

# WJF-90000P-3

90,000 BTU/HR Inline Chiller

Inline Chillers

The Ebbco In-Line Chillers are designed to be used in conjunction with the Ebbco Closed Loop Filtration System, to cool the OEM's high pressure pumps as well as the Ebbco Closed Loop Filtration System, providing cooled treated water for hydraulic cooling and cutting purposes to maximize high pressure pump seal life.

Ebbco inline Chillers use an Air-Cooled, hermetically sealed scroll compressor with vertical air discharge. Each chiller includes cleanable air filters, digital temperature controller, stainless steel enclosure and full one year warranty on all parts and labor.

## Specifications

Refrigerant	R407C
Cooling capacity	90000 BTU/HR
Connection Size	1 1/2"
Fluid Temperature Outlet	65°F *
Site of Installation	Indoor
Ambient conditions	50° F -95° F
Voltage Options	460 vac/3Phase/60Hz
Controller Type	Ranco SSTS
Dimensions	58" x 32-5/8" x 51-3/4"
Finish	430 Stainless Steel
Crated Weight	825 lbs

\*This is the rated temperature at 95°F ambient. Temps can vary but will affect capacity - contact factory
