BUSINESS

 **WILA**

WHAT IS WILA BENDSENSE TECHNOLOGY?

WILA BendSense Technology gives you unparalleled control and precision in the bending process. Discover how BendSense Technology increases your productivity and eliminates human mistakes during bending.

BendSense Technology is an advanced sensor system integrated into WILA Tool Holders. It provides critical information to press brake and cell control software, including tool identification to ensure the correct tool is used, tool position monitoring for precise positioning and orientation, unidentified object detection to identify any unwanted objects in the tool holder, and tool geometry data that provides detailed information on the shape and dimensions of the tool.

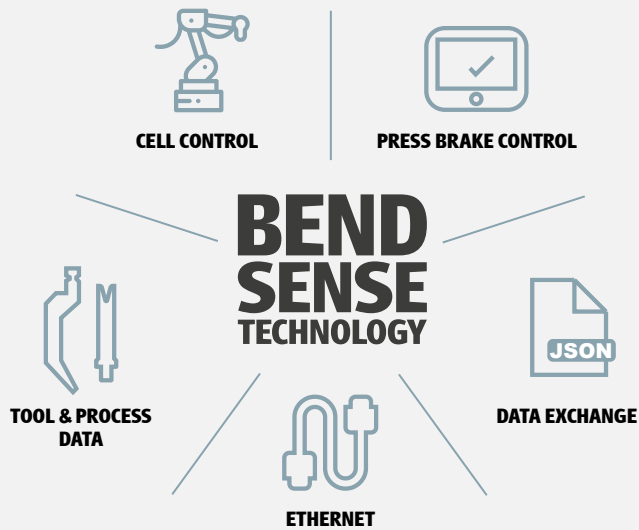

Control your bends with data-driven insights!

- Identify standard and customized tools
- Monitor tool position and orientation
- Detect unidentified objects
- Automatic Tool Change (ATC) without teaching

Future-ready and customizable

As we continue to innovate, more and more functionalities become available. Manufacturers, control software suppliers and integrators can develop their own solutions using our technology, such as tool lifecycle management, keeping WILA products at the forefront of the sheet metal industry.

Create seamless integrations with WILA Basecamp

To maximize the potential of BendSense Technology, we developed WILA Basecamp. Basecamp enables control software suppliers, press brake manufacturers and system integrators to seamlessly connect their products to WILA's innovative solutions. WILA Basecamp gives you optimum performance and precision in every bend.

Equip your press brake with WILA BendSense Technology

Press brake buyers can trust that WILA products are built to deliver exceptional performance and reliability. BendSense Technology not only improves the bending process today, it also ensures that your operations are ready for the future. With its advanced features and seamless integration capabilities, BendSense Technology is the ideal choice for those looking to optimize their bending operations and achieve the highest standards of quality and efficiency.

Both new and existing WILA tooling can be equipped with a unique scannable BendSense code.

Step into the future of bending with WILA's BendSense Technology.

WILA THE PRESS BRAKE PRODUCTIVITY PEOPLE

WILA fully concentrates on the development of products and solutions to optimize the productivity of your press brake. WILA has been producing clamping and crowning systems as well as tools and accessories to improve set-up times and increase the precision of your press brake for decades. Through close cooperation with the world's leading press brake manufacturers, an extensive and competent distribution network, in-house development, sales and production, WILA is the right partner to fulfill your needs. Let WILA help you grow your business.

Your #nextstep in press brake productivity
