ERMAKSAN

METAL FABRICATING MACHINERY

innovative technologies.

www.ermaksan.com.tr

After half a century, Ermaksan is moving confidently into the future

With 48 years of technological investment and our innovative R&D department, Ermaksan has become one of the world's leading companies in the sheetmetal fabrication machinery industry.

Ermaksan is a pioneer in the industry with strong R&D department, 80.000 m² modern production facility, highly qualified team of 700 staff dedicated to high quality manufacturing of our machine tools.

Our factory is equipped with the latest industry leading precision CNC machines. Under the supervision of expert engineers, the factory manufactures 3,000+ machines annually. Ermaksan is one of the world's leading companies in the industry represented by exclusive dealers around the world with strong technical support in 70 countries.

Ermaksan designs and manufactures durable, productive, and value based machinery. We do this by, continuously meeting customer demands and exceeding industry standards towards sustainable growth.

High Tech
CNC Machines
manufactured by
Ermaksan;

- New Generation Fiber Lasers
- CO₂ Lasers
- Press Brakes
- Servo Motorized Hybrid Press Brakes
- Plasma Cutting Machines
- Punch Presses
- Shears
- Iron Workers

POWERBEND PRO

3 Axes (R Manual) CNC Press Brake

Power-Bend Series machines redesigned based on users preferences to become a unique machine with its individual electronic and mechanical features.

Power-Bend Pro Series are among the highest rated machines which will help you increase your productivity and keep costs at minimum level with its user friendly CNC controller and low cost hydraulic maintenance.

New Power-Bend Pro is exactly what you need for your production where complicated, sensitive, single or multiple bends on high speed are paramount.

Stronger, faster and deeper bends...

DELEM ER70.
10,4" high resolution 2D graphical screen comes optional with Power-Bend Pro.

Stronger, faster and deeper bends;

Power-Bend Pro Series allow you to have more production capacity and prevent time loss on production.

Sliding front support arms.
Scaled in metric, height adjustable front support arms.

Rigid structure.
Dynamic and solid body machined with maximum sensitivity.

Combination of speed and power

- ↓ High Free Fall Speed
- High Bending Speed
- ↑ High Return Speed

- High quality and repetitive bending is obtained by using synchronized cylinders and valves.
- Automatic utilisation of all axes on startup.
- All ERMAKSAN machines are designed using SOLID WORKS 3D programming and made with enhanced ST44-1 quality steel using the latest technology.
- Rigid upper beam runs on 8-point bearings with bending precision of 0,01 mm.
- Well-known top and bottom tool brands are long lasting hardened and provide precise bending.
- Silent high pressure pump.

- 2 axis (X, R)
- 4 axis (X, R, Z₁, Z₂)
- 6 axis (X, R, Z₁, Z₂, X₁, X₂)
- Servo motorized backgauge. (option)

Specially designed and produced backgauges by ERMAKSAN help with multifunctional and sensitive bending in complex parts.

CNC and Servo motors run on rail and with 0,01 mm sensitive high precision ball screws which help you to be competitive.

Standard

Backgauge system.
Power-Bend Pro offers you motorized X axis back gauge and manual R axis as standard.

Backgauge fingers.
Special design foldable back gauge fingers.

SICK C 2000 rear light guard.
CE standards safety protections help you work in safer conditions.

Optional

4 axis (X, R, Z₁, Z₂) servo motorized back gauge.
Backgauge positioning with 0,01 mm accuracy.

 **ERMAKSAN** // **POWER-BEND PRO**

Quick release clamping system.
Promecam type top clamps can easily loaded & unloaded.

General features

- Chrome coated cylinders are machined with 0,001 mm precision and pistons are specially hardened.
- Original clamps are user friendly and machined with high precision.
- Front support arms are slideable along machine length and easy to adjust.
- Compact and well-known brand HOERBIGER hydraulics are produced according to CE standards.
- Two photocells on sides for rear guard.
- Fast tool tightening.
- Optic linear scales are sensitive up to $\pm 0,01$ mm.
- Synchronized working cylinders will give you the best bending result with its perfect repeatability ratio.
- 2 axis ultra strong backgauge system (X=800 mm and R), with $\pm 0,01$ mm. repeatability, moves along rails and ball screw, bending length controlled by CNC controller, foldable back gauge fingers for reverse bending applications.
- Multifunctional and highly programmable, 2D CYBELEC DNC 600 CNC controller.
- SIEMENS electrical system.
- Automatic axis referencing when machine is turned on.
- Side guard is standard meeting CE regulations.

Hydraulic blocks.

HEIDENHEIN linear scales.

Your best bending solution

- Perfect configuration for sensitive bending and economic solutions.
- Precise results for long and deep bends.
- Continuous sensitivity with crowning system.
- Long lasting rigid body is also suitable for heavy duty applications.
- Easy maintenance.

Your best bending solution;

You can bend longer and deeper parts with maximum repeatability with standard Power-Bend Pro machines.

Foot pedal.
Double foot pedal helps you to bend your parts automatically and easily.

Impressive bending solutions;

Equipment alternatives can be upgraded on Power-Bend Pro Series upon request. Thus, increased productivity achieved while bending.

Pendant arm.

Side guards.

Rigid structure.
Dynamic and solid body machined with maximum sensitivity.

AP3 / AP4 front sheet support arms. (Optional)
CNC controlled support arms reduces your bending time significantly and is a great help for perfect bending.

Under your control

General features

Ease of use:

- High resolution 9,4" 2D graphic display.
- Easy set up and use that meets operator's needs.
- Rapid data input with the ergonomic keyboard with large keys.
- 2D graphic representation of the part.

User friendly:

- Programming of all the part in a single page.
- Easy installation and training.
- Contextual help and warning pop-ups.
- 99 repeatable bends.
- Library of 50 upper and lower tools.
- Accurate ram positioning by closed loop control of speed, pressure and parallelism.
- Back up facility of the programs, tool library and machine parameters with the standard Cybelec backup software.
- Communication with the machine by full-blown graphical programming at the office environment with the standard PC 1200 2D software (offline software).

First part, good part:

- Easy precision adjustment by simple access to the machine parameters.
- Consecutive program operating feature for high numbers of bend sequence.
- Inputting the angle and bend corrections directly on the controller.

Powerful:

- All basic functions.
- CE safety management.
- Easy communication.
- More than 20 language options.
- Robust and ergonomic design.

User - friendly

 **CYBELEC**
DNC600S

Standard Equipment

- Height adjustable and movable sliding front support arms.
- Top and bottom tools are surface hardened by special treatment.
- Promecam easy clamping system.
- CYBELEC DNC 600S controller with PC1200 2D software.
- CNC controlled strong X=800 mm back gauge.

- 410 mm throat depth.
- 2 back gauge fingers.
- Scales in metric and inches.
- Crowning system in bottom beam (3100/.../4100 - 260 - 320 manual crowning and from 400 tn and above motorized crowning is standard.
- Foot pedal is produced according to CE standards and suitable for single and multiple bends.
- 2 photocells are placed facing each other for rear guards.
- Covers for cylinders and top beam.
- Preadjusted electrical requirements based on customer's geographical area.

Optional Equipment

- Special stroke and throat depth gives extra advantages for deep bends.
- Delem ER70 controller (up to 5 axis).
- Cybelec DNC15 Touch controller (up to 7 axis).
- ER90 controller (3D touch screen).
- Special back gauge fingers can be added on optional backgauge stroke.
- Motorized crowning system.
- Hydraulic oil heating and cooling.
- Custom made table width and bottom tool V openings.
 - Optional top and bottom tools in different length.
- Special tools for box and pole bends.
- Laser front guard options.
- WILA type top and bottom tool clamping system.
- Rol1, 2, 3, 4, 5 different top and bottom quick release clamping systems.
- Tooling cabinet mounted to side of the machine to keep your tools clean and in easy reach.
- Automatic sliding system is lubricated automatically which is highly recommended to extend life.
- U type special bottom tools for bending thick materials.
- Additional front support arms to prevent waves on thin materials.
- Custom made machines upon customer special parameters.
- AP3 / AP4 front sheet support arms.
- Special parking units for front support arms.
- Electrical panel and / or controller can be mounted on right side of machine upon customer request.

OPTIONAL CONTROLLER

ER70

OPTIONAL CONTROLLER

DNC15

General features

- High performance user friendly CNC controller is offered at affordable price.
- 2D graphical bending simulation.
- 2D graphical part drawing.
- 2D graphical manual collision control.
- Automatic bend calculations for inner and outer parameters.
- Automatic X and R axis calculating for bending steps and part dimensions.
- Bend skip or bend change.
- Automatic calculations of bent parts.
- Automatic positioning for Y1 and Y2 upon sample part degree.
- Automatic stroke or inside radius calculation.
- Screen dimension: 10,4" TFT monochrome.
- OS: WINDOWS.
- Memory: 64 MB.
- Memory for end users. Min 2 GB, approximately 1000 programs.
- Programming feature for up to 99 steps.
- Maximum 99 steps for single program.
- Y1, Y2, X, R + motorized crowning (Max 5 axis).
- Tooling and V DIE memory 30/60.
- USB back up available for lost info.
- Additional 2 USB ports for your keyboard or mouse.
- Ethernet sample piece transfer. (Optional)
- Offline 2D part programming. (Optional)

General features

- 15-inch colour touch screen, 2D graphic software
 - 2D offline software
 - Available in 2 versions: 4 or 7 axes either in panel or box design
 - Simple keyboard with large keys
 - Bending solutions are displayed graphically in 2D
 - Indicates possible collisions with the tools or the machine frame.
 - Shows the position of the sheet within the tools.
 - Conversion Inch/mm, TON/TONS etc.
 - Measurement of speed, stopping time and leakage of the beam.
 - Management of CE safety cycles.
 - Interactive display of safety utilities and customized messages.
 - Windows XP Embedded
 - 256 MB ram
 - Mass memory by compact flash (1 GB)
 - 4 USB 1.1 (2x external, 2x internal), 1 parallel (printer), 1 RS232, 1 RJ45 Ethernet, 1 VGA ports
- Languages:**
 French, German, English, Italian, Spanish, Portuguese, Swedish, Danish, Finnish, Dutch, Hungarian, Polish, Czech, Slovene, Russian, Turkish, Chinese, Taiwanese.
 Other languages on request.

OPTIONAL CONTROLLER

ER90 PLUS

General features

- Windows-style operating system.
- 2D and 3D programming.
- 3-D drawing feature.
- 2D DXF and 3D DXF import feature.
- Automatic bending sequence search and collision control.
- 17" LCD touch-screen that facilitates sights of machine body, mould, back gauge, side protection guards, and components .
- Changeable color display unit (buttons, machine color, background color, color patterns, the background).
- Multi-functional alpha numeric keyboard.
- External keyboard and mouse usage possibility.
- Angle measurement and control through IMG 100 system.
- Enabling tandem type operational application.
- Help menu.
- Operator identification.
- Automatic tool selection from library for bending parts.
- Dynamic crowning.
- Remote access.
- Application of digital protractor.
- Motorized front-support system.
- Configuration that can be made up to 16 axes.
- Error message display.
- Inch / mm, t / us tons unit alterations.
- ER90 PC offline software.
- 4 usb ports.
- Language options: Turkish, Czech, Dutch, French, German, Italian, Japanese, Polish, Portuguese, Russian, Spanish, Finnish, Chinese.

ERMAK CAD/CAM Bending Simulation Software:

- 3D solid part import.
- Automatic bend sequence calculation.
- Automatic tool selection from library.

ER90 PLUS.
Professional solutions with 3D controllers.

Fiessler Akas LCIM Protection System (O)

DSP Laser Protection System (O)

Promecam Top Tool Clamping System (S)
Top tool clamping system which provides quick tool change.

Pneumatic Tool Clamping System (O)
Pneumatic tool clamping systems press and center the tools automatically with the help of the pressurized air. These are perfect solutions to shorten the setup timing and for automated press brakes.

Laser Safe (O)
Laser safe that is produced specifically for press brakes and is the leader among safety systems. Laser safe keeps the operator's safety at the top level.

SICK Light Barrier (O)

Hydraulic Tool Clamping System (O)
Hydraulic tool clamping systems clamp, correct and center the tools automatically without need for air. These are perfect solutions to shorten the setup timing and for automated press brakes.

Wila Tool Clamping System (O)

C 2000 Rear Light Guard (S)
CE standards safety protections help you work in safer conditions.

IMG 100 laser Safe and Angle Measurement System (O)
Laser Finger Protection helps you save time with easy installation.
- Laser Safe can be used with DNC 600S and ER-70.
- Angle Measurement can be used with ER-90.

Bottom Tool Clamping and Crowning Systems

Other Equipment

Multi-V Bottom Tool (O)
Multi V or U type adjustable tools.

Wila Bottom Tool Clamping System (O)

Throat (O)
Special throat depths are offered up to 1500 mm for large bends.

Sliding Front Support Arms (S)

Hydraulic Bottom Tool Clamping System (O)

Wila Hydraulic Tool Clamping Systems (O)

Backgauge Fingers (S)
Specifically designed folding backgauge fingers.

CNC Motorized Crowning System (*)
CNC crowning system that communicates with the CNC controller, performs crowning automatically and enables the part to be at even bending angle at any given point.
* Up to 400 TN optional.
From 400 TN and above standard.

Manual Crowning System (*)
Manual crowning system that enables the part to be at even bending angle at any given point.
* Up to 260 TN optional.
On 260 and 320 TN standard.

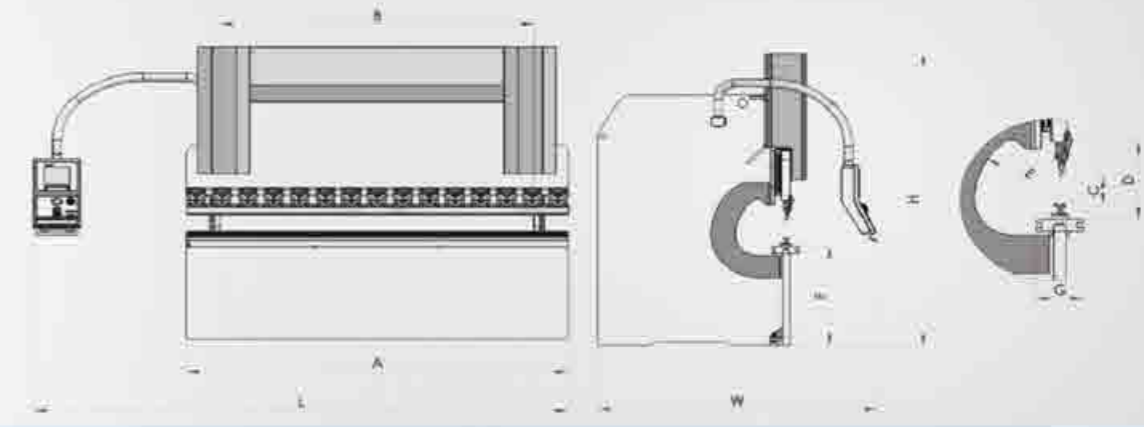

2 Axes (X,R)
4 Axes (X, R, Z1, Z2)
6 Axes (X, R, Z1, Z2, X1, X2) Rapid and Precise Back Support System with Servo Motor. (O)
They enable you to increase the production performance and quality.

Tool Storing Cabinet (O)
