

The DP-4 pendant arm can be bolted directly to all Automec controls. It is fabricated from 2 1/2" x 2 1/2" x 1/8" square steel tube.

Cables can be routed through the pendant using convenient access holes.

The mounting plate is 5" x 5" x 1/2" steel plate for rigidity.

The extension leg pivots 270° and can be mounted below main arm (as shown), above main arm (protruding up) or eliminated depending on the application.
