCB-SU	<ul style="list-style-type: none"> <li>■ Carbide Teeth</li> <li>■ Tool for stainless steel</li> </ul>
TCB-PT II	<ul style="list-style-type: none"> <li>■ Carbide Teeth</li> <li>■ Tool specially for pipes and profiles</li> </ul>
TCB-TISU	<ul style="list-style-type: none"> <li>■ Carbide Teeth + TiN coating</li> <li>■ Tool with particularly long service life with stainless steels</li> </ul>

## AUTOMATION

Our automation system increases the saws efficiency and reduces the burden on the operators. It is available upon the end user needs.

▶▶▶ **THE CMB150CNC** is designed for high-precision cutting with short cycle times and maximum productivity. This saw offers the quality, features, and reliability that have made AMADA an industry leader.

**STANDARD FEATURES** CMB150CNC

- WIRE BRUSH
- INCLINE TABLE
- CHIP CONVEYOR
- SELF-DIAGNOSTICS
- CUT PIECE COUNTER
- SIGNAL TOWER
- ANTI-BACKLASH DEVICE
- AUTO TRIM CUT
- SORTING DEVICE
- HEAVY-DUTY CARBIDE BLADE GUIDES
- CONTROLLED MIST SYSTEM
- SPEED CHANGE BY INVERTER
- LED READOUT INDICATING FEED RATE
- LENGTH SETTING BY DIRECT READOUT
- AMMETER MONITORING MAIN MOTOR AMP DRAW

**OPTIONAL FEATURES** CMB150CNC

- MIST COLLECTOR
- EXTENDED WARRANTY = Regular 1 year + Additional year Total 2 years

Specifications may change without notice at the sole discretion of Amada's Engineering Department.

**HIGH-PRECISION AUTO-SIZING DEVICE**

Using a photoelectric switch to detect the leading edge of the workpiece, the auto-sizing device incorporates a gripper that grips the workpiece from the right and left sides, correctly positions the workpiece, and feeds it with high precision.

**CAPABLE OF CUTTING A WIDE RANGE OF MATERIALS**

CMB circular saws can process a wide variety of steel materials, including round bars and rectangular bars in mild steel, stainless steels, tool steels, and nonferrous materials.

### CMB150CNC

Before using this product, please read the operator's manual carefully and follow all applicable instructions.

• When using our products, safety equipment is required depending on the operational task.

\* Specifications, appearance and equipment are subject to change without notice by reason of improvement.

\* Please use the machine model name as CMII75DG, CMII100DG, or CMB150CNC when applying for administration applications.

\* For any inquires, please contact local Amada Machinery America, Inc. office.
