More product features for you to enjoy

- · Gantry design incorporating strong cross link
- Specially designed gearbox
- · Heavy duty inverter blade drive
- Split front vise
- · Double retracting vise jaws
- Guide arm moving in sync with vises
- Easy material clamping with full stroke cylinder vises
- · Automatic work height sensor
- CE safety standard available
- Vibration damper enabling smooth cutting from small to large sized material

Optional Accessories

- · Hydraulic chip conveyor
- Vise pressure regulator
- · Hydraulic top clamps
- Prism vise
- V_Drive

Introducing Cosen C-tech series

with exclusive V_Drive technology

The ultimate cutting solution for your mass production needs has arrived! Enjoy these six advantages provided by Cosen's C-TECH series. Cut more! Cut better! For less!

5+1 advantages

1. Safe cutting

Thoughtfully covered with four-doorway access, the machine provides operators with all-around protection while maintaining maintenance jobs just as easy. Machine stops upon opened doors, ensuring operation safety at all time.

2. Automatic first cut

Machine automatically positions material for trim-cut. No more measuring required!

3. Convenient data reading

Besides blade life, blade speed and feed vise position, the C-TECH series utilizes blade height detector to provide instant reading on current cutting rate.

4. Simple intuitive controls

Simple intuitive HMI touch screen controls all machine operations, displays vital cutting info and provides troubleshooting assistance.

5. Smoothest saw frame feeding

The saw frame rides on linear guide ways, a design that allows for lowest friction and highest precision possible!

+ 6. Exclusive V_Drive design (option)

With Cosen's V_Drive, you can cut hard-to-cut materials like Titanium, Hastelloy and other metals at significantly increased rates. V_Drive saves you cutting time by 25~50% and at the same time improves blade life, reducing your tooling costs!

World-Class PLC

Utilizing top brand PLC, Cosen's C-TECH bandsaw allows you to program up to 100 different jobs including quantity and length of cut along with the following convenient features:

- · HMI touch panel entry
- · Automatic shutoff upon finished jobs, out of stock or blade breakage
- · Automatic kerf loss compensation
- · Numerically controlled multiple indexing
- Save-a-Blade feature
- Simplified error diagnostics
- Blade speed, blade life & feed vise position & blade height display
- · Blade motor power display
