

## Features of Profile-T products

	Profile-TL	Profile-T2D	ProfileT3D
software version V3.4	2D	2D	2D/3D
<b>Product programming</b>			
Part programming:			
* numerical	●	●	●
* graphical 2D	●	●	●
* graphical 3D	--	--	●
Product ID alphanumeric	25	25	25
Drawing number alphanumeric	25	25	25
Number of products	10	No limit	No limit
Sheetthickness representation	●	●	●
Radius representation	●	●	●
Graphical programming hembends	●	●	●
Enhanced product selection	●	●	●
Learned bend allowance table	●	●	●
Graphical product overview	●	●	●
Graphical bendsequence overview	●	●	●
CNC program editor	●	●	●
Product notes	●	●	●
PDF notes	●	●	●
Directory selection	--	●	●
<b>Tool programming</b>			
Graphical 2D	●	●	●
Radius tools	●	●	●
Hemming tools	●	●	●
Multi-V die support	●	●	●
Number of punches	10	No limit	No limit
Number of dies	10	No limit	No limit
Multiple tool station set-up	●	●	●
Tool segmentation calculation	●	●	●
Tool adapters support	●	●	●
Gauge finger library	●	●	●
Machineshape 2D	●	●	●
Machine shape 3D	●	●	●
Number of Machine shapes	1	10	10
<b>Computed functions</b>			
Bendsequence visualisation 2D/3D	●	●	●
Bendsequence calculation 2D products	●	●	●
Bendsequence calculation 3D products	--	--	●
Collision detection	2D	2D	2D/3D
Developed length (2D)	●	●	●
Product dimensions	●	●	●
Hemming position and force	●	●	●
Tool suggestions / advise	●	●	●
Automatic tool selection	●	●	●
Automatic tool configuration	●	●	●
Automatic bumping calculation	●	●	●
Automatic lay-on support backgauge	●	●	●
<b>Miscellaneous</b>			
Generic integrated calculator function	●	●	●
Printing functionality	--	●	●
DLC product file import/export	--	●	●
DXF product file import, 2D products	--	●	●
DXF tool + machine shape file import	--	●	●
DXF product file import, 3D products	--	--	●
CAD 3D product file import STEP, IGES	--	--	●
