

Gesswein®

The Right Tools

Since 1914

***Providing precision tools, equipment and supplies for the
Metalworking Industries – Jewelry Making, Mold & Die Polishing,
Deburring, Micro-Welding, Inspecting, Polishing, Cleaning and more.***

How we came to be here, over 100 years after incorporating, is truly an American success story. The founder of our company, Paul H. Gesswein, came to America with his parents when he was in his early teens. His arrival in this country typified the struggle that many immigrants faced in becoming self-sufficient. As a teenager, Paul took a job working in a hardware store and soon found that he had many requests from nearby craftsmen for high quality small size precision tools. Recognizing a unique opportunity, in 1914 he decided to start his own business. He began by importing European tools and initially concentrated on local customers, who visited the store to make purchases. The original focus of the business was to supply tools and equipment to the thriving jewelry and silversmith industries in New York and Boston. After more people heard about his precision tools, requests from other parts of the country came in.

That's when Paul decided to produce a book of tools and supplies that he could mail to those who couldn't visit the store—and our first catalog was born. By the 1930s, the Paul H. Gesswein Company, Inc. occupied one room in a building on Maiden Lane in lower Manhattan. Paul made the sales calls while one employee manned the phones.

Some of the larger factories had a tool room and needed many other specialized products. Our 1943 Tool and Die Makers catalog illustrated mounted stones, India stones, files, saws, burs, brushes, etc. Items sold then were predecessors to the ones we offer in this very catalog.

The Paul H. Gesswein Company, Inc. began to grow, expanding as quickly as space became available in the Maiden Lane building. By 1950, the Paul H. Gesswein Company carried over 1,000 items.

In our General Catalog of 1952 we first see our Moldmakers Finishing Stones (Silicon Carbide), which were used by the fledgling Bakelite mold-making industry. During the 1950's plastic injection molding came about and grew very quickly. It became apparent that different types of finishing stones were needed – harder, softer, Aluminum Oxide, etc. In the next decade EDM required new solutions, which we were able to provide. Today Ceramic and our traditional stones are used with mechanical and Ultrasonic finishers. These measurably increase productivity and overall mold finish quality.

Paul H. Gesswein & Company Inc., Home Office, Bridgeport, Connecticut, USA

In 1963, the company finally outgrew its available space. We moved uptown a couple of miles to lower Park Avenue, beginning with 5,000 square feet of space. As the decade progressed, so did we. Within three years, another generation of Gesswein family members had entered the business. We were still on Park Avenue, but we were renting another floor and part of a third to store equipment. Even with the extra space, we had at least two employees sharing the same desk, alternating their workdays in the office. Another move was clearly in the offing. Ultimately, we decided on Connecticut, designing and constructing our own home office here, later acquiring first one adjacent building and then another.

Until roughly 50 years ago, we focused primarily on domestic sales. Paul's son, Roger H. Gesswein then visited Europe to call on suppliers and recognized a vast untapped market. He soon established numerous relationships which continue to this day with European customers who realized, like their American counterparts, the advantages of using our unique, high-quality products beginning a new era of international sales.

The Paul H. Gesswein Company, Inc. has come a long way from that one-room walk-in store on Maiden Lane. Today, we offer over 16,000 items to a large community of jewelry manufacturers and mold and die polishers around the globe. Even with this growth, however, we are still loyal to the vision Paul had a century ago. We are constantly adding new and innovative products to help the metal (precious as well as tool steel) and wood working industries, and these can instantly be seen on our interactive website 24/7.

As simply set forth in our guiding policy: "Our customers are the most important part of our business. Without them we would not be here. We are dedicated to giving them the ultimate in service and to making them think the best thing they ever did was to buy from Gesswein. Gesswein means quality and value. Our products include those of highest quality and precision as well as those of high value at lower costs. Service means giving the customers more than they expect, responding to their needs immediately and shipping orders the same day."

In closing, it seems appropriate to us that we present this catalog with a passage from our very first: **"It is with justifiable pride that we contemplate its completion, and in presenting it to you we do so with the firm conviction that it will bring us into closer relations of mutual advantage"**.

Paul H. Gesswein & Company Inc., is a Proud Member of:

Gesswein® Finishing Stones For Mold & Die Polishing

For over 100 years, leading metalworkers have come to know and rely upon Gesswein for the best in abrasives.

We are proud Gesswein stones are the unquestionable choice of leading mold and die craftsmen worldwide. Their trust and confidence in us is due to:

- **Demanding Standards:** For each stone, careful grading eliminates oversized grains and special blending operations ensure absolute uniformity of finish, whatever your application.
- **Exceptional Quality Control:** Working closely with the best suppliers in the industry as well as making blocks and stones at our facility to ensure the highest standards are consistently met.
- **Quality Ingredients:** Our stones are composed of the purest ingredients.
 - Aluminum Oxide: An extremely tough abrasive; each grain holds its sharpness very well.
 - Levigated Alumina: A very fine form of aluminum oxide (stones made of this formulation are softer).
 - Silicon Carbide: Extremely sharp and brittle (these man-made particles are designed to shatter and expose new, sharp edges).

As an industry pioneer, we have long known an important key to continued success—provide a complete range of products that allows polishers to choose the perfect stone for each task. We continue to develop new products to meet the changing needs of our customers.

Add a STONE CHART to your order and receive it at no charge. (\$10.00 value)

Use the chart below to determine which finishing stone is right for you based upon the type of surface or call 800-544-2043 and speak with our technical staff to choose the best stone for your application.

Which Gesswein® Stone is Right for Your Job?

ABRASIVES-FINISHING STONES

The chart below contains helpful information to guide you in selecting the appropriate finishing stone based on your application. Stones are listed from hardest to softest.

Type	Abrasive Material	Characteristics & Usage	Page (s)
RA 	Aluminum oxide	Special breakdown-resistant resin bond. Can be used aggressively and be ground to a sharp edge or for use on hard-to-reach areas such as slots and ribs.	12
EDM Blue 	Premium aluminum oxide	New harder formulation of our EDM stones especially designed to handle the high-speed back-and-forth motion of a profiler or ultrasonic machine. Superior for removing the hardest EDM scale. Designed for use on hard surfaces at high speed. Holds shape very well.	8
EDM 	Premium aluminum oxide	Our best stones for fast removal of EDM scale. They have sharp points and edges to cut and dig into material to better remove it. Use EDM for more aggressive polishing.	6-7
General Purpose 	White aluminum oxide	This soft stone acts harder due to a proprietary treatment. Experienced polishers will find this formula cuts fast, wears slowly and holds its shape well.	13
Premium White 	Premium aluminum oxide	Semi-hard, good for general purpose mold polishing. Special treatment provides load resistance and a lubricating effect.	14
Oil-Treated 	White aluminum oxide	Soaked in oil solution to prevent loading. Fast-cutting with moderate breakdown. Popular general purpose stones often used for EDM scale removal. Can be used without stoning oil.	9
Diemaker 	Aluminum oxide	Extremely popular. For general purpose stoning on all types of steel. Fast-cutting, wears at an average rate and gives a good surface finish.	4-5
Moldmaker Plus 	Premium silicon carbide	Green silicon carbide. Medium stone with slower breakdown characteristics than our standard Moldmaker stones.	11
Moldmaker 	Silicon carbide	Easy to shape stone for contour polishing. Medium-soft, nonloading and fast-cutting with rapid breakdown.	10
Rough Out 	Aluminum oxide	Coarse, fast-cutting with rapid breakdown. For deep machining marks. Also good for rust removal.	15
Super Fine 	Levigated alumina	Our softest and finest stones for steel surfaces. They don't scratch and are nonloading. For final finish before using diamond compound.	16
Ultra-Soft 	White aluminum oxide	Formulated for polishing aluminum, stainless steel, beryllium, kirksite and other soft metals. Very soft, fast-cutting and nonloading with very rapid breakdown.	16

IMPORTANT: Abrasive stones break down during mold and die polishing, grinding, tool sharpening, and dressing of cutting & grinding wheels. The resulting dust is classified by OSHA as inert or nuisance dust. Please consult the Material Safety Data Sheet for each stone; data provided therein pertains primarily to the dust produced during and after use. Please note that hazards may change when abrasive stones are used in conjunction with solvents, cutting fluids or other chemicals. For more complete information, consult the Material Safety Data Sheets of chemical products used with abrasive stone products.

Gesswein® Diemaker Stones

See Our Sampler Sets on pages 19-21

- Medium-hard aluminum oxide stones combine the characteristics of fast cutting and moderate breakdown.
- Ideal for general purpose stoning on hard and soft tool steels such as H-13, P-21, SS420 and pre-finishing.
- One of our most popular finishing stones.
- **New 100 grit stones in most sizes.**
- Sold in full box quantities of 6 or 12 each as indicated.

IMPORTANT: See dust warning on page 3.

Gesswein® EDM Stones

- Remove the tough, hard scale left by the EDM process much faster than any of our other finishing stones.
- Contains extra-sharp premium-grade aluminum oxide for fast cutting action.
- Special clay bond enables the EDM stones to hold their shape well for working small details and sharp corners.
- Breaks down slowly, cuts fast and resists loading.
- Sold in full box quantities of 6 or 12 each as indicated.

See Our Sampler Sets on pages 19-21

IMPORTANT: See dust warning on page 3.

Gesswein® EDM Blue Stones

- Harder than our regular EDM Stones and designed to remove the tough, hard scale left by the EDM process.
- Breaks down slowly and cuts fast.
- Maintains shape, saving you time.
- Contains extra-sharp premium-grade aluminum oxide for fast cutting action plus a small amount of cobalt blue for added hardness.
- Resists breakage and specifically designed for use in reciprocating profilers.
- Sold in full box quantities of 6 or 12 each as indicated.

Gesswein® Oil-Treated Stones

- Excellent for machined surfaces.
- Fine cutting ability.
- Medium-hard stone with white aluminum oxide soaked with oil. Can be used without additional lubrication.
- Holds shape well for finishing mold details.
- Moderate breakdown.
- Often used for EDM removal. Special oil treatment prevents loading.
- Sold in full box quantities of 6 or 12 each as indicated.

Gesswein® Moldmaker Stones

- Medium-soft stone with silicon carbide abrasive designed to break down rapidly and expose fresh edges.
- Suitable for working on all types of steels as well as roughing out nonferrous metals.
- Ideal for blending, detailing radii and following contours.
- Resists loading.
- Sold in full box quantities of 6 or 12 each as indicated.

See Our Sampler Sets
on pages 19-21

IMPORTANT: See dust warning on page 3.

Gesswein® Moldmaker PLUS Stones

- A premium complement to the Moldmaker Series.
- Produces a silky matte finish on all prehardened tool steels, from 28Rc SAE 4130 through 60Rc A2 and M2. Can also be used to rough out aluminum, beryllium copper and kirksite.
- Medium stone with slower breakdown characteristics than our standard Moldmaker stones.
- General purpose, premium-grade green silicon carbide stones.
- A good choice for stoning contours and radii.
- Sold in full box quantities of 6 or 12 each as indicated.

IMPORTANT: See dust warning on page 3.

Gesswein® RA Stones

- Aluminum oxide abrasive bonded together with a unique organic resin bond gives these stones great resiliency.
- Retain their shape well, and are resistant to breakage even during heavy use.
- Leave a finer finish with less stock removal than other stones of the same grit.
- Can be used by hand, in a profiler or in an ultrasonic polisher on all mold and die steels.
- Ideal for finishing slots, deep ribs and other hard-to-reach mold areas and can also be used to remove EDM scale!
- Sold in full box quantities of twelve each.

Gesswein® General Purpose Stones

- Excellent for P-20 steel polishing!
- Used with stoning oil, the General Purpose stone cuts well and lasts long. Resists loading of steel particles.
- Made of extra-sharp pure white aluminum oxide grains in a specially formulated bond which provides a lubricating effect.
- Sold in full box quantities of 6 or 12 each as indicated.

Sold in full box quantities of 6 or 12 each as indicated by please order in these multiples.

Gesswein® Premium White Stones

- Pure white premium-grade aluminum oxide stones.
- Specially formulated to be load-resistant.
- Can be used on all steels, from the hard A2, D2 and M2 to the softer P20, 420SS, M13 & S7.
- Moderate breakdown, retain their shape wells.
- Can be used in a profiler or ultrasonic polisher.
- Sold in full box quantities of twelve each.

IMPORTANT: See dust warning on page 3.

Set of 3	403-0120	18.75	17.81

Sold in full box quantities 12 each as indicated by **12pc** please order in these multiples.

Gesswein® Rough Out Stones

- Large, coarse, relatively soft stones containing aluminum oxide.
- Cuts fast with rapid breakdown.
- Quickly remove rough scratches and machine tool marks.
- A good choice for roughing surfaces of larger molds and dies.
- Ideal for "hogging" out large amounts of material prior to finishing.
- Sold in full box quantities of 6 or 12 each as indicated.

IMPORTANT: See dust warning on page 3.

Gesswein® Supreme Green Stoning and Lubricating Oil

This stoning oil was developed for mold and die polishing. It is economical, practically odorless, and it's ecologically safer to use than alternative stoning oils. Use with finishing stones to prevent loading and keep the work surface clean. Lets stones cut better and more freely so they produce a bright, smooth surface. Eliminates the need for hazardous kerosene and other lubricating agents, which could be harmful to your health. Can also use with diamond tools where lubrication is suggested. Viscosity: 39.5/44.

Description	Item#	Each
A. 1 Pint (wide-mouth glass container)	800-0152	\$14.95
B. 1 Gallon	800-0151	49.95

Sold in full box quantities of 6 or 12 each as indicated by please order in these multiples.

Web Site Orders 24/7: gesswein.com

All prices subject to change without notice.

Gesswein® Ultra-Soft Stones

- Aluminum oxide abrasive with a special bonding agent designed for very rapid breakdown.
- Cuts fast without loading; easily shaped for contours.
- Formulated for soft metals, stainless steel, aluminum, brass, beryllium and kirksite.
- Sold in full box quantities of 6 or 12 each as indicated.

Gesswein® Super Fine Stones

- Contain levigated (finely powdered) alumina.
- One of our "softest" stones for finishing P20 and 420SS steel surfaces. Breaks down very rapidly and does not scratch.
- Good choice for finishing details.
- Not quite as soft as our Ultra-Soft stones.
- Sold in full box quantities of 12 each.

IMPORTANT: See dust warning on page 3.

Gesswein® Pencil Stones, 5/32" x 5/32" x 4"

A selection of our most popular finishing stones in a 4" long x 5/32" square, making them convenient for stoning small or intricate areas. Shorter length helps prevent wasteful breakage. Use with Pencil Stone Holder #403-0050, shown on page 22.

Sold in full box quantities of 12 or in a money-saving set (see below).

IMPORTANT: See dust warning on page 3.

C. Rub-and-Rinse Stone Cleaner

Gesswein Rub-and-Rinse Stone Cleaner is a semiliquid material that sheds tiny metal particles from hard stones to keep them at their peak efficiency. Recommended for use on hard stones such as our Ruby, India and Hard Arkansas Stones. Contains 1/2 fl. oz.

Description	Item#	EACH
Rub-and-Rinse Stone Cleaner	813-1700	\$9.80

Stone not included.

Gesswein® Supreme Green Stoning and Lubricating Oil

This stoning oil was developed for mold and die polishing. It is economical, practically odorless, and it's ecologically safer to use than alternative stoning oils. Use with finishing stones to prevent loading and keep the work surface clean. Lets stones cut better and more freely so they produce a bright, smooth surface. Eliminates the need for hazardous kerosene and other lubricating agents, which could be harmful to your health. Can also use with diamond tools where lubrication is suggested. Viscosity: 39.5/44.

Description	Item#	Each
D. 1 Pint (wide-mouth glass container)	800-0152	\$14.95
E. 1 Gallon	800-0151	49.95

F. Plastic Spray-Pump Bottle

Use to dispense stoning oil, cleaning solution and more. Spray gets into hard-to-reach areas. Capacity: 4 fl. oz.

Economy Adjustable Stone Holder	403-1015	\$39.95

B

C. ST-38 Stone Holder – 3mm Shank

Allows you to secure square, round, and rectangular stones in reciprocating handpieces, including our Power Hand 2X reciprocating handpieces, Di-Profilers and Super Hand Air Filers. Adjustable hinge lets you change the angle of the stone to fit your application. Made of durable plastic with serrated jaws and set screw for tightening stone into place. Accepts round stones up to 1/2" in diameter, rectangular stones up to 3/8"H x 1/2"W and square stones up to 3/8". 3mm steel shank. Complete with allen wrench. Color may vary.

Description	Item#	Each
ST-38 Stone Holder	403-1010	\$19.75

C

D. LT Recipro Stone Holder – 1/8" Shank

Economically priced holder for reciprocating handpieces. Made of durable plastic with black nonglare finish. Shank measures 1/8" dia. x 1/2"L (too short for use with FMH Di-Profiler; acceptable for use with FMC Di-Profiler).

Description	Item#	EACH Prices	
		1-2	3+
D. Small, for 1/8" x 1/4" stones	403-1025	\$6.25	\$5.63
Large, for 1/8" x 1/2" and 1/4" x 1/4" stones	403-1030	6.25	5.63

D

E. DiProfiling Stone Holder – 3mm Shank

Expands the use of your mini-filer or other profilers. Accommodates both flat and round stones or tools up to 1/4". Shank length 1 3/8", overall 2 5/8". Use for fine, more precise profiling jobs.

Description	Item#	Each
Universal Tool Holder	403-1050	\$57.50

E

F. Ceramic Stone Holder – 3mm Shank

Holds up to 1mm thick and up to 8mm wide stones. Shank length 3/4", overall length 1 1/4".

Description	Item#	Each
Ceramic Stone Holder	403-1045	\$34.95

F

Safety Recommendations – For Reciprocating Handpieces

Prolonged use of vibrating or reciprocating tools may result in vibration-induced circulation problems in the hands. Always follow safe operating procedures. Using hand protection (i.e., insulated gloves) and taking frequent breaks can help minimize but not guarantee against injury. Operating these types of tools in cold weather or with a tight grip will reduce the period of operation before risking potential injury. Individuals with a tendency to suffer from poor circulation, frequently cold fingers or itchy hands should closely monitor the condition of their hands. If symptoms appear, seek medical advice immediately.

Ceramic Stones *Strong yet incredibly flexible!*

New Super Stone (NSS) offers an improved cutting ability, increased heat resistance, and longer life. Made of long ceramic fibers that will not break even under the most strenuous conditions, the NSS can be used in ultrasonic polishers, reciprocating profilers, or by hand (see Ceramic Stone Holders on p. 26).

These strong yet flexible stones are ideal for polishing small intricate areas on all types of metals producing consistent and uniform surface finishes. NSS is non-loading and can be shaped with the Super Dresser #351-0300 (see p. 26). Available in 9 easy to identify color coded grits from 80 to 1200. Made in Japan.

IMPORTANT: See dust warning on page 3.

A-F SUPER Ceramic Diamond Stones

SUPER Ceramic Diamond (SCD) Stones combine ceramic fibers with multiple layers of evenly distributed diamond particles to ensure continuous cutting action. They're perfect for finishing hardened steel and carbide tools. SCD Stones don't load like plated diamond files, are more efficient than diamond compounds, and are easily shaped. SCD Stones will cut and polish flat to a surface, allowing fast and accurate polishing in open areas. SCD Stones are perfect for polishing ribs, hard-to-reach slots and sidewalls, and milled or EDM flat surfaces. Their strong, durable ceramic fiber construction makes them ideal for use in ultrasonic polishers and mechanical profilers or by hand. Available in flat and round shapes in four color-coded grits.

N. SUPER Dresser

Used to dress NSS and SUPER Ceramic Diamond Stones, as well as Cristone stones. Measures 1/8" x 1" x 4" (3 x 25 x 100mm).

Description	Item#	Each
SUPER Dresser	351-0300	\$17.75

CRISTONE Ceramic Stones

IMPORTANT: See dust warning on page 3.

Cristone ceramic stones are made with a unique crystal fiber and work best for fine polishing. The crystal fibers are round in shape and uniform in direction, thus allowing for an even and uniform surface finish free from deep scratches. Performs great on hardened and heat treated metals due to

its strong fiber and resin bond. Use by hand or with any Ultramax Ultrasonic Polisher for powered finishing. Has 180 Celsius heatproof temperature. Dress with Super Dresser (see p. 26).

Cristone Matrix Ceramic End Bristle Brushes

These brushes are a versatile tool for many finishing applications including: surface polishing, deburring, removing tool marks and EDM scale. The ceramic fiber bristles produce a uniform finish and are color coded for easy grit identification from 150 up to 1000 grit. Easily dress shapes and angles into the brushes by using a diamond abrasive file. For example, you can dress a 45 degree angle to match the form of your working surface. Can be used wet or dry. Use in a micromotor handpiece or in a CNC machine. 18,000 Max RPM. 3mm shank. Length: 1¹⁵/₁₆" Width: 3/₁₆" (50mm x 5mm). Made in Japan.

DEGUSSIT® Ruby® Stones & Files For Use on Hardened Steel & Carbide

Gesswein Ruby Stones and Files are made from pure, sintered crystals of synthetic ruby. No bonding material is used, so these stones and files are extremely hard and resistant to changes in shape. This is particularly important for quality precision grinding and finishing. In addition, since Gesswein Ruby Stones and Files feature outstanding resistance to wear,

they are more economical to use than other comparable tools. Use dry or with Gesswein Stoning Oil to grind, touch up or debur steel and carbide parts. Also recommended for use on materials such as glass, quartz and porcelain. Made in Germany.

IMPORTANT: See dust warning on page 3.

A-J DEGUSSIT® Ruby® Stones

For general purpose work. Available in coarse, medium and fine grits.

A-L DEGUSSIT® Ruby® Midget File Set #420

This money-saving kit contains all 11 of our Ruby Midget Files (see above) plus one double-ended holder with two collets. (Holder is available only with this kit and not separately.) Screw machine operators will find this set particularly helpful for dressing cutters without removing them from the machine. Made in Germany.

Description	Item#	Each
A-L Ruby Set #420	350-4200	\$183.75

M-P DEGUSSIT® Ruby® Bench Stones

Ideal for sharpening and for flattening steel and carbide parts as well as sharpening tools and gravers—even carbide. The pure sintered crystals of synthetic ruby have an outstanding resistance to wear, which makes them more economical than other stones. They will not groove, even after years of use. May be used dry or with Gesswein Stoning Oil (see p. 21). Two sizes of stones indicated with an asterisk are finished on both sides. The others are finished on one side only and come neatly mounted in wooden boxes.

Dimensions (inches)	Medium		Fine	
	Item#	Each	Item#	Each
M. 4 x 1 x 3/8*	350-1002	\$113.95	350-1003	\$132.30

O. 4 x 1 x 3/8**	350-1102	108.15	350-1103	130.20
P. 4 3/4 x 2 x 3/8**	350-1112	278.25	350-1113	278.25

*Finished on both sides
**Finished on one side & mounted in wooden box

Q. DEGUSSIT® Ruby® Combination Bench Stone

Finished on two sides and neatly packaged in a wooden box. One side of the stone is medium to cut fast while shaping tools and the other is fine which will impart a brilliant finish. Ideal for sharpening knives and gravers made of high speed steel or carbide. Measures 4 3/4"L x 2"W x 3/8"H. Made in Germany.

Description	Item#	Each
Ruby Combination Bench Stone	350-1114	\$357.00

NORTON Arkansas Stones

Natural Arkansas Stones have gained a reputation over the years as the finest all-purpose stones for deburring and polishing operations as well as for sharpening precision tools. Hard Arkansas Stones are dense and fine-grained for final honing where the sharpest precision edges

possible are needed. Soft Arkansas, with its less dense and more open structure, is ideal for imparting a fine, smooth surface. Arkansas Stones are not oil-filled and should be used with Gesswein Stoning Oil (see p. 21). Made in USA.

IMPORTANT: See dust warning on page 3.

A-I Norton® Hard Arkansas Files – Ultra-Fine Grit

Dense, translucent stones in various shades of gray. All have precision edges.

A. Quad-Hone Stone

Four different stones mounted on a rectangular block for a wide range of sharpening chores from rough shaping to producing a sharp final edge. Quad-Hone includes one each of coarse, medium, fine and ultra-fine Arkansas stones. Each stone measures approximately 6"L x 1"W x 1/4"H. Use with Gesswein Stoning Oil (see p. 21). Made in USA.

Description	Item#	Each
Quad-Hone Stone	380-1102	\$41.50

B-E Hard Black Arkansas Files – Fine Grit

For the machinist, woodworker or gunsmith who requires a smooth polished edge. These dense black stones are more aggressive than other Hard Arkansas Stones. The various shapes and sizes are ideal for deburring and polishing intricate tools and metal parts. All approximately 3" in length. Made in USA.

	Shape	Size	Item#	EACH Prices

E. Knife Edge	▶	3/4" x 1/8" (tapers to a knife edge)	375-8731	22.95	20.66

F. Hard Black Arkansas Bench Stone – Fine Grit

For precision sharpening or for finishing a very sharp edge. Measures 6"L x 2"W x 1/2"H. Packaged in an attractive cedar box. Made in USA.

Description	Item#	Each
Fine Grit	374-2000	\$65.00

G. Soft Arkansas Bench Stone – Medium Grit

A natural medium-grit bench stone. Recommended for relatively fast cutting. Excellent for shaping gravers, knives and precision tools prior to final finish with our Ruby or Hard Arkansas Stones. Use with Stoning Oil (see p. 21). Packaged in an attractive cedar box. Measures 6"L x 2"W x 1"H. Made in USA.

Description	Item#	Each
Medium Grit	374-1000	\$27.00

H, I Hard Arkansas Stones – Very Fine Grit

Genuine Hard Arkansas Stones, white to light gray. Each is glued into a hardwood storage box. Top surface of stone is finished and usable.

Dimensions	Item#	Each
H. 100 x 40mm (4" x 1 5/8")	374-0900	\$42.95
I. 150 x 50mm (6" x 2")	374-0910	109.00

NORTON India® Stones

These sharpening stones are made of synthetic aluminum oxide abrasive graded to a consistent particle size, blended with select bonding agents, molded to shape and finished to exacting surface configurations. Preferred for imparting durable, smooth cutting edges and finishing to close tolerances.

Orange-brown in color. Prefilled with oil to make cutting easier and more effective, retard loading

and eliminate the need for presoaking prior to first use. Note: Although prefilling minimizes the amount of oil needed, it does not eliminate the need for oil on the stone surface.

Apply Gesswein Stoning and Lubricating Oil (see p. 21) on the stone's sharpening surface prior to each use. This will prevent the pores of the stone from filling with material removed from the object being stoned.

India Stones are available in coarse, medium and fine grits. Use coarse grit for restoring badly worn cutting edges and for all sharpening not requiring a keen edge; use medium grit for producing an average edge on a broad range of tools, such as carving tools, milling cutters, lathe tools and die chasers; and use fine grit for producing sharper-than-average edges on gouges, reamers, taps and twist drills. Made in Mexico.

IMPORTANT: See dust warning on page 3.

A. India® Abrasive Files

Hold their shape while producing a fine, uniform finish. Use to debur, chamfer, radius and fit delicate parts. Choose from square, triangular, round and half-round to match different surface contours. Triangular files are excellent for reaching tight corners without disturbing other surfaces. All stones measure 4" (except style 76 which measures 6").

K. Norton® India® Bench Stones

Manufactured with the same aluminum oxide as our other India stones, Bench Stones are most popular for producing a strong, keen, long-lasting edge on high-quality tools. The frequent choice of artisans, craftsmen and mechanics. Use India Bench Stones to quickly restore the cutting edge on all straight edge tools, including chisels, plane blades, wood lathe cutters, draw knives, spoke shaves, precision tools and delicate instruments. Prefilled with oil to make cutting easier and more effective, eliminating the need to presoak prior to first use. Oil still should be supplied to the surface before each use.

A

A. Mold Repair Kit

Can be carried directly to the mold for instant repair in the press. Helps you quickly put your molds back into production. Available in a money saving set with either the Dremel #3000 (850-8027 page 454) or the Marathon PH 2X (510-2946 page 433)

Includes:

- EDM & Diemaker All Grit Stone Set
- Moldmaker, RA, EDM & Ultra Soft Stones
- Supreme Green Stoning Oil
- End Brushes
- Blue and Red Mounted Stones
- Finishing Stone Holders
- Carbide burs
- G-Flex and GMX Abrasives
- Abrasive Belt Stick
- Lapping Sticks
- Felt Bobs, Sticks and Hand Buff
- 3 grades of Diamond Compounds
- Simichrome Polish

Pocket-Size S.P.I. Mold Finish Gauge	811-0225	\$189.95

D

D. Diamond Polishing Kit – Everything you need for Diamond Polishing

Whether you carry it to the mold or have it under your workstation, our Diamond Polishing Kit has all the products you need, right at your fingertips! A convenient time saver and a money saver as well! Available alone or in a money saving kit with Marathon System (See 510-2946 on page 433).

Includes:

- Diamond Compounds
- Lube Thinner
- Felt Bobs & Felt Sticks
- Poli-Felts
- Wood Sticks
- End Brushes
- Cup Brushes
- Wheel Brushes

Description	Item#	Each
Diamond Polishing Kit	216-0001	\$249.00
Diamond Polishing Kit with Marathon	216-0002	449.00

IMPORTANT: See dust warning on page 3.

A. Rub-and-Rinse Stone Cleaner

Gesswein Rub-and-Rinse Stone Cleaner is a semiliquid material that sheds tiny metal particles from hard stones to keep them at their peak efficiency. Recommended for use on hard stones such as our Ruby, India and Hard Arkansas Stones. Contains 1/2" fl. oz.

Description	Item#	Each
Rub-and-Rinse Stone Cleaner	813-1700	\$9.80

B, C Gesswein® Supreme Green Stoning & Lubricating Oil

This stoning oil was developed for mold and die polishing. It is economical, practically odorless, and it's ecologically safer to use than alternative stoning oils. Use with finishing stones to prevent loading and keep the work surface clean. Lets stones cut better and more freely so they produce a bright, smooth surface. Eliminates the need for hazardous kerosene and other lubricating agents, which could be harmful to your health. Can also use with diamond tools where lubrication is suggested. Viscosity: 39.5/44.

Description	Item#	Each
B. 1 Pint (wide-mouth glass container)	800-0152	\$14.95
C. 1 Gallon	800-0151	49.95

D. Norton® India Stone Oil

Specifically formulated for use with sharpening stones. Will not load or gum up. Meets U.S. pharmaceutical standards for mineral oil purity and can be used around food preparation operations.

Description	Item#	Each
4.5 oz.	800-0121	\$7.15

E. Dispenser Bottle with Pump

Plastic bottle holds flux, solvents or other liquids. Special stainless steel lid allows pumping of solution into shallow well on top of bottle. One-way valve keeps solution in well, prevents contamination and eliminates odors. Ideal for dispensing solutions that would otherwise evaporate. 4 oz. capacity.

Description	Item#	Each
Dispenser Bottle with Pump	830-4525	\$26.45

F, G Syringe Dispensers

Plastic syringes with 18-gauge stainless steel needles for pinpoint delivery of stoning oil to the exact place you want. Plunger works smoothly and slides evenly to prevent accidental flooding and sputtering. Constructed of polyethylene and polypropylene. Available in two sizes: 5 and 10cc. Each includes tip sheath and cover. Sold in packages of six.

Description	Item#	PKG. of 6	
		1-3	4+
F. 5cc Syringe	811-2450	\$18.95	\$15.16
G. 10cc Syringe	811-2451	23.50	18.80

H. Pinpoint Dispenser

This handy plastic squeeze dispenser has a needle-point applicator for precise application of flux. No more mess—eliminates dried up flux brushes and dripping flux. An excellent applicator for applying flux to small areas where a flux brush will usually cause a mess; ideal for soldering earring posts, building up prongs, sizing rings and making many similar small repairs. 2 oz. capacity.

Description	Item#	Each
H. Pinpoint Dispenser	830-4520	\$4.79
Pinpoint Dispenser w/16 oz. Anti-Oxidizing Flux (see p. 501)	830-4515	20.00

I. Plastic Spray-Pump Bottle

Use to dispense stoning oil, cleaning solution and more. Spray gets into hard-to-reach areas. Capacity: 4 fl. oz.

Description	Item#	EACH Prices	
		1-2	3+
Plastic Spray-Pump Bottle	811-2460	\$2.15	\$1.94

Gesswein® Mounted Stones & Points

We have assembled an assortment of vitrified bonded mounted abrasives for most metal working applications. From general purpose grinding to specialty deburring, for fast cutting to smooth finishing—there is a stone for most every need. All are manufactured in the USA (except for the German Busch Pink Points, see p. 51) and only the finest materials and workmanship are employed. **See warnings on p. 50.**

Color	Page	Hardness	Grit	Bond	Abrasive	Recommended Metals	Benefit
Blue	44-47, 50	Hard	120	Porcelain	Semi-Friable Aluminum Oxide	Hardened Steels	Holds its shape extremely well
Purple	42-43	Hard-Sharp Cut	80/100/120	Vitrified	Sol-Gel Ceramic Grain + Pink Aluminum Oxide	High Nickel and Exotic Alloys	Fast cutting, cool running even on high nickel and other alloys
Light Blue	48	Medium-Sharp Cut	120	Vitrified	Sol-Gel Ceramic Grain + White Aluminum Oxide	High-Carbon, Stainless Steel, Non-Ferrous Alloys	Long lasting and cuts well
Red	36-39, 49	Medium	60/80/120	Clay	Friable Aluminum Oxide	Medium and Hardened Steels	Fast cutting and non-loading properties
Pink	40-41	Medium	80/100/120	Fused Vitrified	Pink Aluminum Oxide Alloyed with Chrome	Tool Steel and High Speed Steels	Sharp, cool cutting action for harder steels
White	52	Soft	400	Vitrified	Fine White Aluminum Oxide	Glass, Porcelain, Metal or Stone	Produces a fine finish

Note: Busch Pink omitted from chart as it is not a Gesswein stone (see p. 51).

A. Gesswein® Mounted Stone Sample Set – 1/8" Shank

Order our sample set of stones available on 1/8" shanks to see which type best fits your application. Set consists of B52 and W163 shapes in Red, Purple, Pink, Blue and Light Blue.

Description	Item#	Each
10-Piece Intro Mounted Stone Set	300-0010	\$20.25

Gesswein® Red Mounted Stones

Made in the USA

Superior quality stones made of aluminum oxide bonded with porcelain-type clays, which provide the greatest strength and rigidity required for fast stock removal and longer life. The ceramic bond controls the release of the aluminum oxide abrasive grains. As each particle begins to dull, the bond discharges it, allowing new abrasive grain to surface with fresh, sharp cutting edges. Stones are securely bonded to their shanks and are guaranteed to run true.

These fast-cutting, nonloading stones are easily identified by their reddish-brown color. The grit varies between 60, 80 (medium), and 120 (fine). For fast grinding of medium and hard materials. Ideal for internal grinding of tools, dies and gauges. All have 1 1/2" long plated steel shanks. Can be dressed with our Tru-Stone #380-1030 (see p. 51). For recommended speeds, consult the American National Standard Institute for full information on vitrified mounted wheels.

Available in plastic packages of 12 and boxes of 12, 36 or 72.

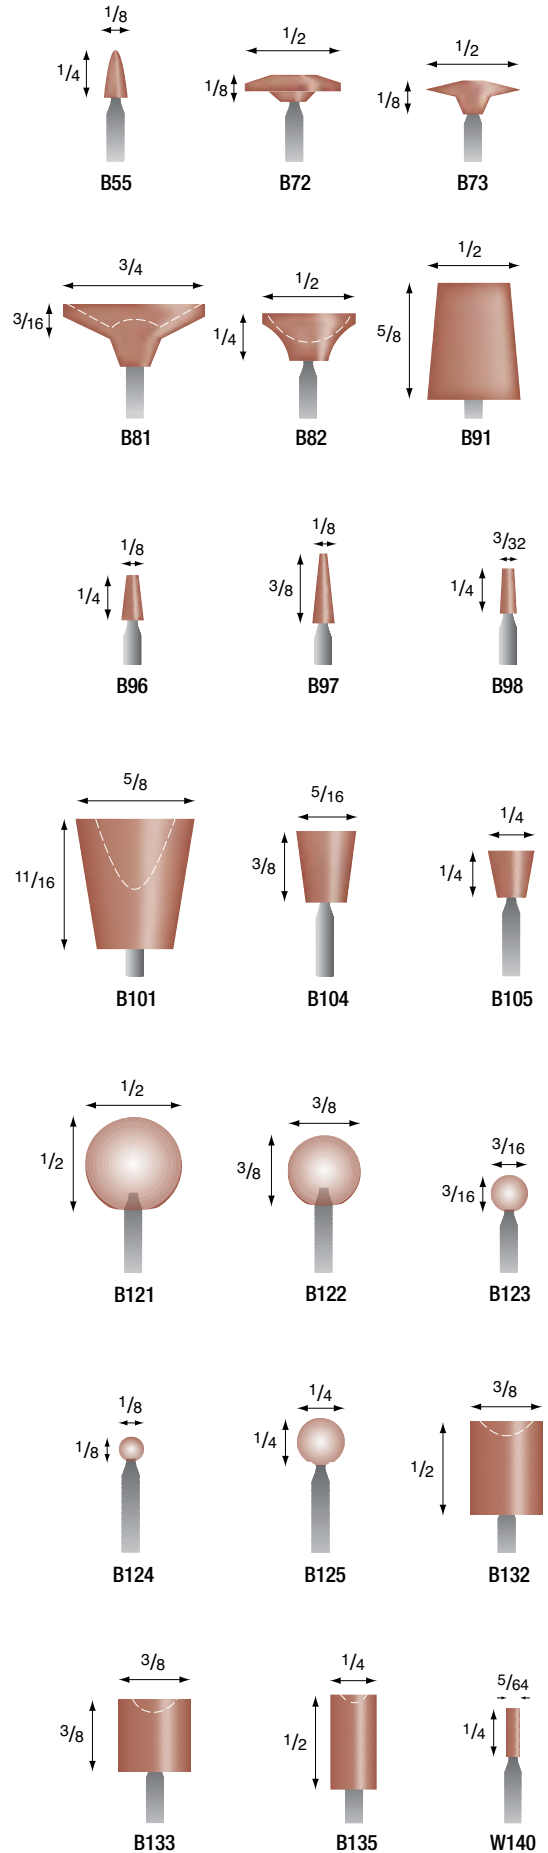

Shape dimensions shown in inches.

A, B Gesswein® Red Mounted Stone Sets – 1/8" Shank

Gesswein Red Mounted Stones are available in money-saving sets of 48 and 100 pieces. These assortments are made from our most popular shapes and offer a stone for almost every application. These sets offer big savings from the one-piece prices.

The 100-Piece Set includes ten each of our ten most popular shapes, conveniently packaged in a box to hold all 100 stones. Ten each of the following shapes: B44, B52, B96, B123, W144, W152, W162, W170, W175, W200.

The 48-Piece Set includes six each of eight popular shapes, conveniently packaged in a box to hold all 48 stones. Six each of the following shapes: B44, B52, B123, W144, W152, W162, W176, W200.

Description	Item#	Each
A. 100-Piece Red Mounted Stone Set	310-3000	\$108.50
B. 48-Piece Red Mounted Stone Set	310-3010	58.00

Gesswein[®] Pink Mounted Stones

These highly popular, high-quality mounted stones are made with a pure, fused aluminum oxide alloyed with chrome, with a medium vitrified bonding agent. This combination gives it a distinctive pink color. These stones have been popular in Europe for many years because of their versatility, on a variety of steels and alloys where a sharp cutting action is required. The attributes of using pink abrasive grain is that besides being friable and cool cutting, the stones exhibit markedly better form holding characteristics, making them exceptionally durable, while giving the sharp cut that is needed. All are mounted on 1 1/2" long plated steel shanks. Actual grit appears in the chart; varies from 80, 100 to 120.

Pink stones can be dressed with our Tru-Stone #380-1030 (see p.51). For recommended speeds, consult the American National Standards Institute for full information on vitrified mounted wheels. Other shapes also available. Please call to special order.

See warnings on p. 50.

Available in plastic packages of 12 and boxes of 12, 36 or 72.

48-Piece Pink Mounted Stone Set	331-0010	\$65.00

A

Gesswein® Purple Mounted Stones

These "top of the line" mounted stones are made with a unique combination of Sol Gel ceramic grain and our high quality Pink fused aluminum oxide to produce the sharpest cut, and most durable of the friable grain vitrified bond stones. This combination gives it a distinctive purple color. Ceramic grain is the most friable grain produced. Due to the sharp cutting action, this mixture is used on high nickel alloys for the aerospace industry, as well as many common varieties of steels and alloys. All are mounted on 1½" long plated steel shanks. Actual grit appears in the chart; varies from 80, 100 to 120.

Purple stones can be dressed with our Tru-Stone #380-1030 (see p. 51). For recommended speeds, consult the American National Standards Institute for full information on vitrified mounted wheels. Other shapes also available. Please call to special order. **See warnings on p. 50.**

Available in plastic packages of 12 and boxes of 12, 36 or 72.

A. Gesswein® Purple Mounted Stone Set – 1/8" Shank

Gesswein Purple Mounted Stones are available in a money-saving set of 48 pieces. This assortment is made from our most popular shapes and offers a stone for almost every application. Includes six each of eight popular shapes, conveniently packaged in a box to hold all 48 stones. Six each of the following shapes: B44, B52, B53, B122, B123, W145, W163, W176.

Description	Item#	Each
48-Piece Purple Mounted Stone Set	333-0010	\$69.00

Gesswein® Blue Mounted Stones

Made in the USA

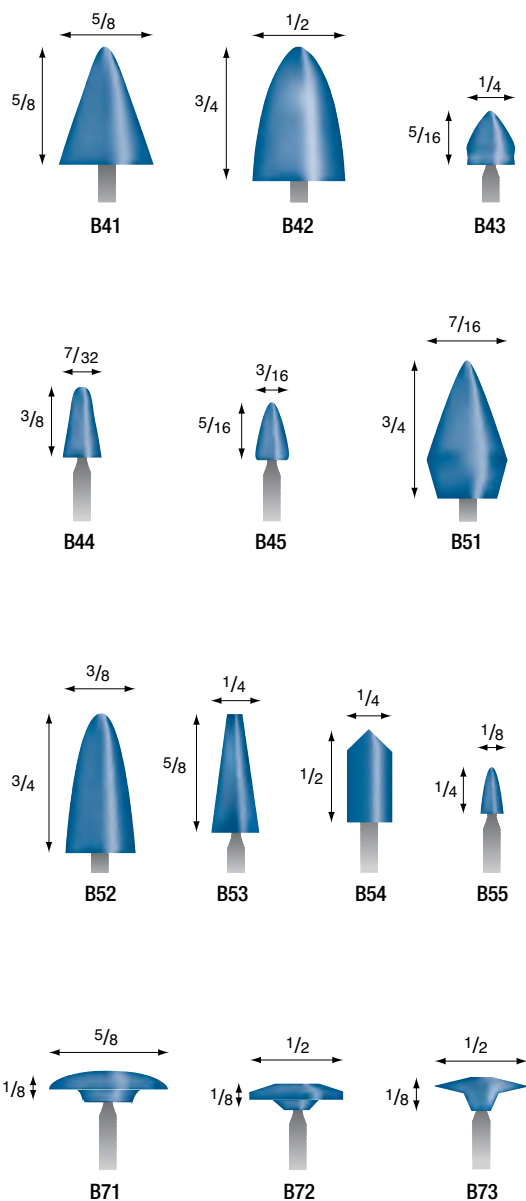

These superior quality stones are made of aluminum oxide bonded with porcelain-type bonds, which provide the greatest strength and rigidity required for fast stock removal and longer life. The ceramic bond controls the release of the aluminum oxide abrasive grains. As each particle begins to dull, the bond discharges it, allowing new abrasive grain to surface with fresh, sharp cutting edges. Stones are securely bonded to their shanks and are guaranteed to run true.

These hard stones hold their shapes exceptionally well. Recommended for use on hardened steel. All are 120 (fine) grit aluminum oxide. They cut well and leave a smooth surface. All have 1½" long plated steel shanks. Blue mounted stones can be dressed with our Tru-Stone #380-1030 (see p. 51). For recommended speeds, consult the American National Standard Institute for full information on vitrified mounted wheels.

See warnings on p. 50.

Available in plastic packages of 12 and boxes of 12, 36 or 72.

A, B Gesswein® Blue Mounted Stone Sets – 1/8" Shank

Gesswein Blue Mounted Stones are available in money-saving sets of 48 and 100 pieces. These assortments are made from our most popular shapes and offer a stone for almost every application. These sets offer big savings from the one-piece prices.

The 100-Piece Set includes ten each of our ten most popular shapes, conveniently packaged in a box to hold all 100 stones. Ten each of the following shapes: B44, B52, B96, B123, W144, W152, W162, W170, W175, W200.

The 48-Piece Set includes six each of eight popular shapes, conveniently packaged in a box to hold all 48 stones. Six each of the following shapes: B44, B52, B123, W144, W152, W162, W176, W200.

Description	Item#	Each
A. 100-Piece Blue Mounted Stone Set	305-3000	\$108.50
B. 48-Piece Blue Mounted Stone Set	305-3010	58.00

Sold individually

Light Blue Mounted Stones

These ceramic mix mounted stones incorporate a unique Sol Gel ceramic abrasive. The Sol Gel abrasive, produced by Sol Gel processing, is both hard and tough. It provides exceptional durability and cut rates in grinding mild, high-carbon and stainless steel as well as many nonferrous alloys. Under normal use, cut rate and wheel life are two to three times that of Red and Blue Mounted Stones. Particularly suited for precision grinding. Form and radius holding are greatly increased due to Sol Gel's durability. Light Blue Mounted Stones are extremely tough in all grades, chemically pure and of uniform quality. All are 120 grit. Can be dressed with our Tru-Stone #380-1030 (see p. 51). All have 1 1/2" long plated steel shanks. For recommended speeds, consult the American National Standard Institute for full information.

See warnings on p. 50.

Light Blue Mounted Stone Set, 1/8"	312-3000	\$26.75
Light Blue Mounted Stone Set, 3mm	312-3031	26.75

B. Handy Block - For 1/8" or 3/32" Shanks

An 88-hole block of cured hardwood for organizing burs, needle files, brushes and more. All holes are 1/8" in diameter to accommodate either 1/8" or 3/32" shanks. Block is slanted so user can see all tools at a glance. Stay-put rubber pads keep block from sliding. Weighs 1 lb., 2 oz. Measures 4 1/2" x 6".

Description	Item#	Each
Handy Block	814-1215	\$15.25

A

B

Red Mounted Points $\frac{3}{32}$ " Shank

Very fast-cutting, nonloading aluminum oxide stones, easily identified by their reddish-brown color. For fast grinding of medium and hard materials. Ideal for internal grinding of tools, dies and gauges. For recommended speeds, consult the American National Standard Institute for full information on vitrified mounted wheels. Mounted on $\frac{3}{32}$ " dia. x $1\frac{1}{2}$ " long plated steel shanks. All are 120 grit with the exception of shape #1 which is 80 Grit. Can be dressed with our Tru-Stone #380-1030 (see p. 51).

See warnings on p. 50.

A, B Rotating Bur Holders – Choose between two styles

Rotating Bur and Tool Holder accepts up to 112 burs or tools. Features ball bearings for smooth action. Includes 92 holes for tools with $\frac{3}{32}$ " or $\frac{1}{8}$ " shanks, 13 holes for tools with $\frac{1}{4}$ " shanks, 7 holes for $\frac{1}{16}$ " to $\frac{5}{32}$ " drill bits and $2\frac{3}{4}$ " dia. x 3"H center cup for hand tools such as files, screwdrivers and more. Measures 7" dia. x 4"H.

Rotating Bur Holder Universal has 45 holes for tools with $\frac{1}{16}$ " shanks, 69 two-step holes for tools with $\frac{3}{32}$ " or $\frac{1}{8}$ " shanks and 12 holes for tools with $\frac{1}{4}$ " shanks. Measure 7" dia. x 4"H.

Description	Item#	Each
A. Rotating Bur and Tool Holder	850-0006	\$16.55
B. Rotating Bur Holder, Universal	850-0004	16.55

Gesswein® Blue Mounted Points $\frac{3}{32}$ " Shank

Made in the USA

Hard blue aluminum oxide stones which hold their shapes, cut well and leave a smooth surface. Recommended for use on hardened steel. For recommended speeds, consult the American National Standard Institute for full information on vitrified mounted wheels. Mounted on $\frac{3}{32}$ " dia. x $1\frac{1}{2}$ " long plated steel shanks. All are 120 grit. Can be dressed with our Tru-Stone #380-1030 (see p. 51).

See warnings below.

Available in plastic packages of 12 and boxes of 72.

Warning: For recommended speeds, consult the American National Standards Institute for full information on vitrified mounted wheels. Before using any abrasive product, follow all safe operating guidelines with respect to eye protection, hand protection, hearing protection and respiratory protection. Also read the Material Safety Data Sheet to be aware of any inherent hazards or cautions.

Important: Abrasive stones break down during mold and die polishing, grinding, tool sharpening, and dressing of cutting & grinding wheels. The resulting dust is classified by OSHA as inert or nuisance dust. Please consult the Material Safety Data Sheet for each stone; data provided therein pertains primarily to the dust produced during and after use. Please note that hazards may change when abrasive stones are used in conjunction with solvents, cutting fluids or other chemicals. For more complete information, consult the Material Safety Data Sheets of chemical products used with abrasive stone products.

Busch® Pink Polishing Points $\frac{3}{32}$ " Shank

Made of genuine corundum, these points are recommended for use on harder metals. For recommended speeds, consult the American National Standard Institute for full information on vitrified mounted wheels. Mounted on $\frac{3}{32}$ " dia. x $1\frac{1}{2}$ "L plated steel shanks. All are medium grit. Can be dressed with our Tru-Stone #380-1030 (see below). Made in Germany.

See warnings on p. 50.

Shape dimensions shown in inches.

A. Rotating Bur Holder – $\frac{3}{32}$ " Shank

Handy tiered holder rotates to keep tools within easy reach. Holds 150 burs or tools. All holes are $\frac{3}{32}$ " in diameter to accommodate $\frac{3}{32}$ " shanks. Weighs 12 oz. Measures 4"H x 6" dia. at base.

Description	Item#	Each
Rotating Bur Holder	124-4720	\$12.75

A

B. Tru-Stone

For dressing and shaping mounted stones and abrasive wheels

A very hard and coarse grit silicon carbide stone with four different sized half-round grooves measuring $\frac{1}{16}$ ", $\frac{1}{8}$ ", $\frac{3}{16}$ " and $\frac{1}{4}$ " on one side. Quickly reshapes and resurfaces abrasive stones to like-new condition. Measures $3\frac{1}{2}$ "L x $1\frac{3}{8}$ "W x $\frac{9}{16}$ "H.

		1-9	10+
Tru-Stone	380-1030	\$5.95	\$4.76

B

Gesswein® White Polishing Points $\frac{3}{32}$ " Shank

Formulated from 400 grit (extremely fine) white aluminum oxide in a soft vitrified bond, these points can be used on glass, porcelain, metal or stone. Produce a high finish. For recommended speeds, consult the American National Standard Institute for full information on vitrified mounted wheels. Mounted on $\frac{3}{32}$ " dia. x $1\frac{1}{2}$ "L plated steel shanks. Can be dressed with our Tru-Stone #380-1030 (see p. 51).

Before using any abrasive product, follow all safe operating guidelines with respect to eye protection, hand protection, hearing protection and respiratory protection. Also read the Material Safety Data Sheet (SDS) to be aware of any inherent hazards or cautions.

Available in plastic packages of 12 and boxes of 72.

Made in the USA

C. Dressing Stone – Coarse grit

A very hard, 20 grit stone that will quickly smooth out and take off irregular edges from almost any grinding wheel or MX Lap. Also excellent for shaping Bear-Tex Wheels. Measures 6" x 1" square.

Description	Grit	Item#	Each
Coarse Dressing Stone	20	380-1010	\$15.50

D. Dressing Stone – Medium grit

A very hard, 150 grit stone in a convenient shape for dressing grinding wheels, G-Flex and GMX wheels (see pp. 96-99). Measures 2 1/2"L x 1 1/2"W x 1/2"H.

Description	Grit	Item#	Each
Medium Dressing Stone	150	380-1020	\$4.05

E. Norton® Norbide® Dressing Stick

The Norbide Dressing Stick is used to economically dress, shape and true vitrified grinding wheels. It's also the choice for "roughing in" a shape prior to diamond truing precision grinding wheels. Measures 3"L x 1/2"W x 1/4"H.

Description	Item#	Each
Norbide Dressing Stick	380-1035	\$77.65

F. Wet Stick Diamond Dresser

Use this dressing stone with water for cleaning diamond points. Measures 2"L x 3/4"W x 1/2" thick.

Description	Item#	Each
Wet Stick	380-1022	\$2.30

G. Diamond Impregnated Dressing Stone

Has a concave center hole for forming a point on polishing rods. Measures 3/4" dia. x 1/8" thick.

Description	Item#	Each
Dressing Stone	145-1240	\$5.40

NORTON

A

A. Norton® 32A Aluminum Oxide Grinding Wheels

For medium to heavy stock removal

Sharp monocrystalline aluminum oxide grain. Outstanding form holding. For moderate to heavy grinding of tool steels, including tough alloys. Allow exceptionally fast, cool cutting. Requires minimum dressing. Cannot be used on a tapered spindle, must use on arbor (see p. 401).

Dia. x Thick x AH	Grit Hardness	Item#	EACH Prices	
			1-9	10-29
7" x 1/4" x 1 1/4"	80/I	245-3195	\$35.75	\$28.60
7" x 1/2" x 1 1/4"	46/K	245-3200	54.85	43.88

B

B. Norton® White Aluminum Oxide Grinding Wheels

For light grinding

For light grinding of all kinds. Particularly good on hard, heat-sensitive materials such as high-speed steel and cast-alloy tools. Available in two hardnesses, J (Softest) and K (Hardest). Cannot be used on a tapered spindle, must use on arbor (see p. 401).

Dia. x Thick x AH	Grit Hardness	Item#	EACH Prices

C

D

C, D Norton® Bear-Tex® Wheels

For quick removal of marks, scratches and surface imperfections. Also great for producing a consistent satin finish. Made of a cushion-type nylon web impregnated with silicon carbide abrasive. Bear-Tex does not load or heat up. The 220 grit fine wheel is our most popular; the other grits are for faster finishing.

D. GP Plus™ and LDW Convolute Wheels

Ideal for a variety of deburring, blending, finishing and polishing applications. Consist of fine silicon carbide embedded in nonwoven material wound around a core producing a cushion effect for controlled, fast cutting and consistent, uniform finishing. Easy to shape and dress. Can be used with water or water-soluble oil if desired. Choose GP Plus (high-density wheels, aggressive) for the toughest jobs and LDW (low-density wheels) for finer, more delicate work. Combine with flanges (see below) and appropriate arbor (see p. 401) to mount on your polishing motor.

E. Rub-Out Stick and Holder

For touch-ups and removal of light scratches on polished surfaces. Made of flexible rubber with silicon carbide abrasive. Holder gives support and gripping power. Stick can be exposed or withdrawn as desired and is easily dressed to the best shape for the job. Also removes rust, heat marks and stains while leaving a polished surface. Measures 6" L x 3/8" dia.

*Quantity discount for orders of one item number only; not assorted.

3M™ Roloc™ Discs

3M Roloc discs allow fast and efficient deburring, blending, polishing and finishing on all types of metal surfaces. They resist loading even under severe operating conditions. The Roloc design makes changing discs easy: the threaded male button on the back of each disc allows firm mounting to Roloc Disc Holder. Lock securely in place with a half-twist, or remove with half-twist in opposite direction. Discs are color-coded or have color-coded button for easy grit identification. Use with right-angle grinders.

Before using any abrasive product, follow all safe operating guidelines with respect to eye protection, hand protection, hearing protection and respiratory protection. Also read the Material Safety Data Sheet (MSDS) to be aware of any inherent hazards or cautions.

A. 3M™ Roloc™ Regalite™ Discs

Made of 3M Cubitron and premium aluminum oxide grains resin-bonded onto heavy cloth backing. Mount on Roloc Disc Holders (see below).

A-O 3M™ Scotch-Brite™ Small EXL Unitized Wheels

For deburring, blending parting lines, removing flash, cleaning and finishing on all metal alloys, as well as many plastics and composites. Great for cleanup prior to and after soldering and welding. Produce fine finishes on tooled pieces, aerospace, automotive and electronic components as well as medical instruments. Long-lasting to help reduce finishing operation costs. Synthetic fiber and resin construction makes a semi-resilient wheel that follows contours well and eliminates undercutting and gouging. All wheels are cool-running and resist heat buildup. Available in three color-coded grits: coarse (orange), medium (red) and fine (purple). See pp. 584- for mandrels.

B. Mounted Hard FR Fiber Wheel – 3/32" Shank

Ideal for stock removal, this wheel has only slight resilience and cuts fast. Made of silicon carbide. Measures 1" dia. x 1/4" thick. 3/32" stainless steel shank. Imported.

Description	Dia. x Thickness	Item#	EACH Prices	
			1-11	12+
FR Fiber Wheel	1" x 1/4"	288-2272	\$3.65	\$3.29

C. Mounted Flexible SLP Fiber Wheel – 3/32" Shank

A flexible yet firm unitized abrasive mounted wheel made of 180 grit pure alumina. Produces a fine, smooth finish. Measures 7/8" dia. x 1/8" thick. 3/32" stainless steel shank. Imported.

Description	Dia. x Thickness	Item#	EACH Prices	
			1-11	12+
SLP Fiber Wheel	7/8" x 1/8"	288-2276	\$1.70	\$1.53

D-F 3M™ Scotch-Brite™ Wheels – 2 Ply, 3/32" Shank

Soft double ply Scotch-Brite easily conforms to surface contours. Removes a small amount of metal while producing a satin finish. Measure approximately 7/8" dia. on 3/32" stainless steel shank. Maximum speed: 10,000rpm. Made in Germany.

Description	Abrasive	Color	Item#	EACH Prices

G-J Mounted Satin Finish Wheels – 3 Ply, 3/32" Shank

Use these extra-thick wheels to create the exact degree of satin finish you want, from the soft and subtle texture of Extra Cut to the lustrous glow of Ultra-Fine. Made of dense-weave fiber for a uniform, nondirectional finish. Last much longer than conventional satin finish buffs. Measure approx. 7/8" dia. x 3/8" thick with 3/32" shank. To try all four grits, purchase our money-saving eight-piece intro pack. Imported.

K Compressed Fiber Wheel – 3/32" Shank

Fibers are compressed and bonded with aluminum oxide to make a firm, dense long lasting wheel with some flexibility. Creates a beautiful distinct scratch finish that contrasts well with highly polished areas. Recommended working speed: 5,000rpm. Made in Germany.

Description	Dia. x Thickness	Item#	EACH Prices	
			1-11	12+
K. Coarse	7/8" x 3/8"	288-2250	\$4.95	\$4.46

A, B Norton® Bear-Tex® Hand Pads

Made of loose nonwoven fiber with abrasive grain mixed throughout. Can be easily cut to desired size. For cleaning, scuffing, deburring or finishing surfaces by hand. Available in two grades. Measure approximately 6" L x 9" W x 3/8" H. Sold individually or in boxes of 20. Cut to fit pad holder 108-7462 below.

Color	Grit	Abrasive	Application	Item#	BOX of 20	
					1-2	3+
A. Maroon	Very Fine	AIO	General-purpose, deburring	108-7447	\$30.80	\$27.72
B. Gray	Ultra-Fine	SiC	Light cleaning and finishing	108-7448	36.90	33.21
Color	Grit	Abrasive	Application	Item#	Each	
A. Maroon	Very Fine	AIO	General-purpose, deburring	108-7445	\$1.70	
B. Gray	Ultra-Fine	SiC	Light cleaning and finishing	108-7446	1.70	

C-E 3M™ Scotch-Brite™ Hand Pads

On surfaces that require cleaning, scuffing, deburring or finishing by hand, Scotch-Brite hand pads outperform steel wool, wire brushes and other nonwoven hand pads. They cut faster and leave a more consistent finish. And Scotch-Brite pads will never rust, so they can be used with water or solvents. Available in three color-coded grades for a variety of cleaning and finishing jobs. Measure 6" x 9". Can be cut to fit Pad Holder or Mini Mandrel (see below).

Color	Grit	Abrasive	Application	Item#	BOX of 10	
					1-2	4+
C. Tan	Coarse	AIO	Heavy-duty cleaning	108-7461	\$40.25	\$36.23
Color	Grit	Abrasive	Application	Item#	BOX of 20	
D. Maroon	Fine	AIO	Cleaning and finishing	108-7457	\$32.40	\$29.16
E. Light Gray	Extra-Fine	SiC	Fine cleaning and finishing	108-7453	32.40	29.16

F. 3M™ Scotch-Brite™ Pad Holder

For use with Scotch-Brite hand pads (see above) cut to 4" x 6" size.

Description	Item#	Each
Pad Holder, 4" x 6"	108-7462	\$28.60

G. 3M™ Scotch-Brite™ Mini Mandrel – 1/4" Shank

For use with 1" x 1 1/2" pieces of Scotch-Brite hand pads (see above). Use on contours or to reach tight areas. Acts like a flap wheel. Measures 2 7/8" long. Has 1/4" shank.

Description	Max. RPM	Item#	Each
Mini Mandrel	14,000	108-7463	\$10.25

See our 3" Scotch-Brush on page 131

H. Satin Finish Buffs

Made of a stiff, nonwoven material, Satin Finish Buffs have abrasive embedded in a red synthetic fiber. They produce a beautiful satin finish and conform to a wide variety of surface contours. Available in either 2-ply or 3-ply with leather center. All measure 4" dia. x 3/16" AH. Made in USA.

Grit	2-PLY		EACH Prices		3-PLY		EACH Prices	
	Item#	1-11	12+	Item#	1-11	12+

I, J Satin Flap Wheels

Densest satin flap wheels on the market. Made of aluminum oxide. As each is used, fiber on the surface softens to create a beautiful finish with no cross-hatching or overlap marks. Medium produces a subtle line effect similar to a brush finish. Very Fine produces a glowing, bright satin finish. Measures 4" dia. x 1" thick x 3/8" AH. Imported.

Dia. x Thickness x AH	Grit	Item#	Each
I. 4" x 1" x 3/8"	Medium	142-3075	\$15.50
J. 4" x 1" x 3/8"	Very Fine	142-3070	12.85

A-F Resin Bond Cut-Off Discs

Both sides and edges of these thin discs can be used for slitting and finishing gold, silver, brass, steel, porcelain and acrylics. Available in either silicon carbide (SiC) or aluminum oxide (AlO). Maximum operating speed: 25,000rpm for discs up to 1"; 21,000rpm for discs over 1". See pp. 584-585 for mandrel selection.

K. VT Discs, box of 50	7/8" x .015"	1/16"	845-1032	15.95	15.15

Before using any abrasive product, follow all safe operating guidelines with respect to eye protection, hand protection, hearing protection and respiratory protection. Also read the Material Safety Data Sheet (MSDS) to be aware of any inherent hazards or cautions.

A. Nylon Cut-Off Discs

These resin-bonded discs are reinforced with interwoven nylon fibers to provide extra strength and durability for cut off operations. Two types are offered: One with durable Semi-Friable Aluminum Oxide (AIO), and the other with a combination of Aluminum Oxide and Premium Ceramic Abrasive (Cera) which produces the sharpest cut. See pp. 584-585 for mandrel selection. All 80 grit. Made in USA.

B. Fast Cut Discs

Truly unique and versatile discs made from cotton fiber, aluminum oxide grain and resin bonded. They are long lasting and very durable and produce a relatively smooth surface finish. The 1 1/2" disc is reinforced with Fiberglass for extra strength. Thickness dimension will vary due to nature of materials. Both have 1/8" arbor holes and cut on the edge. Made in the USA. See pp. 584-585 for mandrels.

D. Cone-Loc Drum – 1½" Wide

Used with Lightning Metalite cloth ½" rolls (above), this is an excellent tool for deburring and sprue removal. By sanding or grinding with this wheel, hand filing can be practically eliminated. Made of heavy-gauge aluminum casting. Drum is covered by ½" thick rubber covering. Rubber covering allows surface to conform to work. Measures 6" dia. x 1½"W x ½"AH. Weighs 2 lbs. Maximum operating speed: 4,000rpm. Refer to p. 400 for arbors.

Description	Item#	Each
Cone-Loc Drum	840-1256	\$209.00

E. Freedom® Foam Wheel and Sanding Belts – 4" diameter, 1" width

Use Foam Wheel and sanding belts to quickly shape and smooth all metals, composites, and wood. Ideal for jewelers, knife makers, gunsmiths and woodworkers. Foam rubber wheel is 4" and has a ¼" continuous rubber rim over a foam core, so sanding belts fit snugly. Made in USA.

B-F PSA Discs

These flexible discs are made of aluminum oxide resin-bonded on a cloth backing for greater durability. Pressure-sensitive adhesive backing withstands the high frictional heat generated when a disc is in use. PSA Discs will stay on until removed from the holder by hand. Each disc has a peel-off backing to ensure adhesive freshness.

G-K PSA Disc Holders - 1/8" and 1/4" Shanks

Flexible rubber pads mounted on shanks to hold any PSA (Pressure Sensitive Adhesive) Discs. Rubber pads also provide cushioning for uniform finish. Actual pad diameters are slightly smaller than specified to ensure easy removal of discs and to prevent material from marring the work surface. Max. Operating speed: 22,000 rpm.

D-F Abrasive Band Drum Arbors

Made of steel with a solid rubber drum which expands when screw or nut is tightened to hold Abrasive Bands snugly. The rubber drum provides a cushioned backing so that Abrasive Bands cut smoothly and leave a uniform finish. Balanced for maximum performance at high speeds.

G. 3M™ Flex Diamond Bands

Incredibly durable, nonloading bands for cleaning, shaping and precision prefinishing. Ideal for dead end hole, tube and inside ring finishing. Coated with 220 grit micron-graded diamond abrasive in a honeycomb pattern for fast cutting. Can be used wet or dry on both soft and hard metals, including platinum, palladium and white gold, as well as soft stones. Produce optimal finishes with minimal metal removal. Won't gouge or catch. Use with drum arbor (see above). Max. operating speed: 20,000rpm.

Straight Abrasive Cartridge Rolls Aluminum Oxide Cloth

Resin-bonded aluminum oxide cloth rolls for both lapping surfaces and finishing inside diameters of dead end holes, tubes and rings. Self-renewing: wearing through one layer uncovers fresh layer of abrasive cloth making them an excellent tool for blending where uniform finishes required. Balanced to eliminate wobble. Use with cartridge roll mandrels (see pp. 584-585). Max. operating speed: 16,000–22,000rpm.

A, B Abrasive Tapered Cartridge Rolls – Aluminum Oxide Cloth

Made of resin-bonded aluminum oxide cloth. Particularly useful on jobs with channels, fillets and irregular concave contours. Hold at a 45° angle to workpiece for reaching into angles and corners, or hold at a lower angle to apply greater abrasive surface for faster cutting action. Self-renewing: wearing through one layer uncovers fresh layer. Balanced to eliminate wobble. Use with cartridge roll mandrels (see below). Max. operating speed: 16,000–22,000rpm.

C. Cartridge Roll Mandrels – 1/8" and 1/4" Shanks

Hardened steel mandrels firmly secure straight or tapered abrasive cartridge rolls. Match pilot size of mandrel to arbor hole on cartridge roll. More flexibility may be obtained if pilot length is slightly shorter than the cartridge rolls. If necessary, mandrels may be ground down to needed length. Available on 1/4" or 1/8" shanks.

D. Premounted Abrasive Rolls – 3/32" Shank

Each roll consists of aluminum oxide abrasive paper wrapped around a 3/32" shank mandrel, creating many layers. Since paper is secured only at the bottom, user can easily tear off worn portion to expose fresh cutting surface. Unlike regular unmounted rolls, these long-lasting rolls require no truing. Recommended operating speed 16,000-22,000rpm.

G-I Paper Bullets and Cones

Economical paper bullets and cones for sanding, blending and fine finishing in hard-to-reach areas. Cones expose new grit as they wear. Recommended for use at low speeds for better control and longer life. Designed for fast, easy changing. Use bullets and small cones with threaded mandrel (see below), large cones with split mandrel (see below).

Shape	Dia. x L	Color	Grit	Item#	PKG of 10

		Red	Medium	107-1051	5.70
		Green	Fine	107-1050	5.70

J. Paper Cone Set

Perfect for fine finishing in tight areas. Includes 10 yellow (coarse), 10 red (medium) and 10 green (fine) large cones; 10 yellow, 10 red and 10 green small cones; split mandrel for large cones, 3/32" shank; and threaded mandrel for small cones, 3/32" shank. Cones expose new grit as they wear. Recommended for use at low speeds for better control and longer life. Designed for fast, easy changing.

Flap Wheels 1/8" and 1/4" Shank

Flap Wheels are made of aluminum oxide resin-bonded to cloth and permanently attached to the hub. They are resilient and can be used on flat or contoured surfaces. Particularly useful in flexible shaft handpieces and other rotary tools. Excellent for blending on metal surfaces, deburring

and removing flash from machined parts and edge blending dies, molds and channels. Cutting action is slightly finer than normally expected from identical grit. Flap Wheels perform best when only slight pressure is applied.

J. Cloth 4" Flap Wheels

Abrasive wheels with closely spaced cloth flaps for fast cutting action with a smooth uniform finish. The 80 grit is used for quick and aggressive metal removal. The 120 and 240 grits are ideal for quick metal removal such as sprue and gate removal. The 320 and 400 grits remove scratches and leave a much finer finish than expected. The 400 grit can also be used for blending after the previous grits are used. For use on tapered spindles. Made in Thailand.

D. Seamless Abrasive Cap Set

This money-saving set includes 270 caps (six of each item# listed in chart above) and 15 corresponding holders (1/8" and 1/4" shanks). Supplied in a convenient 16-compartment plastic storage tray with lid.

Description	Item#	Each
Seamless Abrasive Cap Set	104-1245	\$355.35

A. Micro-Mesh® Abrasives - Silicon Carbide

Micro-Mesh features a unique cushion design that allows its abrasive crystals to recede into its resilient backing and “float” to an even cutting plane. Follows the contours of your work evenly—Perfect for refinishing steel tools and removing light scratches. Restores rolling mill rollers to brand-new condition.

Effective on gold, silver, platinum, even steel! Leaves a smoother, finer finish than expected: 400 grit Micro-Mesh cuts like a 400 grit but leaves an 800–1000 grit finish. Can be used dry or wet. Used dry, it lasts 5–7 times longer than common abrasives. Used with oil or water, it lasts 7–15 times longer.

Description	Grit	Item#	EACH Prices	
			1-11	12+
File (1/2" x 5 3/4", two-sided)	100/150	107-3114	\$2.20	\$1.98

	400/600	107-3116	2.10	1.89

A

B. Micro-Mesh® Ultra-Flex Pad Set

Micro-Mesh Soft Touch pads are handy for doing small jobs and for spot repair projects. The 2" x 2" foam core provides additional flexibility and conformity, while being easy to hold and operate.

Each pad has the same Micro-Mesh grade on both sides. This material is made to be used wet or dry and is made with a flexible cotton backing with polymer emulsion cushioning layer and large micron graded silicon carbide or aluminum oxide crystals suspended in a flexible resin bond. The MX bond is less flexible than other Micro-Mesh products so you can achieve a higher finish on metals. Stated grit size, due to this unique material, produces a finer than expected finish, i.e., 60MX = 240 grit. Each pad is printed with its corresponding grade. The complete set includes the following 13 grades:

SiC Abrasive: 60MX, 80MX, 100MX, 120MX, 150MX, 180MX, 240MX, 320MX, 360MX, 400MX, 600MX

AlO Abrasive: 800MX, 1200MX

Ultra-Flex Pad Set	107-3120	\$16.30

B

C. G-Tac 3-in-1 Hand Finisher

The handy shape and flexibility of the G-Tac also makes it ideal for polishing flat and curved surfaces. Each G-Tac Finisher keeps three grits, (800 = Blue, 1500 = White and 4000 = Gray) at your fingertips making it ideal for final touch-ups when polishing jewelry. Switching between grits takes mere seconds because it is a simple as turning or flipping the tool. Sold in packages of 5. Measure 7" long x 1 1/4" wide x 1/2" thick.

Description	Item#	PKG of 5
3-in-1 Hand Finisher	107-3125	\$9.95

C

Before using any abrasive product, follow all safe operating guidelines with respect to eye protection, hand protection, hearing protection and respiratory protection. Also read the Safety Data Sheet (SDS) to be aware of any inherent hazards or cautions.

A-E Mitchell's Abrasive Cords and Tapes – USA

Flexible cords and tapes fully covered in abrasives for grinding, polishing and finishing small holes, narrow slots, curved surfaces and other areas standard tools can't reach. Used by jewelers for polishing wire settings and small heads, inaccessible to points and wheels. Aluminum oxide and silicon carbide are for cutting, and crocus (ultra-fine iron oxide) is for especially fine polishing. Can be used by hand and in saw frames, drills and other tools on hard and soft metals, ceramic, plastic and wood. Won't tear or fray. Supplied in 50' spools.

Sanding Detailer™ – Multi-Functional Sanding Tool

The Sanding Detailer™ with Micro Finishing Film Belt, is an ergonomic shaped tool ideal for metal finishing, woodworking, welding cleanup, auto body finishing, mold finishing, jewelry making, gun repair and so much more. The tool features three unobstructed working areas, a tapered end, a flat bottom and a rounded end making it ideal when finishing any surface. An enclosed spring helps to maintain proper belt tension. Available with replaceable belts in 8 different grits. See chart below for grits and their corresponding colors.

Specifications:

- Dimensions: 6.25" (159mm) x .5" (12mm)
- Work Surface: 6.25" (159mm) x .25" (6mm)
- Micro Finishing Film, 8 Grits from 220 to 1200 (60 to 9 Microns)

Belt Sticks & Sets Aluminum Oxide

Economical, versatile tools that accommodate 1/4", 1/2" or 3/4" wide abrasive belts, for sanding and smoothing hard-to-reach areas. Made of impact-resistant polypropylene. The tip can be easily reshaped to meet your exact needs. A spring-loaded tensioning device allows the abrasive belt to be rotated so that all areas of the belt can be used and permits quick belt changing. Belt Sticks may be used dry or with water, oil, or solvents. Sticks are supplied in 5 colors to help you quickly distinguish one grit from another. Abrasive belts are resin-bonded, cloth-backed aluminum oxide. Made in USA.

A. Norton, A275 Champagne Sandpaper – Great for Aluminum!

This load resistant paper is an excellent choice for aluminum polishing. The paper utilizes a No-Fil coating, which is a water-based stearate that provides maximum load resistance and extended life. Features a premium P-graded, heat-treated aluminum oxide abrasive yielding fast cut rates. Made with a fiber-reinforced latex-saturated backing, giving the paper exceptional flexibility and high tear strength. Sold in 9"x 11" sheets. Nine piece set includes one of each grit.

A-J Moore's Snap-On Discs

Snap-On Discs feature quick-change, sure-lock brass centers with one cutting face on paper or plastic backing.

Three types of paper-backed discs are available: **Emery** contain black silicon carbide, a fast cutting abrasive; **Adalox** contain aluminum oxide, less aggressive than Emery and **Garnet** which is a natural mineral and is slightly less aggressive than Adalox.

Five types of plastic-backed discs are available: **AIO** contains evenly dispersed micron-grade aluminum oxide, which provides smooth, fast cutting action; **Garnet** is a natural mineral which is slightly less aggressive than AIO; **Sand** contains long-lasting white aluminum oxide, slightly less aggressive than Garnet and Water Proof **Silicon Carbide** which is Silicon Carbide on a paper backing that has a water proof front and is less aggressive than Sand and **Felt** which contain no abrasive and can be charged with compound or paste for quick and easy finishing. Max. operating speed: 30,000rpm. Use with Snap-On Mandrel (see below). Made in USA

M, N Snap-on Blue Zirconia Discs

Blue Zirconia Alumina Sanding Discs are ideal for use with platinum, but will work well on gold and silver. These discs are resin-backed for superior durability and aggressively cut and grind metals with a uniform file-like finish. Last up to three times longer than conventional abrasives. Comes supplied in 3/4" and 7/8" diameters with snap-on centers. The brass-centered holes reduce vibration as they work. For snap-On Discs, use Gesswein's Snap-on Mandrel (Item#: 840-3200) Made in USA.

H, I Slurry Coated Strips and Cloths

Slurry coated polishing strips and cloths are strong and durable and a must for any bench jeweler. Made of Rayon and unique proprietary backing material that sets them apart from traditional polishing paper, and results in a consistent uniform finish. The blend of various types of micron particle minerals is applied to each strip in a slurry coating process along with the abrasive Silicone Carbide. The micron grading technique produces particles of the same size and shape to achieve a consistent finish every time. The Slurry Coated Strips are perfect for hard to reach places and provide consistent results. Use them by hand or in your favorite saw frame. The Slurry Coated Cloths are for larger items to be polished. Both are ideal for wet or dry applications. Available in 9 colors for easy identification of the grits (see below).

- The Strips come in a convenient assortment pack of all 9 colors/grits. Each pack includes 2 sheets per color/grit, overall size 1 7/8" W X 7" L and each sheet contains 12 pre-cut strips (5/32" W X 7" L).
- The Cloths come in a convenient assortment pack of 9 colors/grits. Each pack includes 18 cloths (4" W X 7 1/2" L). 2 cloths per color/grit.
- 360 Grey, 400 Orange, 600 Brown, 800 White, 1000 Red, 1200 Green, 1500 Purple, 2000 Yellow and 4000 Blue

3M™ Scotch-Brite™ Radial Bristle Discs

For fast and easy cleaning and polishing without compound!

Use to clean, prepolish, blend and remove scratches and firescale. Excellent on gold, silver, platinum and most other metals. Require no compounds. Work fast and take the mess out of cleaning up small areas such as tiny findings, bracelet links, nugget rings and more. Long-lasting and nonloading. Color-coded for easy grit identification.

Use a single one for reaching tight areas, or stack several of them for covering large surface areas (for example, 2" and 3" discs can be stacked up to ten in a row). 6" discs consist of eight stacked discs mounted on a plastic hub. Includes adapters for 3/8", 1/2" and 5/8" and 3/4" arbors. Maximum operating speeds: 10,000rpm for 6" discs, 20,000rpm for 3" discs and 30,000rpm for all others (recommended operating speed for most applications: 15,000rpm). See pp. 584-585 for mandrels.

Color	Application
Brown	Removal of heaviest scratches
Green	Removal of heavy scratches
Yellow	Removal of scratches and firescale
White	Texturing, light cleaning
Red	Removal of light scratches and oxides
Blue	Blending, prepolishing
Pink	Very light cleaning, prepolishing
Peach	Polishing
Lt. Green	Final polishing

A-D Small Discs – For use with rotary handpieces

The 9/16" and 3/4" discs are sold in packages of 12 (see pp. 584-585 for mandrels) or in packages of 48 which includes one 3/32" mandrel. Maximum operating speed 30,000 rpm (although recommended for most applications will be 15,000 rpm).

SUNBURST® Radial Disc Assortments & Midget Points

SUNBURST Products are designed with specially treated ceramic abrasive grain embedded throughout. This eliminates the need for polishing compound and produces minimal dust and heat. Ideal for finishing, smoothing and high-luster polishing of all precious, semi-precious and non-precious metals, acrylics and ceramics. See pages 404 and 405 for individual discs and larger sizes. Made in USA.

See website for additional SUNBURST products.

A. Gesswein® 50-Piece Polishing Set

A complete, compact set for every job from fast grinding to final finish. The set features a selection of our most popular rubberized abrasives in both straight- and knife-edged wheels, as well as rods which can be dressed to reach into the tiniest settings. Dressing stone included. The complete set includes:

- 5 Assorted Heatless Wheels: for fast grinding and brush finishing
- 10 Premium GK-10 Rubber Pumice Wheels: industry standard for scratch removal and shaping

- 10 Assorted Black Wheels: for light scratch and bur removal
- 10 Assorted Pink Silicone Polishing Wheels: for ultra-high polish
- 5 Brown Prepolisher Rods: for scratch removal in settings or recessed areas
- 5 Green High Shine Rods: for fine polishing of settings and recessed areas
- Dressing Stone for Rods: shapes rods to fine point
- 6 Mandrels: 3/32" + 1/8" for Wheels
- 1 Mandrel: 3/32" for Rods

Edenta Polishers Natural Rubber – Silicon Carbide

This Swiss company is world famous for making the best quality and longest lasting Rubberized abrasive products, all manufactured under the stringent ISO 9001 guidelines. The abrasive is precision graded and then uniformly distributed throughout the rubber. This Natural Rubber bond is a far superior product as the wheels last over TWICE as long as Silicone and can operate at higher, more efficient speeds. Higher speeds create a brighter, shinier surface and require less pressure.

Brown TopStar Polishers remove light scratches and prepare surfaces for final polishing, max. operating speed: 20,000rpm. Pink Platinum Polishers work well as a prepolisher, max. operating speeds: 10,000rpm. The Gray Titanium Polisher is for removing scratches and flaws, max. operating speed: 20,000rpm, while Blue Titanium Polishers impart a final finish, max. operating speeds: 10,000rpm. Green TopStar Polishers impart a bright high shine, max. operating speed: 10,000rpm. **Mounted shapes have 3/32" shanks**, and unmounted shapes, except for rods have 1/16" arbor holes. See pp. 584-585 for mandrels. Made in Switzerland.

**Longer Lasting
Lowest Total Cost!**

Silicone SiC Wheels and Points

Fast-cutting silicon carbide abrasive is uniformly dispersed throughout a silicone rubber bond for smooth finishing of precious metals. Ideal for intricate surfaces because of their high flexibility. Follow contours exceptionally well. Cut well and leave a smooth finish ready for polishing. Available in 3 grits: Green (220 grit) for cutting, Black (240 grit) for removal of light tool and file marks, and Blue (280 grit) for medium-fast cutting while leaving a smooth finish. All with 1/16" arbor hole. Maximum operating speed: 10,000rpm. See pp. 584-585 for mandrels. Made in Germany.

I. Cylinder	1/4" x 7/8"	845-2400	17.85

J-S Heatless Wheels – SiC in a Resinoid Bond

Especially useful in preparing contrast finishes and texturing—much coarser than a brushed satin finish. Also used for fast grinding and metal removal, these very hard wheels are made of silicon carbide in a resinoid bond. They break down quickly, constantly exposing new grit to produce a uniform, coarse, brushed-look finish with tiny highlights. Easily shaped with a file. 1/16" metal arbor hole. Maximum operating speed: 25,000rpm. (See mandrels, pp. 460-461)

Poly Polishers Silicon Carbide

Superior results on all precious and nonprecious metals. Silicon carbide abrasive in a specially formulated polyurethane rubberized bond for long life—outlasts other types of rubber abrasives. Holds a crisp edge. Available in four color-coded grits (coarse blue, medium gray, fine prepolish brown, and high-shine green) to finish your castings and fabrications from rough to highly polished without getting up from the bench.

All our Polyurethane Polishers are available in a wide variety of shapes and sizes to finish any jewelry item from the largest ring shanks to the tiniest settings uniformly and without a lot of dressing to make them fit! Mounted abrasives are on $\frac{3}{32}$ " shanks. Unmounted wheels and cylinders have $\frac{1}{16}$ " holes and can be mounted on mandrels shown on pp. 460-461. Maximum operating speed: 12,000rpm. Made in Germany.

SX Mounted Polishers $\frac{3}{32}$ " Shank

Features large foam cell size constructed of resilient PVA (polyvinyl acetate) foam, for cool operation and long life. Firm enough to lap flat surfaces yet flexible enough to allow polishing of curved surfaces without gouging. Ideal for hard and soft metals such as platinum, palladium, stainless steel, gold, aluminum and brass. Gray polishers contain silicon carbide while the white polishers have aluminum oxide abrasive. Measure 15mm ($\frac{5}{8}$ " dia. x 25mm (1" long with $\frac{3}{32}$ " shank. Max. operating speed: 15,000rpm. Made in Japan.

PT Platinum/Titanium Polishers

These polishers work especially well on titanium and platinum. Even abrasive distribution allows them to produce smooth, uniform surface finishes. Moderately hard silicone rubber impregnated with aluminum oxide conforms slightly to surfaces. All shapes hold their edges due to slow breakdown rate. Applications include removing tool marks, smoothing parting lines and removing casting scale. Choose from a variety of unmounted and mounted $\frac{3}{32}$ " shank shapes. Available in two color-coded grits: medium (gray) and fine (lilac). See pp. 584-585 for mandrels. Maximum operating speed: 10,000rpm. Made in Germany.

Q-S AirFlex Silicone Wheels – Silicone Carbide

Tiny pockets of air are uniformly interspersed throughout our AirFlex wheels, so they grind and polish quickly without overheating the workpiece. AirFlex Blue (coarse) quickly removes rough surfaces, burs and tool marks. AirFlex Gray (medium) removes medium-grit file marks and leaves a matte finish. AirFlex Brown (fine) removes light scratches and leaves a bright surface. AirFlex wheels work equally well on all precious alloys, including stainless steel and titanium. Flexible AirFlex follows contours and leaves a smooth, uniform finish. Made of silicon carbide abrasive in a silicone rubber bond. The 7/8" square edge wheels are 1/8" thick with 1/16" arbor hole. See pp. 584-585 for mandrels. Max. operating speed: 10,000rpm.

A-I Polyurethane Polishing Rods – SiC

Very popular, long lasting rods are designed for cleaning and polishing castings and metal parts. All are silicone carbide in a polyurethane carrier and can be shaped using our Dressing Stone #145-1240 shown below. Available in three sizes and various grits for all applications.

Each 83-piece set includes both 2 and 3mm sizes, two mandrels ($\frac{3}{32}$ " shank) and a dressing stone to sharpen rods to a fine point. Packaged in a convenient reusable plastic storage box with cover. Choose between Brown and Green or Blue and Gray sets. Maximum operating speed: 21,000rpm. Made in Germany.

O, P Everlast Ceramic Polishing Rods – For hard and soft metals

Durable, long-lasting ceramic in an epoxy resin. Ideal for smoothing and polishing inside holes and hard-to-reach areas. Easily shaped to a fine point. Can be mounted directly into any flex shaft handpiece. For gold, silver, platinum, steel, titanium, brass, etc. Max. operating speed: 60,000rpm. Imported from Japan.

Grit	Color	Dia. x L	Item#	Each
O. 600	Brown	$\frac{3}{32}$ " x 2"	145-0200	\$22.50
P. 1000	Green	$\frac{3}{32}$ " x 2"	145-0205	22.50

Cera Wheels & Points Ceramic abrasive and synthetic rubber for a mirror-like shine

This revolutionary abrasive consists of ceramic particles mixed in a long-lasting synthetic rubber carrier. Its fast breakdown rate ensures ceramic particles are always exposed to the polishing surface. Resists clogging for high efficiency. Blends well and removes stoning scratches with ease, leaving a smooth finish with minimal wear. Cuts safely and smoothly. Great for cleaning, deburring, precision grinding, polishing and super finishing of molds, dies, small electrical components, sensitive equipment and more. Use dry or wet on steels, alloys and stainless steel. Work with light pressures. Choose from points, wheels and sticks. Refer to chart at right for grit designations. Made in Japan.

H. Cera Sticks

Each stick consists of a block of Cera abrasive mounted on a plastic holder. Material and holder are both flexible, so they conform well to irregular surfaces and hard-to-reach areas. Three slots on back of holder serve as convenient hacksaw guides for removing tip of Cera material once worn. Blocks measure 2 3/4"L x 3/8"W x 1/4"T. Sticks measure 7" overall length. Available individually or in a set of all five grits.

I. Diamond Dressing Block

Solid steel block with diamond coating for fast dressing and shaping of any of our rubberized abrasives. One side is grooved for shaping rods, points and knife edge wheels. Other side is flat for dressing square edge wheels. Measures 3 1/2" overall length.

Description	Item#	Each
Diamond Dressing Block	145-1316	\$48.00

Brightboy® Aluminum Oxide

Brightboy is made of aluminum oxide with a resilient rubber bond, making it long-lasting. Its uniform cutting action makes it ideal for deburring and scratch removal on nonferrous metals. Also for light grinding of carbon steel. Permits cushioned action on flat and contoured surfaces. The texture and cutting action are always uniform. Brightboy is approximately 70 grit and requires no additives such as cutting compounds. Not for use on tapered spindles. See pp. 584-585 for mandrels, p. 400 for arbors.

C. Brightboy® Stick and Holder

Excellent for touch-ups and removal of light scratches. Used for cleaning otherwise unreachable deep cavities. Made of flexible rubber. Reusable clear plastic holder has screw-on collet that gives support and gripping power. Stick can be exposed or withdrawn as desired and is easily dressed to the best shape for the job. Also removes rust, heat marks and stains from soft and hard metals. Sticks measure 6"L x 5/16" diameter.

E. Gem Shine Polishing Wheels – Polishing just got easier!

The Gem Shine Polishing Wheels are unique polishing wheels designed for removing light surface scratches from soft stones such as onyx, cabochons and opals. Impregnated with a polishing paste to provide scratch removal and a final polish. Simply apply a little pressure to these wheels to allow the paste to flow out onto the stone and then return to a light polishing application with the same wheel. The results are amazing! Comes supplied in a box with (5) Gem Shine Polishing Wheels and a reinforced 3/32" mandrel.

Description	Item#	Set
Gem Shine Polishing Wheels	845-1105	\$22.95

F-H Elasto Wheels and Cylinders - 1/8" Shanks

Aluminum Oxide is combined with rubber to produce smooth running cushioned abrasive wheels and cylinders. They cut and polish very quickly, are load resistant and can easily be dressed. Use for polishing mold runners, deburring and descaling metal parts. Made in Germany.

Abrasive Wheel Operating Recommendations: Certain precautions should be observed when running any abrasive wheel. Be sure to wear proper eye protection, and never exceed the recommended operating speed stamped on the box or wheel. An improperly used wheel is dangerous. Be sure to comply with American National Standards Institute Safety Code B-7.1 and Occupational Safety and Health Act covering speed, safety guards, flanges, mounting procedures, general operating rules, handling, storage, inspection and general machine conditions.

Cratex® Small Wheels **Tough, resilient, rubberized Silicon Carbide abrasive**

Utilizes silicon carbide as the abrasive grain in a standard bond of premium grade, oil-resistant chemical rubber. Its unique cushioned action allows the abrasive grains to cut freely, smoothly and softly without gouging or digging into the work surface.

Some typical applications:

- Cleaning and polishing to remove surface deposits.
- Polishing and smoothing to improve performance, appearance and cleanliness.
- Ideal for work on jewelry, plastic parts, small castings and models.

E. Cratex® Set #777

Contains 80 small wheels and points in popular sizes including coarse, medium, fine and extra-fine grits. Four mandrels with 1/8" shanks are in the set. Packaged in a clear divided box for easy selection.

Description	Item#	Each
Cratex Set #777	146-7770	\$88.65

Cratex® Large Wheels Silicon Carbide

Feature the same tough, resilient, rubberized silicon carbide abrasive in a standard bond of oil-resistant chemical rubber as the small wheels. Unique cushioned action allows the abrasive grains to cut freely, smoothly and softly without gouging or digging into the work surface.

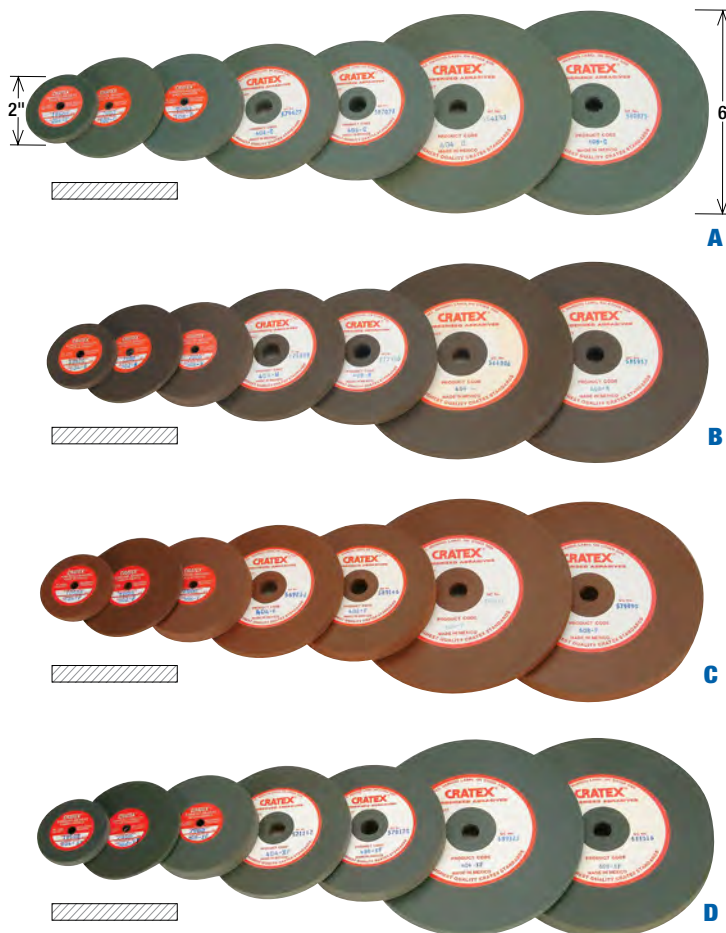

These square-edge wheels have either 1/4" or 1/2" arbor holes. See chart for maximum operating speeds. Frequently, speeds between 30% and 80% slower than the maximum will yield optimal results

Diameter	Max. Operating Speed
2" with 1/4" arbor hole	10,500rpm
2 1/2" with 1/4" arbor hole	8,300rpm
3" with 1/4" arbor hole	7,000rpm
4" with 1/2" arbor hole	5,250rpm
5" with 1/2" arbor hole	4,200rpm
6" with 1/2" arbor hole	3,500rpm

GRX Innovative AIO abrasive material for fast grinding and superb surface finishing

GRX consists of aluminum oxide dispersed in a unique elastic bond. Cuts a bit slower than silicon carbide yet imparts a very smooth surface finish—each grit yields a much higher finish than expected. Grinds platinum, gold, silver, steel and aluminum without clogging. Prevents metal surfaces from becoming scorched during processing. Very long-lasting. Made in Japan.

A-C GRX Wheels

For grinding sprues or burs and removing surface roughness. Use on a polishing motor with arbor. Not for use on tapered spindles.

A-D Dedeco® Silicone Ring Buffs – Silicon Carbide

These silicone ring buffs are soft and flexible for use on precious metal alloys. Fits on a tapered spindle. Center hole is reinforced with a plastic tube.

White/Coarse: For removing deep scratches

Black/Medium: For smoothing and removing light scratches

Blue/Fine: For high-luster polishing

Pink/Extra-Fine: For super high-luster polishing and final finish

E-J MAX Inside Ring Polishers – Perfect for polishing insides of rings!

Created due to popular demand, these polishers excel at polishing finger holes of rings. Made of MX material, which features foam cell construction for good flexibility, cool operation and long life. Choose from straight and tapered styles in five grits; RA240 grit is a specially formulated 240 grit that removes metal much more quickly than standard 240 grit. Mount directly to the Mini Max Combo 854-0120 (see p. 387) or screw into unique steel adapters (sold separately) and mount on the right hand side of your 5/8" or 1/2" shaft polishing motor. Measure 3 1/8" long. Max. operating speed: 3,600rpm.

A. Dedeco® Jeweler's Lathe Wheel – Silicon Carbide

This rubberized wheel is coarse enough to make quick work of grinding jobs yet flexible enough to follow contours and leave a smooth finish. Contains 220 grit silicon carbide abrasive. Max. operating speed: 3,800rpm. 1/2" Arbor Hole.

Shape	Grit	Dia. x Thick x AH	Item#	Each
SE Wheel	220	4" x 1/2" x 1/2"	145-0085	\$26.95

B, C AirFlex Poly Wheels – Silicon Carbide

Tiny pockets of air are uniformly interspersed throughout our AirFlex wheels, so they grind and polish quickly without overheating the workpiece. AirFlex Gray (medium) removes medium-grit file marks and leaves a matte finish. AirFlex Brown (fine) removes light scratches and leaves a bright surface. AirFlex wheels work equally well on all precious alloys, including stainless steel and titanium. Flexible AirFlex follows contours and leaves a smooth, uniform finish. Made of silicon carbide abrasive in a silicone rubber bond. Max. operating speed: 3,000rpm. 1/4" Arbor Hole.

AirFlex	Dia. x Thick x AH	Grit	Item#	Each
B. Gray (medium)	4" x 19/32" x 1/4"	240	145-1181	\$21.45
C. Brown (fine)	4" x 19/32" x 1/4"	800	145-1182	21.45

D. Unitized Mounted Points – 1/8" Shank

Ideal for a variety of deburring, blending, finishing and polishing applications. Consist of durable unitized material embedded with either silicon carbide for a fine finish or aluminum oxide for a medium or coarse finish. Mounted on 1/8" shanks. Conform to workpieces for consistent, uniform finishing without undercutting or gouging.

Style	Dia. x H	Max. RPM	Coarse	Medium	Fine	Each

Fine Silicon Carbide
Shown actual size.

Polishing Safety Measures

- Many polishing compounds contain respirable silica or other hazardous ingredients. Be sure to use a dust collector to pull all polishing dust away from your breathing zone, and wear a properly fitted NIOSH respirator rated for the specific dust or chemicals with which you are working.
- Any grinding operation will remove small amounts of metal from the workpiece. To protect your eyes from flying debris, always wear safety goggles or similar eye protection.
- Tie back loose hair and clothing to prevent entanglement in the polishing motor or spindle.
- Firmly twist the buff onto the tapered spindle before turning on the motor, and keep the buff centered and straight to ensure true running. With the spindle correctly installed, turning force of the motor will keep the buff safely mounted during grinding and polishing.
- Always use the lower quarter of the buff to control the action and to prevent the workpiece from being pulled from your grip. Never entwine your fingers with the workpiece; instead hold it in a manner that will prevent your fingers from being harmed should it be pulled from your grip.

GMX/G-FLEX Cotton Fiber & Abrasive Mounted Points

GMX: Soft Latex Bond

GMX cotton fiber products utilize a unique flexible bond with laminates of non-woven, aluminum oxide abrasive impregnated fabric, with laminations that run parallel to the shank to prevent the ends from chipping. The construction continually exposes new abrasive grain for cooler running, and the flexible bond allows for reduced vibration and chattering. Unlike bonded or coated abrasives, these do not load up when working on softer metals or alloys, such as aluminum. Cylinders and other shapes can be dressed to conform to unique contours. Excellent for breaking edges, deburring, and blending on aluminum, stainless steel, and exotic alloys. GMX is also ideal for polishing mold runners and mold & die components. Available on 1/4", 3mm and 6mm shanks via special order.

G-Flex: Firm Resin Bond

G-Flex cotton fiber products are similar to the GMX, but use a firm resin bond. It is also non-loading and can grind and finish in one operation. A special formulation keeps it from being too aggressive, and works well on aluminum, stainless steel, and exotic alloys. Another favorite for cleaning and polishing mold runners, as well as deburring and edge breaking on all metals. Also work great for deflashing of die castings, as well as deburring and finishing of turbine blade roots. 3mm shanks are in stock on some cylinders, others are available by special order.

See Grinding Wheel Institute publications for operating speeds of mounted products.

Use 80 grit for deburring and sprue removal, 120 grit to remove parting lines and small burs, 180 and 320 grit for removing light scratches.

A-C GMX & G-Flex Application-Specific Sets – 1/8" Shank

All 3 Gesswein cotton fiber sets offer an assortment of 12 points: 6 GMX and 6 G-Flex points in various shapes and grits targeted to working in specific applications: General purpose deburring and edge finishing, aluminum and non-ferrous finishing and deburring, stainless and exotic alloy finishing and deburring. All are mounted on 1/8" shanks. Each set includes 12 pieces: 6 shapes in both GMX (gray, soft latex bond) and G-Flex (brown, firmer resin bond).

Description	Item#	Set of 12

D-J GMX Discs

A long-lasting aluminum oxide abrasive in a unique composite of laminated cotton fiber in a rubber bond. The cotton base also creates a cushioned feel and helps reduce chatter and loading. GMX cuts and smooths in one operation, leaving a smooth, even finish. Discs can be dressed to conform to shape of workpiece. Use 80 grit for deburring, 120 grit to remove parting lines and small burs, 180 and 320 grit for removing light scratches. Made in USA.

GMX Long-lasting aluminum oxide abrasive

A unique composite of laminated cotton fiber in a rubber bond, GMX cuts and smooths in one operation, leaving a smooth, even finish. Can be dressed to conform to shape of workpiece. Use 80 grit for deburring and

sprue removal, 120 grit to remove parting lines and small burs, 180 and 320 grit for removing light scratches. See p. 401 for arbors. Additional GMX products are also available on pages 96-98. Made in USA.

A-E GMX Sticks and Rods

Used for polishing and touching up molds, dies and metal parts. Less aggressive than finishing stones, GMX sticks produce a surprisingly smooth surface.

Polishing Compounds & Rouges

Gesswein offers the finest products for all aspects of polishing. From removing deep scratches to cutting, to final finishing to a very high luster finish, we have what you need to work on brass, stainless steel, gold (yellow and white), silver, platinum, rhodium, chrome, nickel steel, aluminum, copper, and zinc. Almost any metal you use we can help you polish as well as acrylics, epoxies and hard plastics.

We are proud to offer:

- Traditional polishing compounds—a careful blend of abrasives and binders in bars and tubes.
- Dialux premium polishing compounds are very popular in Europe due to their ability to adhere well to the buff, reducing the amount used.
- Water-soluble compounds contain a special emulsifier to make clean up easy with just soap and water.
- Veggie Compounds clean up easily and because they are completely free of animal products, are kosher.

A-N Polishing Compounds

Listed in approximate order from the most to least aggressive. All bar weights are approximate and may vary slightly from bar to bar.

Type	Description and Application	Approx. Weight	Item#	EACH Prices	
				1-9	10+
A. Gray Star*	Aggressive, dry compound for removing deep scratches, yet leaves a uniform finish. Excellent for brass, gold, silver and stainless steel.	1 lb. 2.2 lbs.	215-0915* 215-0910*	\$4.15 8.40	\$3.74 7.56
B. Chrome	Produces mirror finish on hard metals such as chrome, nickel steel and stainless steel. Medium cutting compound for soft metals.	1¾ lbs.	215-1550	11.50	9.20
C. Bobbing Compound	A fast cutting compound that leaves jewelry dull in appearance but scratch free. This is the first step to remove deep scratches in jewelry (gold, silver and platinum) and other hard metals like stainless steel and chrome.	14oz.	215-0428	4.50	3.83
D. Manhattan Bobbing*	Specially formulated for use on sterling silver, but also works on gold and brass to remove scratches & pits and to prepare for buffing with tripoli and rouge.	1¼ lbs.	215-0425*	6.95	5.91
E. NYC Tripoli*	Fast cutting on soft metals such as brass, aluminum, gold and silver. Sticks well to laps and brushes. Used in place of Tripoli.	1 lb.	215-0475*	2.60	2.21
F. Tripoli*	For cutting down and removing scratches from soft metals such as gold, silver, aluminum and brass. Leaves surface scratch-free for final polish.	1 lb.	215-1750*	2.30	1.84
G. Gray 800*	Light cutting compound for removing surface roughness and scratches from platinum.	7/8 lb.	215-0045*	19.50	16.58
H. ZAM®	For use on softer metals, epoxies and hard plastics. Cuts and polishes at the same time and leaves a high luster. Fast cleanup. Won't scratch softer stones like turquoise.	¼ lb. 1 lb.	215-1603 215-1602	4.35 6.25	3.92 5.63
I. White 1500*	Medium cutting compound for platinum. Removes light scratches and prepares surface for final polishing.	7/8 lb.	215-0049*	33.99	28.89
J. White 4000*	Fine cutting compound for platinum. Removes light haze and scratches.	½ lb.	215-0042*	32.50	27.63
K. White 6000*	Fine cut-and-color compound for platinum. Removes faint scratches and leaves a soft, bright finish.	½ lb.	215-0043*	35.70	30.35
L. 4X White Diamond*	A medium cut-and-color compound for soft metals such as gold, silver, and brass.	¾ lb.	215-1710*	2.10	1.68
M. White Rouge	High luster on platinum, white gold, chrome and stainless steel.	¼ lb.	215-0250	2.45	2.08
N. White 8000*	Polishing compound for ultra-white high shine on platinum.	½ lb.	215-0046*	37.99	32.29
O. Orange Luster	Formulated with low oil content to increase polishing power. Works fast and delivers the whitest, brightest shine on platinum	5 oz.	215-0037	18.50	15.73

***CAUTION:** This compound contains silica. See warning on facing page.

A-J Polishing Compounds, continued

Type	Description and Application	Approx. Weight	Item#	EACH Prices	
				1-9	10+
A. Red Rouge	Imparts extremely high luster on soft metals: gold, silver, brass and all nonferrous metals. The industry standard for producing the final finish.	1/4 lb.	215-1151	\$2.10	\$1.68
		1/2 lb.	215-1152	3.75	3.00
		1 lb.	215-1153	6.75	5.40
B. Blue Rouge	Clean working compound designed to produce high luster on gold, silver, brass, chrome and all nonferrous metals.	1 lb.	215-1702	3.50	2.80
C. Green Rouge	Produces an extremely high luster on chrome, stainless steel, silver, platinum, white gold and rhodium.	1/4 lb.	215-0805	4.40	3.52
D. Yellow Glow	For ultra-bright final finish on yellow gold and most metals except silver. Has a very light cutting action. Not greasy. Comes in peel-away tube.	14 oz.	215-0054	6.25	5.00
E. Lustre Bar	Produces very high luster finish on all metals as well as plastics. Will remove light scratches, yet leaves a bright mirror finish. Comes in peel-away tube.	1 lb.	215-1600	7.65	6.12
F. Platinum Blue	This specially formulated compound imparts the highest possible finish on platinum and other precious metals.	5 oz.	215-1784	16.95	14.41
G. Two-Step Platinum	Reduce the polishing steps associated with platinum. Adhere very well to buffs. Yellow bar (Step 1) removes scratches. Green bar (Step 2) imparts mirror finish.	13.4 oz.	215-0038	19.95	16.96
		13.4 oz.	215-0039	19.95	16.96
H. Platinum Pink	Imparts a highly reflective surface on platinum as well as white gold, titanium and other hard metals.	5 oz.	215-1786	19.25	16.36
I. C-Clear Watch Crystal	Restores plastic by removing scuffs and scratches. Used by jewelers to make old plastic watch crystals look new again.	1/4 lb.	215-0041	6.50	-
J. Platinum Sample Set*	Four different compounds for platinum: Gray 800, White 1500, White 8000 and Orange Luster.	3/4 lb.	215-0036*	25.00	-

Featured Compounds	 <p>Gray Star Aggressive, dry compound for removing deep scratches, yet leaves a uniform finish. Excellent for brass, gold, silver and stainless steel. 1 lb. bar. 215-0915* \$4.15</p>	 <p>Two-Step Yellow cuts and quickly removes scratches on stainless, titanium, aluminum, copper, zinc, brass, gold, silver and platinum. 215-0038 \$19.95 The green produces a mirror finish on precious and other metals. 215-0039 \$19.95</p>	 <p>Lustre Bar Produces very high luster finish on all metals as well as plastics. Will remove light scratches, yet leaves a bright mirror finish. Comes in peel-away tube. 215-1600 \$7.65</p>
	 <p>Platinum Blue This specially formulated compound imparts the highest possible finish on platinum and other precious metals. 215-1784 \$16.95</p>	 <p>Green Rouge Produces an extremely high luster on chrome, stainless steel, silver, platinum, white gold and rhodium. 215-0805 \$4.40</p>	 <p>White 8000 For an ultra-white high shine on platinum and titanium. 215-0046* \$37.99</p>

***CAUTION:** This compound contains silica. Normal use may generate fine dust, which can irritate eyes, skin and nasal passages. Use ventilation and safety protection, and wash after use. Long term exposure to silica-containing compounds may cause silicosis, lung damage or lung cancer which may be prevented by use of appropriately rated respirator and air exhaust.

Many polishing compounds contain hazardous ingredients. Be sure to use a dust collector to pull polishing dust away from your breathing zone and a properly fitted respirator rated for the specific dust or chemicals with which you are working. Normal use may generate fine dust which can irritate eyes, skin and nasal passages. Use ventilation and safety protection, and wash after use. Long term exposure to silica-containing compounds may cause silicosis, lung damage or lung cancer which may be prevented by use of appropriately rated respirator and air exhaust.

A-B Veggie Compounds – Vegetable oil-based!

These vegetable oil-based compounds offer several advantages over standard compounds, including faster loading time, easier cleanup and less dust. Completely free of animal by-products and also kosher. Use Tripoli for cutting and Red Rouge for final finishing. Available in ¼ lb. tubes and 1 lb. bars.

Type	Description and Application	Approx. Weight	Item#	EACH Prices	
				1-9	10+
A. Premium Brown Tripoli	Fast cut and color compound. Removes scratches and leaves a matte surface ready for final polishing. Good on aluminum, brass, copper, nickel, silver gold and platinum.	¼ lb. tube	215-1808	\$2.40	\$2.04
		1 lb.	215-1809	3.10	2.64
B. Premium Red Rouge	Imparts high color on soft metals. Ideal for final finishing of precious metals such as gold and silver, as well as brass and bronze.	¼ lb. tube	215-1804	4.10	3.49
		1 lb.	215-1805	8.70	7.40

Please ask for quotes on larger quantities.

C. Pumice Powder

A natural abrasive used for cleaning surfaces and for removing imperfections and firescale. Mix with water or oil and apply with a muslin buff to create a fine matte finish. Sold by the pound.

Description	Item#	LB. Prices	
		1-9	10+
Pumice Powder	845-4000	\$4.25	\$3.61

Please ask for quotes on larger quantities.

D. SUPRA Pumice Paste

For smoothing rapid prototype models as it produces a mild cutting action on acrylic and soft metals. Use with the Scotch-Brush for best results. 80 gram bar.

Description	Item#	Each
SUPRA Pumice Paste	218-2045	\$7.95

E. SUPRA Polishing Crème (50g Tube)

For ultra high finishing of Rapid Prototype models as well as precious metals. Works best with a soft white muslin buff. 50 gram tube.

Description	Item#	Each
SUPRA Polishing Crème	218-2240	\$9.50

F. Rapid Prototype Finishing Kit

Gesswein has developed a kit to make it easy as 1, 2, 3 to put a high polish on your acrylic models. With technology gravitating towards rapid prototyping, models being produced on 3D printers may come off these printers with a smooth surface, but they are not highly polished!

Why should models be highly polished? Very simple! By giving them a mirror finish before the casting stage, or mold making stage, the end product will require much less finishing. This important extra step allows for manufacturing consistency and the surface quality will be greatly improved.

Step 1: Use the Scotch-Brush with Supra Pumice Paste to remove the fine build lines.

Step 2: The Duratex White Buff used with Supra Polishing Crème produces a very smooth surface.

Step 3: A soft loose Muslin Buff used with Platinum Pink Compound leaves a mirror bright finish.

Description	Item#	Each
Rapid Prototype Finishing Kit	810-0035	\$59.00

A-H Dialux Polishing Compounds

Premium polishing compounds imported from Europe. Made from select abrasive grades, uniformly blended and manufactured under the strictest quality controls. Adhere exceptionally well to buffs, brushes and felts, so very little is needed, which helps reduce cleanup and save time. Individually packaged in cardboard boxes for cleaner handling. Each bar measures 3⁵/₈"L x 1¹/₈"W x 1"H and weighs approx. 4 oz.

Type	Description and Application	Approx. Weight	Item#	EACH Prices	
				1-9	10+
A. Dialux Bleu (Blue)	All-purpose compound for all types of metal	4 oz.	215-1771	\$4.95	\$4.46
B. Dialux Jaune (Yellow)*	For bright high polish of soft metals such as brass, bronze and copper.	4 oz.	215-1772*	4.95	4.46
C. Dialux Blanc (White)	For bright polishing of silver.	4 oz.	215-1773	4.95	4.46
D. Dialux Gris (Gray)	Recommended for fine polishing of stainless steel.	4 oz.	215-1774	4.95	4.46
E. Dialux Rouge (Red)	The brightest shine for yellow gold. Also produces a brilliant shine on silver.	4 oz.	215-1775	5.25	4.73
F. Dialux Vert (Green)	Recommended for bright polishing of hard alloys such as platinum, white gold, chrome, chrome cobalt and stainless steel.	4 oz.	215-1776	5.25	4.73
G. Dialux Noir (Black)	For final polishing of silver.	4 oz.	215-1777	5.25	4.73
H. Vornex (Orange)	Pre-polish cutting compound for all ferrous metals.	4 oz.	215-1778	4.95	4.46

I-Q Water-Soluble Polishing Compounds – Cooler buffing and faster clean up

Contains a special emulsifier so compounds rinse off easily with soap and water.

Type	Description and Application	Approx. Weight	Item#	EACH Prices	
				1-9	10+
I. Gray/Green*	For fast metal removal; more aggressive than Gray Star. For cutting white metals, gold, silver and brass.	2 lbs.	215-1752*	\$4.35	\$3.48
J. Gray Star	Aggressive dry compound for removing deep scratches, yet leaves a uniform finish. For brass, gold, silver and stainless steel.	1 lb.	215-1740	4.65	3.72
K. Tripoli*	Standard tripoli in a water soluble form. For cutting down and removing scratches from soft metals such as gold, silver, aluminum and brass. Leaves surface scratch-free and ready for final polish.	1 lb.	215-1750*	2.30	1.84
L. Yellow	Produces a very high, final finish on white metal, gold, silver and brass.	2 lbs.	215-1751	8.15	6.52
M. Green Rouge	Produces an extremely high luster on chrome, stainless steel, silver, platinum, white gold and rhodium.	1 lb.	215-1730	4.50	3.60
N. Premium Red Rouge	For the highest, brightest finish on yellow gold. Produces a premium grade finish on all precious metals, especially when teamed with our Chamois Buffs.	1/4 lb. 1 lb.	215-1715 215-1720	3.10 8.50	2.48 6.80
O. Black Rouge	Produces a deep, dark luster on gold, pewter and other precious metals and is especially effective on silver.	1 lb.	215-1701	5.15	4.12
P. Turquoise Rouge	For imparting the final finish on precious metals and soft, semiprecious stones. Ideal for buffing jewelry such as silver set with turquoise.	1 lb. 2 lb.	215-0152 215-0151	4.25 7.65	3.40 6.12
Q. Sample Set*	Four 1 lb. bars of our most popular compounds: Gray Star, Tripoli, Green Rouge and Red Rouge.	4 lbs.	215-1760*	18.50	-

***CAUTION:** This compound contains silica. See warning on page 101.

Gesswein® Diamond Compounds

Feature evenly distributed 100% virgin synthetic diamond, more consistent in shape than natural diamond, for fast, consistent cutting action. We stock in medium (M) 75% and heavy (H) 100% concentrations. Standard Oil-Soluble Compounds hold together very well, even under high-speed conditions. Specifically formulated for the mold and die industry. Can be thinned with Oil-Soluble Lubricant/Thinner. Water-Soluble compounds have the same

concentrations as Oil-Soluble Compounds. Allow fast and easy cleanup. Can be thinned with Water-Soluble Lubricant/Thinner. Consider Budget Oil-Soluble Compounds when affordability is a factor (lower prices are due to variations in particle size and friability). Packaged in 1-gram, 6-gram and 18-gram disposable syringes.

A. SUPRA® Diamond Compounds

Oil-soluble compounds with very heavy concentration of 100% virgin synthetic diamond for sharp, even cutting action. Graded to closer tolerances than those dictated by nationally recognized standards. Provide much faster stock removal than traditional diamond compounds. Sold in 5-gram Precision Applicators, which afford finer control than ordinary syringes.

B. Diamond Polishing Kit – Everything you need for Diamond Polishing

Whether you carry it to the mold or have it under your workstation, our Diamond Polishing Kit has all the products you need, right at your fingertips! A convenient time saver and a money saver as well! Available alone or in a money saving kit with Marathon System (See 510-2946 on page 433).

Includes:

- Diamond Compounds
- Lube Thinner
- Felt Bobs & Felt Sticks
- Poli-Felts
- Wood Sticks
- End Brushes
- Cup Brushes
- Wheel Brushes

F-J Lubricant/Thinner and Spray Bottle

To use all brands of compounds most efficiently, we recommend adding a lubricant to allow the compound to cut at its peak performance and to prevent the felt bob from gumming up or chattering. When added to diamond compound on the workpiece, lubricant thins out the mixture, creating a slurry and extending the compound. Available in two formulations: Oil-soluble and water-soluble, and in spray or squeeze bottle for moistening felts prior to diamond compound application.

Fill empty 4 oz. spray bottle with cleaning solution, lubricants and more for easy dispensing. Spray gets into hard-to-reach areas.

	1/4" x 1/4"	825-0507	6.95	5.56

H. Pegwood Sticks

Flexible multipurpose sticks that maintain a fine point and resist breaking when pushed into a hole. Use by hand, with reciprocating or rotary tools for intermediate finishing with diamond and other compounds. Carefully chosen, round soft sticks can also be used when gluing or as a dop stick. Dress with a knife or file. Measure 6" long. Sold in bundles of 24.

Shape	Diameter	Item#	BUNDLE of 24	
			1-9	10+
Round	2mm	825-1201	\$10.00	\$8.50

I, J Wood Laps – For ULTRAMAX® units

For use with diamond compound. Can be shaped with a diamond file or stone. Excellent for polishing narrow slots.

Material	Size (mm)	Item#	Pkg. of 5
I. Extra-Hard Wood	3 x 30 round	508-3349	\$24.95
J. Extra-Hard Wood	3.2 x 6 x 30 flat	508-3351	20.00

Supplied with ULTRAMAX DF/SF.

Simichrome Polish®

One of the finest all-metal paste polishes in the world! Simply rub on with a soft cloth and rub off to obtain a brilliant luster. Will not harm uncoated metal surfaces. Unlike chemical polishes, it will not remove a layer of the metal surface being cleaned. Recommended for use after diamond compound. Removes tarnish, dirt and oils, and generally renews polished metal surfaces. Leaves a protective film, which retards oxidation but does not prevent tarnishing. Works well on virtually any ferrous or non-ferrous metal surface such as brass, copper, silver, gold, pewter, magnesium, bronze, chromium, stainless steel, platinum, aluminum and countless other similar uncoated metals. Do not use on painted or lacquered surfaces. Excellent for removing shallow scratches from most any plastic and is also used to charge dry polishing medias (such as Dri-Shine III, Walnut Shells, or crushed cob) for tumbling. Polishing grit is 8 to 10 microns. Made in Germany.

A-C Simichrome Polish®

Description	Item#	Each
A. 50g Tube	218-2050	\$13.70
50g Tube, Box of 24	218-2100	252.30

F. Brilliant Luster Cream – For a high polish without the harsh odor

Produces a lustrous mirror sheen on mold and die surfaces. Quickly removes stains and oxidation, as well as the haze created by diamond polishing. Can be used on all steels, aluminum, chrome, brass and bronze. Goes on and comes off easily with a felt bob, soft cloth or tissue paper. Emits no harsh odors, unlike other brands. Nonhazardous and noncorrosive.

Description	Item#	Each

R, S Mini-Filer Diamond Tips – 2mm Shank

Mini-filing tips coated on one side with synthetic diamonds, precisely bonded to obtain the best physical properties for added strength and wear. These tips can be used in our Mini-Filers (see pp. 420-421, 426) and other light-duty profiling handpieces. All measure .5mm thick x approx. 23mm long. 40mm long mini-filer tip holder also available.

F-O Gesswein® Diamond Rifflers – 150 Grit

Gesswein Diamond Rifflers use 100% man-made diamonds. These synthetic diamonds are more consistent in shape than natural diamonds. This guarantees sharp and even cutting action, durability and long life. All blanks are precision-made of high-strength steel. High-density wear-resistant plating enables total usage of the full concentration of diamond.

Available individually or in a money saving set of all 10 shapes.

- Overall length: 5½" (140mm)
- Handle Diameter: 3.0mm
- Diamond Coated Length: ¾" (20mm)

		30 x 10mm	800	240-3053	38.40
		30 x 10mm	1200	240-3055	38.40

D-H EZE-LAP® Diamond Hand Lappers

These lappers are ideally suited for honing edges of carbide cutting tools. They offer excellent abrasion resistance for superior finishing. Available in assorted grits to match your finishing requirements. Comfort-fit handgrips are designed for accurate control and color-coded for easy grit identification. Measure 6"L x 3/4"W (diamond face measures 2"L x 3/4"W).

Hand Lappers	Color	Item#	Each
D. Extra-Coarse (150)	Green	349-6009	\$11.95
E. Coarse (250)	Black	349-6010	9.30
F. Medium (400)	Purple	349-6012	7.75
G. Fine (600)	Red	349-6014	6.50
H. Super-Fine (1200)	Blue	349-6018	6.50

I, J EZE-LAP® Diamond Hand Sharpeners

These sharpeners are ideally suited for honing edges of carbide cutting tools. They offer excellent abrasion resistance for superior finishing. Folding sharpeners with butterfly knife-style handles are grit color-coded and measure 9"L x 1"W open, 5"L x 1"W closed (diamond face area measures 4"L x 3/4"W).

Folding Sharpeners	Color	Item#	Each
I. Fine/Medium	Silver	349-6020	\$35.10
J. Fine (tapered cone)	Red	349-6022	23.40

A

A. Diamond PSA Cloth

Features precisely graded diamond grit on a flexible cloth backed by pressure-sensitive adhesive. The diamond grit is positioned on raised "islands" covering the cloth, thus allowing greater flexibility and more aggressive cutting action. Can be easily cut with scissors, shaped, punched and bent to almost any configuration. Use wet or dry for applications on steel, carbide, ceramic, glass, etc. All diamond cloths are color coded for easy identification of grit. Measures 50 x 100mm (2" x 4").

Color	Grit	Size	Item#	Each
Brown	120	50 x 100mm	107-4951	\$51.00
Red	200	50 x 100mm	107-4952	39.00
Yellow	400	50 x 100mm	107-4953	35.00
White	600	50 x 100mm	107-4954	35.00
Blue	1000	50 x 100mm	107-4955	44.00

B

B. Diamond PSA Foil

Consists of diamond abrasive particles electroplated onto very thin and flexible metal foil. Backed by pressure-sensitive adhesive. Can cut to any size and shape with scissors. Simply remove the paper backing and stick foil on to your own tools, creating a new "self-made" tool. Wide range of grit selection for fast aggressive cutting or fine polishing on steels and carbides. Measures 50 x 100mm (2" x 4").

Grit	Size	Item#	Each
120	50 x 100mm	107-5790	\$40.50
200	50 x 100mm	107-5792	30.95
400	50 x 100mm	107-5794	27.00
600	50 x 100mm	107-5795	23.50
1200	50 x 100mm	107-5797	23.50

C

C. Diamond PSA Poly Film

These highly flexible films are made of precisely graded diamond particles bonded to high strength polyester backing and provide a uniform, consistent finish. The films are waterproof, have good heat resistance and have a PSA (Pressure Sensitive Adhesive) backing. Can be used on a variety of materials including hardened steels, tungsten carbide, ceramic, glass, precious stones and epoxy. Measures 25 x 150mm (1" x 6").

Micron	Size	Item#	Each
60	25 x 150mm	107-5786	\$20.00
45	25 x 150mm	107-5785	20.00
30	25 x 150mm	107-5784	20.00
15	25 x 150mm	107-5783	20.00
9	25 x 150mm	107-5782	20.00
6	25 x 150mm	107-5781	20.00

A-I Diamond-Impregnated Rubber Wheels and Points – 3/32" Shank

Diamond and rubber combined to give you fast finishes on platinum, precious alloys, titanium and stainless steel. Long-lasting, made in 3 versatile shapes to access the tightest areas. Color-coded for grit identification. Available in three color-coded grits: medium (green), fine (gray) and extra-fine (red). All 3/32" shanks. Max. operating speeds: 10,000rpm. Made in Germany.

Green Gem Polishers – Medium		Dimensions	Item#	Each
A.	Mtd. Point	13 x 4mm	145-1322	\$8.85
B.	SE Mtd. Wheel	11 x 2mm	145-1321	8.85

I.	SE Mtd. Wheel	11 x 4mm	145-1329	15.60

J. Diamond Embedded Polisher – 3/32" Shank

Developed to polish very hard metals (like Platinum, Palladium, Titanium, Stainless Steel). This square edge, 7/8" polisher has microfine ground diamonds evenly embedded in a synthetic rubber bond. Ideal for trimming, reduction, smoothing parting lines, pre-polishing, high-shine polishing. Also an excellent choice for polishing super hard carbide gravers. Max. operating speeds: 10,000rpm. Made in Germany.

Description	Item#	Set Price
Diamond Embedded Polisher	145-1380	\$23.50

K. 3M™ Diamond Hand Pads

Use for precision sharpening of all your blades and tools. Each pad has one cutting face that contains micron-graded diamonds. Open dot pattern provides aggressive cutting action and reduces loading. Flexible backing conforms to irregular surfaces. Pads are color-coded for easy grit identification. Cutting face measures 3 3/4"L x 2 1/4"W. Available individually or in a set of six.

Color	Grit	Micron	Item#	Each
Green	60	250	240-3060	\$37.45

White	800	20	240-3064	18.70
Blue	1800	10	240-3065	18.70
K.	6-Piece Set		240-3085	119.95

L. 3M™ Sponge Sanding Pads – Aluminium Oxide

Flexible, palm-sized Sponge Sanding Pads from 3M conform to almost any surface contour. Made of long-lasting, closed-cell rubber with micron-graded aluminum oxide abrasive grains, these pads will not gouge the work surface. 3M Sponge Sanding Pads can be used wet or dry for a variety of applications as well as folded or trimmed to fit into detailed areas.

Each pad measures 4 1/2" x 5 1/2". Available in Medium, Fine, Super-Fine, Ultra-Fine and Micro-Fine as well as a Set of all 5.

Diamond and CBN Pins

Diamond and CBN (cubic boron nitride) are superior abrasives with material removal rates beyond those of conventional abrasives such as aluminum oxide or silicon carbide. Our diamond pins are ideal for use on carbides and extremely hard steels and ceramics. Our CBN pins are recommended for use on high-carbon, high-chrome, high-speed steels such as M2, M3, M7 and T15; die steels such as D2, D3, HB and A&O; alloy steels harder than 50 HRC; and nickel- and cobalt-based super alloys such as titanium and stainless steel. The cutting edges last longer, resist breakdown better, produce more ground parts per hour and improve the quality of the finished product, helping reduce overall costs. When heat distortion is an important factor, CBN is the wise choice because it runs cooler than diamond.

Diameter	Maximum RPM
.020"-.200"	60,000-120,000
.200"-.500"	45,000-60,000
.500"-1.00"	30,000-45,000

Maximum 1/2" overhang

A. BX and GX Series (BX = CBN, GX = Diamond) - 1/4" Shank

BX are all 80/100 grit. GX are as follows: coarse is 100/120 grit, fine is 140/170 grit. Measure 3" long.

B. SUPER Dresser

Used to dress NSS and SUPER Ceramic Diamond Stones, as well as Cristone stones. Measures 1/8" x 1" x 4" (3 x 25 x 100mm).

Description	Item#	Each
SUPER Dresser	351-0300	\$17.75

C. Wet Stick Diamond Dresser

Use this dressing stone with water for cleaning diamond points. Measures 2"L x 3/4"W x 1/2" thick.

Description	Item#	Each
Wet Stick	380-1022	\$2.30

Mounted Diamond Points - 1/8" Shank

Inexpensive yet durable cutting tools with diamond particles nickel-electroplated onto medium carbon steel. Use on carbide, steel, ceramic and wood surfaces. Heads shown actual size. Measure 1 3/4" long with 1/8" shanks. Sold individually and in three sets (see below). Always use with

water or Lubricant/Thinner (see p. 105). All 1–1.5mm diameter points are fine (150 grit); all 2–5mm diameter points are medium (120 grit). Max. operating speeds: 80,000rpm for 1–3mm dia; 60,000rpm for 3.5–4mm dia; 50,000rpm for 5mm dia.

Heads shown actual size.

30-Piece Set (one of each style)	226-1283	94.50

Diamond Cutters - 3/32" Shank

Feature medium/fine grit diamond particles electroplated onto stainless steel for unmatched quality and durability. Great for stone carving and cleanup work on glass, ceramics and metals. Cutters shown actual size, although entire shank is not displayed. Measure 1 3/4" long with 3/32"

stainless steel shanks. Sold individually and in three sets (see below). Always use with water or Lubricant/Thinner (see p. 105). Max. operating speed: 30,000rpm.

Heads shown actual size.

A, B Diamond Cutter Sets - 3/32" Shank

Description	Item#	Each
A. 12-Piece Set #1 (one each of 226-1161 through 226-1172)	226-1160	\$67.15
12-Piece Set #2 (one each of 226-1181 through 226-1192)	226-1180	57.45
B. 20-Piece Master Set (one each of asterisked above)	226-1159	89.95

C. Diamond Bit Sets

These economical and functional medium/fine diamond bit sets are a good value for the novice or hobbyist. Can be used on ceramic, glass, metal or stone. Include 20 bits in different shapes and sizes and a handy plastic organizer. Bits measure 1 3/4" (44.5mm) long. Available with 3/32" or 1/8" shanks. Max. operating speed: 30,000rpm. Sold only in the set. Always use with water or Lubricant/thinner (see p. 105).

Description	Shank	Item#	Each
20-Piece Set	3/32"	226-1220	\$8.45
	1/8"	226-1221	8.45

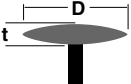

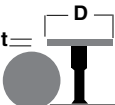

Diamond Wheels and Points - 3/32" Shank

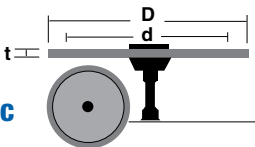

A wide variety of shapes and sizes of diamond wheels convenient for cutting hard metals, ceramics, stones and more. A single layer of diamond is nickel-electroplated to each wheel, ensuring long life when used with only slight pressure. The diamonds are in an exposed position for fast cutting action. All are 140/170 grit with 3/32" shanks. Made in Sweden.

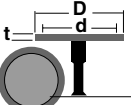

Diameter	Maximum RPM
.020"-.200"	60,000-120,000
.200"-.500"	45,000-60,000
.500"-1.00"	30,000-45,000

Maximum 1/2" overhang

A-I Diamond Cutters – 3/32" Shank

Feature premium-grade, high-impact-strength industrial diamonds electroplated onto ten different shapes. This process provides a super-abrasive grinding and cutting system. The diamonds protrude from the bond so that only the abrasive crystals are in contact with the workpiece. This greatly reduces frictional heat and thermal distortion of the work surface. The use of a coolant (we recommend Gesswein Stoning and Lubricating Oil—see p. 105) will maximize tool life and be a great aid where minimum heat distortion is required. Max. operating speed: 60,000rpm. All are 150 grit with 3/32" shanks.

Style	Style#	Item#	Each
A. Countersink, 60°	101	226-1010	\$22.60

J. Diamond Drilling Compound

Used with Diamond Lapp Drills (below) to drill holes in stones. Base in which diamond is suspended holds particles in place until they become embedded in face of drill.

Size	Item#	Each
1g Syringe	216-0450	\$8.35

K-N Diamond Lapp Drills

Hollow brass drills used with Diamond Drilling Compound (above) to make holes in stones without cracking them. Gently apply drill to surface on which diamond compound has been applied. Use slow speed and let up on drill frequently. Makes perfect holes in onyx, ruby, etc. Due to the 3.75mm shank, use with #30 handpiece. Must be used with Lubricant/Thinner.

Diameter	Item#	Each
K. 1.5mm	813-0100	\$4.75
L. 2mm	813-0200	4.75
M. 2.5mm	813-0300	4.75
N. 3mm	813-0400	4.75
Set of all 4	813-0500	18.25

O, P Sintered Diamond Cut-Off Discs

These discs easily cut carbon fiber, carbide, steels, acrylics and other hard-to-cut materials. The 7/8" disc is sintered diamond throughout; the 1 1/4" disc is sintered diamond on outer edge only (approximately 1/8"). Each has 1/16" arbor hole. Max. operating speed: 20,000rpm.

Dia. x Thickness*	Item#	Each
O. 7/8" x .007"	845-1080	\$35.95
P. 1 1/4" x .040"	845-1085	42.95

*Thickness of each disc may vary slightly.

Q. Diamond Disc Set – 1/8" Shank

Electroplated diamond discs, all medium grit for cutting or sanding stones and glass. Discs measure 1 3/16" (20.25mm) dia. x 0.033" (.84mm) thick x 1/8" AH and have diamond electroplated on both sides. Sold individually or in a 6-piece kit, five discs and a 1/8" mandrel. Max. operating speed: 30,000rpm.

Description	Item#	Each
Diamond Disc 6 pc. Set	226-1225	\$14.35
Diamond Disc	226-1226	3.35

High-Speed Mini Diamond Points - 1/16" Shank

Premium points for use in high-speed, air-driven turbo handpieces with maximum operating speeds up to 80,000rpm. Feature diamond particles electroplated onto surgical-grade steel. Points shown at actual size, although entire shank is not displayed. Measure an average of 3/4" (20mm) long with 1/16" shanks. Sold individually and in sets of 12 and 24. Always use with water or Lubricant/Thinner (see p. 105). Choose from coarse (80 grit) and fine (120/140 grit). Mount in collet-type handpieces with one of our reducing collets (see below).

B

A, B High-Speed Mini Diamond Point Sets - 1/16" Shank

Description	Coarse 80 Grit Item#	Fine 120/140 Grit Item#	Each
A. 12-Piece Set (asterisked above)	226-1601	226-1631	\$26.95
B. 24-Piece Set (one each of above)	226-1600	226-1630	53.95

C-E Reducing Collets

Instantly converts your 1/8", 3mm or 3/32" collet to hold a 1/16" tool shank. Simply slip reducing collet into collet on your rotary handpiece to use 1/16" shanked tools. Make sure both the reducing collet and the tool shank are fully inserted into the handpiece collet. Stainless steel.

Size	Item#	Each
C. 1/8" to 1/16"	816-1502	\$14.90
D. 3mm to 1/16"	816-1505	14.90
E. 3/32" to 1/16"	816-1503	14.90

Six-piece minimum; please order in multiples of six.

Diamond Grinding Wheels - 150 grit, 100 concentration

Feature man-made diamond, more consistent in shape than natural diamond, for sharp, even cutting action, durability and long life. Resin-bonded to produce a self-sharpening effect and even grit distribution. Can be used wet or dry on carbide, ceramic, glass, welds, quartz and other hard, brittle and short chipping materials.

E82	1/2" x 1 7/8"	0.25	220-0200	17.05	16.20

A. Cluster Diamond Dresser CL-18

A universal cluster tool for small surface and cylindrical grinders. Contains 18 diamonds. Six are exposed for immediate use; others appear as dresser wears down.

Style	Dia. x L	Item#	Each
CL-18	7/16" x 2"	220-4150	\$55.45

B. Heavy-Duty Cluster Diamond Dresser HD-15

For roughing out or for commercial finish. Nib is loaded with 15 diamonds. Five are exposed for immediate use; others appear as dresser wears down.

Style	Dia. x L	Item#	Each
HD-15	7/16" x 2"	220-4200	\$82.85

C. Cluster Diamond Dresser CB-24

A bullet-nose carbide bond impregnated dresser randomly set throughout with 24 small diamonds for rough dressing operations on 36 to 60 grit abrasive wheels.

Style	Dia. x L	Item#	Each
CB-24	7/16" x 2"	220-4100	\$53.50

D. Cluster Diamond Dresser PG-4R

A flat-faced nickel alloy matrix dresser containing many particles of diamond sand spaced precisely for dressing operations on 80 grit or finer abrasive wheels.

Style	Dia. x L	Item#	Each
PG-4R	7/16" x 2"	220-4250	\$51.90

E. Diamond Phono Points

High-quality miniature points with full-size, long-lasting diamonds for accurate wheel forming and intricate, small radius dressing.

Size	Dia. x L	Angle (A)	Item#	Each
Large	1/8" x 1"	60°	220-0550	\$8.20
Large	1/8" x 1"	75°	220-0600	8.30
Large	1/8" x 1"	90°	220-0650	6.60

F. Offhand Wheel Dresser

Has 35 to 40 exposed diamond points set in a carbide matrix. Sturdy construction with comfortable, sure-grip plastic handle. Measures 9 3/4" long.

Description	Item#	Each
Wheel Dresser	220-4050	\$77.70

SUPRA® "MM" and "MKM" Brushes

Gesswein miniature mandrel-mounted wheel and cup brushes are made with solid steel ring construction for durability. Brush filaments are permanently anchored in the solid steel ring and uniformly distributed for even wear. Great for flat, curved, small and hard-to-reach surfaces.

Hard and soft bristle types are made of animal hair. Wire brushes constructed of .003" crimped brass, .003" or .005" crimped steel or .005" crimped stainless steel. Maximum operating speed: 15,000rpm. Sold in full dozens; select bristles also available individually. **Items with asterisk also available on 3mm shanks.** Made in USA.

SUPRA® "MM" Bristle Wheel Brushes

Styles 701D, 711D, 702D and 712D each contain two rows of upright bristles. D = Double.

B. Set #2	1/8"	112-8003	21.90

SUPRA® "ME" Brushes

Gesswein miniature mandrel-mounted end brushes are available in a wide variety of sizes. One-piece ferrule construction ensures that the stem and ferrule will not become separated during use. Plastic ferrules are available to prevent scratching when used for interior polishing work. In the table below, please note that those brushes with a style number containing the letter "P" have plastic ferrules, which are slightly larger than stated diameter. All other ferrules are metal. Hard and soft bristle types are made of animal hair. Nylon end brushes consist of 0.018" strands of 500 grit silicon carbide. Our .003" wire end brushes are straight while .005" diameter wire end brushes are crimped. Maximum operating speed: 15,000rpm. **Items with asterisk also available on 3mm shanks.** Made in USA.

SUPRA® “MK”® Bristle Wheel Brushes

The World’s Best Polishing Brushes!

Our most popular unmounted wheel brushes. Feature solid-ring construction for great durability. Contain soft white goat hair bristles, double thick, ideal for applying rouge and compounds. Designed to run true. Mount on our unbreakable SUPRA “MK” Plastic Spindles in seconds, helping speed up production. Can also be mounted on mandrels #20 and #22 (see pp. 584-585 for mandrel specifications). Have brass hubs with 1/8" arbor holes. Maximum operating speed: 15,000rpm. Made in USA.

D, E Plastic Spindles for SUPRA® “MK”® Wheel Brushes

Threaded steel mandrels mounted in hard plastic spindle bases. Accommodate all SUPRA “MK” Brushes. Fit on tapered spindles. Allow easy mounting of brushes—require only slight pressure and a quarter-turn. Choose for right or left motor shaft.

Description	Item#	Each
D. White Spindle for Right Shaft	840-4950	\$10.30
E. Black Spindle for Left Shaft	840-4900	10.30

EL-192 Wheel Brush Aluminum Center – 1/4" Arbor Hole

An absolutely unique and extremely popular brush used in many industries. Made of black stiff horsehair (originally 9" long) with bristles converging, securely mounted to a steel hub. The aluminum center measures 1/4" diameter and the EL-192 can be used with a mandrel or with a tapered spindle. This brush is preferred by jewelers, mold polishers, sculptors and metal working factories. Maximum operating speed: 3,450rpm. Made in USA.

G, H Tampico/Nylon End Brushes, 1/4" Shank

Heavy duty 1/4" shank end brushes for high diamond polishing on larger jobs. 1" diameter helps the polishing get done faster. Available in Tampico for more aggressive polishing and Nylon for higher polishing such as 6 or 3 micron diamond. Brush length is trimmed to the perfect length of 0.75", which eliminates the need for self trimming and provides excellent stability. Plastic rings also provide additional support when applying pressure. Maximum Operating speed: 10,000rpm. Made in USA.

Cocker-Weber Brushes

The Cocker-Weber company has been manufacturing brushes in the United States for over 100 years. They are the world's leader in quality and value, unmatched! The hard wood hubs are cured and resist breaking resulting in long life and strong bristle retention. The plastic unbreakable hubs are more narrow and impervious to water or other liquids.

Made in the USA

A. Superior Quality Wood Hub Wheel Brushes

Our premium, highest quality wood hub brushes are clearly superior to all others. They are made with the very best hard Chungking (animal hair) bristles securely mounted in hardwood hubs. Those with two or more rows of bristles are the converging type for faster action. All have 1/4" arbor holes. Recommended for use on tapered spindles. Maximum operating speed: 10,000 RPM. Made in USA.

SC stands for short cut bristles, which give more aggressive brushing action.

B. Standard Quality Wood Hub Wheel Brushes

The Economy version of Cocker-Weber brushes are marked with a black imprint. They are made with very good quality Chungking bristles, securely mounted in the same high quality wood hubs and are almost as stiff as our Premium type. Those with two rows of bristles are the converging type for faster action. All have 1/4" arbor holes and are recommended for tapered spindles. Maximum operating speed: 10,000 RPM. Made in USA.

12pc Twelve-piece minimum; please order in multiples of 12.

C-F Plastic Hub Superior Quality Wheel Brushes

Consist of extra-hard, premium quality Chungking bristles and are made by Cocker-Weber. Mounted on narrow, unbreakable plastic hubs. Bristles converge especially well eliminating the need for burn-in. All have 1/2" thick hubs with 1/4" arbor holes and recommended for use with tapered spindles. Maximum operating speed: 10,000 RPM.

Safety Recommendations

For safe operation of motor-driven brushes, comply with the Safety Standards of the Industrial Division of the American Brush Manufacturers Association and of the American National Standards Institute: ANSI B165.1-1991, "Power-Driven Brushing Tools—Safety Requirements."

A-C Wire Scratch Wheel Brushes – .003" diameter crimped wire

This superior construction packs much more wire into each brush, which gives faster action, and longer life when compared to wood hub 'tufted' brushes. Synthetic polymer centers (2203B has an aluminum center), ensure secure retention on tapered spindles. Ideal for cleaning, light deburring and imparting a fine satin finish on nonferrous metals such as gold and silver. Use brass on yellow metals, others on white metals. All have 1/4" arbor holes. Maximum operating speed: 6,000rpm (4,000rpm for 4403B). Made in USA.

**D. Scotch-Brush, 3" Dia.**

Two ply of 3M™ Scotch-Brite™ are supported by two rows of stiff white Chung King bristle secured onto a plastic hub. The bristles give support to the application of more pressure for faster results. Additionally, both brush and Scotch-Brite™ accept compounds and pastes making this a versatile finishing tool. May be use on tapered spindle. Max operating speed 2,800rpm.

A-I Micro Spiral Brushes – Abrasive Bristle

Nylon bristle with aluminum oxide abrasive. This new brush concept is a perfect tool for cleaning or light bur removal in through holes or on hole edges. The 0.3mm diameter nylon bristle contains 500 grit AIO abrasive grain. Easy to hold and use by hand or can be carefully used in a rotary handpiece if run no faster than 1,500rpm* (3mm shank diameter). Each brush's wire mandrel top (except MSB 2.2 and MSB 2.7) is coated with epoxy resin to protect the work surface from damage.

Texturing Wheels

Whether you want a fine satin finish, a coarse textured surface or something in between, Texturing Wheels have it covered. Choose from a wide variety of sizes and wire diameters to get the exact finish you're looking for. They produce a look similar to a sandblasted finish without the gritty mess or chore of changing sand in the blaster. You don't even have to get up from the bench. Mounted Texturing Wheels ($\frac{3}{32}$ " shanks) can be used on a standard flex shaft handpiece. Unmounted Texturing Wheels can be used on a tapered spindle on your polishing motor. Consist of steel wires firmly attached to plastic hubs. Color-coded for easy selection. Benchtop dust collector or gold saving box strongly recommended to collect gold for refining. Safety goggles or face shield and finger protection required.

A-D Mounted Texturing Wheels – $\frac{3}{32}$ " Shank

Wheels in four different sizes and a variety of wire diameters for use on your flex shaft. Use with safety goggles (face shield and finger guards also recommended). Recommended operating speed: 5,000rpm.

Gesswein® Buff Selection Guide

Muslin, flannel, felt, and cotton materials create buffs with different polishing characteristics. Used with compounds, buffs can handle everything from removing deep scratches to imparting a high luster. Reserve just one buff for each compound to avoid mixtures, which can produce unpredictable finishes. Made in USA except where indicated. When selecting buffs, please consider the following information:

Stitched Buffs: Joined by several rows of stitching for firmer action. Use with cutting or polishing compounds.

Loose Buffs: Joined only at arbor hole for softer action and following contours. Use with rouge for final polishing.

Razor-Edge Buffs: Perfect for reaching into tight areas.

Chemical Treatments: Improve stiffness and provide better compound retention. Use with cutting compounds for fast action.

Combed Edges: Hold compounds well. Require no break-in period.

Centers: Choose from leather reinforced or shellac-hardened pinhole and lead for use on tapered spindles. Also available; 3/8" arbor holes for use on 3/8" arbor shafts.

Why Choose Gesswein® Buffs?

What makes our Made in USA buffs better than many competitors can be summarized as follows:

Premium quality 100% cotton carded cloth with 80/80 and 86/80 thread counts (the number of threads per square inch in each direction). The yarn size is 30/30. These consistent thread counts and tight weaves make our buffs more wear-resistant and longer lasting.

Our polymer plastic treated buffs give superior performance to starch treatments used by some others.

When processing we take extra care to relieve the folds and wrinkles inherent in a bolt of cloth and use a die cutter that prevents nicks and ensures cuts are not made from the salvage edge of the cloth. We turn every other ply so that it is offset by at least 45 degrees which prevents premature thread fraying, ensures

even and circular wear and improves compound retention. Well turned buffs will outlast unturned buffs by up to 50%.

We regulate tension, stitching, and sewing pattern parameters. Tension is such that when stitches are pulled up, they snap back to the buff. Stitching is kept to 4-6 stitches per inch on the buff, 9-16 on the leather center, and the sewing needle is lifted between each row of stitching to create a truly concentric sewing pattern. All these factors add up to longer lasting buffs.

We inject shellac into the center of each buff making the entire center hard which allows the buffs to be repeatedly taken on and off the spindle without becoming wobbly. Some manufacturers simply dab or stamp shellac onto the center.

For longer life, better cutting and polishing and superior value – use Gesswein Buffs.

A. Loose White Muslin Buffs – 3/8" Arbor Hole

Made of fine-weave muslin with combed edges. Have 3/8" diameter arbor holes for use on 3/8" arbor shafts. Not for use on tapered spindles. Made in USA.

Dia. x Ply	Thread Count	Item#	EACH Prices			
			1-11	12-35	36-14	144+

6" x 20	80/80	140-4520	2.40	2.16	1.92	1.68

B. Razor-Edge White Muslin Buffs – Leather Pinhole Center

Made of fine-weave muslin except for #140-8650, which is made of coarse-weave muslin. Can reach into areas where conventional buffs cannot, such as corners, channels and slots. Stitching provides firm edge and maintains buff shape. Buffs with 86/80 thread count are a bit stiffer and more aggressive than buffs with 80/80 thread count. Made in USA.

Dia. x Ply	Rows of Stitching	Thread Count	Item#	EACH Prices			
				1-11	12-35	36-143	144+
2 1/2"	3	86/80	140-8250	\$2.35	\$2.12	\$1.88	\$1.65

	3½"	143-1350	29.85	24.87

D. Canton Flannel Buffs – Shellac Pinhole Center

Made of soft, thick fabric with combed edges and shellac-hardened centers. Use with rouge to impart a high finish on precious metals. Excellent for high-karat gold and silver.

Dia. x Ply	Rows of Stitching	Item#	EACH Prices	
			1-11	12+
4" x 30	3	142-8400	\$3.85	\$3.21
5" x 30	3	142-8500	5.20	4.33
6" x 30	4	142-8600	6.85	5.71

E. Felt Buffs – Leather Pinhole Center

These wool felt buffs combine the excellent compound retention and long life of a lap with the flexibility and conform ability of a buff. Soft is flexible for following surface contours and is perfect for rouge and other polishing compounds. Medium is semi-flexible and designed for use with tripoli on soft metals. Both have four rows of stitching.

Dia. x Thick	Type	Item#	Each
6" x ¾" (6 ply)	Soft	283-0001	\$14.75
6" x ¾" (6 ply)	Medium	283-0002	18.65

F. Brilliant Buff – No rouge, no mess!

Made of soft, long-strand pure Egyptian cotton treated with an environmentally friendly polishing chemical that creates no mess. Yields a bright shine on platinum, gold and silver without additional compound. After using Tripoli, polish with this buff for a brilliant finish. Leaves behind an undetectable residue that inhibits tarnish. For use on tapered spindles.

Dia. x Thick	Item#	Each
4½" x ¾" (30 ply)	142-0010	\$12.95

G, H Duratex Buffs

Use for cutting and polishing all types of metal and acrylic. Silicon coated on one side, the cotton material does not give off lint and holds compound much longer than normal buffs ½" thick. Brown buffs are meant for use with harder metals: platinum, white gold, and stainless steel. White buffs are best for use with softer metals, like silver and yellow gold. Made in Germany.

Description	Dia. x Ply x Arbor Hole	Item#	Each Price	
			1-11	12+
G. Brown Buff	4" x 15 Ply x ¼"	142-5410	\$10.75	\$9.68
Brown Buff	5" x 15 Ply x ¼"	142-5411	12.25	11.03
Brown Buff	5" x 30 Ply x ¼"	142-5412	20.30	18.27

G, H Duratex Mounted Buffs – 3/32" Shank

Use for cutting and polishing all types of metal and acrylic. Silicon coated on one side, the cotton material does not give off lint and holds compound much longer than normal buffs 1/2" thick. Brown buffs are meant for use with harder metals: platinum, white gold, and stainless steel. White buffs are best for use with softer metals, like silver and yellow gold. Made in Germany.

D. Countersunk Felt Bob – 3mm Shank

Specially designed for polishing flat surfaces, utilizing the end of the bob. The center hole on the bob helps stabilize it while rotating so it is easy to control and won't "walk." In addition, the tapered sides allow you to polish to the side wall, without it inadvertently being polished. Measures 7/8" dia. x 1"H with a 3/8"D cavity. Mounted on 3mm shank. Made in USA.

Hardness	Size	Item#	EACH Prices	
			1-5	6+
Rock-Hard	3mm shank	295-0012	\$5.10	\$4.85

G. Mounted Felt Wheel with Plastic Hub – 3/32" Shank

Soft felt wheel mounted on a nonscratching plastic hub with 3/32" stainless steel shank. Works so well that it's patented. Use with compound for cutting and polishing. Made in India.

Dia. x Thick	Type	Item#	EACH Prices	
			1-11	12+
1" x 3/16"	Soft	288-2209	\$1.35	\$1.22

H. Compressed Fiber Wheel – 3/32" Shank

Fibers are compressed and bonded with aluminum oxide to make a firm, dense long lasting wheel with some flexibility. Creates a beautiful scratch finish that contrasts well with highly polished areas. Recommended working speed: 5,000rpm. Made in Germany.

Dia. x Thick	Type	Item#	EACH Prices	
			1-11	12+
7/8" x 3/8"	Coarse	288-2250	\$4.95	\$4.46

I. Diamond Impregnated Felt Bobs – 1/8" Shank

Diamond abrasive is loaded throughout the wool felt eliminating the need for additional compound. Ready to work immediately, they polish quickly, constantly introducing new diamond abrasive to the work surface. The diamond felts are also *self-lubricating* so no extra lubricant is required. Available in 4 grits from 1 micron to 15 micron in our 2 most popular shapes. All 1/8" shanks. Made in USA.

B. DUROTEX™ Abrasive Impregnated Composites – 1/8" Shank

DUROTEX composites are made out of a tough and resilient polyurethane type material. Available with Silicone Carbide or Aluminum Oxide grain, the composite bond and abrasive grain wear evenly to ensure consistent performance and surface finishes. DUROTEX is high temperature resistant and will not heat up or melt even under strenuous conditions. Can be used on many materials including all metals, (even brass and titanium), glass and more. Please consult ANSI for speed recommendations. All 1/8" shanks. Made in USA.

Felt Wheels

Manufactured from carefully selected wool without synthetic fibers or fillers, ensuring product reliability. Feature uniform density throughout for longer life. Yield high-quality finishes every time. Can be shaped.

A. Soft Felt Wheels – For High Finish

Can be used on irregular surfaces where fast metal removal is unnecessary. Very flexible. Pinhole centers. Mandrel not included (see pp. 149, 584-585 for mandrel selection). Made in USA.

Dia. x Thick	Item#		EACH Prices

Safety Recommendations

Mandrels and mounted accessories improperly used are dangerous. Comply with American National Standards Institute Safety Code B7.1 and Occupational Safety and Health Act covering speed, safety guards, flanges, mounting procedures, general operating rules, handling, storage and inspection. Speeds to use depend on the accessory.

Gesswein® Laps

Lapping maintains integrity of flat surfaces and keeps angles and corners from being rounded off during polishing. Unlike buffs, which are soft, laps are very firm and have a wider area to cover much more of the work surface. Can even be shaped to knife or beveled edges.

When selecting laps, please consider the following information:

Felt Laps: Pure wool felt laps hardened by a process of steaming and pounding. Free of artificial hardeners.

Diamond-Hard Laps: Pure wool felt laps excellent for lapping due to a treatment that results in extreme density.

Split Laps: Slotted in four places to allow user to see finish as work is held on lap. Use on split lapping machines.

Silicone: Superior finish on gold and other precious metals.

GMX: Unique bond of abrasive-impregnated cotton in flexible bond. Excellent for deburring and blending aluminum, stainless steel and exotic alloys.

A

A. Gesswein/Paramount® Felt Laps

Pure wool felt laps uniquely made to ensure proper hardness and performance. All have pinhole centers. Max. operating speed: 3,450rpm. Made in USA.

B. 14" x 14"	820-0275	9.95	9.45	8.96

C. SELVYT® Microfiber Cloth

Ideal for cleaning diamonds and gemstones. Made of ultra-soft heavy brushed microfiber. Retains softness after repeated washing. Stitched edges prevent fraying. Machine washable. Made in UK.

Size	Item#	EACH Prices		
		1-5	6-11	12+
10" x 10"	820-0260	\$5.50	\$5.23	\$4.95

D. SELVYT® SC Cloth for Silver

Contains an anti-tarnish agent, Selvyt SC removes light tarnish from silverware and silver jewelry. Leaves behind an invisible coating that eliminates oxidation. Stitched edges prevent fraying. Made in UK.

Size	Item#	EACH Prices		
		1-5	6-11	12+
10" x 10"	820-0280	\$5.75	\$5.46	\$5.18

E-G. SELVYT® SR Cloth

Made of pure unbleached cotton. Features no-lint texture that polishes without scratching. Use on precious jewelry, watches, silverware and crystal. Retains its suppleness even after repeated washing. Made in UK.

Size	Item#	EACH Prices		
		1-5	6-11	12+
E. 5" x 5"	820-0100	\$1.50	\$1.43	\$1.35

G. 14" x 14"	820-0205	7.65	7.27	6.89

H. SELVYT® JC Cloth

The Selvyt JC (Jewelry Cleaning) cloth is ideal for cleaning gold and most other metals such as brass, copper, platinum and silver. Manufactured in a chemically impregnated red cotton fabric, Selvyt JC is a professional's cloth that can be used at home too. Non-scratching. Edges are bound to keep them soft. Measures 10" square. Made in UK.

Size	Item#	EACH Prices	
		1-11	12+
10" x 10"	820-0287	\$5.75	\$5.18

I. KIMTECH® Mold Polish Wipes

Use for cleaning the most extreme high polished surfaces. Can be used with diamond compound for the ultimate finishing touch. Engineered for excellent absorbency and low-lint wiping, these disposable wipes are solvent resistant and contain no binders or surfactants. Rayon/polyester spunlace material for cloth-like softness. Applications include mold polishing, aerospace, clean manufacturing areas, DVD manufacturing and printing. 1 roll = 225 sheets. Each sheet measures 7" x 7".

Description	Item#	EACH Prices	
		1-5	6+
Kimtech Mold Polish Wipes	820-0515	\$33.50	\$30.15

J. Cape Cod Anti-Tarnish Polishing Cloth

With easy rubbing, this moist cotton cloth removes dirt and tarnish from sterling silver, gold, brass, bronze, copper, pewter, aluminum and stainless steel. Also leaves behind an invisible coating that protects against tarnish, water stains and corrosion. Keeps jewelry brighter longer. Sold in packages of two.

Size	Item#	PKG. of 2	
		1-11	12+
4" x 6"	820-0370	\$5.15	\$4.29

Busch® Burs 3/32" Shank

Made of tungsten vanadium steel for strength and durability. Feature precision-machined, uniformly spaced teeth for accurate and smooth cutting. Use with a good lubricant such as Gesswein Lube-Stik (see p. 480) to facilitate cutting and prolong tool life.

The 3/32" shanks measure approximately 1 3/4" long. Maximum operating speed varies with bur size and is indicated on each individual box. Burs packaged six to a box and available only in multiples of six unless otherwise indicated. Please consult ANSI (American National Standards Institute) for speed recommendations. Made in Germany. **Please ask for quotes on larger quantities.**

Cup Burs 3/32" Shank

Cup burs are used to quickly and easily remove burrs and round off the ends of wires and prongs. Much easier than using a file. Measurements are taken from the outside of the head, so good rule of thumb is to select a bur 2 sizes larger than the wire or prong you are using. Please consult ANSI (American National Standards Institute) for speed recommendations.

Busch® Twin-Cut Cup Burs – Fig 411T

Unique cup burs for fast and safe prong shaping. Feature twin-cut blade geometry. Shorten, round and burnish in one step. Allow easy metal discharge through two slits. **See website for smaller sizes.**

High Speed Burs $\frac{3}{32}$ " Shank

Made of extremely rugged high-speed steel to withstand heat buildup under the most extreme conditions. On average our High Speed burs have 20% more fluting than other brands which creates a fine surface finish. Cut faster and last longer than vanadium steel dental burs. Please consult ANSI (American National Standards Institute) for speed recommendations. Made in USA.

Gesswein® Lube-Stik

Use on grinding, cutting, drilling, piercing or similar tools to speed up production and increase tool life. Reduces both friction and heat buildup so that tools stay sharper, work faster and cut smoother. Easy to use: just run your tools into the soft lubricant every so often. Can also be used to reduce the effort needed for drawing operations. Supplied in handy push-up dispenser tube.

TiN (Titanium Nitride) Burs $\frac{3}{32}$ " Shank

Made of high-speed steel, with a TiN (titanium nitride) coating that increases wear resistance to 10–20 times that of plain steel. Significantly improves corrosion resistance, reduces friction and allows freer chip flow for better workpiece finishes. Sold individually or in convenient, money saving sets,

so you always have the bur you need when you need it. Please consult ANSI (American National Standards Institute) for speed recommendations. Made in USA.

Includes one of each bur listed above.

Description	Item#	Each
71-Piece Set	130-1014	\$610.50

A

Jeweler's Carbide Burs $\frac{3}{32}$ " Shank

Burs individually hand-cut with diamond wheels. All have fine teeth. Outlast and cut faster than any other burs. Sizes 4-8 feature one-piece construction; sizes 9 and larger are securely brazed onto $\frac{3}{32}$ " steel shanks. Must be run at maximum speed—will chip if started on work at

slow speed or if not removed from work at fast speed. Can be resharpened. Please consult ANSI (American National Standards Institute) for speed recommendations. Made in USA.

Carbide Cylinder Burs

For cutting and smoothing the inside of rings and cylinders as well as for edge breaking. Available in three styles for a fine, very fine or super fine finish. Are 'double cut' to produce a smooth surface and better operator control of the bur. Solid carbide heads are securely brazed onto steel shanks. Made in USA.

Busch® Carbide TiNitride Coated T426 SPEED – 3/32" Shank

Suitable for cutting and contouring all types of precious metal alloys. Titanium Nitride coating on Carbide produces a tool with an exceptionally long life. The 6mm diameter bur's end is rounded for safety. Made in Germany.

Head Dia. x L (mm)	6.0 x 13.0
Item#	124-3860
EACH	52.09

Wolf Wax High Speed Steel Cylinder Burs

Made of high-speed steel. Coarse cut for rapid removal of wax. Teeth on the end for milling. Longer cutting surface. Shorter shank (25mm) reduces centrifugal wobble.

Busch® High Tech Carbide Tools ^{3/32"} Shank

Carbide burs and drills are known for their particular hardness and the resultant tool life, as well as their cutting capacity. These advantageous properties now also make it possible to economically process materials, which are very hard and difficult to cut (such as platinum, white gold, titanium, and steel). Let yourself be captivated by reproducible results and smooth, shiny surfaces!

Busch AU style carbide burs cut more aggressively than standard carbides. Edges are more precise (making setting easier) and they produce a brighter finish. Available in Round as well as 90° and 70° Hart shaped burs. Round burs are packaged six to a box, available only in multiples of six. Both 90° and 70° Hart burs are packaged two to a box, available only in multiples of two. Shanks are marked with a gold band for easy identification.

Busch Carbide Twist Drills have a robust 2-blade construction and generously sized chip channels. Made of super-hard fine grain carbide these drills are designed to work both on the harder metals associated with carbide tools and on white gold as well. Numerous perfect drill holes can be replicated with the same tool when using a coolant such as our Lube-Stik #816-2461 (see p. 480). Twist drills are packaged two to a box, available only in multiples of two.

Please consult ANSI (American National Standards Institute) for speed recommendations. Made in Germany.

Please ask for quotes on larger quantities.

Super Carbide Burs $\frac{3}{32}$ " Shank

Made of the finest tungsten carbide, accurately fluted and honed to sharp cutting edges, end cut. Consist of heads brazed onto $\frac{3}{32}$ " steel Shanks. Have coarse tooth structure. Designed to operate at very high speeds. Cannot be resharpened. Please consult ANSI (American National Standards Institute) for speed recommendations. Made in Germany.

WHITE® Carbide Burs $\frac{3}{32}$ " Shank

High-quality tungsten carbide burs securely brazed on heat-treated $\frac{3}{32}$ " steel shanks and approximately $1\frac{3}{4}$ " in length. Bur teeth are reinforced with extra carbide for elimination of premature chipping. Superior fluting improves cutting edges for pinpoint accuracy. All are end cut. Cannot

be resharpened. Please consult ANSI (American National Standards Institute) for speed recommendations. Available only in multiples of five. Made in USA.

A. Reducing Collets

Convert your $\frac{1}{8}$ " or 3mm handpiece collets to hold $\frac{3}{32}$ " shank tools. Easy to use: slip the reducing collet into your handpiece collet, then slip the tool into the reducing collet. Make sure the reducing collet and the tool are fully inserted before operating.

Description	Item#	Each
$\frac{1}{8}$ "- $\frac{3}{32}$ " Collet	816-1501	\$14.90
3mm- $\frac{3}{32}$ " Collet	816-1504	14.90

B. Gesswein® Lube-Stik

Use on grinding, cutting, drilling, piercing or similar tools to speed up production and increase tool life. Reduces both friction and heat buildup so that tools stay sharper, work faster and cut smoother. Can also be used to reduce the effort needed for drawing operations. Supplied in handy push-up dispenser tube.

Description	Item#	EACH Prices	
		1-9	10+
Lube-Stik	816-2461	\$5.55	\$5.00

(5pc) Five-piece minimum; Please order in multiples of Five.

WHITE® Friction Grip Carbide Burs 1/16" Shank

Made from super-hard carbide securely brazed onto 1/16" steel shanks. They withstand extremely high speeds up to 350,000rpm but please consult ANSI (American National Standards Institute) for speed

recommendations. Designed to get into small spaces. All fit our NSK Presto Air Turbine 850-7235, (p. 451). See below for reducing collets from 1/8", 3mm or 3/32" to 1/16". Made in USA.

Shown actual size

BURS

Your handpiece doesn't accept 1/16" shanks? Use a reducing collet. (see below)

Replacement Vinyl Sweatband	270-0214	3.50

B

Gesswein® Solid Carbide Burs

Plain cut Double cut

Gesswein Solid Carbide Burs are made from laboratory-certified raw material. Most are machine-ground by CNC, producing geometric uniformity in shape and depth of flute. Controlled material selection and CNC manufacturing ensure high product consistency from order to order for dependable cutting action and much longer bur life. All Gesswein Solid Carbide Burs feature one-piece construction (head and shank made of one piece of carbide) unless otherwise indicated. Supplied in two fluting styles: plain cut, which provides aggressive cutting action for fast stock removal, leaving a better finish than plain cut. Made in USA.

Maximum Speed Recommendations (rpm):

Bur Cutting Diameter	1/16"	3/32"	1/8"	3/16"	1/4"
Stainless Steel	75,000	65,000	55,000	40,000	35,000
Other Common Materials	50,000	45,000	35,000	27,500	25,000

These are suggested speeds only. Faster and slower speeds may be used for different materials.
Please consult ANSI (American National Standards Institute) for speed recommendations.

Gesswein® Solid Carbide Burs 1/4" Shank; 2" Overall

One-piece construction. 1/4" and 3/16" cutting diameters on 1/4" shanks. Can be resharpened. 6mm shanks and double cut available on special order.

Plain Cut Set	129-2000	\$165.00

B

B. Gesswein® Lube-Stik

Use on any grinding, cutting, drilling, piercing or similar tool to speed up production and increase tool life. Lube-Stik reduces friction and heat buildup so that tools stay sharper, work faster and cut smoother. Easy to use—just run your tool in the soft lubricant. Supplied in a handy push-up dispenser tube.

Gesswein® Solid Carbide Burs 1/8" Shank; 1 1/2" Overall

Each features one-piece construction—head and shank are fashioned from a single piece of carbide. Available in two fluting styles: plain cut and double cut. Plain cut provides aggressive cutting action for fast stock removal, leaving a slightly rough finish. Double cut makes small chips for efficient stock removal, leaving a better finish than plain cut. Can be resharpened. Measure 1 1/2" long. Made in USA.

C

Gesswein® Innox Carbide Burs – 1/8" or 1/4" Shanks

Gesswein Innox carbide burs are designed with a special geometry to suit growing market demands for stainless steel applications. This is a cost effective alternative to standard solutions due to the greater rate of stainless steel stock removal as well as on Ferritic, Austenitic & Martensitic based materials.. Made in USA.

Features & Benefits

- Specifically developed cutting geometry—Generating high stock removal on Stainless Steel components
- High performance grinding—Ensuring production savings
- Specifically engineered Stainless Steel cutting geometry—Reduces heat build up at the cutting edge and workpiece
- Manufactured from high quality sintered tungsten carbide—Guaranteed high performance and durability
- CNC Machined—High consistent quality
- Manufactured to strict quality control standards—Incorporates 100% inspection of brazed joints on the 1/4" diameter cutting burs.

B

A, B Gesswein® High-Speed Steel Blanks and Cutters

Use with CNC, pantograph or duplicating machines. Made of premium high-speed steel and heat-treated to a hardness of 62–65 HRC in a process that retains toughness. Not as durable as carbide cutters but effective for tasks that require greater tip resiliency, such as making deep, fine cuts. We suggest they be ground by plunge-cut or cross-feed method with a soft grinding wheel. Centerless ground to a tolerance of $+.0000/-0.0002$ ", with flats that are within $.001$ " above center. All have flat length of 0.565 " except #151-9630 and #151-9660, which have flat length of 0.400 ".

A, B Solid Carbide Square-Nose End Mills

Made of premium micro-grain carbide for superior performance and greater wear resistance. Stay sharp longer than regular carbide end mills, with less chipping and breaking. Available in two-flute and four-flute styles. Right-hand, center cutting, 30° spiral.

Tolerances:

Cutting Diameter +.0000/-.0020"
Shank Diameter -.0001/-.0004"

C-F Gesswein® Super Carbide Blanks and Cutters

Stay sharper and last up to five times longer than standard carbide due to high cobalt content. Ideal for use on tool steel, stainless steel, Inconel and other high-temperature metals. Centerless ground. Overall tolerance: +.0000/-.0005". Split tolerance: +.000/-0.001". Hardness: 91.8 HRC. Density: 14.74g/cc. Transverse rupture strength: 400,000 PSI. Use with pantograph or duplicating machines.

Interested in CAD/CAM but not sure if it is right for you?

If you're already using CAD (Computer Aided Design) you already know the main benefits:

- Easily create custom pieces for your select clients. Respond to local interests making you and your firm the first place customers think of when they want something truly special.
- Quickly show the concept, get immediate customer input for revisions and close the sale while the excitement of the design plan is at its highest.
- Break away from the limitations of hand carving; saving time, effort and providing utmost perfection in your models.

Having both your own CAD and CAM (Computer Aided Manufacturing) also known as 3D Printing, is an extension of this immediacy:

- You control the production schedule: no waiting on your supplier's schedule and complete elimination of delivery time.
- By keeping production in-house, your unique designs are secure.

Gesswein is proud to be teamed up with FormLabs and EnvisionTec. This alliance allows us to offer the latest technologies with the latest capabilities for you and your firm, letting you compete with other designers on a level playing field.

Interested? Call in to speak with one of our specialists to explore how these different options can help you. Also, check out our website, these technologies change quickly and the most up-to-date information will be found on-line.

"...I have worked with and have experience in ALL machines... milling machines, Roland, Solidscape, Perfactory. I gotta tell you honestly...I love my [Aureus] desktop. I would not trade it for anything else."

— Hien Nguyen, Owner
Trademark Jewellery

We offer the machinery and resins you need to save time and money while you keep total control over your intellectual property and unique designs.

Our software is easy to learn and easy to use. You'll quickly be producing intricate models.

A. 3-D Design Software

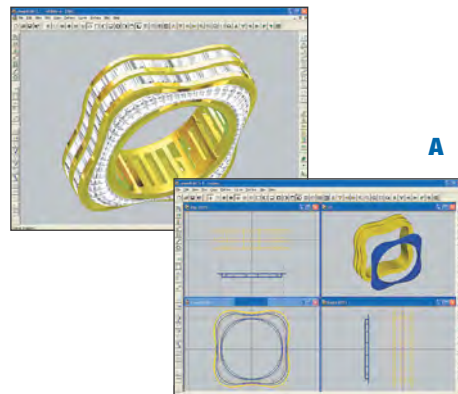

We have many different software packages available for you, our specialists can help you determine the right one for your needs. Please see our website, Gesswein.com for full details.

JewelCAD Pro (266-4009) known for its non-engineering approach and simple interface resulting in a fast learning curve.

Firestorm CAD (266-4015) a direct modeling program. Create your design and import it into the system. Training is included in the purchase price.

3DESIGN CAD 7 (262-0119) user friendly software for advanced 3D model creation.

Description	Item#	Each
JewelCAD Pro V5.1	266-4009	\$3,995.00
Firestorm CAD	266-4015	6,500.00
3DESIGN CAD 7	262-0119	6,600.00

A

B. UV Post Curing Chamber

Designed to cure (harden) 3D printed resin models after production prior to casting. Settings include run times in intervals of 5 and 10 minutes and continuous mode.

Description	Item#	Each
UV Post Curing Chamber 110V	262-0190	\$125.00
UV Post Curing Chamber 220V	262-0191	125.00

B

C. Gesswein UV Curing Chamber 110V

Designed to cure (harden) 3D printed resin models after production prior to casting. Specialty high intensity UV lamp cures models in 3-5 minutes, depending on the resin being cured. Recommended to operate at 2-3 minute intervals to prolong the life of the lamp. Comes installed with a "Cooling" Fan in order to keep the high strength lamp running at the optimal temperature. Replacement lamp sold separately, see related products below. Approximate life of the UV lamp is 800 hours.

Description	Item#	Each
Gesswein UV Curing Chamber 110V	262-0195	\$995.00

C

D. Formlabs Form Wash

Form Wash's impeller agitates isopropyl alcohol (IPA) to flow around every nook and cranny of your part, getting them perfectly clean every time. When washing completes, Form Wash automatically raises parts, making sure your designs never warp. Parts air dry and are ready when you are. BUILT TO FIT THE BUILD PLATFORM: Parts can stay right on the build platform protecting delicate prints, or be removed and placed in the basket. SIMPLE IPA MONITORING: Form Wash can hold up to 8.6 liters (approx. 9 quarts) of IPA, enough to wash approximately 70 prints. The wash bucket is removable. An included hydrometer lets you know when it's time to change out IPA. A siphon pump makes it easy to transfer IPA into and out of the wash bucket. Approximate wash time when using fresh IPA is 15 minutes. Made in China.

Description	W x D x H	Item#	Each
Formlabs Form Wash, 90~264V	10.3" x 11.5" x 13.4"	262-0164	\$499.00

D

E. Formlabs Form Cure

Once your parts are cleaned - see Form Wash above. The parts go to the Form Cure. FINELY TUNED FOR CONSISTENT CURING: An advanced heating system precisely controls curing temperatures up to 80° C. 13 multi-directional LEDs emit the optimal wavelength of light for curing Formlabs materials, 405 nanometers. A rotating turntable provides uniform exposure during post-curing. The heating system preheats the chamber to get parts ready for optimum post-curing. Made in China.

Description	W x D x H	Item#	Each

E

F. EnvisionTEC LED Post Curing Chamber

The LED Post Curing Unit is a light polymerization chamber for the hardening/curing of light curing resins. This final step (curing the model/part) after 3D printing and cleaning a 3D printed model/part results in higher strength and stability as well as ensuring a thorough cure, especially important in parts slated for direct casting. The LED Post Curing Unit features an adjustable shelf, allowing for smaller items to be placed closer to the LED's for faster curing times. Made in India.

Description	Item#	Each
EnvisionTEC LED Post Curing Chamber	262-0108	\$995.00

F

EnvisionTEC

EnvisionTEC was founded on a deep understanding of additive manufacturing, a drive to succeed and a commitment to deliver real value. EnvisionTEC's first 3D printer was a hit in the jewelry market – largely because of its ability to deliver incredible precision and surface finish, quickly – and the technology spun out to other sectors from there. Customers who manufacture hearing aids, dental prosthetics and other small and smooth parts followed. For 15 years, EnvisionTEC has been delivering advanced 3D printers and materials to Aerospace Engineers, MCAD designers, Doctors, Dentists, Laboratories, Researchers, Jewelers, Animators and many more.

Today, as the 3D printing market continues to mature, many different processes are used around the world to 3D print objects from digital design files. In order to serve the professional market, you need professionals who get it. EnvisionTEC's leaders have been on the frontlines of the additive movement —and it shows.

A

B

A. Micro Plus Advantage and Micro Plus High-Res

This family of 3D printers provides the ideal desktop companion for a wide variety of 3D printing applications. Available in two configurations, the Micro Plus series is a professional grade 3D printing solution utilizing an industrial UV LED light source and an integrated, embedded PC with Wi-Fi. The touchscreen adds convenience to the user interface, allowing for the necessary files for print to quickly and easily be transferred from any network computer directly to the Micro Plus via Wi-Fi. The Micro Plus 3D printers can produce functional parts with exceptional surface quality without sacrificing speed. The materials available for the Micro Plus line cover a wide range of applications, including jewelry, toy, medical, industrial design and engineering, and more. Micro Plus Advantage (262-0146) and Micro Plus High-Res (262-0148)

B. Aureus Plus

An enhanced version of EnvisionTEC's best-selling machine for the low production of customized jewelry. With its unbeatable price to performance ratio the Aureus PLUS is the perfect choice for the small to medium sized company looking to fill their 3D printing production requirements. Round-the-clock production is achievable due to the ability to run unattended, and with the significant speed increase in the Aureus PLUS model, production is greatly increased as well. Aureus Plus (262-0109)

C-H EnvisionTEC Resins – Visit our website for the most up-to-date information.

C. PIC100

Developed for direct investment casting of products for the Jewelry market. It offers excellent burn out properties and build with the highest quality and crisp detail. The material is processed on all Perfactory® systems. EnvisionTEC PIC100 builds extremely smooth surfaces.

D. EC500

EnvisionTEC's innovative direct investment casting material, Easy-Cast EC500 has 30% faster build times and dramatically improved casting abilities, as well as zero ash content.

E. HTM140V2

Dramatically changing jewelry manufacturing by eliminating the need to make a silver/metal master and then vulcanizing in rubber. The new HTM140V2 photopolymer (stands for High Temperature Mold Version 2) is designed to withstand the heat and pressure of vulcanizing the model in rubber with beautiful detail.

F. EC3000

EnvisionTEC's innovative direct investment casting material, has 3 times more wax than any polymer based material, including EC500. It does not boil during burnout, a leading cause of porosity during casting among competitive products.

G. EPIC

EPIC is a wax-based material which offers the crispness of EnvisionTEC's PIC materials with the castability of its EC-500 materials in a new formulation that delivers a desirable combination of price, performance, and reliability.

H. PHOTOSILVER

is an RP resin that can produce high detail models straight from the machine without the need for finishing. Can be used directly for molding using conventional techniques and materials. Ceramic filled photopolymer material which produces highly detailed parts with crisp features. High temperature resistance allows for the production of vulcanized rubber molds without breaking or melting the master pattern.

FORMLABS

Unlock your creativity one build at a time! Gesswein and FormLabs are committed to bringing innovative and sophisticated fabrication tools into the creative hands of designers, engineers, and artists around the world. An unprecedented convergence of design, performance, and accessibility, the Form 2 brings professional-quality 3D printing to a broader audience. We believe in what we do, and we're excited about creating powerful tools that change the way we work and live.

The Technology

Looks-Like: Test design iterations and communicate ideas to stakeholders affordably and quickly.

Works-Like: Reliably develop proofs of concept and test functional prototypes with materials closely matching common injection-molded plastics.

Feels-Like: Simulate a range of materials from rubber to rigid, and create prototypes with the smooth finish and feel of end products.

A. FORMLABS Form 2

From concept to design, the Form 2 is a powerful tool for jewelers, artists, and designers. Quickly prototype new designs and rapidly produce large batches of ready-to-cast parts. (262-0168)

Everything you need to start printing! Form 2 + Finish Kit includes the Form 2 3D printer, Resin Tank (1), Build Platform (1), Finish Kit, and PreForm Software. You also select the appropriate resin for your usage. Jewelers and designers can go directly to investment with their Form 2 Castable Resin. (262-0170)

Specifications:*

Dimensions:	35cm × 33cm × 52cm (13.5" × 13" × 20.5")
Wt:	13kg (28.5 lbs)
Operating Temp. (Suggested):	Auto-heats to 35° C (95° F)
Temp. Control:	Self-heating Resin Tank
Power Requirements:	100–240 V, 1.5 A 50/60 Hz 65 W
Laser Specifications	EN 60825-1:2007 certified, Class 1 Laser Product, 405nm violet laser, 250mW laser
Connectivity USB:	Wi-Fi, Ethernet and USB
Optical Path:	Protected
Printer control	Interactive Touch-screen with Push-button

Description	Item#	Each
FORMLABS Form 2	262-0168	\$3,350.00*

*Must chose resin of choice (not included)

B. FORMLABS Form 2 Resin Materials

Formlabs standard resins available in Black, Clear, Grey and White are formulated to deliver the highest-quality output, our resin captures astonishing detail without sacrificing durability and toughness. Castable Resin burns out cleanly without ash or residue and captures crisp, precise detail and smooth surfaces. Jewelers and designers can go straight from a 3D design to a model for direct investment.

Description	Item#	Each
Black Resin Cartridge	262-0260	\$149.00
Grey Resin Cartridge	262-0240	149.00
White Resin Cartridge	262-0270	149.00
Clear Resin Cartridge	262-0186	149.00
Castable Resin Cartridge	262-0170	299.00

C, D FORMLABS Resin Tanks and Build Platform

Your Resin Tank should be replaced for every two-to-three liters of resin used. If you're planning on working with multiple colors, extra resin tanks allow you to switch quickly and easily between them. You can safely store your other tanks for as many as two months, which means you won't have any wasted material. Chose the Long Term Tank for long rigorous or high volume printing—lasts 20x longer than the standard resin tank. A spare Build Platform can speed up your workflow, whether you're changing resins or starting a new print.

Description	Item#	Each
C. FORMLABS Resin Tank for Form 2	262-0166	\$59.00
D. FORMLABS Build Platform for Form 2	262-0167	99.00
FORMLABS LT Resin Tank for Form 2	262-0163	99.95

D

ferris® File-A-Wax® – Ring Tubes, Slices & Blocks

It's the accepted standard for making a wide variety of designs, especially detailed carvings. Easily turned on a lathe and burns out cleanly from flasks. Cannot be steam dewaxed, not recommended for wax injectors.

Blue: Less hard and more flexible than green, purple or turquoise. Melting temperature: 240°F (115.5°C). **Purple:** General purpose, hard with some flexibility. Melting temperature: 240°F (115.5°C). **Green:** A very hard wax, it

can't be flexed. Ideal for sharp edges, intricate carvings and delicate engraving. Melting temperature: 243°F (117°C). **Turquoise:** Not as hard as green—displays exception surface finish, especially in recessed areas. Maintains superior strength, toughness and extreme flexibility. Not brittle and thus making it very forgiving when milling prongs. When roughing out models, it does not clog the tools such as hand files. Melting temperature: 243°F (116.5°C).

Ferris File-A-Wax available in green, purple blue and turquoise.

See pp. 185, 189 for more Wax Ring Tubes.

A-I Ferris® File-A-Wax® Ring Tubes

Matt® Carving Wax

Formulated to meet the demanding specifications of professional wax carvers. Compounded with special care to avoid contamination, pitting and air bubbles. Accurately shaped to minimize preparation time. Choose from three color-coded grades of flexibility. **Green:** (rigid) cuts clean and crisp, excellent for detailed carving and milling. Melting temperature: 230°F. **Purple:** (all-purpose) easy to work, good for chip carving. Melting temperature: 225°F. **Blue:** (bendable) works for items that require flexibility. Melting temperature: 220°F.

A. Jewelry Drawing Template

An easy-to-use, calibrated template for jewelry designers. Immediately improves your jewelry designs as well as simplify the task of determining the sizes of stones required for your jewelry. Contains stone shape profiles and sizes, as well as shank top and side views. Great for sketches and wax work. Measures 10¼"L x 4¾"W. Complete with instructions.

Description	Item#	Each
Jewelry Drawing Template	812-1660	\$25.00

B. Matt™ Ring Template

Now it's easy to get the precise ring outline you need on your wax blank. Template features 18 different cutouts of both men's and ladies' rings from the most popular styles to some of the more unusual designs. Unbreakable plastic with precision-milled cutouts.

Description	Item#	Each
Matt Ring Template	265-2333	\$12.30

C. Matt™ Wax Trimmer Kit

Trim wax blanks to the exact shape you need. Also use to mill out center of wax rings for sizing. The rotary file is specially designed for wax work. The platform locks at 90° to create a perfectly symmetrical wax pattern and can also be angled for taper cuts. Platform can be adjusted parallel to the handpiece for milling operations to create seats, perfect channels and decorative work. The Matt Trimmer requires a Flexible Shaft machine and 1" diameter handpiece (such as our #30). Comes complete with mounting bracket, adjustable platform, rotary file, ring template (with 18 profiles for men's and ladies' rings), assorted carving wax blanks and instruction book.

Description	Item#	Each
Matt Wax Trimmer Kit	265-2352	\$148.50
Replacement Rotary File (1/8" shank)	265-2357	30.65

D. Matt™ Reamer/Planer

Consists of a precision-ground steel rod with a holding knob and two specially designed carbide blanks. The wing blade is for planing the tube surface, and the boring bit is for boring the finger size. Turn the reamer clockwise and counterclockwise, and the wing blade cuts in both directions, sheering off a thin film of wax with every stroke, leaving a perfectly flat surface. After replacing the wing blade with the boring bit, turn the reamer clockwise to enlarge the finger hole to the precise size with smooth inner walls. Has engraved lines that indicate various finger sizes. Also lets you create bezels for round stones or coin holders.

Description	Item#	Each
Matt Reamer/Planer	261-7905	\$58.90

E. Wax-a-Sizer

Perfect for professional wax carvers. Features machined aluminum bits with sharp blades for cutting accurate finger hole sizes straight through wax ring blanks in one pass. A pilot head on each bit is sized to match the hole in standard wax tubes for stability and symmetry when cutting. You can even hold the whole wax tube in your hand while sizing, making it easier to handle, then simply cut off the desired width after sizing is complete. Wax-a-Sizer includes 20 individual bits in color-coded full-sizes and half-sizes from 5 to 14½, a sturdy wooden handle and wooden storage box. Sizes are clearly marked on bits and box.

Description	Item#	Each
Wax-a-Sizer	265-2319	\$169.00

F. Multi Angle Wax Gauge

Perfect for measuring wax. Make 90°, 45° and 30° pieces. Easy to draw parallel lines or to get circular center. Measures approximately 4 ¾" long.

Description	Item#	Each
Multi Angle Wax Gauge	265-2317	\$39.95

A. Matt™ Miter Box and Saw Set

Includes extruded aluminum miter box with stop-lock and steel back saw. Slices wax bars, rods and ring tubes into tablets with perfectly straight and parallel walls or tapered sides. Miter box holds the ring tube firmly in place. Stop-lock lets you cut multiple tablets of the same thickness. Rugged steel sawblade cuts through tubes with very little effort, leaving a smooth finish. Miter box measures 6"L x 2"W. Sawblade measures 6½"L x 2"D.

Description	Item#	Each
A. Miter Box and Saw Set	265-2346	\$56.95
Replacement Sawblade	265-2348	17.00

A

B. Matt™ Ring Tube Reamer

Enlarge the finger hole of wax ring models with speed and accuracy. Hardwood mandrel is specially machined to incorporate a steel cutting blade that extends from the handle to the tapered tip. Slide this reamer through the hole of a wax ring or ring tube and gently rotate clockwise. As the blade turns, it scrapes the inner wall, enlarging the ring to the size that is clearly marked on the mandrel and leaving a smooth, shiny, uniform finish on the ring in seconds.

Description	Item#	Each
Matt Ring Tube Reamer	265-2349	\$26.50

B

C, D Matt™ Wax Gun Set and Matt™ Supply Box

A wax extruder for creating unique and intricate jewelry designs. The lightweight gun has a thermostatic control for wax temperatures from 120-300°F. Convenient wax cartridges are used for fast loading. Flow is controlled with your thumb.

Endless design possibilities include macramé, twists, wax weaving and more. Set includes gun, 113-page instruction book, 2 brass nozzles (one small and one large round orifice), nozzle-changing wrench and 15 wax cartridges.

The Matt™ Supply Box includes a highly polished rotating hardwood mandrel mounted on a sturdy steel base, an alcohol lamp, and 120 pieces of wax for the Matt Wax Gun (40 each of green, red and blue).

Description	Item#	Each

F

A

A. Electric Waxing Tray

This easy-to-clean, 3-well wax tray is digitally controlled for temperature adjustment up to approximately 260° F. Two compartments measure 1¾" L x 1⅜"W x ¾" deep, large compartment measures 3" L x 2" W x ¾" deep.

Description	Item#	Each
Electric Waxing Tray	265-2358	\$183.00

B

C

B, C Transparent Sheet Wax

Pliable sheets of transparent wax with smooth surfaces. Trace designs directly on sheet, then cut with scissors or carving tool. Sheets measure 4" x 4". Sold in boxes of 15 assorted sheets.

Description	B&S Gauge	Item#	Box
B. Pink (soft) Sheet Wax	20, 22 & 24	261-9200	\$22.65
C. Green (firm) Sheet Wax	20, 22 & 24	261-9150	24.25

D

D. Freeman Sol-U-Carv Wax – A Carvable Wax That is Water Soluble

Sol-U-Carv is both a carvable and soluble wax specifically formulated for the lost wax casting process. Ideal for making hollow beads, hollow pendants, dome rings, or any other configuration where a hollowed area in the finished pattern is desired. Can be carved using conventional carving tools to form cores. Melting temperature: 165° - 170° F. (73.8°-76.7° C.). The melted wax can be poured or injected into a prepared mold to form the desired shape. Other wax can be injected around the Sol-U-Carv wax placed in a metal or rubber mold to produce extremely intricate patterns.

Description	Item#	Each
Freeman Sol-U-Carv Wax (1 lb.)	263-1051	\$22.95

E

E. Ferris® Mold-A-Wax®

Works like clay when softened in hot water. Melts at 150°F. Sold in 1 lb. blocks. Black Mold-A-Wax is slightly pliable and can be softened in hot water and injected at 150°F. Red Mold-A-Wax is much softer than Black and is not injectable.

Description	Item#	EACH Prices		
		1-2	3-5	6+

A, B Precision Wolf Milling Wax™ By Ferris® – Ideal For Milling Machines!

Wolf Milling Wax withstands extremely high rotational speeds, possesses the toughness to be machined into thin sections and cleans up quickly and easily. Possessing high pliability and toughness, ultra-thin cross sections with the most intricate details and minimal tool path residue can be obtained. Wax models clean up easily and burn out completely. When finished, wax models exhibit a gold-like tone that is easy to read and helpful in visualizing how the finished pieces will look when cast. As a bonus, it has proven to be an excellent hand carving wax, as well. Available in ring tubes and slices. Ring tubes measure 6" long with 5/8" dia. finger hole. Slices measure 53mm square. Melting temperature: 240°F (115.6°C).

Wax Ring Mandrel	260-4250	\$40.45

J. Handy Wax Pen

Whether you are a hobbyist, artisan or a jewelry manufacturer/retailer, the New Handy Wax Pen is the perfect tool for the bench or someone on the go. Small in size but mighty in power, the Handy Wax Pen is a must to have for the beginner to the advanced wax worker. Comfortable to hold and maneuver, the Handy Wax Pen is consistent in temperature (266-284°F/130-140°C) and preheats in just two minutes! Comes complete with one tapered tip that makes it ideal for wax carving, smoothing, shaping, creating textures and buildups and spruing wax pieces for casting. When not in use, wax pen can rest on a handy metal stand for optimal safety. 110V. Made in Taiwan.

Description	Item#	Each
Handy Wax Pen	265-2320	\$19.95
Replacement Tapered Tip	265-2323	6.00

A-G Giles® Precision Waxer

An indispensable tool for wax model making. Great for carving, shaping, texturing and sizing. Graduated dial adjustment has nine settings for accurate temperature modulation. Slim, lightweight handpiece with flexible 26" cord provides fine control for intricate work. Measures 4" long without tip. Weighs 1 oz. Waxer features mounted handpiece holder, pilot light and on/off switch. Includes three tips. Electrical: 110V or 220V, 1A, 15W, 50/60Hz. Measures 4"L x 5"W x 3"H. Made in USA.

R. PEPETOOLS TouchAmatic Digital Wax Pen

State-of-the-art digital wax pen that provides immediate heating response when you simply touch the contact point on the pen. Features variable control knob for precise temperature control. Low enough to do fine wax work and high enough to burn sprues into silicone molds. Two modes: "Continuous Mode" will output a constant temperature from the pen tip and "Touch Mode" will output heat only when the pen is activated. Immediate heating response. Takes up minimal space on the benchtop with its small footprint. Handpiece cord measures 31" providing necessary maneuverability. Includes four color-coded Nichrome tips.

Specifications:	
Temperature Range:	Up to 800° F (420° C)

B. Pen	1,300°F	265-2880	22.95	20.66
Replacement Tip		265-2885	7.15	6.44

C. Smoothy™ Flameless Wax Finisher/Mini Torch

A flameless jet of heated air gives you a smooth, scratch-free surface when passed over wax patterns. Blends parting lines without actually touching the wax. Remove tip and you have a pencil-point torch producing temperatures up to 2,300°F. Great for light soldering or minor casting repairs. Uses standard Butane fuel. UL registered. 6¾" overall.

Description	Temperature	Item#	Each
Smoothy	2,300°F	262-0500	\$174.50

D, E Wax Rasps – The fastest way to rough out wax models!

These rasps feature extra-sharp teeth for a fast cut with no clogging. Open back allows wax shavings to fall away quickly. Available in square or round. Both measure 6" long.

Shape	Item#	Each
D. Square	260-3062	\$8.95
E. Round	260-3060	8.95

F. Wax Needle File Sets

High quality files for rough filing wax. Each file is 5½" long. Coarse, non-clogging. Set of six: crochet, equalling, half-round, round, square and three-square.

Shape	Item#	Each
F. Wax Needle File Set (Italy)	265-2335	\$60.90
Econo Set (India)	265-2315	9.95

G. Large Wax File Set

Five large sized wax files for shaping wax. Set includes round, half-round, square, pillar and 3-square. Coarse, nonclogging. Measures 8" long. Made in Italy.

Description	Item#	Each
Large Wax File Set	265-2337	\$96.50

H. Wax Carving File Set

Includes four files designed for precision wax carving. Their pen-like design provides optimal control. And their single-cut teeth never clog. Made of stainless steel. Measure 6¾" overall length, 1" cut length.

Description	Item#	Each
Wax Carving File Set	260-2950	\$22.35

A-C Ceramic Plastic Deflashing Tools

Each holds edge indefinitely and provides complete user safety.

These tools feature space-age ceramics that deburr hard plastics effortlessly while eliminating the fear of cutting your hands or fingers in the process. Ideal for curved and complicated shapes. Excellent on ultra-hard resins that defy carbon steel tools. Can also be used on soft metals such as aluminum, copper and brass.

Available in 3 sizes: Large Disposable Deflasher (6 7/8" long with 1 1/2" long cutting edge) has matte cutter-type handles; Small Disposable Deflasher (5 1/4" long with 1" long cutting edge) has a fluted, nonroll design; Micro Deflashing Pen (5 7/8" long with 3/8" long cutting edge) has 2 jaw chuck for easy blade replacement.

Description	Blade	Item#	Each
A. Large Ceramic Deflasher	1 1/2"	351-0295	\$32.95
B. Small Ceramic Deflasher	1"	351-0294	29.95
C. Micro Ceramic Deburring Pen	3/8"	351-0001	29.95
Replacement Micro Blades—5-pack	3/8"	351-0002	29.95

D. All-in-One Swiveling Deburrer – With five tips

Deburs holes as small as 3/32" and removes sharp or rough edges from steel, aluminum, brass or iron parts. Comes with five curved, sharpened, high-speed steel tips made from 1/8" stock for long wear and less chance of breakage. Each tip swivels 360° either way to follow curves and contours. Handle has an internal storage compartment and a quick-tip-release feature. Measures 5" long.

Description	Item#	Each
All-in-One Swiveling Deburrer	846-2050	\$19.98

E. Swiveling Wax Carver/Deburrer

This handy tool is great for radiusing and rounding off corners and edges, especially on insides of rings. Replaceable tip swivels 360° (forward or backward). Comes with large and small hardened tool steel tips. Metal handle measures 1/2" diameter x 5 7/8" overall length.

Description	Item#	Each
Swiveling Wax Carver/Deburrer	846-2055	\$19.95

F. Castaldo® Mold Release Spray

Castaldo mold release spray is pure silicone oil in an aerosol can for use in releasing wax patterns from rubber or metal molds. Safe, non-toxic, colorless, odorless, greaseless. Will not damage molds made of natural mold rubber. Contains no CFCs nor VOCs.

Description	Item#	EACH Prices	
		1-11	12+
Castaldo Mold Release Spray	816-2915	\$13.40	\$12.73

G. Sprints GF Mold Release Spray

Sprints all-purpose GF, gentle formula, mold release spray is a heavy-duty, food grade, non-paintable, silicone spray compatible with solvent-sensitive thermoplastics. Ultra-fine atomization for uniform coverage, fast drying. Contains no CFCs.

Description	Item#	Each
Sprints Mold Release Spray 12 oz. can	816-2925	\$10.95
Sprints Mold Release Spray (case of 12)	816-2938	104.00

H. Talc Powder

Brush or dust onto your rubber molds to permit easy removal of waxes and to open vents. Also used as a separating powder. 5 lb. bag.

Description	Item#	Each
Talc Powder	260-1375	\$16.50

A. Akrovest Wax Wash

Spray on wax pattern to reduce surface tension, allowing complete adherence of investment to wax. Nonhazardous. Sold in 8 oz. spray bottle.

Description	Item#	Each
8 oz. Spray Bottle	260-4520	\$13.30

A

B. Wax Kleen™

Rub this 100% organic solution on your wax patterns to polish them before casting. Removes scratches and leaves a clean, smooth surface. Pleasant citrus scent.

Description	Item#	Each
8 oz. Bottle	261-9004	\$19.10

C. Wax Wash

Brush on or dip wax pattern into Wax Wash to reduce surface tension, allowing complete adherence of investment to wax. Can be used whether flask will be vibrated or vacuumed.

Description	Item#	EACH Prices	
		1-3	4+
1 pt. Bottle 	260-4555	\$8.45	-
1 qt. Bottle 	260-4550	12.75	\$10.20

C

D. Dispensing Bottle

Plastic bottle holds Wax wash or other solvents. Special stainless steel lid with one-way valve allows pumping of solution into shallow well on top of bottle. Ideal for dispensing solutions that would otherwise evaporate.

Description	Item#	Each
Dispensing Bottle	830-4525	\$26.45

D

E. Wax Injection Mold Plates

Thick, well-finished aluminum plates for uniform pressure on your rubber mold during wax injection. Each set contains 2 plates, 12-gauge thickness, 3"L x 1 3/4"W.

Description	Item#	Set of 2
Wax Injection Mold Plates	265-2340	\$2.95

E

F. Plating Thermometers

Stainless steel thermometer for measuring stripping and plating bath temperatures. Help eliminate guesswork to improve results. Include metal clip for easy attachment to edges of beakers. Dial reads from 50 to 400°F. Measures 8" long.

Description	Item#	Each
Stainless Steel Dial Thermometer	210-2255	\$15.95

F

 UPS® hazardous shipping surcharge applies. Ships via UPS® Ground only, no air, FedEx® or US Mail shipments. Can't ship to Alaska, Hawaii or Puerto Rico.

A. Kelly Green Injection Wax

Extremely fluid wax easily fills both thick and thin intricate designs. Low ash content produces a very clean burnout for “snow white” flasks resulting in maximum flow when vacuum casting and reducing porosity. Unique color of Kelly Green is very “readable” for fine detail. Injection temperature: 155° to 160°F (68° to 71°C).

Color	Item#	PKG. of 5 lbs.		Item#	BOX of 50 lbs.	
		1	2+		1-4	5+
Kelly Green	261-8149	\$30.95	\$29.40	261-8158	\$250.95	\$238.40

B. Ferris® Turquoise Injection Wax

Super tough, medium-hard wax with built-in release agents. General purpose for both large and small molds. Injection temperature: 150° to 160°F (66° to 71°C).

Color	Item#	PKG. of 5 lbs.		Item#	BOX of 50 lbs.	
		1	2+		1-4	5+
Turquoise	261-8143	\$28.95	\$27.50	261-8152	\$235.95	\$224.15

C. Ferris® NYC Blue Injection Wax

Identical formulation as the Turquoise wax above, but in a bright readable blue made popular in the New York City area. Injection temperature: 150° to 160°F (66° to 71°C).

Color	Item#	PKG. of 5 lbs.		Item#	BOX of 50 lbs.	
		1	2+		1-4	5+
NYC Blue	261-8145	\$28.95	\$27.50	261-8155	\$235.95	\$224.15

D, E Ferris® Magnaject™ Pink and Blue Injection Waxes

Extremely fluid wax to fill the most intricate patterns—including filigree, even at low pressures. Minimal shrinkage. Durable, nonbrittle with long shelf life. Available in blue or pink. Injection temperature: 150° to 160°F (66° to 71°C).

Color	Item#	PKG. of 5 lbs.		Item#	BOX of 50 lbs.	
		1	2+		1-4	5+
D. Magnaject Pink	261-8144	\$32.95	\$31.30	261-8153	\$280.95	\$266.90
E. Magnaject Blue	261-8146	32.95	31.30	261-8154	280.95	266.90

F. Ferris® Blue Injection Wax

Specially formulated for intricate, detailed molds. Hard wax with excellent memory. Cools quickly, pulls easily from mold. Injection temperature: 150° to 160°F (66° to 71°C).

Color	Item#	PKG. of 5 lbs.		Item#	BOX of 50 lbs.	
		1	2+		1-4	5+
Blue	261-8142	\$29.95	\$28.45	261-8151	\$240.95	\$228.90

G. Ferris® Plastic Injection Wax

This plastic-type wax combines the excellent flow characteristics of wax and the durability of plastic. Minimum shrinkage, excellent memory and flexibility. Long shelf life before and after injection. Releases easily from molds. Melting point: 155°-160°F. Injection temperature: 150° to 160°F (66° to 71°C).

Color	Item#	PKG. of 5 lbs.		Item#	BOX of 50 lbs.	
		1	2+		1-4	5+
Blue	261-8130	\$29.95	\$28.45	261-8132	\$240.95	\$228.90

G

H. Injector Cleaning Wax

Quick and easy method of eliminating all traces of injection wax from wax pots and injectors. This soft, white, translucent wax removes even the most stubborn wax residues. Excellent purging wax for large injectors. Has a melting temperature of approximately 130°F. Supplied in 5 lb. box.

Description	Item#	PKG. of 5 lbs.	
		1	2+
Injector Cleaning Wax	261-9000	\$41.50	\$37.35

H

A. Castaldo® Plast-O-Wax®

Castaldo Plast-O-Wax produces patterns that are very flexible, resilient and durable with great memory and does not become brittle over time. Fewer broken patterns equal greater productivity. A unique all-purpose injection wax that combines excellent flow and fill qualities with the stability of plastic while producing smooth glossy surfaces, crisp detail and minimal shrinkage. Great for stone-in-place casting. Injection temperature: 155° to 160°F (68° to 71°C).

Description	Item#	2kg Box	Item#	20kg Box
Plast-O-Wax	261-8137	\$29.95	261-8136	\$209.95

**B. Freeman® General-Purpose Flakes™**

This all-purpose injection wax is Freeman's most popular formulation as it provides the ideal balance of characteristics demanded by most designers and casters. Also recommended for stone in place casting. Low shrinkage with excellent flow and long pattern shelf life. Aqua is the most popular color while Turquoise and Ruby Red are for designers and casters who prefer darker colors for easier visual verification of fine detail. Injection temperature: 150°F (65°C).

Description	Item#	5 lb. Box	Item#	BOX of 50 lbs.		
				1	2-9	10+
Ruby Red	261-9321	\$29.79	261-9320	\$268.00	\$241.20	\$227.80
Turquoise	261-9325	29.79	261-9324	268.00	241.20	227.80
Aqua	261-9323	29.79	261-9322	268.00	241.20	227.80

**C. Freeman® Flexible Blue Flakes™**

Features the longest shelf life and the highest flexibility of the Freeman Flakes line so it will not break during removal from the mold. This unique mixture of wax and plastic is especially well-suited for metal molds and stone in place casting. Injection temperature: 155°F (68°C).

Description	Item#	5 lb. Box	Item#	BOX of 50 lbs.		
				1	2-9	10+
Flexible Blue	261-9327	\$31.50	261-9326	\$280.00	\$252.00	\$238.00

**D. Freeman® Tuf Guy Green Flakes™**

This is the toughest wax of the Freeman Flakes line. Its accuracy and durable, yet flexible characteristics make it ideal for large pieces. Excellent memory and high flexibility allow easy pattern removal from any mold. Low shrinkage, good flow. Injection temperature: 165°F (73°C).

Description	Item#	5 lb. Box	Item#	BOX of 50 lbs.		
				1	2-9	10+
Tuf Guy	261-9329	\$29.79	261-9328	\$268.00	\$241.20	\$227.80

**E. Freeman® Super Pink Flakes™**

Featuring the quickest solidification, this wax will not give, making it ideal for clasps, claws, and bezel settings. Also, the opacity makes this wax superior in readability. Superior flow and fast solidification. Injection temperature: 150°F (65°C).

Description	Item#	5 lb. Box	Item#	BOX of 50 lbs.		
				1	2-9	10+
Super Pink	261-9331	\$31.50	261-9330	\$280.00	\$252.00	\$238.00

**F. Freeman® Filigree Pink Flakes™**

This wax combines the flexibility of Tuf Guy Green with the excellent flow characteristics of Aqua General-Purpose flakes, producing very high detail while enabling easy pattern removal without breakage. Recommended for stone in place casting. Injection temperature: 155°F (68°C)

Description	Item#	5 lb. Box	Item#	BOX of 50 lbs.

Filigree Pink	261-9333	\$29.79	261-9332	\$268.00	\$241.20	\$227.80

**G. Freeman® Carvable Purple Flakes™**

Developed for designers and casters who often rework wax patterns, this wax offers superior carvability with minimal filling or clogging of tools. Also, with the highest injection temperatures of the Freeman Flakes line, it will not break under stress and enables easier handling. Excellent flow and flexibility, low shrinkage and long pattern shelf life. Injection temperature: 170°F (77°C).

A

A. ARBE Hand Pump Wax Injector

A well-built hand pump wax injector with an air pressure gauge that reads up to 30 PSI and an ultra-sensitive thermostat that ensures precise and consistent temperature control up to 250°F. Insert a thermometer in the port on the cover (not included; consider #210-2255 (see p. 195)). Designed for great reliability with ceramic mica heating elements, heated sealed nozzle, fully insulated cast-aluminum pot and powder-coated steel outer drum. Also includes on/off switch, power indicator light and spigot drain. Made in USA.

Specifications:

Wax Capacity	2 ¾ qts. (5½ lbs.)
Electrical	110V, 6A, 660W, 50/60Hz or 220V, 3A, 660W, 50/60Hz
Dimensions	10½" dia. by 14"H

Description	Electrical	Item#	Each
Hand Pump Wax Injector	110V	265-4950	\$545.00
Hand Pump Wax Injector	220V	265-4951	545.00

B

C

B, C ARBE Air Pressure Wax Injectors

Extremely well-built units designed for reliability and performance. The 2¾ Quart and 4 Quart models differ only in size and capacity. Both feature: Heated, sealed nozzle which won't leak or clog, large, easy-to-remove and tightly sealed top, fully insulated cast-aluminum chamber with durable stainless steel outer casing, convenient spigot drain for wax change and cleaning, adjustable pressure control with regulator and gauge (max. 15 PSI), automatic pressure release valve to ensure safety, dial-adjustable heater and thermometer well for temperature control up to 250°F (121°C), power indicator light, and an on/off switch. Require an air compressor such as #265-3100 (see p. 249) and a thermometer such as #210-2255 (see p. 195). Made in USA.

Specifications:	2 ¾-Quart	4-Quart
Wax Capacity	2 ¾ qts. (6 lbs.)	4 qts. (8 lbs.)
Electrical	120V, 9A, 60Hz	120V, 7A, 60Hz
Dimensions	10½" dia. x 14"H	12" dia. x 19½"H

Description	Electrical	Item#	Each
B. 2 ¾-Quart Injector	120V	265-2267	\$475.00
C. 4-Quart Injector	120V	265-2295	625.00

D

D. ARBE Mini Air Pressure Wax Injector

For the small shop or for special waxes, our Mini Wax Injector has all the features of the larger ARBE injectors in a space-saving unit. Air pressure operation with a 2" diameter easy-to-read gauge, safety release valve, adjustable thermostat to 250°F, and thermometer well (use our #210-2255 Dial Thermometer). Machined aluminum pot, cover and base with durable steel ceramic-mica aluminum heating element. Double sealed, no leak nozzle. 220V unit is special order please allow extra time for delivery. Requires an air compressor that is capable of reaching a minimum of 30 PSI. Made in USA.

Specifications:

Wax Capacity	1⅓ qts. (2.66 lbs.)
Dimensions	8" dia. x 10"H

Description	Electrical	Item#	Each
D. Mini Injector	110V, 60 Hz, 1Ph	265-2270	\$355.00
Mini Injector	220V, 50/60 Hz, 1Ph	265-2720	375.00

E

E. Universal Debubbler Valve – For Wax Injectors

Are air bubbles ruining your waxes? Attach this valve to your wax injector, hook up to your vacuum pump and vacuum out all the bubbles for perfect wax patterns.

Description	Item#	Each
Universal Debubbler Valve	260-3375	\$64.95

A. MASTERIX Wax Injectors

Injected wax is free of bubbles, even micro bubbles, thus flawlessly and accurately replicating your designs. Especially designed to handle the extremely difficult very thin thicknesses associated with filigree. Both units can easily handle any pattern in a rubber mold measuring up to approximately 5"x4"x1.5"

Available either as the Standard Model (265-2129) or as the Auto Injection System (265-2130) which utilizes AutoStart. AutoStart, first in the world, allows the user to save on the average 2 to 3 seconds per injection cycle, thus ensuring a considerable increase in production. The operator's work becomes so simplified that even the novice operator can use the wax Injector without any issues! No buttons to press, even with molds of different sizes, simply load and the size is detected and centered prior to injection. Once the mold is read, it is automatically injected, thus reducing operator errors on choice of programs.

Both versions utilize RFID technology allowing the operator to quickly load the parameters by scanning the tag on the rubber mold. Made in Italy.

Features

- Automatically injects quickly, accurately and easily saving time
- Rejects are reduced considerably
- Consistent pattern weight

Description	Item#	Each
Standard Wax Injector 	265-2129	\$11,550.00
Auto Start Wax Injector 	265-2130	12,550.00
RFID tags (10)	265-2133	28.50
RFID tags (100)	265-2134	250.00

(130mmW x 120mmD x 45/65mmH)

B. Orange Wax Injector – Ideal for high production manufacturers

Precise, consistent pressure produces perfect repeatable patterns. You are in control of all the variables, temperature of wax in the reservoir and at the nozzle; air pressure, mold holding pressure and vacuum time so your patterns are perfect. Uses standard size rubber molds, approx. 2" x 1.2" and easily handles off-center molds with their patented process, decreasing operator training time. Rejects are reduced considerably.

Features

- Injects quickly and easily saving process time
- Automatically injects the mold accurately producing perfect wax patterns
- Consistent pattern weight

Rubber Molds: 2" x 1.2" x 0.3"

C. Digital Vacuum Wax Injection System Increases production by eliminating wax pattern defects!

An advanced system delivering consistent, repeatable wax patterns with the best possible surface finish. Draws air out of the mold before injection, eliminating air bubbles that result in wax pattern defects. Injects wax immediately after vacuuming to ensure a complete fill. Performs two-stage injection to compensate for shrinkage.

Offers both manual and automatic modes with the ability to set the following parameters for different molds: wax and nozzle temperatures, vacuum and injection times, injection pressures, clamp holding time, clamp holding pressure and clamp forward pressure.

System consists of digital vacuum wax injector, digital pressure controller auto clamp and foot pedal. Accommodates up to 3 1/8" x 3 7/8" x 1 1/4" rubber molds. Requires air compressor such as SilentAire #265-3100 and vacuum pump such as Oil-less #265-2255 (see p. 250).

Description	Electrical	Item#	Each
C. Complete System	120V	265-4144	\$4,125.00
Wax Injector only	120V	265-4140	2,200.00
Controller/Clamp only	120V	265-4142	2,400.00

See page 249 for
SilentAire Compressors.

Controller: 8 1/4"W x 13 1/2"D x 7 1/2"H

Clamp: 6 1/4"W x 7"D x 8 1/4"H

Net Wt.: 72 lbs.

A

A. Castaldo® VLT™ – Silicone Rubber - For Resin Models

Castaldo VLT (Very Low Temperature) Silicone Mold Rubber vulcanizes at 160°F (71°C), allowing you to make long-lasting production molds directly from CAD/CAM and Rapid Proto type plastic resin models, without risk of model damage. Speeds your designs from computer concept to production in hours, not days. Easy to pack and cut. Shrinkage is only 0.1%. Produces highly detailed wax injections with extraordinarily shiny surfaces that require less finishing. Available in 2⁷/₈"W x 18"L x 3⁸/₁₆" thick strips. Sold in boxes of 5 lbs.

Description	Item#	BOX of 5 lbs.		
		1-2	3-5	6+
Strips (2 ⁷ / ₈ " x 18")	260-1487	\$46.25	\$43.94	\$41.63

B

B. Aluminum Mold Frames

Predrilled holes in sides allow excess rubber to escape during vulcanization, helping to prevent model deformation. Measurements denote mold sizes.

Description	L x W x Thickness	Item#	Each
B. Single Frame	2 ⁷ / ₈ " x 1 ⁷ / ₈ " x 3 ⁴ / ₄ "	260-2200	\$12.00
	2 ⁷ / ₈ " x 1 ⁷ / ₈ " x 1"	260-2300	14.00
	2 ⁷ / ₈ " x 1 ⁷ / ₈ " x 1 ¹ / ₄ "	260-2400	17.50

C

C. Castaldo® Mold Locks

Insert one of these brass cones into each corner of your rubber mold. They will form locks to prevent mold shifting during injection. May be used alone or with powder for easier separation after vulcanizing. Each bag contains 1/4 cup (3 oz.) of Mold Locks, equalling approximately 150 pieces.

Description	Item#	EACH Prices		
		1-2	3-9	10+
Castaldo Mold Locks	260-1350	\$18.15	\$17.24	\$16.34

D

D. Sprue Formers and Rods

Machined from solid brass. Slight difference in size of sprue former allows you to select the size that more closely matches your wax injector nozzle making it easier to maintain contact between the mold and nozzle. #9 is 9mm (.35") high and tapers from 3.3mm (1/8") to 11.5mm (.45") while #10 is 10mm (.39") high and tapers from 3.3mm (1/8") to 14mm (.55"). Matching 3mm (.118") diameter by 50mm (approx 2") long rods are included. Sold in packages of 10.

Style	Sprue Former Taper x Height (mm)	Rod Dia x L (mm)	Item #	Pkg of 10
# 9	3.3 – 11.5 x 9	3 x 50	260-3092	\$14.50
#10	3.3 – 14 x 10	3 x 50	260-3093	14.50

E

E. Rubber Mold Locking Pins

This is the fastest, easiest way to automatically form locks in your rubber molds! Pack your mold normally, then push one of these solid stainless steel pins into each corner of the mold before vulcanizing. Use these 23mm pins for 1¹/₈" to 1¹/₂" thick molds. Sold in set of 4 pins.

Description	Dia x L (mm)	Item#	SET Prices	
			1-2	3+
Rubber Mold Locking Pins	7 x 23mm	265-0856	\$13.50	\$10.80

F

Assorted Colors

F. Castaldo® Gelato Super High Strength™ – Silicone Rubber

This silicone-based rubber makes molds that cut like butter. Uncured, it has the consistency of soft putty, making it very easy to pack in undercuts and detailed areas. Produces a firm mold with excellent flexibility and tear strength. Strong enough to make complex multi-part molds. Gives waxes a smooth, shiny finish for easy release from molds. Vulcanize at 330°F for 15 minutes per layer of rubber. Strips measure 2⁷/₈" x 18". Gelato sold individually or in set (yellow/tan not included in set).

A, B Castaldo® Gold Label® – Natural Rubber

Contains more pure natural gum rubber than Castaldo White Label, making Castaldo Gold softer and more pliable. The superior qualities of Castaldo Gold make it the ideal rubber for difficult molds containing undercuts, filigree or multiple settings. Easy to pack and highly flexible so that wax patterns release smoothly. Vulcanize at 310°F for 15 minutes per 1/4" of mold frame thickness. Rubber is 1/8" thick. Also available in rolls. Call for more info.

Description	Item#	BOX of 5 lbs.		
		1-2	3-5	6+
A. Strips (2 7/8" x 18")	260-1460	\$46.25	\$43.94	\$41.63
B. Ready Cut (1 7/8" x 2 7/8")	260-1480	49.25	46.79	44.33

C, D Castaldo® White Label® – Natural Rubber

A high concentration of pure natural gum rubber makes Castaldo White firm but flexible. A good all-purpose mold rubber that cuts well. Well-suited for thin molds. Vulcanize at 310°F for 15 minutes per 1/4" of mold frame thickness. Rubber is 1/8" thick. Also available in rolls. Call for more info.

Description	Item#	BOX of 5 lbs.		
		1-2	3-5	6+

D. Ready Cut (1 7/8" x 2 7/8")	260-1475	46.50	44.18	41.85

E. Castaldo® No-Shrink Pink® – Natural Rubber

Specially formulated for less than 1% shrinkage! Can be used alone or combined with Castaldo Gold or White rubber to reduce shrinkage and save money. Use No-Shrink Pink around the model and Castaldo White or Gold for the outside of the mold. Vulcanize at 290°F for 12 minutes per layer of rubber. Note: This natural rubber must be vulcanized at precisely 290°F. Use a thermometer to check your vulcanizer accuracy.

F. Castaldo® SuperStretch™ – Silicone Rubber

SuperStretch™ rubber's high shine finish means less polishing. Cuts like butter. Easy mold packing/easy mold cutting. Low rubber shrinkage-only 1.3%. Compatible with other Castaldo silicone molding rubbers; can be used alone or used as an insert for special projects. Vulcanize at 330°F for 15 minutes per layer.

A

A-C Castaldo® Moldmatic® Ready Made Molds™ – Natural Rubber

A two-part system consisting of Ready Made Molds with preformed locks and Moldmatic Mold Frames. Mold cutting time and effort are greatly reduced. The mold halves fit together perfectly in a precision-engineered mold frame for consistently perfect wax patterns. The same high quality natural Castaldo mold rubber known throughout the world, but now prefabricated and ready to use. Mold locks are preformed. Merely remove the protective cloth squares at the center of the mold and insert your model. After vulcanization, simply pull the edges of the mold apart to expose perfectly formed locks. The center of the mold is cut normally. Sold in boxes of 10 molds along with 10 extra pieces of rubber so that any thickness mold can be made. You must use Ready Made Molds with Moldmatic Frames.

D. Castaldo® Quick-Sil™ RTV Jewelry Molding Rubber – Mold Putty

Two-part silicone mold rubber that cures in just 15 minutes—without heat! Quick-Sil is soft and pliable, so it's easy to mix and easy to pack even complicated models. Because no heat is used, there is absolutely no shrinkage. Tear resistance is equal to any standard silicone mold rubber. Molds require some pressure to make a good impression of the model. Safe, nonhazardous, nontoxic. Use standard mold frames. Available in 2 lb. kit (1 lb. each of Part A and Part B) to make 3-4 standard size molds.

		1-2	3-4	5+
Quick-Sil RTV	260-1675	\$69.95	\$66.45	\$62.96

E

E. Castaldo® Mold Separation Cream – Eliminate or reduce mold cutting.

With Castaldo Mold Separation Cream, you may never have to handle a sharp mold knife again. Pack your model normally. When you have established a parting line between the 2 halves, spread a small amount of Mold Separation Cream on one surface with a fingertip or small brush. After the mold is vulcanized, insert a screwdriver into the parting line and peel the halves apart. Castaldo Mold Separation Cream can be used to separate the entire mold or just part of the mold, including locks. May be used with or without mold lock formers and on any type of mold rubber. Nontoxic, nonhazardous. Net Wt. 1 oz.

Description	Item#	Each
Castaldo Mold Separation Cream	260-1401	\$11.50

F

F. Castaldo® Resin Release™ Spray – Apply to models before packing

Although designed specifically for use on Castaldo VLT silicone mold rubber, Castaldo Resin Release Spray also acts as a protectant on Rapid Prototype models. RP and resin models should be tested before using liquid mold rubber. Some RP and resin model materials will react with the liquid rubber becoming gummy, distorted or bond destructively to their molds. To prevent this problem, spray Resin Release onto models shortly before vulcanizing, helping you make production-quality molds directly from CAD/CAM resin and wax models. Natural soy-based formula, nonflammable, biodegradable. Sold in 340g cans.

Description	Item#	EACH Prices	
		1-2	3+
Resin Release Spray	816-2917	\$14.70	\$14.70

Although no hazardous shipping surcharge applies, these items can only ship via UPS® Ground, no air, FedEx® or US Mail possible. Cannot ship to Alaska, Hawaii or Puerto Rico.

A. Castaldo® LiquaFast™ ICE RTV

New LiquaFast™ ICE from CASTALDO® is a transparent blue two-part 0% shrinkage RTV silicone molding rubber that cures very rapidly at normal room temperature (73°F) and cures even faster at 120°F. You can make a mold from your CAD CAM, RP and SLA models in the morning, inject waxes 30 minutes later and cast them that afternoon. No more waiting.

Features:

- New LiquaFast ICE makes strong, tough, tear-resistant permanent molds that do not decay with age.
- LiquaFast ICE's low viscosity makes it easy to measure, mix and pour.
- Normal cure time: Only 60 - 90 minutes.

Specifications:

Shrinkage: 0.0%
 Working time at 73° F/23° C: 15 minutes
 Setting time at 73° F/23° C: 60 - 90 minutes
 Setting time at 120° F/50° C: 30 minutes
 Mixing Ratio: 1:1 by weight

Description	Item#	1kg Kit	Item#	4kg Kit
A. Castaldo LiquaFast ICE RTV	260-1682	\$57.50	260-1683	\$209.50

B. Castaldo® LiquaCast Long-Life – RTV

LiquaCast Long-Life makes molds that are extremely strong, tough and tear-resistant. Molds will not soften or liquefy over time and will last for decades!

Perfect for complex molds, difficult undercuts, spirals and cores. It is compatible with most computer-generated CAD-CAM resin and difficult to mold CAD-CAM wax patterns. Molds have a glossy, shiny surface that produces waxes with a glossy, shiny surface. Final castings require less polishing. Rubber shrinkage is 0%. Low viscosity makes it easy to measure, easy to mix, easy to vacuum and easy to pour. Mix ratio is 1:1 by weight or volume. Cure time is 24 hours. Rapid cure time @150°F (65°C) is just 90 minutes. Use with Castaldo Liquid Rubber Mold Frames (below).

Description	Item#	Each
B. 1kg Kit	260-1671	\$71.95
8kg Kit	260-1672	185.95
20kg Kit	260-1673	455.00

C. Castaldo® Original LiquaCast™ Liquid RTV Mold Rubber

A two-part liquid mold rubber that vulcanizes without pressure at room temperature. Use it to make molds of waxes, organics, plastics, and anything that cannot withstand the heat/pressure of normal vulcanization. Contains no silicone and makes a stronger, more durable mold than standard liquid mold rubbers. 0% Shrinkage. Cures in 16–24 hrs. Requires vacuuming. Use with Castaldo Liquid Rubber Mold Frames (below). Use Castaldo Resin Release Spray (816-2917) to protect Rapid Prototype models (see facing page).

Description	Item#	Each
C. 1 lb. Set	260-1662	\$43.50
10 lb. Set	260-1664	123.00

D. Freeman Jewel-Sil RTV Molding Rubber

A two-part clear silicone rubber for room temperature vulcanization of your jewelry molds. Reproduces intricate details with close tolerances. Features low viscosity for easy pouring, excellent clarity for precise cutting, high tear strength and ability to endure temperatures up to 350°F. Mix and use within an hour. Cures in 24 hours with less than 0.1% shrinkage.

Description	Item#	Each
D. 1kg Kit	261-9347	\$49.95
5kg Kit	261-9348	265.00

E. Castaldo® Liquid Rubber Mold Frames

Each consists of a solid aluminum U-frame with built-in sprue former, two pieces of heavy-duty clear plastic and industrial bands. Made extra-tall to allow expansion during vacuuming—no more spills. Eliminate need for paper collars. Available in four thicknesses: 3/4", 1", 1 1/4" and 1 1/2". All make molds up to 1 7/8"W x 6"H.

Thickness	3/4"	1"	1 1/4"	1 1/2"	Each

L. Mold Holder, A/C

A fast and simple way to learn rubber mold cutting. Cut a line about 1/8" to 1/4" deep around the perimeter of the mold. Then fasten the aluminum clamps onto the edges of the mold at the sprue end. The 2 clamps firmly grip each half of the mold, leaving both hands free to finish the cutting. As the cutting progresses, turn the knobs to spread the mold—you'll have no problem seeing or reaching where you want to cut.

Description	Item#	Each
Mold Holder	260-2576	\$109.95

M. Cuttlefish Bone

For casting small objects by pressing model directly into cuttlefish. Soft shell makes a smooth-walled mold. Cut sprues, gates and vents into the wall with a sharp knife. Supplied in random sizes. Package contains 4-6 pieces weighing approx. 1/2 lb. total.

Description	Item#	Each
Cuttlefish Bone	265-3000	\$24.85

A. Dual-Control Deluxe Vulcanizer

No more over- or under-cooked molds! Two independent thermostats control each platen separately, so you get the exact temperature you need for the top and bottom of your mold. Ideal for the new 0% shrinkage rubbers (such as Castaldo No-Shrink Pink, p. 201) that demand precise temperature control. Heavy-duty cast-iron and aluminum construction with 1" diameter pressure screw and heavy guide posts to ensure uniform pressure on mold and perfect alignment of stainless steel platens. On/off toggle switch with pilot light and 2 separate thermostat pilot lights. Accepts both single and double mold frames. Made in USA.

Specifications:

Electrical	110V, 6A, 660W, 50/60Hz 220V, 3A, 660W, 50/60Hz
Dimensions	15½"W x 9½"D x 20½"H

C. Polder Timer/Thermometer – For investing and vulcanizing

This handy countdown timer also measures temperature with a plug-in thermometer on a 48" long wire and independent alarms that can be used separately or together. Perfect for monitoring vulcanizer temperature, timing molds, investing and plating baths.

Shows countdown in hours, minutes and seconds. Reverts to last setting when shut off—great for investing multiple flasks. Displays set temperature, alarm sounds when reached, and actual temperature. Temperature range: 32-392°F (0-200°C).

Description	Item#	Each
Polder Timer/Thermometer	265-1915	\$27.00

C

D. Vulcanizer Mold Plates

Thin aluminum plates for covering aluminum mold frames and rubber when vulcanizing. Keeps platens clean and prevents rubber from sticking to the platens.

C. Tivac Paper Flask Liner – Eliminates the need for perforated flasks

Vacuum channels formed by the liners increase the exposed surface area of the investment and create an unobstructed air flow. Provides over 40% more vacuum capacity than wax web, plastic web, or vacuum rods. Burns out cleanly. Completely nonhazardous. Built-in collar replaces flask sleeves. #4 fits 4" x 6", 4" x 7" and 4" x 8" and #5 fits 5" x 6", 5" x 7" and 5" x 8" solid-wall flasks.

R&R® Investment

Select Ultra-Vest® when casting non-ferrous metals; Ultra-MAXX® when using white gold and palladium, as well as yellow gold. Plasticast is the ideal investment for plastic pattern materials. All three are available in traditional formulas or with new BANDUST™ Technology for measurable reduction in total respirable dust—up to 99% compared to other brands of jewelry investment. Casting quality is maintained with excellent final casting results and no process changes are required during the investing stage. Full pallet pricing also available.

A, B R&R® Ultra-Vest® and Ultra-Vest with BANDUST™

Recognized worldwide as the premium investment for gold, silver, brass, and other non-ferrous jewelry castings. Provides easy quench and easy clean-up reducing your risk of losing valuable gold. Ultra-Vest investment produces smoother surfaces than other investments, resulting in less finishing.

Worldwide, Ultra-Vest is widely accepted as being the most process forgiving product available for your casting needs saving you time and money associated with application-related defects. Whether you are casting a simple piece or an intricate shape, Ultra-Vest investment is the investment of choice.

C, D R&R® Ultra-Vest MAXX® and Ultra-Vest MAXX with BANDUST™

An excellent choice for casting white gold and plastic or resin pattern materials. maximum thermal stability for high metal melt temperatures, flask temperatures, burnout temperatures, and casting temperatures. Just want to use one investment? Ultra-Vest MAXX can be used with yellow gold too. Eliminates orange peel defects associated with metal/mold reactions. Eliminates flashing & spalling associated with investment breakdown during burnout of plastic & resin pattern materials.

E, F R&R® Plasticast and Plasticast with BANDUST™

Plasticast was developed for the investing and burnout of commonly used plastic or wax/plastic pattern materials. Ideal for resin models created in rapid prototype processes. The high expansion of all these pattern materials requires an equally high expanding, extra high strength investment. Plasticast provides a smoother, cleaner casting surface not obtainable with standard brands of investment. Plasticast is designed for easy removal in water. Plasticast also provides a superior casting surface when standard injection waxes are used.

A, B R&R® Platinum & Binder

PLATINUM by R&R is an acid-based binder mixed with investment for casting platinum alloys. This investment and binder provides platinum casters with a consistent, acid-based mixture that does not separate, resulting in smoother, more consistent casting surface finish than any other two-part platinum product. Investment comes in 50 lb. Box and must be ordered with a 900ml bottle of concentrated Binder 260-4076. Note, 900ml is enough for 100 lbs. of Platinum Investment. Carefully follow all instructions for optimum results and user safety. Made in the USA.

E. ALL CAST® Investment

A micro-fine grain, “carbon-free” investment for producing ultra-smooth castings. Especially good for RP models. All Cast is a super-fine phosphate-bound, cristobalite investment ideal for use with precious, semi-precious and non-precious alloys (all gold karats in white and yellow, silver, platinum, cobalt, steel, palladium and palladium alloys). Meticulously formulated compound provides the caster with a wide range of burnout temperatures. Burnout Range: 1300°–1800°F (704°–982°C). Sets in just 20 minutes! Burns out in 2 to 4 hours, depending on flask size. Smooth, accurate, strong, and reliable. Available in kits of 25 lb. and 50 lb. boxes that include liquid binder. Not for use with titanium or titanium alloys. Made in USA.

Description	Item#	Each

A. Auto-Vac Investing Machine

Take the worry out of investing with Auto-Vac. This timesaving machine mixes investment and fills flasks under full vacuum, eliminating the air bubbles that hurt casting quality and kill productivity down the line. Produces smooth, crisply detailed molds, which result in better castings. Also helps keep dust out of the air for a healthier workspace. Easy to use and clean: place flasks in vacuum chamber, swivel mixing unit over it, pour water and investment into mixing unit, seal lid and run machine; when done, swivel mixing unit over wash basin and clean out with water gun. Includes two all-metal stands for flexibility. Requires vacuum pump.

Features:

- Mixes and fills in a controlled environment to help reduce casting defects.
- Reduces exposure to harmful investment dust.
- Easy to use and clean.
- Includes 2 stands so you can choose a 47¼" or 55" working height.

Specifications:

Investment Capacity: up to 40 lbs., Max. Flask Height: 11"

Flask Diameter	3"	3½"	3¾"	4"	4½"	5"	6"
No. of Perforated Flasks with flange	6	5	4	4	3	2	1
No. of Flangeless or Solid wall flasks	8	7	7	6	5	4	1

Vacuum Requirement: 10 CFM, 29.5" Hg (300 liter/minute)

Electrical: 220V, 1 Ph, 50/60Hz

Dimensions: 27"W x 26"D x 47¼"H or 55"H (height depends on stand used)

Net/Ship. Wt.: 269/364 lbs.

B

C. Vac-A-Mix Investment Mixer

With a built-in vacuum pump, Vac-A-Mix vacuums investment while it's mixing to eliminate all bubbles from your investment. A built-in timer and easy-to-use buttons control mixing time and vacuum. Investment is mixed in closed bowls to reduce airborne investment powder. After gently pouring the investment into your flask, place the flask on the built-in vibrating base for a minute to make sure investment is uniformly dispersed and bubble-free.

- Built-in timer
- Built-in vacuum pump
- Adjustable built-in vibrator
- Includes 5 mixing bowls (200, 300, 500, 800 and 1200ml) and mixing paddles
- High vacuum power for bubble-free results

Specifications:

Electrical: 110V, 1.3 Amps, 150 Watts, 60Hz

Vacuum Pump Capacity: <23.6~ 26.7" Hg (<800 ~ 900 mbar)

Dimensions: 12.9" W x 11.8" D x 20.8" H (33 x 30 x 53 cm)

Shipping Weight: 65.8 lbs. (29.8kg)

C

VacuVest - Investment mixing and pouring all under vacuum!

Improve the quality of your casting and save time! VacuVest eliminates investing problems and easily increases your productivity. To operate, place flasks in lower chamber. Add premeasured water and investment into top. Operator controls exact mixing time, then fills each flask—all under full vacuum. Unit is cleaned using built-in automatic water wash and hand water gun. Waste empties into a tub for easy disposal. Backed by a one-year warranty against defects (except pouring taps, which may wear after extended use). Vacuum pump not included. Made in England.

Features:

- Mixes & pour investment under vacuum
- Improves quality for fewer rejects and speeds up production
- Speeds up production
- Reduces airborne investment powder for a healthier environment
- Controls mixing, vacuum and pouring conditions

F. Quatro Investment Particle Containment Stations, Small & Large

Ideal for jewelers located in offices without access to outside ductwork. Features a filtration system that captures particles, then recirculates clean air back into the room to save on heating and A/C costs. Large Station installs directly over your investment mixer and has a metal-frame filter area containing dust filters and true HEPA filters, ensuring 99.97% efficiency, to capture investment particles. Backed by a one-year manufacturer's warranty. Media refills are available that contain enough mixture for four refills. Made in Canada.

Features:

- Easy filter access
- Whisper quiet operation
- LED bright illuminated interior
- Top opening doors
- Medical Grade HEPA Filters
- Contains the Following Filters:
HEPA Filters: 854-2093, Dust Filters: 854-1394

Can be ducted to outside with optional 4" diameter collar/hose exhaust kit. (Item is special order)

A. Heavy-Duty Electric Burnout Furnace

A compact electric burnout furnace built for heavy-duty use. Features inner chamber lined with 2½" thick firebrick, swing-down door that can be used as a platform for loading and unloading flasks, counterweight for easy opening and closing and dial control with six temperature settings up to 2,000°F. Please see page 216 for our pyrometer and Type K thermocouple (#265-1920).

Electrical: 240V, 13A, 1 Ph, 3.1kW, 50/60Hz.

Measures 17½"W x 17½"D x 17½"H with 12"W x 12"D x 8"H chamber.

Ship. Wt: 136 lbs.

Rear view of exhaust/blower system

A. Ney® 3-550A Venturi Air Furnace – Excellent for use with platinum

The Ney 3-550A Venturi Air Furnace is engineered for the cleanest burnout possible in an electric oven. Gas porosity, also known as pinhole or micro porosity, can ruin platinum castings or require expensive rework such as laser welding later. The Ney 3-550A Venturi Air Furnace tackles gas porosity at its source.

The self-contained Venturi exhaust/blower system continuously introduces fresh air for more complete combustion of your waxes. It substantially reduces carbon residue and other by-products of incomplete combustion, virtually eliminating gas porosity in castings. Great for gold and silver too.

Features:

- Air intensity is user-controlled—increase airflow when you need to hold more flasks.
- Air is preheated before entering furnace to keep temperature constant.
- Flasks are uniformly heated—no hot or cold spots.
- Fully programmable digital temperature controller with LCD readout of temperature and countdown time, delay start and membrane keypad.
- Durable hybrid muffle material for more efficient heating.
- Slide-out heating elements for easy replacement.
- Space-saving vertical rise door with smooth roll-back action for maximum access.

Specifications:

Electrical: 220–240V, 1 Ph, 2800W, 50/60Hz
 Dimensions:
 Outside: 15.8"W x 17.0"D x 16.0"H (25.0"H with door open)
 Chamber: 9.0"W x 9.0"D x 7.0"H
 Max. Temp.: 2,012°F (1,100°C)
 Net/Ship. Wt.: 45/60 lbs.

Description	Item#	Each
Ney 3-550A Venturi Air Furnace	265-1361	\$3,280.00

B. Ney® Vulcan Furnaces

Burnout furnaces designed by Ney to make your burnout more precise and your casting process more convenient. Vulcan's high-performance, hybrid muffle is more durable than fiber and allows faster heating and cooling than firebrick. Two slide-out side element plates make element replacement easy. Vulcan's door opens vertically with a smooth roll-back action to give maximum access to the chamber while using minimum vertical space. Available with your choice of manual or programmable temperature controls.

A-550 Manual Temperature Control:

Temperature is selected using a front panel control knob. Degrees are marked so you can dial the exact temperature you want, up to 2,012°F.

3-550 Programmable Temperature Control:

Features 9 three-stage programs and 1 single-temperature hold program. You can link programs together for a maximum burnout of 6 temperatures, 6 hold times and 6 rate settings. Temperature, countdown time and program number are digitally displayed at all times. Also features delay start. Membrane keypad and LED indicators make this controller easy to program and operate.

A. Ney® Fiber Furnace

A compact, electric burnout furnace which uses 25% less energy than a standard firebrick design. The secret is a lightweight ceramic insulating fiber muffle throughout the furnace chamber. Heating elements are embedded into fiber muffle for quick heating and even heat distribution throughout chamber. One-piece-construction chamber is replaceable, lightweight, heats faster and uses less energy. Efficient design achieves 4-wall heating for even temperature distribution. Sturdy 20-gauge metal cabinet is coated inside and out with temperature-resistant enamel. Pilot light and temperature control knob included. Tapered chamber fits flasks up to 6"H in the front and 5"H in the back. Includes 8" x 8" ceramic burnout tray.

Specifications:

Electrical: 115V, 12A, 1320W, 50/60Hz or 230V, 6A, 1320W, 50/60Hz

Dimensions:

Outside: 15"W x 14½"D x 16½"H

Chamber: 9"W x 9"D x 6½"H

B. Programmable Burnout Furnaces, Models 913, 914 and 918

These furnaces feature a programmable controller with three built-in, easy-to-use programs plus the ability to be custom-programmed for your own burnout schedule up to 99 hours, with delay start capability. Controller allows you to preset up to six segments or "ramps." Each ramp consists of (1) rate of heating/cooling, (2) temperature setting in °F or °C, and (3) hold time for each temperature. The program you set stays in permanent memory until you reset it. Furnaces are enclosed in tough stainless steel cabinets with firebrick chambers. Easily replaceable heating elements are secured in grooves inside the chambers.

A

A. Paragon SC3 Fiber Oven with Controller

The digital SC3 oven from Paragon is used for lost-wax casting and also fires precious metal clay, enamels, and glass in minutes up to 2000°F. The SC3 is popular with seminar teachers because it fires so fast and plugs into a 120 volt outlet (240V also available).

The SC3 fires automatically at the rate and temperature you enter on the built-in controller. A large, brightly lit display prompts for firing rate, temperature and hold time. Use the hold feature to automatically soak any type of precious metal clay to its recommended time or to hold flasks at desired temperature for casting.

The ¼" thick ceramic fiber firing chamber is wrapped in a steel inner case. The outer steel case remains cool due to the layer of air between it and the inner case. In addition, the case is slotted for air circulation. Electrical components, located in the base, stay cool even at extended hold times. The fast firing element is embedded in the firing chamber shell. The SC3 heats from the two sides and back. It includes a top vent for lost wax casting. Door opens 180 degrees for easy front loading. CE approved.

Specifications:

Electrical: 120V, 15 Amps, 1 Phase, 60Hz, 1800 Watts
240V, 8 Amps, 1 Phase, 60Hz, 2000 Watts

Overall Dimensions: 13.3"W x 14"D x 17"H

Chamber Dimensions: 7.75"W x 8"D x 7.75"H

Max. Temperature: 2000°F/1093°C

Control Type: Sentry Digital 3-Key Glass Control

B

B. Analog Pyrometer and Type K Thermocouple

A high-quality analog pyrometer for exceptional accuracy. Features large needle indicator for easy reading. Measures temperatures from 100°F to 2,400°F. Accurate to within ±2% of total reading. Includes Type K chromel-alumel thermocouple, wall hanging bracket and drilled plug for quick mounting in peephole.

Description	Item#	Each
Analog Pyrometer	265-1920	\$215.00

C

C. Handheld Digital Pyrometer

Enjoy digital accuracy on a modest budget with this reliable handheld unit. Features large LCD for easy reading even in bright light, low battery indicator and on/off switch to save battery life. Measures temperatures up to 1,999°F. Accurate to within ±2% of total reading. Includes easily replaceable Type K thermocouple with 5' wire and wall hanging bracket. Requires 9V battery. Measures 2¾"W x 1"D x 4¼"H. Weighs 5 oz.

Description	Item#	Each
Digital Pyrometer	265-1914	\$99.95

D

D. Burnout Oven Wax Trays

Two-part steel trays with upper grid for holding flasks during burnout and lower tray for collecting melted wax. After wax has melted out of flasks, remove stainless steel tray to prevent release of wax fumes. Flasks remain undisturbed, heating elements last longer and the furnace floor stays clean.

Description	Fits	Item#	Each
D. 12 ⁵ / ₈ " sq. Tray	#914 Furnace	265-1434	\$162.95
16 ¹ / ₂ " sq. Tray	#918 Furnace	265-1438	199.95

E

E. Brick Oven Cement

A permanent high-temperature refractory cement for all types of firebrick kilns. Simply mix with tap water and apply.

Description	Item#	Each
Brick Oven Cement, 1 lb. bag	265-1437	\$7.50

A. Gas Burnout Furnaces

Gesswein is proud to offer guillotine style gas burnout furnaces. Gas is more economical to run as well as providing a cleaner burn out due to the airflow. With no heating elements to burn out, you have less down time and with over 40 years of proven reliability; these furnaces are what you need!

These furnaces are carefully designed to provide many years of virtually trouble-free use and are constructed out of heavy-duty steel with the highest quality firebrick interiors along with a 3" ceramic fiber door and ¼" thick door cable. All units are equipped with a triple port burner to reach the temperatures needed for the complete elimination of all wax necessary for a clean mold. Natural gas connections are standard but propane is also a special order option if desired.

These furnaces are made to order and are customized for your specific use. Contact us to discuss your specific needs and we will prepare an exact price quote for your specifications. Made in USA.

All dimensions are in inches. Note: All furnaces (excluding the 26 x 26 model) can fit through a 28.5" door opening after you remove the furnace door and assembly. The model 26 x 26 requires a minimum door opening of 34.5".

*Arched rook allows better flow of exhaust gases and even heat distribution standard due to size of the furnace.

Shipment by truck is required on these furnaces.

A

A. Paragon® Programmable Controller – For Electric Ovens

Offers ramp-type burnout program with 6 temperature settings, 6 time settings (runs from 0–99 hours) and delay start. Includes detailed instructions with a short form version on the front of the unit so you'll never forget. Made in USA.

Features:

- Digital temperature display in °F or °C
- High-temperature safety shutoff
- Type K thermocouple

Specifications:

Electrical: 120V or 240V, 50/60Hz

Dimensions: 6½"W x 4"D x 15½"H

Ship. Wt.: 10 lbs.

Description	Electrical	Item#	Each
Paragon Controller	120V, 50/60Hz	265-1453	\$699.00
	240V, 50/60Hz	265-1454	825.00

B

B. Kilninder 4.E Programmable Controller – For Electric and Gas Ovens

Offers standard and ramp-type burnout programs with ramp time and dwell time from 0–42 hours in 10-minute increments and delay start from 0–85 hours in 20-minute increments. Boasts 99-program memory (a program can consist of 1–20 stages, each of which controls kiln temperature, ramp time and dwell time). Includes detailed instructions. Made in USA.

Features:

- Digital temperature readout in °F or °C
- Temperature control precision of ±8°F (±5°C)
- Elapsed time display
- Security lock to prevent accidental program changes
- Electronic feedback to eliminate temperature overshoot
- High-temperature safety shutoff & Built-in surge protector
- Power outage return
- Secondary thermocouple accommodation for backup purposes

Specifications:

Electrical: 90–250V, 50/60Hz

Dimensions: 6⁵/₈"W x 8¹/₂"D x 4¹/₂"H

C

C. Centrifugal or Lost Wax Jewelry Casting

By Murray Bovin, Revised by Peter M. Bovin

Entire casting process in step-by-step detail. An excellent reference source for any caster. Covers different methods of casting, describing all processes involved plus tools and equipment. Includes dozens of charts that detail burnout programs, investing procedures, metal and casting temperatures and much more. Photos show work in progress. Softcover, 143 pages.

Description	Item#	Each
Centrifugal or Lost Wax Jewelry Casting - Book	810-2800	\$24.50

D

D. Lost-Wax Casting: Old, New, and Inexpensive Methods

By Fred R. Sias Jr., Ph.D.

Designed to be used as both a textbook and a reference book, this work is directed primarily at beginners. Places heavy emphasis on understanding the processes involved. Includes chapters on spruing, investing, wax elimination, centrifugal casting, vacuum casting, alloys, finishing and more. Softcover, 201 pages.

Description	Item#	Each
Lost Wax Casting - Book	810-2956	\$22.95

E

E. Basic Wax Carving, Volume 1 – By Spike Cornelius

Learn the basic steps and skills necessary to carve your own wax project or design. Demonstrates proper setup of bench environment, proper use of tools, the act of squaring up a rough block of wax, and accurate design transfer (layout). Intended for the serious student who wants to learn professional wax carving. Color, 1 hour.

Description	Item#	Each
Basic Wax Carving - DVD	810-3000	\$39.95

actual items may vary.

A. Deluxe Vacuum Casting Kit For high-quality production casting.

With the Gesswein Deluxe Casting Kit, you can carve original designs in wax, pack, vulcanize and cut rubber molds, inject the rubber molds to make wax patterns, tree your patterns, mix and vacuum the investment, burn out the flasks and vacuum cast them. This kit offers the flexibility to cast both perforated flasks and standard solid-wall flasks. All you need is a melting torch (see pp. 517-518) or electric melter (see p. 225) to cast from one item to over 50 items per day depending on size. Add extra flasks and cast even more.

Electrical: 115V (220V available).
Ship. Wt: 246 lbs. (Can ship UPS Ground)

Description	Item#	Each
Deluxe Vacuum Casting Kit 	265-1164	\$3,850.00

 Although no hazardous shipping surcharge applies, these items can only ship via UPS® Ground, no air, FedEx® or US Mail possible. Cannot ship to Alaska, Hawaii or Puerto Rico.

Includes:

- Deluxe Vacuum Casting Machine, Model T1.5
- SC3 Fiber Furnace
- Hand Pump Wax Injector (2³/₄ qts.)
- Junior Vulcanizer
- Perforated Flask, 3¹/₂"D x 4"H
- Sprue Base for above
- Perforated Flask Sleeve
- Perforated Flask Tongs
- Solid-Wall Flasks (2)
- Sprue Bases for above (2)
- Rubber Flask Sleeve
- Standard Flask Tongs
- Mold Release Spray
- Sprue Former and Rod (10)
- Dial Thermometer
- Knife Blades (10)
- Knife Handle
- Injection Wax (5 lbs.)
- Injection Mold Plates
- Investment (23kg/50#)
- Investment Scale & Scoop
- Spatula
- Rubber Mixing Bowl
- Graduated Cylinder
- Borax
- Handled Melting Borax
- Heat-Resistant Gloves
- Carbon Stirring Rod
- Mold Rubber (5 lbs.)
- Mold Frames (2)
- Mold Frame Plates (4)
- Wax Wash
- File-A-Wax Set
- Sprue Wax (1 lb.)
- Sticky Wax
- Wax Carving Tools (set of 6)
- Alcohol Lamp
- Jewelry Casting book, by Murray Bovin

B. Basic Vacuum Casting Kit

All you need is a melting torch and our Basic Vacuum Casting Kit to cast your own wax patterns one piece at a time or to make small trees to cast several items at once. An excellent casting reference book is included. Electrical: 115V (220V available).

Ship. Wt: 173 lbs. (Can ship UPS Ground)

Description	Item#	Each
Basic Vacuum Casting Kit	265-1167	\$2,265.00

Includes:

- Vacuum Casting Machine, Model T3
- SC3 Fiber Furnace
- Investment (23kg/ 50#)
- Investment Scale & Scoop
- Rubber Mixing Bowl & Spatula
- Graduated Cylinder
- Heat-Resistant Gloves
- Solid-Wall Flasks (2)
- Flask Tongs
- Sprue Bases (2)
- Sticky & Sprue Waxes
- Wax Carving Tool
- Wax Wash
- Borax
- Alcohol Lamp
- Carbon Stirring Rod
- Handled Melting Crucible
- Jewelry Casting book, by Murray Bovin

Representative items pictured;
actual items may vary.

Substitutions: We will be happy to consider substitutions, at your request, of the major pieces of equipment in any of our Casting Kits. For example, if you substitute a larger furnace (which will accommodate more flasks) you can cast dozens or even hundreds of items per day using the same casting machine. Please call our Inside Sales Department for price quotations on kits with substitute items.

A

A. T1.5 Deluxe Vacuum Casting/Investing Machine

For both standard and perforated flasks

Our benchtop caster allows you to invest your flasks under vacuum on the left side of the machine and vacuum cast both perforated and standard flasks on the right side. Turn the control handle to "Investment Table," and the powerful 3 CFM vacuum pump pulls air bubbles from the investment under a 9" dia. x 8½"H bell jar. Turn the handle to "Casting Chamber," and vacuum is redirected to the casting side. Three adapters are included to cast small and large perforated flasks (up to 5" x 7") and standard solid-wall flasks. Use of perforated flasks in the casting chamber allows vacuum to be pulled from both the walls and bottom of the flask, ensuring a complete fill and denser casting. Made in USA.

Includes:

- Two adapter plates to cast 3½" and 4" dia. flasks (no adapter plate needed for 5" flasks)
- Adapter plate to cast solid-wall flasks
- Bell jar, flask tongs, vacuum pad, 1 pt. vacuum pump oil
- 3½" x 4" perforated flask, 3½" sprue base

Specifications:

Electrical	110V, 6A, 60Hz or 220V, 3A, 50Hz

B

B. Vacuum Casting/Investing Machine, Model T3 – For standard flasks

An ideal system to use when space is at a minimum! The 1/2 HP, 3 CFM vacuum pump will create a negative pressure equal to 27–29" Hg at sea level to eliminate air bubbles from investment and for vacuum-assist casting. Includes vacuum pump, 6' hose and connections, built-in vacuum gauge, sturdy Plastic bell jar (9"D x 8"H inside), rubber investing pad and silicone casting pad. Recommended for flasks up to 4" x 4". Electrical 110V, 6A, 60Hz. Casting unit measures 12½"L x 12½"W.

Description	Ship. Wt. (lbs.)	Item#	Each
B. T3, complete	55.5	265-1755	\$820.00

A, B Ti-Research Cast/T Centrifugal Casting Machine

Cast/T is an award-winning centrifugal casting device designed to make casting more efficient and versatile. The compact machine is designed for torch melting and can cast silver, gold, platinum and stainless steel. In fact, Cast/T can handle any metal or alloy that can be melted and cast under atmospheric conditions. Cast/T can even produce rings with stones in place. A maximum of 450 grams of gold can be cast in one cycle within its compact frame.

In contrast to conventional centrifugal machines, the flask does not sit at the end of a revolving arm. Instead it rotates in place along its own axis. Patterns are not treed but sprued radially onto a wax disk to effectively fill the mold during casting. Because no tree or center sprue is necessary, Cast/T cuts metal waste by about 50% over traditional casting methods.

Don't let Cast/T's small size fool you; it can handle up to 25 ladies' rings per flask. The unique flask design allows you to use less investment and to fit more flasks in your oven. Three different mold sizes are available to accommodate both large and small jewelry models and a wide variety of casting needs.

Cast/T spins the flask at a fast speed of 1,100rpm to ensure complete fills of even high-temperature metals such as platinum and stainless steel. As a result, Cast/T requires a strong investment. Dental investments can be used, but for consistent, predictable results, we recommend All Cast (see p. 211). Both models include small mold ring (flask), large mold ring, 250g crucible, crucible holder, sprue base, five wax sprue disks, pair of tongs and comprehensive instruction manual.

Electrical: 115V, 40W, 60Hz or 230V, 30W, 50Hz. Measures 6.6" dia. x 10"H. Weighs 19 lbs. Meets stringent European safety standards, including CE and TUV. Backed by a two-year manufacturer's warranty (excludes consumables). Made in Germany.

C. Heat-Resistant Gloves with Aluminized Back

Gloves are manufactured from 22 oz. basket-weave fiber blended with fiberglass. Aluminized back protects against radiant heat while wool lining protects against contact heat. Specially designed for better cooling, comfort and safety. Gloves have been used in temperatures up to 800°F for brief contact. Wide cuff openings allow gloves to be dropped with the flick of the wrist in case of excess heat buildup. Measure 14" long.

Description	Item#	Each
Heat-Resistant Gloves, pair	816-1020	\$53.95

D-E Heat-Resistant Gloves

For safe, easy handling of hot objects. Gloves are fully lined with black felt and manufactured from 22 oz. basket-weave fiber blended with fiberglass. Ideal for use in temperatures up to 1,000°F for brief contact. Extra-wide cuff openings allow gloves to be dropped with a flick of the wrist in case of molten splash or excess heat buildup.

Description	Item#	Each
D. 14" Gloves, pair	816-1015	\$41.95
E. 23" Gloves, pair	816-1016	76.50

D

E, F ZO Paint for Crucibles

Prevents platinum contamination during casting

ZO Paint is a calcia-stabilized zirconium oxide (ZrO₂) paint which shields platinum from harmful chemicals leached out of silica or quartz crucibles. Preventing platinum contamination and brittle, porous casting. Best applied in several thin coats with an airbrush (sold separately). Quick to dry. Because it allows you to use the same crucible for more melts without worrying about contamination, you get the most out of each crucible. Use Airbrush Set (includes 9 oz. Propel propellant) to apply in multiple thin layers.

Description	Item#	Each

B. Re-Cast It

A remarkable alloy additive that restores the fluidity, color and brightness of old or scrap yellow gold before you cast it. Use to eliminate the porosity associated with casting old gold. Add 5% to your gold, melt and stir. Flow temperature: 1,950°F. One jar casts up to 800 dwt of gold. Ship. Wt: 2 oz.

Description	Item#	Each
Re-Cast It	857-3010	\$59.95

C. Manganese Bronze Casting Grain

This nonprecious alloy resembles 14K gold. It can be oxidized, antiqued or plated. Great for sample lines to avoid theft and use of gold. Should only be torch melted. Casting temp: 1,700-2,100°F. Melting point: 1,620°F. Specific gravity: 8.3.

Description	Item#	LB. Prices	
		1-9	10+
Manganese Bronze Casting Grain	857-2995	\$23.75	\$20.19

D. Combination Sliding Ingot Mold

High-quality finished steel mold for converting clean scrap metal into convenient and usable shapes. Great versatility—round and different size flat shapes can easily be formed. Flat width adjustable up to 2". Simply melt metal, heat ingot and pour.

Ingot Sizes:
 Round: 3, 4, 5 and 6mm
 Flat: 80 x 50 x 4mm

Description	Item#	Each
Combination Sliding Ingot Mold	268-1100	\$44.05

E. Sliding Ingot Mold

Used to convert clean scrap metal into flat stock for rolling. Molten metal is poured into the mold, which can be parted by removing the clamp. Each mold can be made smaller by adjusting the sides in a horizontal direction. Maximum capacity: 115 dwt. Maximum ingot size: 50 x 45 x 3.5mm.

Description	Item#	Each
Sliding Ingot Mold	268-1260	\$42.75

F. Econo Extra-Long Wire Ingot Mold

One-piece cast-iron mold with handle. Use for making wire ingots. Features three 9 1/4" long depressions: two are approximately 1/8" wide, and the third is approximately 3/8" wide. Measures 15" long.

Description	Item#	Each
Econo Extra-Long Wire Ingot Mold	268-1201	\$29.95

G. Small Wire Ingot Mold

Makes strips in three sizes: 19mm x 8mm x 170mm, 7mm x 8mm x 170mm and 9mm x 9mm x 170mm. Measures 11 1/4" long.

Description	Item#	Each
Small Wire Ingot Mold	268-1250	\$12.75

A. Electric Melting Furnaces

Made with the highest standards, the Electric Melting Furnaces are built with a solid steel construction as well as the finest components. Many years of experience combined with continuous technological updates and a constant search for innovative materials, places them in a quality level of excellence recognized worldwide. Available in 3 sizes/capacities; 0.5kg, 1kg, 3kg and 3kg with a tilt feature. CE certified. All 4 models have auto shut-off at the maximum temperature of 2012° and 110V/60Hz. Includes: Melting furnace complete with pyrometer, graphite crucible, crucible tongs and, graphite stirrer. Made In Italy.

	Fine Gold Capacity	Tilt Item#	Watts	Overall Size (WxDxH)	Weight	Item#	Each

E. Accu-Melt Furnace

Electric melting furnace for melting gold, silver and other nonferrous alloys for casting, ingot or shot making. Graphite crucible has a capacity of 1kg pure gold. Groove in crucible lip makes it easy to remove crucible from melter with special tongs (included). A full 700W of power provides temperatures up to 2,012°F. Digital operation with digital temperature readout. Supplied with one crucible and tongs. Made in Italy.

Specifications:

Electrical: 110V, 700W, 60Hz or 220V, 1 Ph, 700W, 60Hz
 Capacity: 1kg fine gold (32.15 troy oz.)
 Dimensions: 9"W x 9"D x 13½"H

GALLONI

Induction Casting Machines

ASEG GALLONI Company, established in Italy in 1948, was the first in the world to produce electronic induction machines for melting and casting special metals, precious and non-precious alloys for the global jewelry and dental markets.

Using expertise and experience gained over many years, Galloni manufactures a wide and comprehensive range of electronic casting machines for gold, silver and platinum that are applicable to every type of lost-wax casting requirement.

Galloni Company manufactures its equipment in compliance with the CE standards and is certified according to ISO 9001, CISQ, IQNet.

Casting Chamber

Front Panel

Galloni Okay Plus

Introducing Galloni's newest, high performance, fast action, medium-frequency centrifugal vacuum casting machine. Self-stirring for homogenous melts. Cast up to 300 grams of Platinum, 200 grams of 18K Gold and 130 grams of Silver in minutes using special ceramic crucibles.

The solid-state power generator is electronically controlled and the casting arm is easily balanced and accepts flasks up to 3.5" x 3.5" high.

Includes flask, ceramic crucible and cover for gold, ceramic crucible for platinum, melting coil and crucible carriage with holding plate for either gold or platinum, metal stirring rod, eye shield and flask tongs. Backed by a one-year manufacturer's warranty.

Features:

- Automatic movement of coil (pneumatic)
- Vacuum/Gas supply switch
- RPM regulator (adjustable arm acceleration)
- Optical pyrometer

Specifications:

Max. Crucible	300g platinum	Electrical:	230V, 5kW, 1 Ph

G1 Ultimate

G3 Ultimate

Galloni G1 and G3 Ultimate Casting Machines – Pressure Over Vacuum

The Galloni “G” Ultimate casting machines are the latest and most technically advanced induction heated vacuum “over pressure” machines currently available worldwide, featuring low frequency generators and fully proportional computer-controlled power output. The operator has simply to charge the crucible, place the casting flask in position and press one button! Both models are equipped with a touch-screen 3-color LED 3D. The machines lead the operator logically step-by-step through the casting sequence, irrespective of the type and quantity of the alloy. Frequency and power output are automatically and continuously adjusted and, just ahead of attaining the preset casting temperature, the computerized control starts modulation of the heating current by delivering low frequency impulses, thus inductively stirring the melt. Then, when all parameters are achieved and the temperature “spread” is no more that 4°C either side of the set point, pouring starts automatically followed by strong pressurization of the molten metal by inert gas. The complete cycle can be performed in 5 minutes.

Backed by a one-year manufacturer’s warranty.

Specifications:

Crucible

Pressovac MAX

Galloni Pressovac MAX – Pressure Over Vacuum

Incorporates state-of-the-art features for high-production casting of both **platinum and gold** with extremely fast cycle times: 2–3 minutes for gold and platinum.

- Full vacuum casting chamber to radically enhance crucible life and to remove gases from the flask, minimizing or eliminating gas porosity.
- After vacuuming, the casting chamber is flooded with inert gas to prevent oxidation of gold and platinum/cobalt alloys.
- Medium-frequency induction melting with self-stirring effect for homogeneous melts.
- Produces **extremely dense** castings.

Includes one crucible kit and flask cradle. See page 230 for details. Backed by a one-year warranty. CE approved.

Specifications:

Power	5kW
Max. Crucible Capacity	350g Pt, 800g 18K Au, 500g Ag, 180g Pd, 400g Steel
Max. Flask Size	4" dia. x 5"H

Galloni Pressovac – Pressure Over Vacuum

Compact electronic induction vacuum/pressure casting machines scaled down to a smaller size. Pressovac is a perfect entry-level induction casters that will keep up with your production as your business grows. The melting/casting chamber and cover are made of thick anodized aluminum, and both cover and chamber floor are water-cooled so that chamber stays cool even after multiple castings—**there's no downtime between casts!**

Pressovac can cast gold, silver, platinum, palladium, titanium alloys and steel and handles all types of models. Melts via electronic induction for quick self-stirring homogeneous melt, then casts under vacuum with powerful over-pressure of inert gas to simultaneously pull and push the metal into the flask. Guaranteed dense castings without the brittleness, cracking or subsurface porosity that cause expensive rework or customer returns.

Pressovac Optical includes an optical pyrometer for accurate temperature measurement of platinum, palladium, titanium or steel. Supplied with 3 crucibles (1 each for gold/silver, platinum, and palladium/steel) and a flask adapter for a 3.5" x 3.5" flask along with a metal stirring rod and flask tongs. **Can also cast gold and silver but if accurate temperature measurement is needed for these metals, we recommend the Pressovac Dual below.**

Pressovac Dual includes both an optical pyrometer (for platinum, palladium, titanium alloys or steel) and an immersion thermocouple (for gold/silver) making it suitable for all metals. Supplied with 1 crucible kit (choose from these kits: gold/silver, or platinum/palladium/steel) and a flask adapter for a 3.5" x 3.5" flask along with a metal stirring rod and flask tongs.

See page 230. For crucible kits which you can choose when placing your order.

Backed by a one-year manufacturer's warranty.

Specifications:	Pressovac (Optical)	Pressovac (Dual Pyrometer)
Power	3.0kW	3.0kW

Pressovac Dual Pyrometer Crucibles

A

A. Au Kit – for Pressovac Dual Pyrometer

- Graphite crucible cemented with its container for gold and silver (20 cc)
- Lid cover for crucible
- Graphite thermocouple sheath
- Spare thermocouple type "S"
- Melting coil (3648)
- Crucible holding plate complete with crucible lid cover holder mechanism

Description	Item#	Each
Au Kit for Pressovac Dual Pyrometer	265-0816	\$1,685.00

B

B. Pt/Pd/Steel Kit – for Pressovac Dual Pyrometer

- Ceramic crucible for platinum (10 cc)
- Silicon carbide crucible (20 cc)
- Melting coil (3645)
- Crucible holding plate complete with crucible lid cover holder mechanism

Description	Item	Each
Pt/Pd/Steel Kit for Pressovac Dual Pyrometer	265-0817	\$1,108.75

Pressovac MAX Crucibles

C

C. Au Kit – for Pressovac MAX

- Graphite crucible cemented with its container for gold and silver (60 cc)
- Lid cover for crucible
- Graphite thermocouple sheath
- Spare thermocouple type "S"
- Melting coil (3647.1)
- Crucible holding plate complete with crucible lid cover holder mechanism

Description	Item#	Each
Au Kit for Pressovac MAX	265-0891	\$1,710.00

D

D. Pt Kit – for Pressovac MAX

- Ceramic crucible (20 cc)
- Melting coil (3650.1)
- Crucible holding plate complete with crucible lid cover holder mechanism

Description	Item#	Each
Pt Kit for Pressovac MAX	265-0892	\$1,125.00

E

E. Steel/Pd Kit – for Pressovac MAX

- Silicon carbide crucible (40 cc)
- Melting coil (3650.1)
- Crucible holding plate complete with crucible lid cover holder mechanism

Description	Item#	Each
Steel/Pd Kit for Pressovac MAX	265-0893	\$1,034.00

GALONI Pressovac Crucibles

Ceramic container for graphite liner (for Au)

Interchangeable graphite liner (10 cc) (for Au)

Ceramic crucible (10 cc) (for Pt)

Silicon carbide crucible (20 cc) (for Steel/Pd)

A. Devesting Machine

Use this high power, heavy-duty system to thoroughly clean investment from castings. Two-piece unit has a rollout catch chamber for removal of accumulated investment. Adjustable water spray nozzle is controlled by a foot pedal. Seam-welded steel frame construction with brushed stainless steel body. Internal work light. Front hinged door for optimal viewing. Heavy-duty replaceable rubber gloves.

Specifications:

Electrical: 240V, 15A, 1 PH, 60Hz
 Motor: 3 HP
 Dimensions:
 Overall: 24³/₈"W x 28³/₈"D x 59"H
 Workspace: 23³/₈"W x 13¹/₂"D x 12⁵/₈"H
 Max. Water Pressure: 1,700 PSI
 Water Flow: 10.5L/min.
 Net/Ship. Wt.: 293/440 lbs.

Description	Item#	Each
A. Devesting Machine 	265-2183	\$6,425.00
Replacement Gloves, pair	265-2185	32.95
Replacement Nozzle	265-2187	45.00

A

B, C Hydro Air Wash Gun

Removes investment from castings by using compressed air and water. Made of chrome-plated zinc and brass. Includes heavy-duty, squeeze-trigger air valve, rubber nozzle and hand grips for protection against hot water. Reduces cleaning time and eliminates costly cleaning equipment. Operates on 50–200 PSI. Requires 3/4" dia. x 4"L hose (sold separately) for connection to faucet. Net Wt: 3 lbs.

Description	Item#	Each
B. Hydro Air Wash Gun	260-1800	\$145.00
C. Water Hose	260-1805	10.95

B

C

D. NeyClean SP Investment Remover

Specially formulated NeyClean SP makes quick work of investment removal. The powerful powder formula strips investment from your castings and molds exceptionally fast. If you use it in a heated ultrasonic tank, NeyClean SP works even faster: heat enhances its cleaning power. Better still, the exclusive powder formula can be used over and over again, providing great savings over competitive products. All this and it's even biodegradable! Effective, easy to use, economical and safe for the environment—NeyClean SP is all of these. Supplied in a plastic container. Combined with hot tap water, one container makes 12¹/₂ liters (13 qts.) of solution.

Description	Item#	Each
NeyClean SP Investment Remover	260-4260	\$36.90

D

E. Vest Off

A mildly acidic water-based cleaner for removing investment plaster. Dilute with five parts water in ultrasonic cleaner (use auxiliary pan or beaker). Use cold and undiluted as dip. Rinse off with water. Gives off no fumes. Comes in 1-gallon bottle.

Description	Item#	EACH Prices	
		1-4	5+
1-gallon bottle 	260-4300	\$35.60	\$26.70

 UPS® hazardous shipping surcharge applies. Ships via UPS® Ground only, no air, FedEx® or US Mail shipments. Cannot ship to Alaska, Hawaii or Puerto Rico.

E

F. Hand Brush with Enclosed Handle

Features stiff nylon bristles set in a durable block with enclosed handle for keeping skin and fingernails clean. Ideal for removing investment and more. Measures 4"L x 1¹/₂"W.

ST-50

A

ST-60

B

Both units includes power pack, lightweight handpiece, on/off foot switch, wrench and instructions. ST-50 includes Carbide Tip only. ST-60 includes all 5 tips.

A, B SonoCraft Burnishers Ultrasonic Porosity Removers

SonoCraft units were designed especially for professional jewelers to remove porosity and other surface imperfections quickly and easily. But they are also amazing surface finishers with excellent reach into the tiniest areas: polishing under cathedral settings and cleaning up half round rails. You can polish and burnish areas that are almost impossible to reach by hand which traditionally had to be done with a magnetic tumbler. Both units include power pack, lightweight handpiece, on/off foot switch, wrenches and instructions. Made in Japan.

Select between two powerful units:

The **ST-50** comes with one burnishing tip and works on softer metals such as gold and silver. It operates in a continuous mode with a constant fast impact governed by a Variable Rheostat dial. Used for burnishing and polishing.

Our **ST-60** includes five tips and works on the softer metals as well as hard metals such as Platinum. A very versatile machine, the ST-60 has four ultrasonic modes:

- Single Hit Mode: Tightens beads onto stones with minimal or no touch-up needed.
- Intermittent Mode (Slow): Slowly repeating impacts for light engraving.
- Intermittent Mode (Rapid): Rapidly repeating impacts for engraving.
- Continuous Mode: Constant fast impact for burnishing and polishing.

Benefits:

- Advanced ultrasonic technology drastically reduces finishing time for increased productivity.
- Automatic frequency adjustment provides optimal efficiency for excellent finishing results.
- High output power handles all kinds of metals with ease.

Specifications:

A-E Carbide Rotary Burnishers Faceted – For platinum, gold & silver

A fast way to remove porosity, firescale and scratches. Made of highly polished tungsten carbide on 3/32" shanks. Measure 1 1/2" long. Select between a 12, 18, or 36-facet sidewall.

- 12-facet burnisher leaves a coarse finish and covers large pinholes on gold and silver
- 18-facet burnishers leave a medium finish and cover moderate pinholes on all metals
- 36-facet burnishers leave a fine finish and cover small pinholes on all metals.

Imported from South Korea.

F. Margin Roller Burnisher 3/32" Shank

For burnishing over scratches in gold, making it possible to salvage many pieces without gold loss. Can also be used for burnishing over microporosity in castings. The 3/16" (5mm) head consists of five steel rollers that act as rotating mallets. Measures approximately 1 3/4" long with 3/32" shank for use with handpiece.

Description	Item#	EACH Prices	
		1-2	3+
Margin Roller Burnisher	811-2150	\$21.95	\$19.76

G. Porosity Killer 3/32" Shank

For burnishing over porosity in gold, making it possible to salvage highly porous pieces without gold loss. Similar in operation and effect to a margin roller but more aggressive. The 2mm thick head measures approximately 1/2" x 1/2" with rounded corners. 1 3/4" overall length.

Description	Item#	Each

See pages 158 + 494 for more burnishers.

H, I Busch® Carbide Burnishers 3/32" Shank

Fig. RR426 Carbide Burnishers from Busch. Exceptionally well made tools used to remove porosity and surface imperfections from cast pieces by moving metal over the defect. Burnisher tip is rounded. Dia: 6.0mm, Length 13.0 mm.

J. ECO-Torque 280 Rotary Micromotor General Purpose

Our most affordable rotary micromotor system! The ECO-Torque 280 handles a wide range of rotary handpiece applications. Whether you need a system for grinding, drilling, polishing or bright cutting, ECO-Torque 280 will get the job done.

Includes a compact controller with 110/220V selector switch and forward/reverse switch, lightweight 35,000rpm rotary handpiece with 3/32" collet, on/off foot switch, handpiece cradle rest, replacement pair of carbon brushes and collet chuck wrenches. Controller measures 4 1/2"W x 5 3/4"D x 3 3/4"H and weighs 2.75 lbs. Handpiece measures 6" long x 1.1" diameter (tapers to 0.7" dia. at finger grips) and weighs 7.3 oz. An optional reducing collet is available (sold separately, see p. 434) to reduce collet size from 3/32" to 1/16" to run high-speed burs.

Description	Item#	Each
ECO-Torque 280	510-2980	\$199.95

A

A. Niles Pneumatic Sprue Cutters

Heavy-duty air-powered tools for cutting castings from sprues. Feature tapered blades that make it easy to get in between closely spaced castings. Eliminate hand and arm fatigue and increase production. Can be operated by hand when not on stand. Each includes one pair of blades, stand, foot pedal, air hose and hose connectors. Air compressor requirements: 60-85 PSI, 0.8 CFM. Made in Japan.

Specifications:	Model 25	Model 35
Blades:	P6, High-Speed Steel	Z8P, Carbide
Cutting Capacity at Midsection of Blade:	3mm	4mm

Ultrasonic Cleaners

Ultrasonic cleaning technology utilizes high frequency sound waves to agitate a water-based cleaning solution that in turn acts on contaminants adhering to metals, plastics, glass and ceramics. Ultrasonic cleaners remove dust, dirt, oil, pigments, grease, polishing compounds, mold release agents, and biologicals like blood, fingerprints and saliva. Gesswein Cleaning Solutions are formulated for light, medium or heavy-duty cleaning and all reduce surface tension in order to clean more effectively and enhance cavitation (formation of microscopic cleaning bubbles).

A. Sonic Wave IV– Personal Ultrasonic Cleaner – 1¼ pints

The Gesswein Sonic Wave IV is the latest in the family of small ultrasonic cleaners for the home. Powerful and modern looking, the Sonic Wave IV is a professional grade digital Ultrasonic Cleaner with a 1¼ pint capacity half-wave PCB and high power transducers giving a large effective cleaning area—far superior to similar units on the market. Quickly cleans Jewelry, and DVDs, etc. Works well with our Ultrasonic Solution. The price point means it a great gift with purchase or add-on purchase for your customers.

Features:

- Large 2-color LED display.
- Powerful LED Blue Light inside
- Stainless Steel Tank.
- High impact plastic housing.
- See-through half-domed lid.
- Digital timer with 5 setting
- Auto shut-off.
- Frequency=42,000Hz

Specifications:

Capacity: 1¼ pints (600ml) Size: 7¾"W x 7¾"D x 7"H

B. Digital Ultrasonic Cleaner – 2½ qts.

A moderately sized ultrasonic cleaner for removing dirt and compounds from jewelry. Provides 42kHz of cleaning power. Features integral heater with radiator fan; quiet solid-state circuitry; digital controls with 90, 180, 280, 380 and 480-second cleaning cycles; isolated electronics for protection against moisture; heavy-duty wipe-clean plastic housing; durable stainless steel tank; and auto-shutoff for safety. Includes lid with viewing window and a cleaning basket. CE, GS, NRTL and PSE approved.

Specifications:

Capacity: 2½ qts.
 Electrical: 115V, 160W 50/60Hz
 Dimensions: Overall 13¾"W x 10"D x 8⅞"H
 Tank 10⅜"W x 6½"D x 3⅞"H
 Weight: 5½ lbs.

Elma "P" Series Ultrasonics

These top-of-the-line heavy duty cleaners are the most advanced industrial strength tabletop units available. The "P" series are extremely versatile and have 8 special ultrasonic features plus an intuitive, user-friendly operations display. The 2 frequency control allows for either high energy density for deep cleaning applications (37kHz)—or for gentle, quiet cleaning of delicate items such as pearls or small diameter tubes and capillaries (80kHz). Lids sold separately. Two-year Manufacturer's Warranty. Made in Germany.

Features:

- Normal: for general cleaning, mixing, dissolving.
- Pulse Mode: gives additional power through increased peak performance.
- Sweep: distributes the ultrasonic power throughout the tank.
- Degas: quickly degases liquid when freshly added to the tank.
- Power control: optimizes output for special and laboratory applications.
- Pause: interrupts the operation.
- Auto Start: automatic start when temperature is reached.
- Heat control: adjustable.

A. Elma “EASY” Series Ultrasonics
Superior Cleaning Power and Easy to Use!

The Elma EASY series includes 9 quality units of different sizes and is characterized by simple, user-friendly operation. With 100% ultrasonic power at a frequency of 37 kHz, the Pulse function and visual warning (bath temperature reaches the set limit), the Elma EASY solves typical cleaning tasks in the processing of jewelry and industrial parts quickly and efficiently.

The “Pulse” function can be activated to remove tenacious, mineral soiling and polishing pastes, increasing the ultrasonic power by up to 20%, so that any soiling will be removed easily and quickly. The limit temperature can be adjusted according to individual requirements. When the set temperature limit is reached the unit gives out a visual warning that helps to protect sensitive items from damage due to high temperatures. Made in Germany, 2-Year Manufacturer’s Warranty, 110V/60Hz.

Features:

- More power with Pulse function for removing dirt, polishing compound and hand cream.
- Visual limit temperature warning to protect sensitive parts.
- Easy handling with safety shutdown for more user safety.
- Pulse Function for 20% faster cleaning, removes caked on drift compounds.
- Electronic timer up to 30 minutes and also able to work continuously.
- Thermostatically controlled heating with safety shut off function.
- Programmable visual temperature limit warning protects sensitive parts.

BESTBUILT Ultrasonic Cleaners

BestBuilt Ultrasonic Cleaners utilize industrial transducers to create powerful 40KHz ultrasonic wavelengths—short enough to clean the finest details of your jewelry and powerful enough to remove caked-on dirt as well as rouge and other compounds. All BestBuilt models have a 30-minute timer and cover. The 4 largest units feature variable temperature control. All ultrasonics come with a 1 year warranty; 2 year transducer warranty and a sample of Ultrasonic Cleaning Solution. Made in South Korea.

UltraBasket	4 ⁷ / ₈ " x 3 ⁷ / ₈ "	851-5127	\$25.75

Ultrasonic Cleaning Solutions

Gesswein Cleaning Solutions are formulated for light, medium or heavy-duty cleaning and all reduce surface tension in order to clean more effectively and enhance cavitation (formation of microscopic cleaning bubbles).

Ultrasonic cleaning technology utilizes high frequency sound waves to agitate the cleaning solution that in turn acts on contaminants adhering to metals, plastics, glass and ceramics. Ultrasonic cleaners remove dust, dirt, oil, pigments, grease, polishing compounds, mold release agents and biological residue such as blood, fingerprints and saliva.

A-D Gesswein® Classic Ultrasonic Solution

The classics always come back! Gesswein is happy to bring back its original "Classic" Ultrasonic Cleaning Solution. With a 35:1 mixing ratio, the Classic Solution will work hard to remove tough dirt, grease, hand cream and still powerful enough to remove the toughest polishing compounds. Let your jewelry shine as first impressions are important! Available in Pint, Quart, Gallon, and 5 Gallon Pail.

Description	Yield at 40:1	Item#	Each

E-H SUPRA® FC Ultrasonic Solution

The Gesswein SUPRA FC Ultrasonic Solution is a must for any jeweler or industrial user needing fast cleaning action. Formulated in the USA, FC Ultrasonic Solution is fast and cleans the heaviest of compounds and dirt quickly and effortlessly. Compared to other solutions, Gesswein FC Solution is industrial strength and has minimal odor. It is non-ammoniated, non-flammable, alcohol free, mildly alkaline, environmentally friendly and non-hazardous to ship. Concentrated: use 50:1 in regular tap water and 100:1 in distilled or deionized water. Available in Pint, Quart, Gallon, and 5 Gallon Pail.

A-B Gesswein® Brite and Ultra Brite Ultrasonic Cleaning Solutions

Pick the right solution for every cleaning application.

Concentrated solutions formulated for specific jewelry applications. Both work well for ultrasonic cleaning, hand brushing and immersion or soak cleaning. Contain no chelating agents. Can be used from room temperature up to 160°F. Use in concentration of 2–20% for best results. Available in 1-quart bottles, 5-gallon pails and 55-gallon drums.

Brite (blue) is a moderately alkaline solution best suited for cleaning plain or stone-set rings (excluding those with delicate stones). Ideal for gold, silver and platinum as well as copper and brass. Perfect for everyday use in the retail store or repair shop.

Ultra Brite (pink) is a heavy-duty cleaning solution designed to quickly remove the most stubborn polishing compound residue. We think Ultra Brite is the strongest cleaner on the market, and it's free of ammonia and other harmful chemicals that could hurt your fine jewelry. Ultra Brite is ideal for all precious metals and stainless steel as well as diamonds and other stones that can withstand normal ultrasonic cleaning. Ultra Brite is considered hazardous to ship.

Description	Item# (1qt. Bottle)	Item# (5 gal. Pail)	Item# (55 gal. Drum)
A. Brite	851-5311 \$16.25	851-5312 \$199.95	851-5313 \$1,527.00

 Although no hazardous shipping surcharge applies, these items can only ship via UPS® Ground, no air, FedEx® or US Mail possible. Cannot ship to Alaska, Hawaii or Puerto Rico.

 UPS® hazardous shipping surcharge applies. Ships via UPS® Ground only, no air, FedEx® or US Mail shipments. Can't ship to Alaska, Hawaii or Puerto Rico.

C-D Magic Green – Powdered Ultrasonic Soap Concentrate

Magic Green is more economical and occupies much less space than liquid concentrates. Saves on shipping costs, too. And since it won't evaporate, it even keeps longer. Simply mix it to meet needs as product is adjustable for time of run and speed. Start with 1 ounce per gallon and up to 3 ounces per gallon. The stronger the mix, the faster it works and the longer it works. Perfect for gold and silver because it removes rouge and tripoli instantly. Ammonia-free and biodegradable.

Description	Item#	EACH Prices	
		1-5	6+
C. 32 oz. Bottle	812-0701	\$22.95	\$20.66

A. Deluxe Junior Steamer – For moderate production

This compact tabletop unit boasts up to 40% greater effective capacity than similar units, so it provides more steam before needing a water refill. Features a high-limit pressure control switch that regulates heat and pressure automatically. An automatic cutoff shuts the unit down if the water level drops below the heating element. Made of the toughest heavy-duty materials to withstand constant use. Easy to install with no plumbing required. Includes fast-response heating element, foot-controlled solenoid switch, safety relief valve, low-water cutoff with reset switch, steam pressure gauge, lockable blowdown drain valve and water fill funnel and valve. Complies with ASME safety code. UL and CSA approved. Uses ordinary tap water. Optional Mobile Steam Jet Gun available. Fits easily onto the Deluxe Junior Steamer. Trigger-operated gun on 7 feet of sturdy flexible hose. Includes T-fitting for mounting into steam line of steamer. One-year manufacturer's warranty. Made in USA.

Specifications:

Electrical: 120V, 12.5A, 1500W, 60Hz Max. Pressure: 60–85 PSI
 Capacity: 1.5 gals. Dimensions: 16½"W x 12"D x 19"H

Steam Cleaner Powder, 4 oz.	853-1000	\$5.95	\$4.76	\$4.17

D, E Automatic Water Feed Series Steamers – For high production

These steamers eliminate the need to manually fill and refill. Each model is equipped with an automatic water feeder that injects water as needed into the boiler under full pressure. Eliminates downtime, making steam readily available. Provides constant steam at approx. operating pressure of 50 PSI. Auto-6 is a compact version with one steam jet. Auto-8 has two steam jets. Electrical plugs not supplied. All models plumb to water line. Comply with ASME safety code. Use ordinary tap water.

Specifications:	D. Auto-6	E. Auto-8
Electrical*	208V, 1 Ph, 60Hz	240V, 1 Ph, 60Hz

F. Steam Dragon™ Steamer – Safe for malls, stores and offices

This space-saving unit produces steam on-demand rather than holding it under pressure like boiler-type steamers, so it eliminates the risk of explosion. Performs comparably to much larger machines yet requires no boiler permits, so it is welcome in public locations. Simple to operate: just insert the supplied water feed hose into a bottle of water, step on the foot pedal to feed water into your unit, and watch as water instantly flashes into steam and exits the nozzle. Flow of steam stops when all the water has boiled to steam. Features foot switch, durable 20-gauge stainless steel construction and solid-state controls. UL Listed. **Requires distilled water.**

Specifications:

Electrical: 115V, 11A, 1300W, 60Hz, Max. Pressure: 90–125PSI,
 Dimensions: 9"W x 12"D x 10"H, Ship. Wt.: 26 lbs.

A

See page 407 for Quatro Solder Pure Fume and Particulate Extractor

A. Quatro Fresh-Air Series HEPA Air Purifiers
Ensure optimal gold recovery and air quality.

Polishing operations and bench work create a great deal of dust, some precious, some harmless and some toxic. Many dust collectors pick up much of the dust at the source, but jewelry polishing operations also allow a substantial amount of dust to become airborne and settle around the shop. Fresh-Air Series Air Purifiers capture airborne dust and other contaminants in an advanced three-stage filtration system, then recirculate clean air back into the room. All provide complete room air exchange approx. 15 times per hour. Each includes smooth casters for easy relocation to dusty areas. Electrical: 120V (240V available). Optional odor filter also available by special order. Backed by a one-year manufacturer's warranty. Made in Canada.

Filtration System Features:

- Stage-1 Prefilter – Captures the biggest particles, prolonging the life of subsequent filters. Inexpensive and easy to change.
- Stage-2 HiCap Filter – Provides high-capacity particle retention. (Most precious metal will be captured by stage-1 and 2 filters, which can be sent to your refiner for reclamation.)
- Stage-3 HEPA Filter – Picks up 99.97% of 0.3 micron particulate, including soot and pollen. Recirculates clean air back into the room to help minimize heating and AC costs.

Fresh-Air Model	400	600	1000	2000

C

Stand Sold Separately

B, C Quatro Ductless Fume Hoods – For those without access to outside ductwork.

Units feature a two-stage filtration system that captures fumes, then recirculates clean air back into the room to save on heating and AC costs. Burnout fume hood installs right on wall behind burnout furnace. Rhodium fume hood installs directly over plating area. See Optional Stand. Each has a metal-frame filter container that holds an activated charcoal media mixture specifically formulated for the respective application. Backed by a one-year manufacturer's warranty. Made in Canada.

H. Luster Cloth

Polishes jewelry to an amazing high shine! Cleaner than a rouge cloth, Luster Cloth is a soft, felt-like material with special additives and non-scratching micro-abrasives that remove tarnish and dirt. Polishes silver, gold and many other materials to a like-new high shine. It won't scratch or stain your jewelry or your hands. Perfect for cleaning and polishing your own finished jewelry and economical enough to use as "give-aways" for your valued customers. Packaged in re-sealable plastic bags. Measures 7-1/2" x 5". For dry use only. Made in Japan.

10" x 10"	820-0360	\$2.60	\$1.95

I. Tenaris Pro Anti-Tarnish Dip

Tenaris Pro represents the new borderline in the field of anti-tarnish solutions for silver, gold, brass and bronze. Tenaris Pro effectively protects items against tarnish due to a superior surface protection. Internal laboratory tests observed that silver pieces treated with Tenaris Pro do not tarnish when exposed to hydrogen sulfide vapors for more than 65 hours. Tenaris Pro is easy and fast to use since it doesn't require any specific equipment for plating. Possesses low resistance to wearing and scratching. It is therefore particularly recommended for the protection of finished pieces during storage in the display case, safe, and shop window. Sold in 1 liter bottles.

- Works by dipping—no equipment required.
- Possesses low toxicity and is not dangerous to the environment (does not contain chromium.)
- Easy to use.
- Can be easily removed from the surface.
- Does not interact with the substrate.

Description	Item#	Each
Tenaris Pro Anti-Tarnish Dip	210-1361	\$28.50

Although no hazardous shipping surcharge applies, these items can only ship via UPS® Ground, no air, FedEx® or US Mail possible. Cannot ship to Alaska, Hawaii or Puerto Rico.

Compressed Air Filters

Compressed air filters remove water, oil, dirt and dust from compressed air. These contaminants can cause rust or premature wear in air handpieces, clogged lines in sandblasters or wax contamination in injectors. Even if your air compressor has an outlet filter, a long air line allows water vapor to condense downstream. To prevent contamination problems, install filters in the air line as close as possible to the air-driven tool, sandblaster or wax pot. Gesswein filters feature screw-on transparent polycarbonate bowls with automatic drains. Bowls are easily disassembled for cleaning without removal from the air line.

A, B Miniature Filter/Regulator/Lubricator Assembly For air handpieces.

Combines functions of filter, regulator and lubricator. General-purpose filter removes solid and liquid particles down to 5 microns. Regulator allows outlet pressure adjustment from 5 to 100 PSI. Micro-fog lubricator provides oil mist to lubricate moving parts of air handpieces. Has 1 oz. reservoir. Use optional bracket to mount on wall or bench. Maximum inlet pressure: 150 psi. Ports: 1/8".

Description	Item#	Each
A. Filter Assembly	850-7349	\$220.40
B. Mounting Bracket	850-7335	15.70
Lube Oil, 8 oz.	850-0985	25.65
Replacement Filter	850-7369	14.50

C, D Miniature Prefilter/Coalescing Filter Assembly

Ideal for applications requiring dry and extremely clean air. Designed for air compressors rated up to 3.5 CFM. Prefilter removes liquid and solid particles down to 5 microns; coalescing filter removes particles down to 0.01 micron. Use optional bracket to mount on wall or bench. Maximum inlet pressure: 150 PSI. Ports: 1/4".

Description	Item#	Each
C. Filter Assembly	850-7353	\$109.00
D. Mounting Bracket	850-7359	16.80
Replacement Prefilter (white)	850-7337	19.95
Replacement Coalescing Filter (green)	850-7357	68.60

E, F Miniature Filter/Regulator

Combines the functions of filter and regulator. Filter removes solid and liquid particles in compressed air down to 5 microns. Regulator allows outlet pressure adjustment from 5 to 100 psi. Maintains nearly constant outlet pressure despite changes in inlet pressure. Use optional bracket to mount on wall or bench. Maximum inlet pressure: 150 psi. Ports: 1/4".

Description	Item#	Each
E. Filter Assembly	850-7333	\$85.85
F. Mounting Bracket	850-7335	15.70
Replacement Filter	850-7369	14.50

G. Large Prefilter/Coalescing Filter Assembly

Designed for large air compressors rated up to 15 CFM. Ideal for applications requiring greater airflow. Prefilter removes liquid and solid particles down to 5 microns; coalescing filter removes particles down to 0.01 microns. Requires regulator for use with most air tools. Maximum inlet pressure: 150 psi. Ports: 1/4".

Description	Item#	Each
G. Filter Assembly	850-7355	\$160.00
Replacement Prefilter (white)	850-7337	19.95
Replacement Coalescing Filter (green)	850-7365	181.65

H-J Barbed Fitting, Worm Drive Clamp and Reinforced Air Hose

Fitting works with most wax injectors and small vacuum pumps. Worm drive clamp fastens air hose securely to fitting.

Sturdy 1/4" I.D. rubber air hose reinforced to withstand air pressures up to 250 PSI. Use for compressed air and vacuum pumps. Works with barbed fittings. Sold by the foot.

Description	Item#	Each
H. Worm Drive Clamp	265-2274	\$3.95
I. Barbed Fitting, 1/4" NPT	265-2272	5.95
J. Reinforced Air Hose	265-2273	2.50

A. SilentAire Compressors – Quiet yet powerful!

The **Val-Air** is a premium value model with cast aluminum lid with cooling fins for improved ventilation and Filter-Regulator with auto-drain feature and condensate bottle. With a coalescent filter to 0.01 micron.

Sil-Air is the same without the aluminum lid with cooling fins or coalescent filter.

Both versions feature powerful 1/2 HP motors which provide over 2 CFM of air. They can handle up to 10 large Wax Injectors and are fully automatic. Both make about as much noise as a refrigerator, so you can work without distraction. Both measure 14" dia. x 22"H. Weigh 58 lbs. May require additional filter at the air tool to eliminate condensation that can form in very long airlines. Accepts 1/4" male fittings. 220V also available. Made in Italy.

Features:

- Tank and line pressure gauge
- Line pressure regulator
- Moisture trap and filter
- Safety valve
- Air-intake filter

Specifications:

Motor	1/2 HP

B. Oil-Free Air Compressor – 3/4 HP Oil-Free Air Compressor

Engineered and built with the latest technology to provide high quality clean air. The Oil-Free Dual Piston Pump System allows the air compressor to work more efficiently, creating less noise and less wear for a longer pump life. Oil-less operation makes it virtually maintenance free! Includes tank and line pressure gauge, line pressure regulator, moisture trap with filter, safety valve, and air intake filter. Made in China.

Specifications:

Motor:	3/4 HP	Noise level:	52 dB
Max. Pressure:	116 PSI / 8 bar	Airflow:	118 liters per minute
Tank Capacity:	6 gals.	Dimensions:	16"Dia. x 21H"

E

E. Flushing Oil

For optimal service and long life from your vacuum pump, use flushing oil once a year. Just drain all the old oil, fill to normal level with flushing oil, run pump for 30 minutes, drain flushing oil, then fill with appropriate vacuum pump oil. Sold in 1 qt. container.

Description	Item#	Each
Flushing Oil, 1 qt.	265-1706	\$34.00

F

F. Air Gun with Self-Coiling Hose

A high-quality blow gun with responsive spring-loaded trigger. Produces a very narrow air stream on-demand. Includes convenient self-coiling 1/4" hose and 1/4" NPT coupler. Gun tip extends roughly 4" out of molded plastic handle. Color may vary.

Description	Item#	Each
Air Gun with Self-Coiling Hose	265-2325	\$39.50

A. PEPETOOLS Professional Pearl & Bead Drilling Machine

Drilling holes in pearls and beads can present several challenges, mainly when it comes to fixing them in place. This drill press meets those challenges head-on to help save precious time. Features a unique adjustable holding jig for securing multiple sizes of pearls and stones, ensuring you get straight, properly sized holes each and every time. Works in combination with your #30 handpiece (see p. 438) and flex shaft.

Features:

- Double-loop holder for securing your #30 handpiece
- Brass cup jaws for easy and stable mounting of pearls and beads
- 180° rotating jaw table for preventing hole misalignment when drilling from the opposite side
- Water holding post for cooling items while drilling, allows use of diamond drill bits
- Advancing lever for moving items securely into drill

Description	Item#	Each
Drilling Machine	816-1445	\$215.00

A

B. Pearl Drills – 1/8" Shank

Used to drill setting holes for seed pearls as well as both round and half-round stones. Sold individually and in a set of 12 diameters with plastic stand and cover.

Brass Riveting Wire	816-2600	\$4.65	\$3.95

Why Are Rectifiers Needed?

Rectifiers serve as sources of direct current for electroplating and electrostripping operations. A rectifier that operates on 115V AC and converts it to direct current can be easily regulated to produce the required voltage. When selecting a rectifier, be sure to choose one with sufficient amperage output, which determines the size of the bath as well as the surface area that can be plated. 10A output is recommended for smaller baths and can be used for electrostripping smaller items. For larger baths and electrostripping larger items, 25A output is recommended.

A, B PEPETOOLS IPS Pro 10A/25A and IPS Plus 10A/25A

Available in either 10A or 25A, and choose between the (IPS Pro) or the (IPS Plus) which incorporates a solution coil heater to keep your solutions at a consistent temperature. The IPS - (Intelligent Plating System) - rectifiers from Pepetools are the most user friendly, intuitive and fully programmable systems available.

All versions are fully programmable and user friendly utilizing a "one button" plating system. Two (2) internal counters provide an important measuring function that allows user to properly maintain plating bath, regulate the thickness of the plating and also calculate the amount of material being used. Just set the values you require and press start. IPS also can handle when your work piece accidentally touches the anode causing a short. That would normally shut down a plating system, but with IPS plating is bypassed until the short is eliminated and will self-restore and continue with the preset values entered.

These rectifiers utilize a sequential (staged) process providing an environment for a properly controlled crystal growth with the necessary density of the deposits. Both factors contribute to an exceptionally shiny, non-pitted finish.

Features:

- Ability to set plating voltage and amperage
- Ability to set plating time (1 second to 9 hours and 59 seconds)
- Reverse polarity time
- Integrated Amp hour counter
- Storage space for (5) individual programs (with defined plating time, reverse polarity time, current voltage, current amperage, and delayed start).
- Sequential Programming allows larger plating operations

Both the IPS Plus and the IPS Pro come with the IPS control unit and lead wires. The IPS Pro also includes a solution coil heater that fits a 1000ml beaker (not included) and is accurate up to +/- 1°C. This heater is fully programmable in either Fahrenheit or Celsius and maintains the set temperature perfectly! Made in USA.

Description	Item#	Each
A. IPS Pro 10A	212-0958	\$865.00
IPS Pro 25A	212-0959	865.00
B. IPS Plus 10A	212-0955	575.00
IPS Plus 25A	212-0956	575.00

C. PEPETOOLS Thermocontroller and Magnetic Mixer Set

Because hotplates and similar heating units for plating heat from underneath, and the glass commonly used for beakers is a very good insulator, these units take a long time to heat and fail to provide accurate, consistent temperature control. This revolutionary set solves these problems by heating your bath from within and constantly stirring it to maintain even temperature. Suitable for small and large baths. Heats a 2-liter bath to 125°F in 30 minutes.

Includes Thermocontroller with coil and sensor and Magnetic Mixer with stirring pellet. Thermocontroller turns blue when bath is not hot enough and green when at temperature, allowing you to see at a glance when solution is ready. Has a control dial and switch for displaying temperature in °F or °C. Measures 4.8"W x 5.9"D x 1.4"H. Magnetic Mixer has a control dial that allows you to fine-tune stirring speed. For consistent even plating the PEPE Thermocontroller and Magnetic Mixer Set is a must! Measures 3.0"W x 6.9"D x 5.1"H. Both units also include 110/220V selector switch. Made in the USA.

Easy-To-Use Innovative Plating Systems for Every Jeweler

JENTNER
PLATING TECHNOLOGY

Jentner products are used in more than 30 countries wherever quality and precision are required. With over 30 years of experience in the electroplating and surface finishing area they are known for providing innovative technologies. Gesswein is proud to offer a comprehensive range of Jentner electroplating products from the Digital II and Digital V galvanic bath platers to RMGO!, the revolutionary room temperature system (see facing page), to the Picco pen plater (see page 267). Made in Germany.

Digital II & V Compact Electroplating Systems – For pen and bath plating

The Plating Process just got even easier with the Digital II and Digital V Compact Plating Systems. The small, compact Digital II has a volume of (6) 1.5 liter tanks for cleaning and plating whereas the more robust/larger Digital V has a volume of (4) 5 liter and (4) 2 liter tanks for cleaning and plating. These galvanic units can be used for all current galvanic baths e.g. cold electro cleaning, and cold gold plating baths, bright silver and rhodium baths, palladium or ruthenium baths as well as non-precious metals like copper or nickel.

Both have preinstalled electroplating programs for several coating processes that defines a new dimension for easy and high quality plating. Pre-adjusted voltages make electroplating very easy. An integrated time countdown function and minute counter prevents overplating and guarantees energy efficient work. Plating solutions, anodes, heater, plating jigs, and other accessories sold separately.

Features:

- Several flexible programs to adjust and store. Guarantees safe accurate processes for a constant high quality
- Easy to handle and to adjust by digital display of voltage and temperature
- Ampere minute counter guarantees overview in precious metal accounting
- Safety by high quality, metal welded case and integrated splash-guard cap
- Two flexible heaters can be installed
- Efficient electroplating with convertible tanks
- Dual voltage: 110V 60Hz / 220V 50Hz

A. RMGO! Plating Kits – (Plating As Easy As 1, 2, Go!)**Cold solutions • room temperature • no heat required**

RMGO! is available for gold or rhodium plating or a deluxe set with all you need for both.

Pre-installed times and voltages allow an exact deposition of the metal. You can choose from 15 sec, 30 sec or 60 sec of plating. There is an automatic power shut-off after the elapsed time. This assures a perfect coating as no precious metal is wasted. Plating solutions sold separately. Made in Germany.

Advantages:

- A deposition time of 36 sec instead of 30 sec costs you 20% more of your expensive rhodium! That is a cost saving of 0.2 g rhodium at 1000 rings if you plate exactly 30 sec.
- Absolutely safe process as the voltage needs not to be set – easy handling by only one GO! button.
- Errors are avoided as no voltage needs to be set.
- More than 1000 rings with 1 ltr. Rhodium solution JE88 and an ultra brilliant white shining surface.
- Select your own appropriate cold bath solutions.
- Return on invested capital within max. three months, depending on your output.

Gesswein® Plating Kits

If you've never plated before, we are here to help! These Plating Kits are a great introduction to the process and in just a few steps, you can begin plating. Our Plating Kits contain everything you need to get started and Gesswein's knowledgeable technical staff is always ready if you need any help.

The most important considerations when plating are:

- Use lead-free solder on jewelry repairs or you'll need to preplate with copper and nickel.
- Polish and thoroughly clean items before plating.
- Keep the bath covered when not in use to keep it clean.

A

B

A, B Rhodium Plating Kit - 25 Amp

Rhodium plating is used in electronics because of its low electrical resistance, low and stable contact resistance, and high corrosion resistance. Jewelers use rhodium for plating because it is extremely hard, highly resistant to scratching from everyday wear, hypoallergenic and will not tarnish. For these reasons, Rhodium is often plated over white gold, platinum, and palladium jewelry. Kit includes:

- PEPETOOLS™ IPS PLUS 25A digital rectifier with lead wires (115/230V) - (212-0956)
- 1 lb. EarthGold electrocleaner for removing fingerprints and dirt (non-hazardous) - (210-0946)
- 1 lb. EarthGold Acid Activator (non-hazardous) - (210-0939)
- Rhodium Bath Pre-Mixed 1 gram - (210-1018)
- Stainless steel anode for electrocleaning - (210-2701)
- Platinum-clad niobium anode for transmitting current to the rhodium plating bath - (210-2600)
- Three 1,000ml graduated Pyrex beakers with flexible plastic covers for holding and storing electrocleaner and rhodium solutions - (210-2800) + (210-2953)
- 1/2 lb. spool of copper work wire for holding items while plating - (210-2100)

Description		Shipping Weight	Item#	Each
A. Plating Kit - With Rhodium	⚠	16 lbs. (7.25kg)	210-0006	\$885.00
B. Plating Kit - Without Rhodium		14 lbs. (6.35kg)	210-0007	795.00

C. EarthGold Plating Kit

A complete line of cleaners, degreasers, stripping and plating solutions. Plating solutions can be plated over nickel, sterling silver, gold, silver, rhodium and most other precious and nonprecious metals. Leave a bright durable deposit. Kit includes everything you need to plate in Nickel, Copper, & 14K Yellow Gold. Made in USA.

The EarthGold Kit includes:

- PEPETOOLS™ IPS PIUS 25A Digital Rectifier with lead wires
- 4 qts of plating solution: 14K Gold, Bright Nickel, Copper Strike, and Bright Copper.
- 1 lb. Acid Activator—Cleans and activates surface of metals that are difficult to plate, such as stainless steel, chrome and metals containing lead or zinc.
- 6 Pyrex Beakers (600ml) with Covers.
- 2 Stainless Steel Anodes, 2 Copper Anodes, and 1 Nickel Anode.
- 1 lb. Electrocleaner—Removes finger marks and dirt.
- 1/2 lb. spool of Copper Work Wire (for making hooks to hold jewelry)
- Plastic Stirring Rod, Plating Thermometer, and Whatman pH Strips.
- Air Agitator (Air pump and Airline tubing 8 ft.)

Description	Shipping Weight	Item#	Each
EarthGold Plating Kit	27.25 lbs. (12.36kg)	210-0903	\$1,025.00

D, E Rhodium Fume Containment System, Small & Large

Quatro Rhodium Containment systems will significantly reduce rhodium odor and vapors migrating throughout your workplace because they utilize a 4 stage filtering process (prefilter, charcoal filter, media filter and HEPA filter). Designed for compact, quiet operation (50-55 dBA). Sizable dimensions allow you to leave your beakers inside the containment area, even running the systems overnight. Can be used as a stand-alone or ducted outside. Complete with acrylic doors, ample soft LED lighting and one year manufacturer's warranty. 120V, 60Hz. Made in Canada.

	Small	Large
Inner Dimensions (W x D x H):	23.875" x 16.875" x 14.75"	29" x 20" x 24"

J. EarthGold Stripper

Strips gold deposits from rhodium, nickel, stainless steel and steel. Do not use on silver for an extended period of time.

Description	Qty.	Item#	Each
J. Stripper	1 qt.	210-0940	\$15.25
	1 gal.	210-0941	61.30

K. EarthGold Electrocleaner

Provides a completely clean, contaminant-free metal surface prior to electroplating.

Description	Qty.	Item#	Each
K. Electrocleaner	1 lb.	210-0946	\$9.80
	3 lbs.	210-0947	29.75

L. EarthGold Acid Activator

Provides excellent oxide removal and etching properties to help metals bond better when electroplating. Effective on white metals, brass, bronze, nickel, stainless steel, steel, silver and gold. Do not use on zinc.

Description	Qty.	Item#	Each
L. Acid Activator	1 lb.	210-0938	\$8.85
	3 lb.	210-0939	24.20

M. Whatman 0-14 pH Strips

Extra pH strips for checking your EarthGold plating baths. 6 x 80mm, 100/pkg.

Description	Item#	Pkg. of 100
Whatman 0-14 pH Strips	210-2401	\$40.75

Rhodium Solutions

Gesswein offers our own Gesswein brand made in the USA, as well as Umicore J1 and Diamond Brite imported from Umicore in Germany. Both brands are bright, white and tarnish-resistant.

Gesswein brand is the traditional white rhodium popular in the American market and has the distinct advantage of being very easy to use.

Umicore is internationally known as the brightest whitest rhodium and is preferred by the international market. Due to volume purchases, we have extremely competitive prices on Umicore Rhodium. Rhodium can be directly plated on gold, copper and copper alloys, nickel and nickel alloys. When plating over non-precious metals, an intermediate nickel coating of many microns thickness is absolutely essential. Strike nickel or gold plating is advantageous with all substrates. **Rhodium prices fluctuate with metals market.**

No Hazardous
shipping surcharges

Made in
the USA

A-C Gesswein® White Rhodium Solution

This sulfate-type rhodium solution produces a whiter finish than phosphate-type solutions and has the distinct advantage of being very easy to use. Gesswein brand Rhodium requires no heating of the solution, no deionized water and minimal pre- and post-treatment. Made in USA.

It's available either as a ready-to-use Premix, or concentrated. Each produces the same great results but varies in convenience, versatility and shipping rates. Both concentrations use the same Gesswein Replenisher (below) which restores rhodium and acid to the bath as it depletes after use.

Premix is not concentrated so it's ready to use right out of the bottle. Just pour it in your beaker and start plating.

Description	Rh Content	Item#	EACH Prices	
			1	2+
A. Premix (Bath Plating, 1pt)	1g	210-1018	\$149.55	\$142.07

Concentrate requires mixing with your own distilled water which can be purchased at most grocery stores. Concentrate is offered in 2 bottle sizes: 1 gram of Rhodium in 4 oz. liquid or 5 grams of Rhodium in 6½ ounces of liquid.

Description	Rh Content	Item#	EACH Prices	
			1	2+
B. Concentrate (Bath and Pen Plating)	1g	210-1000	\$144.95	\$137.70
C. Concentrate (Bath Plating)	5g	210-1016	725.15	352.45

Prices change with current market value.

Made in
the USA

See pp. 263, 268 for
Pen Plating Solutions.

Rhodium is non-returnable.
Prices change with
current market value.

D. Gesswein® Rhodium Replenisher

Use to replenish rhodium and other chemicals to your Gesswein white rhodium bath as it depletes after use. Do not use rhodium solution to replenish; doing so will upset the bath's chemical balance. Use our Rhodium Test Kit below to determine correct amount of replenisher to use. Replenisher can also be used for pen plating.

Description	Rh Content	Item#	EACH Prices	
			1	2+
D. Replenisher	1g	210-1010	\$144.95	\$137.70
Replenisher	5g	210-1017	725.15	352.45

Prices change with current market value.

D

E. Gesswein® Rhodium Test Kit

As your rhodium bath is used, it depletes rhodium as well as other important chemicals. Our Rhodium Test Kit helps you determine when to add replenisher so you can restore the bath to its original condition. Saves money by ensuring you add just enough replenisher, not too much. Easy to use. Includes complete instructions, control and sample vials, pipette and test block. Designed for use only with our rhodium solutions (#210-1000, #210-1016 and #210-1018).

Description	Item#	Each
Rhodium Test Kit	210-2000	\$67.00

E

⚠ Although no hazardous shipping surcharge applies, these items can only ship via UPS® Ground, no air, FedEx® or US Mail possible. Cannot ship to Alaska, Hawaii or Puerto Rico.

Rhodium suppliers all SAY their rhodium is the whitest and brightest, but only Umicore can PROVE it. Measured by spectrophotometer, only Umicore Diamond Bright is as bright as pure rhodium (89.5–90 on the lightness scale), while other brands fall short (86–90). Test results were independently verified by CIE-Lab. There is simply no whiter rhodium available on the market. Rhoduna Diamond Bright plates at a thickness of 5µm for a quality thick plating. Consider using Umicore RH J1 which plates at 0.3µm, if less thickness is acceptable. Umicore Diamond Bright features sulfate-based formula with high deposition capacity, good plating speed and exceptional throwing power. Packaged in shrink-sealed plastic bottles for protection and security. Choose from concentrated solution for rack and barrel plating or pen plating straight out of the bottle.

A. Umicore RHODUNA® Diamond Bright The world's brightest and whitest rhodium

Umicore RHODUNA Diamond Bright deposits brilliant-white, ultra-bright coatings of previously unattained lightness and brilliance. Characterized by high covering speed and excellent throwing power. Layer thicknesses of up to 5µm (micron) can be deposited crack-free with minor porosity. Results have high abrasion resistance. For rack and barrel plating.

Rhodium can be directly deposited on silver, gold, copper and copper alloys, nickel and nickel alloys. When plating tin, lead, zinc, aluminium and iron, intermediate nickel coatings of some thickness are absolutely essential. Strike nickel plating is advantageous with all substrates.

Umicore Diamond Bright Replenisher—To use as Diamond Brite becomes depleted. Do not use rhodium solution itself to replenish; doing so will upset the bath's chemical balance.

Description	Rh Content	Item#	Each
A. Umicore Diamond Bright Rhodium	2g	210-1038	\$291.76
Umicore Diamond Bright Rhodium Replenisher	5g	210-1040	717.41

Rhodium is non-returnable. Prices change with current precious metals market.

B. Umicore J1 RHODUNA® Rhodium Concentrate

Umicore J1 Rhodium Concentrate A long time standard of Umicore, RHODUNA® J1 is an electrolyte slated for the deposition of Brilliant-white, very light, bright coatings. Umicore J1 is suitable for plating jewelry with layers up to 0.3µm thick. Minor porosity, good covering speed, excellent throwing power. Provides high abrasion resistance, good wear resistance, corrosion resistance, and tarnish resistance. J1 is advantageous for rack and barrel plating. Packaged in shrink-sealed plastic bottles for protection and security.

Use J1 replenisher as J1 bath becomes depleted. Do not use rhodium solution itself to replenish; doing so will upset the bath's chemical balance.

Description	Rh Content	Item#	Each
B. Umicore J1 RHODUNA® Rhodium	2g	210-1041	\$287.41
Umicore J1 RHODUNA® Replenisher	5g	210-1042	717.41

Rhodium is non-returnable. Prices change with current precious metals market.

C, D Umicore Ruthuna Black Ruthenium Plating Solutions

Darker than black rhodium

Umicore Ruthuna plates darker than black rhodium because it contains ruthenium, another member of the platinum family. Plates a very dark gray (anthracite) color, almost black. Can be used alone or as a contrast color on both yellow and white metals. Available for bath plating or pen plating.

Ruthuna 475 comes in 4 oz. bottle which has 100ml of solution containing 2 grams of ruthenium. For proper adhesion it is strongly recommended to plate Ruthuna 475 over an undercoat of 18K gold.

Specially formulated for pen plating, Ruthuna 279 contains 2 grams of ruthenium. Can be plated directly over gold, gold plate, silver, platinum and palladium. When pen plating over non-precious metals, plate the item with gold prior to using Ruthuna 279.

Description	Rh Content	Item#	Each
C. Ruthuna 475 Bath Plating Solution	2g	210-1036	\$82.90
D. Ruthuna 279 Pen Plating Solution	2g	210-1037	89.95

Rhodium is non-returnable. Prices change with current precious metals market.

D

UPS® hazardous shipping surcharge applies. Ships via UPS® Ground only, no air, FedEx®, or US Mail shipments. Cannot ship to Alaska, Hawaii or Puerto Rico.

A-F Anodes

Used to introduce electrical current and to replenish metal ions into plating baths. Stems of all standard anodes can be bent to hang on edges of Pyrex beakers (dimensions given do not include stems).

Types:

- Soluble: Copper, nickel and silver anodes dissolve in the bath, replacing metal ions as they are deposited onto the workpiece during plating.
- Inert: Stainless steel and platinum-clad anodes do not dissolve in the plating bath. Serve to introduce electrical current into bath.
Note: A stainless steel beaker can be used as an inert anode.

Description	Size (L x W)	Item#	Each
A. Copper Anode	6" x 1"	210-2500	\$6.99
B. Nickel Anode (depolarized)	6" x 1"	210-2551	7.25
C. Silver Anode (fine)	3 ⁷ / ₈ " x 1"	210-2651	56.00
D. Stainless Steel Anode	6" x 1"	210-2701	5.40
E. Platinum-Clad Niobium Anode*	4" x 1"	210-2600	129.50
Stainless Steel "T" Anode	4" x 12"	210-2710	15.00
F. Platinum-Clad Titanium "T" Anode	4" x 12"	210-2610	79.00

*Performs as well as solid platinum for rhodium and gold plating. Consists of niobium clad at heavy gauge with 99% pure platinum, cold-rolled to a uniform thickness and meshed to expose more surface area. Because of mesh form and high conductivity (3.5 times more than platinized titanium anodes), this platinum-clad anode provides better current distribution for more uniform plating. Costs less than solid platinum and lasts longer than electroplated anodes.

G. Umicore Platinum Anode Systems

Provides current from 2 directions giving a more even and uniform rhodium plate. Sets contain 2 mesh type platinum coated anodes and a titanium holder. Made in Germany.

Description	For Beaker Size	Anode Size	Item#	Each
G. Platinum Anode System 500	500/600ml	3 ¹ / ₂ " x 1 ³ / ₁₆ " (2)	210-2612	\$157.75
Platinum Anode System 1000	1000ml	4" x 1 ¹ / ₂ " (2)	210-2617	209.95

Prices change with current precious metals market.

H, I Plating Thermometers

Two different types for measuring stripping and plating bath temperatures. Help eliminate guesswork to improve results. Include metal clip for easy attachment to edges of beakers. Glass type reads up to 220°F or 100°C (has both scales). Stainless steel dial type reads from 50 to 400°F. Measures 8" long.

Description	Item#	Each
H. Glass Thermometer	210-2310	\$7.25
I. Stainless Steel Dial Thermometer	210-2255	15.95

J. Copper Work Wire

Soft 24-gauge copper wire for holding items to be stripped or plated. Sold in 1/2 lb. spool.

Description	Item#	Each
Copper Work Wire	210-2100	\$12.95

K. Pre-Mixed Silver Bath-Cyanide Free

The Jentner Silver bath (JE60) is an innovative cyanide-free electrolyte for the deposition of very white silver layers. It is characterized by light weight handling and very high consistency and best of all, does not need to be heated (room temperature/cold). Does not contain cyanide and therefore offers environmental and safety benefits. However, it is a corrosive and proper care must be taken with use and disposal. Contains 31g of silver per liter and is pre-mixed (ready to use). The purity of the silver solution is nearly 100% and is suitable for both decorative and most jewelry applications. The electrolyte deposits a maximum thickness 25 µm. Can not be use in conjunction with the RMGO Plating Kits. Made In Germany.

This item cannot ship via Fed Ex or USPS and cannot be shipped outside the contiguous USA.

- Silver content: 31g / L
- Density: 1.13g / ml (1.12-1.20)
- Anode Material: Fine Silver (210-2650)
- Optimal Voltage: 1.5 - 1.6V
- Bath temperature: 68° F - 104° F (20° C - 40° C)
- Deposition Rate: Approx. 0.5 µm / min

Description	Item#	Each
Pre-Mixed Silver Bath-Cyanide Free	210-0905	\$129.95

Non-returnable. Prices change with current precious metals market.

⚠ UPS® hazardous shipping surcharge applies. Ships via UPS® Ground only, no air, FedEx®, or US Mail shipments. Cannot ship to Alaska, Hawaii or Puerto Rico.

A. Gesswein® Electrocleaner Powder

Removes fingerprints, grease and similar contaminants from the plating surface without removing metal. Promotes optimal adherence of electroplating deposits. Especially useful in place of electrostripping on jewelry parts that are too delicate to withstand metal removal. Sold in a 3 lb. jar, which makes 32 qts. of electrocleaning solution. Cyanide-free. Use with stainless steel beaker or with Pyrex beaker (see beakers on p. 266) and stainless steel anode (see pp. 264).

Description	Item#	Each
Electrocleaner Powder 	210-3300	\$22.80

 **UPS® hazardous shipping surcharge applies. Ships via UPS® Ground only, no air, FedEx®, or US Mail shipments. Cannot ship to Alaska, Hawaii or Puerto Rico.**

A

B. Carbon Treatment Sets for Rhodium Baths

It eventually happens to every plater: rhodium comes out looking gray instead of white. The usual culprits? Organic contaminants introduced to your plating bath from wax or other stop-offs, electrocleaner or soap, dust or dirt. Once dissolved, these contaminants can't be removed by sieving or straining.

Each money-saving Carbon Treatment Set uses activated charcoal to absorb contaminants so you can filter them out and restore the bath to like-new condition rather than discard it. Includes charcoal (3 oz. in standard set, enough for approx. 48 one-liter bath treatments; 11 oz. in large set, enough for approx. 176 one-liter bath treatments), funnel, treatment tank with cover, glass stirring rod, filtration tank, filter paper and instructions. Use for monthly preventive maintenance and emergency situations. Excellent for gold plating baths. *Note: Will not remove metal contamination, such as that from soft solder.*

Description	Item#	Each
B. Standard Set	210-2020	\$75.00
Large Set	210-2124	119.95

B

C. Rhodium Test Kit

As your rhodium bath is used, it depletes rhodium as well as other important chemicals. Our Rhodium Test Kit helps you determine when to add replenisher so you can restore the bath to its original condition. Saves money by ensuring you add just enough replenisher, not too much. Easy to use. Includes complete instructions, control and sample vials, pipette and test block. Designed for use only with our rhodium solutions.

Description	Item#	Each
Rhodium Test Kit	210-2000	\$67.00

C

D. PD2 Palladium Plating Solution

Ready-to-use palladium plating solution especially designed for flash plating. Features highly compact consistency and resistance of the galvanic layer, making it particularly suitable for pre-rhodium treatment on low-karat gold and silver articles. Also serves as a tough barrier against diffusion of gold deposits on copper and copper alloys. Ideal for use as an intermediate layer between rhodium and white gold, reducing the possibility that scratches and abrasions of the rhodium-plated layer will affect the alloy underneath — very important to prevent release onto skin of white gold alloys containing nickel. Sold by the liter.

Features:

- Cyanide-free
- 2g/L concentration
- Room-temperature plating—no heater required
- Premixed solution—UPS shippable with no hazardous charges
- Nontoxic and noncorrosive
- Neutral pH

Description	Qty.	Item#	Each
PD2 Solution	1L	210-1350	\$247.00

D

A

A. Electric Hot Plates

Choose from single and double models. The double model saves precious plating time by heating two baths simultaneously (includes separate temperature controls). Feature durable chrome tops for resistance to scratching and marring and lift-out heating elements for fast, easy cleaning. Made in USA. *Note: You must provide insulation such as a Solderite Pad (see pp. 507) between stainless steel beaker and hot plate during plating to prevent your rectifier from shorting out.*

Specifications:	Single	Double
Electrical	120V, 6A, 700W, 60Hz	120V, 12A, 1400W, 60Hz
Dimensions	8½"W x 8½"D x 3¼"H	17"W x 9¾"D x 3¼"H
Description	Item#	Each
Single Electric Hot Plate	212-2051	\$59.50
A. Double Electric Hot Plate	212-2050	95.00

B

B. Stainless Steel Beakers and Covers

Stainless steel beakers act as anodes for electrostripping and electroplating—just attach your lead wire directly to the lip of the beaker. Stainless steel covers protect solutions. There is no cover available for 0.6 quart beaker.

Description	Size (I.D. x H)	Item#	Each
0.6 qt. Beaker	3¼" x 4½"	210-2954	\$67.95
1¼ qt. Beaker	4" x 5½"	210-2955	21.95
2 qt. Beaker	4¾" x 6¾"	210-3000	24.50
4¼ qt. Beaker	6½" x 7⅝"	210-2957	32.65

G

G. Plastic Stirring Rod

For mixing your electrocleaning, electrostripping and electroplating baths. Will not react with solutions. Measures ½" dia. x 12"L.

Description	Item#	Each
Plastic Stirring Rod	210-2460	\$4.15

A. Rhodnette Pen Plater

Create exciting two-tone effects and make touch-up repairs with our Rhodnette Pen Plater. Takes just minutes to learn how to use like an expert. Features highly absorbent, hard fiber electrode tips that can be easily shaped and will plate the most delicate details and contours with an even deposit of metal (masking may be unnecessary). Plating solutions and concentrates sold separately. Electrical: 110V, 1A, 50/60Hz. Made in Germany.

Includes:

- Compact rectifier base with recesses for holding up to three pens and three plating solutions (not included)
- Plating pen (anode) with six regular felt tips
- Smooth-jaw alligator clip with lead wire (cathode)
- Glass jar with cover for holding plating solution
- Stand for supporting wires

Description	Item#	Each
A. Rhodnette Pen Plater	212-0900	\$675.00

Black Lead Wire	210-2110	54.00
Glass Jar with Cover (color may vary)	210-2107	28.35

A

B. Picco Pen Plater

The Picco pen plating unit allows for a fast and spotless application of rhodium, gold and silver on small items. Designed for finishing of fancy shaped blanks, findings, settings, and all parts which are normally time-consuming to plate. The rectifier is built in a well designed stainless steel case. Voltages are easily adjusted with the LED display. Dual Voltage. Pen plating solutions sold separately. Made in Germany.

Description	Item#	Each
Picco Pen Plater	212-0715	\$650.00
Replacement Picco Pen Plater Handpiece + Red Cord	212-0716	159.00
Replacement Picco Pen Plater Tweezer + Black Cord	212-0717	59.00

Picco Pen Plater

B

C. PEPETOOLS Digital Pen Plating System

Compact system with precise voltage regulator and clear digital readout. Lets you dial in exact voltage needed from 1.2–17V for perfect results. Plating solutions and concentrates sold separately. Electrical: 110/220V. Made in Europe.

Includes:

- Compact rectifier base with recesses for holding up to two pens and three different plating solutions (not included)
- Plating pen with three felt tips
- Alligator clip with lead wire
- Three plating jars with twist-off lids for avoiding spills.

Description	Item#	Each
Digital Pen Plating System	212-0721	\$225.00
Replacement Plating Pen	212-0714	41.95

C

Wizard Disposable Pen Plater

Portable and easy to use, the Wizard disposable pen plater is a must for anyone needing quick touch ups or portable repair work. The Wizard Disposable Pen Plater is sleek and ergonomic and has a stainless steel body for easy handling. Battery operated for up to one hour of continuous plating and has 6 volts of capacity with no knobs or adjustment needed. Tips can easily be replaced with a Standard Tip (210-2102). The Wizard is a must for portability and precision plating!

A. Liver of Sulphur XL Gel

Real liver of sulphur in premixed gel form, which is much easier to work with. Ready to use after a quick shake (heat up for 15 seconds in a microwave to lessen viscosity if too cold to stir), XL Gel can be brushed on and is thick enough not to run. Convenient dispensing bottle lets you squeeze out just the right amount. Or squeeze out a small drop directly onto a brush. Minimizes odor, reduces waste. Imparts a patina on silver, copper, bronze and more. Mix one teaspoon in 12 oz. of heated water to make dark patina solution, less to make light patina solution. Boasts 4–5 times longer shelf life than dry liver of sulphur. 4 oz. XL Gel makes 24 portions 12 oz. solution.

Description	Qty.	Item#	Each
Liver of Sulphur XL Gel	4 oz.	210-1451	\$16.45

A

B. Liver of Sulphur

Use this product to permanently antique silver and copper. Will not rub off or disappear during ultrasonic or steam cleaning. Just mix a small amount with ordinary tap water in a Pyrex beaker, immerse or paint your jewelry, and watch it turn from brown to blue/green to light gray then dark gray. Stop process when the appropriate color has been obtained by rinsing jewelry thoroughly. For antique effect, buff selected areas to bright shine and leave background dark. Requires no anode. Not suitable for antiquing gold because there is no noticeable effect. Sold in 1/2 lb. container.

Description	Qty.	Item#	Each
Liver of Sulphur	1/2 lb.	210-1450	\$24.00

B

C. JAX Green Antique

Chemical darkener for producing an antique green patina on brass, bronze and copper. Apply to clean metal surface with a bristle brush or immerse entire object. The initial coat is critical: when a dull film appears, that indicates the patina has reacted to the metal. Additional coats can be applied if desired (allow complete air drying in between coats).

Description	Qty.	Item#	Each
Green Antique	1 pt.	210-1430	\$15.85
Green Antique	2 oz.	210-1434	6.75

C

D. JAX Black Antique

Chemical darkener for producing an antique black patina on brass, bronze and copper. Apply to clean metal surface with a bristle brush or immerse entire object. Rinse well with water and dry. To achieve desired finish, highlight with steel wool or Scotch-Brite. You can also over-darken and then relieve with steel wool or polishing cloth.

A-N Ceramitation – Resin that cures at a low temperature!

This resin is mixed with a catalyst, then fired at a low temperature to make hard, ceramic-like surfaces similar to kiln-fired enamels in both appearance and physical properties. Simple enough to use for beginners to produce professional work in a short time.

Can be brushed on, sprayed on or applied with a spatula or a squeeze bottle. Apply a single coat, or build up in successive layers to obtain unusual and elegant finishes. Adheres to metal, wood, plastic and ceramic. Cures after being fired at 200°F for one hour by an electric kitchen oven, infrared lamp or forced air blower. Boasts hardness of 60–75 on Sward scale once cured—very close to kiln-fired enamels with hardness of 65–80, which must be fired up to 1,500°F. Can be stoned and polished after curing.

Choose from seven vivid opaque colors and six transparent colors that let the base metal shine through for brilliant jewel-tone effects. Mix colors to obtain an infinite variety of hues. Sold in 2 oz. bottles and in money-saving sets. Opaque set includes all seven colors listed below, transparent clear and a 1-pint bottle of catalyst. Transparent set includes all six colors listed below and a 1-pint bottle of catalyst.

COLORiT

The revolutionary way to add brilliant color to your jewelry!

Add COLORiT ceramic-reinforced composite material to a variety of jewelry and dazzle your customers with its brilliance. When dried with the included curing light, this material cures into a solid polymer network of exceptional strength and durability. Resists both chipping and cracking better than hard-fired enamels. Won't flake and peel like epoxies. Comes in liquid form, making it easy to apply on both flat and curved surfaces. Produces colorfast, nonshrinking design accents.

Use a single color, or mix colors to obtain any hue and shade. Adding White makes them more pastel and opaque, and adding Clear makes them more transparent. Pearl White and Pearl Blue are stunning by themselves, and they create an opalescent or marbled look when added to any of the other colors. Swirl in some Neon for highlights that actually glow under an ultraviolet light. The possibilities are limited only by your imagination.

Features:

- COLORiT gives your jewelry the look and feel of enamel.
- COLORiT can be inlaid into any precious or nonprecious metal, including platinum, silver and stainless steel. Can even be inlaid into more COLORiT.
- COLORiT colors can be used right next to each other to create a cloisonné look. A few seconds of pre-curing eliminates color bleed. Colors can also be worked uncured to create artistic effects.
- COLORiT colors can be mixed to create any hue, opaque or transparent.
- COLORiT is colorfast—it won't fade over time.
- COLORiT can be carved, sanded, filed, machined, and lathe-turned at high speeds, sandblasted or polished to a high shine right along with the metal.
- COLORiT is highly resistant to scratching, shock and impact. Bright finishes can be restored with a simple re-polishing.
- COLORiT is so durable that it can withstand tumbling, plating and mild ultrasonic, steam and solvent cleaning.
- COLORiT application is easily mastered.
- COLORiT is so versatile, workable and durable, it opens up entirely new design options.

Images courtesy of Annika Bertilsdotter/Sweden.

A. COLORiT DP2 Starter Set

Add COLORiT to your jewelry and dazzle your customers with its brilliance. It doesn't chip or crack like glass-filled enamels, nor does it flake or peel like epoxies. This ceramic-reinforced composite material is resistant to shrinking, scratching and impact. By means of a special LED curing light, it dries into a solid 3-D polymer network with exceptional strength. Because it comes in a liquid form it's easily applied on both flat and curved surfaces. Gives your jewelry the look and feel of enamel.

Colors can be mixed to create any hue, opaque or transparent. Can be carved, sanded, filed, machined, and lathe-turned at high speeds, sandblasted or polished to a high shine right along with the metal. So durable that it can withstand tumbling, electroplating and mild ultrasonic, steam and solvent cleaning.

Use a single color, or mix colors to obtain any hue. Colors included with each set are of medium saturation, so they appear slightly translucent. White makes the colors more opaque. Clear makes them more transparent. Pearl White looks stunning by itself and creates a pearlescent, marbled look when added to any of the other colors.

COLORiT Starter Set includes:

- 8 jars COLORiT (Deep Black, Deep Red, Deep Yellow, Deep Green, Deep Blue, Hi Clear, White & Neon Red)
- 4ml Premium Bond
- LED DP2 Curing Light
- Workplate with Heater
- Light-Protected Workstation, 13¾"W x 10"D x 9½"H
- Micro Brush Regular (10)
- Micro Brush Super Fine (10)
- Applicator Tool
- Instrument Holder
- Ring Holder

Description	Item#	Each
COLORiT Starter Set 	821-3507	\$2,995.00

The COLORiT Process

Both a mechanical bond and a chemical bond are required to ensure COLORiT durability and colorfastness. Inlaid areas must be undercut, and proper application and curing instructions must be followed. COLORiT is easy to apply and dries in just minutes under the special curing light. From cleaning to curing, the complete process usually takes no longer than 30 minutes; curing comprises roughly half that time and requires only minor operator attention.

1. Apply Premium bond and let dry.

2. Apply color.

3. Cure with special light source.

4. File, sand, sandblast or polish.

Images courtesy of Annika Bertilsdotter/Sweden.

B

B. COLORiT Lite Cube 1

The latest advance in COLORiT technology, the Lite Cube is a compact UV curing chamber with adjustable UV levels and fully-lined metal interior to boost UV reflection and insure homogeneous curing of all COLORiT colors. With a 7" x 7" curing area, Lite Cube is ideal for curing small jewelry items such as rings, pendants and bracelets – one at a time or in multiples.

Lite Cube includes an industrial safety system which protects the user from UV radiation. Effective, efficient and user-friendly. Larger curing options also available; please call for details.

Specifications:

Supply Voltage: 220V (Transformer included for use on 110V)
 Power Input: 100 Watts
 Overall Dimensions: 13.8"L x 10.2"W x 9.8"H
 Curing Area: 7" x 7"

A-D Gravograph/New Hermes® RV-II Inside Ring Engraver

Point of purchase engraving makes it easy to close a sale, offers your customers instant gratification and turns each ring into a personalized keepsake.

The RV-II is manufactured by Gravograph (New Hermes), a supplier of engraving machines and accessories used by jewelers worldwide for over 70 years. The RV-II's cast metal design and high precision components ensure that you will produce high quality engraving for generations to come.

With the RV-II you can engrave bright initials, dates or phrases on the inside of almost any shape or size ring easily and quickly. Requires no prior engraving experience – an unskilled operator can engrave up to 20 letters in a few minutes. Results are bright, highly readable and completely professional.

The RV-II will easily engrave on wedding bands or stone-set rings. It automatically centers the ring in the clamping jig. Uniform spacing between letters is easily accomplished by pushing a lever.

A replaceable diamond stylus creates bright lettering with a hand-engraved appearance.

The reversible type dial (included) has 2 different type styles. Gothic is simple but fully readable, while Tilted Block presents a more formal appearance. Also available are the Extra-Condensed and 2 Line Block Dials, as well as a Continuous Script Dial for a more romantic look. Made in France.

Please see our website for the most up-to-date information and current BESTBUILT offerings.

Established in 1961, Sisma is known worldwide for the design and production of extremely high precision machinery. Innovative by vocation, Sisma combines an independent and cutting edge design and production organization, with a wealth of highly specialized experience and technical expertise, thus guaranteeing top product quality. ISO 9001 certified. Made in Italy.

For basic engraving we offer the LOGO Marker. Compact and affordable, without sacrificing quality or precision. This Nd: YAG laser engraver features an automated motor axis for inside and outside ring making, a variable Z axis for spot precision, and is air cooled for quiet, continuous use. View your work in progress with a large sight glass and internal LED illumination. Additional features include the ability for 900 DPI picture importing and marking, remote assistance for software upgrades and troubleshooting, and hookups for fume extraction and metal reclamation.

For production engraving and light cutting consider the Easy 200 or 300 fiber optic laser markers. Innovative "all-in-one" laser marking system, characterized by ease of use and equipped with a Z motorized axis, these machines operate at high precision and speed. View your work in progress with a large sight glass and LED interior lighting.

For cutting and engraving select between the robust Smarky 500 (50W) and 700 (70W) fiber optic Marker/Cutters use the same principles and fiber optic technology as the Easy 200 and 300 series but boast upgrades such increased speed, larger working chamber and higher working power. A must for any manufacturer looking to do trademarking or mass production, 2D cutting, and engraving on almost any shape or metal.

Extra Large Saddle Stool	810-1812	\$199.00

A

B

GRS® Systems – For Engraving, Bright Cutting, Bead Raising and Setting.

Designed for beginners and professionals alike, GRS Power Engravers make clean, sharp cuts in precious metals, steels, crystal, glass, stone, wood and other materials. Transform compressed air into powerful impact action for engraving, texturing, carving and more. Backed by a two-year manufacturer's warranty. Made in USA.

A

A. GRS® GraverMax G8® – Revamped for better performance!

The venerable GraverMax tradition continues with this affordable, compact system. Features adjustable speed of 400–8,000 strokes per minute, adjustable throttle bias for tailoring response to different jobs and advanced valve pulse unit for quiet operation.

Requires air compressor for 1.4 CFM of oil-free air at 45 PSI. Includes foot pedal, dual-stage air regulator, air hoses and quick-disconnect handpiece fittings for all GraverMax handpieces. Measures 5¼"W x 12"D x 8¼"H. Electrical: 100–240V, 50/60Hz. UL approved. Made in USA.

Description	Item#	Each
A. GraverMax G8	856-0311	\$1,385.00
GraverMax G8 w/ #710 QC Handpiece	855-9949	1,630.00
GraverMax G8 w/ #901 QC Handpiece	855-9951	1,625.00
GraverMax G8 w/ #940 QC Handpiece	855-9952	1,650.00

B

B. GRS® GraverMach® AT – All in One System

Never before has an all-in-one system given the user so much versatility and control. Features a selector knob for choice of hand or foot operation of your handpiece: the touch element offers pressure-sensitive hand control for precision work; the traditional foot pedal offers standard foot control when you prefer.

Requires air compressor for 1.4 CFM of oil-free air at 45 PSI. Includes foot pedal, dual-stage air regulator, air hoses and quick-disconnect handpiece fittings for all GraverMach handpieces. Measures 6"W x 13"D x 8¼"H. Electrical: 100–240V, 50/60Hz. UL approved. Made in USA.

Description	Item#	Each
B. GraverMach AT	856-0270	\$1,945.00
GraverMach AT w/ #901 QC Handpiece	856-0102	2,138.00
GraverMach AT w/ #940 QC Handpiece	856-0101	2,178.00

C

C. GRS® GraverSmith® – The budget-oriented choice!

Performs basic engraving and setting for less than its siblings, GraverMach and GraverMax SC. Features regulator with pressure gauge, combo filter and water trap, adjustable speed of 400–8,000 strokes/min. and quick-disconnect handpiece fitting.

Requires air compressor that yields at least 1.4 CFM of air at 45 PSI. Includes foot control, air tubing, and holes for storing accessories. Electrical: 110/220V. Measures 5¾"W x 10"D x 9"H.

Description	Item#	Each
C. GraverSmith	855-9950	\$910.00

D

D. GRS® GraverMeister® – The original standalone machine!

This unit comes ready to use with its own oil-less air compressor, making it readily portable. Features adjustable speed of 1,600–2,400 strokes/min. (sliding lever on front controls stroke rate). Can be used for engraving on precious metals, steels and more, carving, stippling, bright-cutting and bead raising.

Sold alone or with GRS #509 handpiece (see p. 279 for details). Includes foot control, air tubing and four tools. Electrical: 115V, 7A, 60Hz. Measures 14"W x 11½"D x 8½"H.

Description	Item#	Each
D. GraverMeister	856-0049	\$1,915.00
GraverMeister with #509 QC HP	856-0302	2,037.00

A. GRS® #901 Quick-Change Handpiece – For Max/G8/SC, Mach/AT & Smith

Offers a wide power range and fine control. Excellent for stone setting, fine engraving, deep relief work, bead raising and hammer setting. Features heat-treated stainless steel construction, ergonomic handle and adjustable side hose connection. Available with six quick-change holders or in a complete set with quick-change handle, and tool tray. Measures 2.6" long. Weighs 2.6 oz.

Description	Item#	Each
A. #901 Quick-Change Handpiece	855-9991	\$315.00
#901 Quick-Change Handpiece Set	855-9992	365.00

B. GRS® #921 Monarch Quick-Change Handpiece – For Max/G8/SC, Mach/AT & Smith

The top-quality Monarch impact handpiece makes ultra-fine engraving easier than ever, including bulino and banknote styles. Features heat-treated stainless steel construction, graver-style handle and adjustable side hose connection. Includes six quick-change holders. Measures 2.4" long. Weighs 1.8 oz.

Description	Item#	Each
#921 Monarch Quick-Change Handpiece	855-9990	\$315.00

C. GRS® #940 Magnum Quick-Change Handpiece – For Max/G8/SC, Mach/AT & Smith

The compact handpiece with an unmatched combination of power and control—try it and you'll be more than impressed. Offers a better range of power than any other handpiece, from very fine to amazingly heavy. In fact, it exceeds the power of previous models that are twice as large. Also offers fine control with shading capability that's significantly better than any handpiece with this much top-end power. Includes palm knob, head and six quick-change holders. Oval knob available as a special order. Measures 2.8" long. Weighs 6.4 oz.

Description	Item#	Each
#940 Magnum Quick-Change Handpiece	856-0303	\$360.00

D. GRS® #710 Quick-Change Handpiece – For Max/G8/SC, Mach/AT & Smith

Offers plenty of power for working on hard metals such as platinum and steel as well as good control for making smooth cuts in gold and other soft metals. Features stainless steel construction, ergonomic handle and quiet rear exhaust. Includes six quick-change holders. Measures 4.4" long. Weighs 6.4 oz.

Description	Item#	Each
#710 Quick-Change Handpiece	856-0015	\$341.00

E, F GRS® #610 Hammer Handpiece – For Max/G8/SC, Mach/AT & Smith

This exceptional impact tool offers the power for stone setting and control necessary for light jobs. Operates with tool directly on work rather than loosely above it for reduced stone damage. Built for all-day use. Produces the brightest stippling possible when used with Lazer Point #850-3590 (sold separately). Setscrew chuck holds round tools up to 0.13" (3.3mm) and square tools up to 0.10" (2.5mm). Measures 4.5" long. Weighs 5.5 oz.

Description	Item#	Each
E. #610 Hammer Handpiece	856-0280	\$345.00

Description	Item#	1-2	3+
F. Lazer Point	850-3590	\$24.95	\$22.46

G. GRS® #509 Large Quick-Change Handpiece – For GraverMeister only.

The most powerful GraverMeister handpiece available. Great for heavy metal engraving, hammering and wood carving. Includes six quick-change holders. Measures 6.0" long. Weighs 7.9 oz.

Description	Item#	Each
#509 Large Quick-Change Handpiece	856-0301	\$410.00

H. Handpiece Storage Strip

The Handpiece Storage Strip keeps handpieces within easy reach. Four holes provide storage for multiple handpieces of varying size. The storage strip includes clips that fit the side of some commercial benches. It can also be mounted to a flat surface with the included hardware.

I

A-D GRS® Airtact® Control System

Airtact replaces the foot control on your GRS machine to provide an incredibly tactile, precise way to control power to your impact handpiece using only the pressure of your palm, thumb/finger or foot, bringing higher precision to engraving work.

Consists of Control System and your choice of Touch Elements: Palm style installs on back of handpiece for those who hold it like a hand engraver, Thumb/Finger style installs on front of handpiece for those who hold it like a pencil and FootPod style is designed for those who prefer tried-and-true foot control.

Airtact works with GraverMax G8, GraverMach, GraverMax SC, GraverSmith, GraverMax or GraverMate, regardless of when it was made (GraverMax and GraverMate require proper Filter Hookup Set). Control System includes tubing and connections for up to two Touch Elements. Measures 3½"W x 7"D x 4½"H. Backed by a two-year manufacturer's warranty.

Description	Item#	Each
A. Control System	855-9957	\$454.00
B. Palm Element Set for #901 HP	855-9961	161.00
Palm Element Set for #921 HP	855-9962	148.00

D. FootPod Element Set	855-9958	47.85
Filter Hookup Set for GraverMax	855-9955	54.85
Filter Hookup Set for GraverMate	855-9956	54.00

E. GRS® Quick-Change Handpiece System 3

The most affordable, least complicated air impact handpiece system from GRS. Unlike GRS systems which produce special air pulses to control impact handpieces, Handpiece System 3 uses normal compressed air to run a simpler self-oscillating piston-and-port quick-change impact handpiece.

Features a lightweight, cool-running handpiece that reduces fatigue so you can work faster. Delivers good power for engraving, texturing and carving a variety of materials. Includes air filter/regulator, foot control, three quick-change tool holders, air tubing and interchangeable springs for fine to heavy work. Requires air compressor that yields at least 1.2 CFM of air at 50 PSI.

Description	Item#	Each
Quick-Change Handpiece System 3	856-0020	\$619.00

F. Quick-Disconnect Kit – Saves time changing handpieces.

Allows quick changes from one handpiece to another without interrupting workflow. Cuts off airflow immediately when release button is pushed. Installs on vinyl tubing. Includes main body and two quick-disconnect handpiece fittings.

Description	Item#	Each
Quick-Disconnect Kit	856-0282	\$31.75

G-I Sam Alfano Engraving DVDs

Produced by master engraver Sam Alfano, this instructional video has something to offer the novice and professional alike. Teaches basic to advanced ring engraving techniques with close-up video, from a fundamental running leaf border to lumesque scrollwork, relief engraving, sculpting and more. DVD format, 120 minutes.

Description	Item#	Each
G. Engraving Scrollwork Start to Finish	811-0075	\$49.99
H. Lettering Techniques for Hand Engravers	811-0077	49.99
I. Successful Jewelry Engraving	811-0064	49.95

A. Foredom® Power Graver™ – For engraving and setting.

Power Graver is a flexible shaft system specially designed for engraving and hammering. Uses standard gravers to give you the feel of hand engraving with less effort and fatigue. Provides stone setters the power they need for bezel and channel setting, raising beads, turning prongs and chasing.

Includes motor, #9D hammer handpiece with duplex spring, manual speed controller, on/off foot switch, accessory kit, grease, handpiece oil and DVD. Permanently lubricated ball bearing motor provides high torque at low speed for tough jobs. Can be used with hammer handpieces other than #9D. The #9D handpiece comes with 1/16", 3/32", 1/8" and 3mm collets for gravers, beading tools and setting tools. Fits Power Graver motor only. Benchtop manual speed controller runs motor at 500–2,800 strokes/min., keeping selected speed constant. On/off foot switch lets you stop and start again without readjusting speed.

Description	Item#	Each
A. Power Graver, 110V	821-6725	\$552.50
Power Graver, 220V	821-6730	552.50

B-D GRS® #850 Ultra-High-Speed Rotary Handpiece

Provides considerably more power and torque than other rotary handpieces. Operates at 300,000–400,000rpm for effortless engraving, decorating and grinding of metal, plastic, glass, stone, wood and many other materials. Runs with virtually no vibration or noise. Needs no lubrication. Accepts only 1/16" tools due to its high operating speed (see below for diamond/stone and carbide bur sets). Includes air tubing, connectors and carbide bur. Connects to auxiliary airport on all GRS systems (excluding GraverSmith and GraverMeister) or any regulated air supply. Requires 1.3 CFM of air at 30–35 PSI. Measures approx. 5/8" dia. x 5 1/8" long. Weighs 2.5 oz.

Description	Item#	Each
B. #850 Ultra-High-Speed Rotary Handpiece	855-9989	\$510.00
C. Diamond/Stone Bur Set - 1/16" shank	856-0289	53.95
D. Carbide Bur Set - 1/16" shank	856-0288	26.95

E, F Magna-Graver® II Vari-Pact™

Vari-Pact is a powerful impact handpiece that attaches to any standard flex shaft except Power Graver. Allows you to do scrollwork, florentine, bead raise, texture and stipple on precious metals as well as brass and steel. Selector button lets the user choose from four impact power settings that range from light to heavy for better cutting control. To protect handpiece from undue wear and tear and improve control, use with a flex shaft that has gear reduction, such as Foredom LX (850-1220 see p. 436). Measures 5 1/4" long. Made in USA. Graver set sold separately.

Description	Item#	Each
E. Magna-Graver II Vari-Pact	821-6042	\$325.00
F. Graver Set for Magna-Gravers*	821-6045	36.35

*Three gravers (square, flat and liner) and round high-speed steel tool blank, all with 1/8" shanks

G-I Dremel® Electric Engraver

An economical adjustable engraver for creating designs on metal, wood, plastic, ceramic, glass and leather. Features stroke adjustment dial and pencil-type grip. Includes hanger and carbide point. Measures 6" long. UL listed.

Description	Item#	Each
G. Electric Engraver, 110V	821-6010	\$31.95
H. Optional Diamond Point	821-6020	16.25
I. Replacement Carbide Point	821-6015	5.30

J, K Brass Practice Rings

Use to practice engraving, bead setting and more. Size 6.

Description	Item#	Pkg. of 10
J. Thin (3mm) Rings	260-3070	\$19.95
K. Wide (8mm) Rings	260-3071	26.50

L. Brass Practice ID Tags

Practice engraving different ratio adjustments on these 30 x 50mm highly polished ID tag style brass plates. Use to make a master set of templates in a range of ratios so you can easily select the right ratio for every job. 15 gauge with 1/8" (3mm) hole. Sold in packages of 10.

Description	Item#	Pkg. of 10
L. Brass ID Tag	260-3072	\$24.00

Muller® Swedish Steel Gravers

Made of premium-grade Swedish steel pretempered for work on nonferrous metals such as gold, platinum, silver and copper. Can be retempered to suit individual requirements.

A. GRS® Combination Tool Carousel – For gravers and small tools.

Spend more time engraving and less time searching for tools with this efficient organizer. Top tray holds up to 30 tools and gravers, and bottom tray has four removable QC (quick-change) tool trays that each hold 10 gravers with GRS QC Holders attached. All trays rotate for easy access. Small footprint occupies very little space on the workbench.

Description	Item#	Each
Combination Tool Carousel	856-0293	\$43.35

Tools not included

A, B Muller® Line Gravers (Liners)

Every industry knows the adage “time is money” and liners are a terrific time saving tool for engravers. Use to make multiple parallel lines with a single stroke for shading, backgrounds, achieving a Florentine finish and cross-hatch or checkering patterns. Made of premium-grade Swedish steel. Choose from straight and bent styles. Each has a size that represents the distance between lines (the first number) and the number of lines (the second number). The larger the first number, the greater the distance between lines. Size 18/10 creates a standard Florentine finish. Can be used on a variety of metals, woods, plastics etc. Made in USA.

C-F GRS® GlenSteel™ Gravers

Made of GlenSteel, a high-speed tool steel forged exclusively by GRS for engraving, setting and other demanding work. Stay sharp longer and resist breakage better than other gravers and tools. Easier to grind and cobalt-free for increased safety. Measure 0.093" (2.35mm) square x 2.7" (70mm) long. Fit all GRS QC (quick-change) impact handpieces.

Style	Item#	Each
C. Square	856-0001	\$16.95
D. Flat	856-0002	16.95
E. 120° Point	856-0003	18.85
F. Blank	856-0004	14.95

G, H Carbide Gravers

Made of a special grade of extra-fine-grain carbide that withstands impact better than any other grade. Sharpen with Power Hone (see p. 292) and diamond wheel. Square has one end angled at 45°. Blank is unground and ready to be custom-shaped. Measure just under 3/32" square x 2" long.

Style	Item#	Each
G. Square	856-0292	\$12.95
H. Blank	856-0290	10.96

A-D GRS® QC Gravers – In convenient ready-to-go shapes.

Just sharpen and use. Eliminate the need for tedious shaping—think of the time they'll save. Fit all GRS QC (quick-change) impact handpieces when mounted in GRS QC Holders (see below). Also fit many other handpieces, including Power Graver, Magna-Graver and more. Precision-ground from high-speed chrome tool steel. Sold individually and in two kits.

See p. 29 for ruby stones – the Ultimate Sharpening Stones.

F-I GRS® C-Max Gravers and Holders – Tungsten Carbide, 1/8" Shank, Length: 1.8"

Years of development have produced a tungsten carbide graver with the right blend of hardness and toughness for hand engraving and stone setting applications. C-Max achieves a metallurgical balance like no other carbide. For years, engravers and jewelers have used other carbide gravers that break easily or do not hold a fine edge. This frustration is gone forever, thanks to C-Max carbide. Try these tools and do better work in noticeably less time. Also available as a QC graver. See website for C-MAX QC Gravers.

A

A. GRS® Low-Profile Vise Assembly

GRS quality along with extra working space. When a workpiece calls for a lower height, the Low-Profile Vise provides a comfortable 6" (150 mm) of space for a proper view and position. This vise has the same jaw size and capacity as the MagnaBlock, yet is 1.5" shorter. Top half of vise rotates while bottom half remains stationary. Gesswein offers a 30-piece attachment set (856-0277) that includes storage for the adapter plates and pins that come with the block. Block weight (26 lbs (12 kg)- Jaw height 1 1/8" (46mm) - Ball diameter 6 1/8" (147mm) - Max opening 3 1/2" (89mm) - Jaw width 3" (76mm). Includes upper jaw plates, 5 pins, base, 1 plastic hex key, and wrench. Made in USA

Description	Item#	Each
A. Low-Profile Vise	856-0315	\$695.00

B

B, C GRS® Engraver's Blocks

The Magnablock and the Small Block are extremely well-made devices used to hold objects firmly for engraving, stone setting and general-purpose work. Each holds both large and small items. Features heavy weight and adjustable drags for keeping the workpiece in the proper position. Uses two industrial ball bearings and a large roller thrust bearing to eliminate side play and wobble. Includes rubber ring pad with Nylon glides, upper jaw plates, five pins and wrench. Made in USA.

Features:

- Solid steel construction for exceptional durability
- Adjustable friction lock from zero to full lock for crown rotation control
- Nonglare satin finish on body, black oxide finish on jaws for protection
- Precision-machined parts for smooth, efficient operation
- Easily adjustable working angles for comfort

Specifications:	Magnablock	Small Block
Spherical Diameter	5 3/4"	5 1/8"
Jaw Size	3"W x 1 3/4"H	2 1/2"W x 1 1/2"H
Max. Jaw Opening	3 1/2"	3"

C. Small Block with 30-Piece Attachment Set	821-6005	615.00

D

D. GRS® 30-Piece Attachment Set

30 attachments for all GRS Engraver's Blocks in a wooden storage base. Includes Ring Holding Clamp, shown.

Description	Item#	Each
30-Piece Attachment Set	856-0277	\$118.00

E

E. GRS® Ring Holding Clamp

Uses leather lining to prevent objects from marring. Fits all GRS Engraver's Blocks (included in above set).

Description	Item#	Each
Ring Holding Clamp	856-0296	\$24.45

F

F. GRS® Microblock™ Ball Vise

Compact, low-profile design is perfect for microscope work and other jobs where a larger vise is an obstacle. Smooth, self-centering jaw system and adjustable internal brake system lets the user choose the amount of rotational resistance from totally free to fully locked. Machined from solid stainless steel and finished with low-glare treatment to reduce eyestrain. Includes positioning ring, four jaw pins, wrenches and Thermo-Loc Sample Kit (four bars). Measures 3.1" dia. with 1.8"W x .87"H jaws. Max. jaw opening: 2". Made in USA.

Description	Item#	Each
Microblock	856-0304	\$305.00
F. Microblock with 30-Piece Attachment Set	856-0305	395.00

A. GRS® Inside Ring Holder for Vises

Holds rings from the inside for easy stone setting or engraving. Safely handles tapered and delicate designs that can be crushed by ordinary ring clamps. Fits in all GRS Engraver's Blocks and most vises. Includes seven different mandrels for holding ring sizes 4-13 without marring, expansion screw and wrench. Made of solid steel.

Description	Item#	Each
Inside Ring Holder	856-0209	\$73.40

B. GRS® Thermo-Loc®

Very tough work-holding plastic. Softens with heat to clay-like pliable consistency so you can form it around an endless variety of workpieces. Turns rock-hard once it cools to hold items securely. Economical and practical—can be reused again and again. Neutral gray in color to prevent eyestrain, even under bright work lights. Heat in a microwave oven on the pad included with the Starter Kit, in a conventional oven, in hot water or with a heat gun (be sure to follow proper heating instructions).

Description	Item#	Each
Thermo-Loc, 1/2 lb.	816-1592	\$25.60
Thermo-Loc, 1 lb.	816-1593	43.75
Thermo-Loc, 5 lbs.	816-1594	166.00
Thermo-Loc Starter Kit (includes 1 lb. Thermo-Loc and microwave-safe 6" x 6" pad)	816-1597	49.95

Also see JETT SETT page 495

C. GRS® Thermo-Loc® Jaw Sets

Hold irregularly shaped and fragile parts securely without damaging them. Choose from small and large jaw sets for respective GRS Engraving Blocks. Each includes two stainless steel master jaws and four aluminum bonding strips. Easy to use: just set jaws in your Engraving Block, bolt on aluminum bonding strips, apply Thermo-Loc to strips, and form them around your workpiece. Unbolt and save custom jaws for repeat jobs, or resoften the Thermo-Loc to hold another workpiece.

Description	Item#	Each
Thermo-Loc Small (Small Block) Jaw Set	816-1595	\$90.80
Thermo-Loc Large (Magnablock) Jaw Set	816-1596	120.00

D. GRS® Contoured Vise Jaw Set

Ideal for holding odd-shaped parts in GRS Megablock and Small Engraver's Blocks. Fits in top holes of blocks. Has rubber-lined jaws that automatically conform to a part's shape to grip it firmly with minimal clamping force. Provides a fast and safe way to hold shaped mold inserts and irregular items for polishing. Small jaw can be rotated 180° for greater versatility.

Description	Item#	Each
Contoured Vise Jaw Set	821-5997	\$75.90

E, F GRS® Super Pins

Made of heavy-duty plastic to hold large parts without marring. Fit in GRS Magnablock and Small Block. Available with 3/8" and 1/4" steel shanks.

Description	Item#	Each
E. Super Pins with 3/8" shanks, pkg. of 2	821-5999	\$8.35
F. Super Pins with 1/4" shanks, pkg. of 4	821-5998	12.95

A

B

A, B PEPETOOLS Engraver's Block and Attachments

High-quality nickel-plated block designed to hold workpieces firmly without side motion. Has ball bearings for freedom of movement and smooth swiveling. An adjustable drag keeps the work piece in its proper position. Tight tolerances and precision construction eliminates side shakes. Deep throated jaws slide smoothly on the center screw allowing you to set the most comfortable working angles.

Suggest 35-piece attachment set. Made in USA.

Description	Item#	Each
A. 6" Engraving Block	821-6114	\$382.50
B. 35-Piece Attachment Set (includes Replacement Hex Key)	821-6112	103.20
Long Rubber-Covered Pins, set of 4	821-6150	7.08
Tapered Pins, set of 4	821-6300	8.75
Replacement Hex Key	821-6800	8.50

C

C. GRS® Satellite Turntable & Stand Package

System provides unrestricted mobility, allowing work on larger pieces. It can also be easily stored when not in use. The tripod base provides incredible stability during the most calculated cuts. Height adjusts from 18" to 29". The package includes the Turntable (856-0322) and Stand (856-0323) which are also sold separately, see below. Comes with Brake kit (856-0326) and Low-Friction PTFE Pad (856-0327). Does not include a vise.

Description	Item#	Each
Satellite Turntable & Stand Package	856-0324	\$830.00

D

D. GRS® Satellite Turntable

Robust design provides a completely overhauled bearing system for minimum maintenance and a smooth, quiet glide. Sealed profile promotes a cleaner internal environment and limits contamination from metal chips. The top of the turntable has been marked with easy centering lines to accommodate any GRS vise. Comes with Brake Kit (856-0326) and Low-Friction PTFE Pad (856-0327). Does not include vise, Satellite Stand, or Centering Post

Description	Item#	Each
Satellite Turntable	856-0322	\$438.00

The Satellite Turntable is compatible with all GRS vises. Vise sold separately.

E

E. GRS® Satellite Turntable Stand

Provides unrestricted mobility, allowing work on larger pieces. The stand's height adjusts from 18" to 29", creating ideal work elevations. The gas spring mechanism and included collet wrench make adjustments quick and easy. The tripod base provides stability during the most calculated cuts. The Satellite Turntable Stand is compatible with the Satellite Turntable (856-0322). Turntable and Stand are sold in a money-saving set (856-0324) above.

Description	Item#	Each
Satellite Turntable Stand	856-0323	\$440.00

F

F. GRS® Satellite Fixed Top & Stand

Take control of your work and find freedom from your bench. The Satellite Fixed Top Package is the ultimate work surface for hand engravers that prefer a GRS Positioning Vise. This system provides unrestricted mobility, allowing the artist freedom from their bench to work on larger pieces. The tripod base provides incredible stability that will ease the mind of any engraver during the most calculated cuts. The stand's height adjusts from 18" to 29", accommodating most engravers. The gas spring mechanism and included collet wrench make adjustments quick, easy, and almost effortless. The 10-inch steel surface provides a large area for adjustability and stability of your vise (Not included).

Description	Item#	Each
Satellite Fixed Top & Stand	856-0325	\$549.00

A. Low Profile 5" Ball Vise, 2½" Dia.

With 2½" dia. jaws that are 1½" tall. Need more working space under your microscope? Now you can with the RinGenie Low-Profile Ball Vise. Overall height is 4½". Sturdy construction with jaws that are made of stainless steel with copper face inserts for many years of use. Most vise accessory kits in the market will also fit this model. Made in USA.

Description	Item#	Each
5" Ball Vise 2½" Dia.	816-1507	\$632.50

A

B. Low Profile 5" Ball Vise, 3½" Dia.

With 3½" dia. jaws that are 1" tall. Need more working space under your microscope? Now you can with the RinGenie Low-Profile Ball Vise. Overall height is 3½". Sturdy construction with jaws that are made of stainless steel with copper face inserts for many years of use. Most vise accessory kits in the market will also fit this model. Made in USA.

Description	Item#	Each
5" Ball Vise, 3½" Dia.	816-1508	\$632.50

B

C. 5" Positional Vise

With 2½" dia. jaws which are 1½" tall. Utilizing two stationary pins to easily adjust the working position. Overall height is 6¼". Jaws opening measures 1½". Made in USA.

Description	Item#	Each
5" Positional Vise	816-1509	\$852.50

C

D. Positional Rotatory Table & Vise

With a mounted vise. Great for general work at the bench or any flat surface. Constructed of a Steel 8" work base with drag screw resistance, optional positioning and a 360° rotation. Jaws are 3" dia. and 1" tall. Jaws opening is 4½". Overall height is 3⅝". Made in USA.

Description	Item#	Each
Positional Rotatory Table and Mounted Vise	816-1511	\$984.50

D

E, F 3" Vise + Adapter

With 1.9" dia. jaws which are ¾" tall. Made from stainless steel. Overall height 4". Jaw opening 1¼". Vise Adapter, made from aircraft quality aluminum, allows bench mounting. Made in USA.

Description	Item#	Each
E. Vise	816-1498	\$742.50
F. Vise Adapter	816-1499	192.50

E

F

G. The Expert's Guide to Graver Sharpening – By Sam Alfano

Created by Sam Alfano, master engraver with over 25 years of experience. Offers step-by-step instructions on how to use the GRS Sharpening System. Covers sharpening of square, 120°, flat, round, brightcut, script lettering, modified flat and Italian bulino engravers, as well as liners. Includes dozens of timesaving tips and tricks. DVD format, 60 minutes.

Description	Item#	Each
The Expert's Guide to Graver Sharpening	811-0051	\$49.00

G

H. Easy Step-by-Step Graver Sharpening DVD – By GRS

Graver and tool sharpening simplified. Using microscopic camera work and special visual aids, you'll see clear, step-by-step sharpening. Each tool is first sharpened and then demonstrated in proper use including metal engraving and stone setting. Everyone using gravers, chisels and similar tools will save time, end frustration and produce finer results with this training. DVD format, 120 minutes.

Description	Item#	Each
The Expert's Guide to Graver Sharpening	856-0059	\$47.15

H

A, B Pitch Bowls

Made of cast iron. The 5" diameter bowl holds up to 2 lbs. of pitch, and the 8" diameter bowl holds up to 4 lbs. of pitch (not included). Use with ring pad (see below) for stability.

Description	Diameter	Item#	Each
A. Small Bowl	5"	811-1290	\$27.25
B. Large Bowl	8"	811-1310	31.45

C, D Ring Pads

Use with pitch bowls to insulate the workbench surface from heat. Lets you tilt engraver's block or pitch bowl so you can find the best working angle.

Description	Diameter	Item#	Each
C. Small Rubber Pad	5"	811-1291	\$6.55
D. Large Rubber Pad	8"	811-1311	12.95

E. GRS® Pitch Cup

Compact pitch cup for mounting in jaws of any vise or engraver's block. Each comes prefilled with black pitch, a special material that softens when heated and provides firm support for hard-to-hold, irregularly shaped and delicate items. Gently reheat pitch to remove workpiece.

Description	Dimensions	Item#	Each
Pitch Cup	2" diameter	856-0171	\$30.25

F. Black Pitch

Traditional, ready-to-mix pitch for holding and supporting jewelry during engraving and more. Especially useful for holding objects too delicate to hold in an engraver's block. Use in a pitch bowl and set into a ring pad for a handy engraving fixture. Mix with plaster or pumice and linseed oil to vary hardness. Includes instructions for mixing and use. Sold in 8 oz. containers.

Description	Item#	Each
Black Pitch, 8 oz.	811-1805	\$48.95

G. Peg Clamp

A mini handheld tool for holding odd-shaped items for engraving. Features 2" dia. half-round spring-loaded jaws that open and close on twin guides at the turn of a thumb screw. Includes four pegs that can be easily positioned in any of the 30 holes in each jaw. Has wooden handle. Measures 5" long. Max. jaw opening: 7/8".

Description	Item#	Each
G. Peg Clamp	812-0210	\$19.35
Replacement Pegs, pkg. of 4	812-0200	3.20

H-J GRS® BenchMate™ Multipurpose Vise

Attaches to BenchMate or directly to your bench. Tilts left and right and rotates on vertical axis so you can find the best working angle. Features holes in top for holding pins or the padded ring clamp from GRS 30-Piece Attachment Set #856-0277 (see p. 286). Made of satin-finished steel. To mount, fit in Fixed Mounting Plate, secure to Benchtop Mounting Adapter, then screw into bench.

Description	Item#	Each
H. Multipurpose Vise	856-0172	\$195.00
I. Fixed Mounting Plate	856-0196	21.25
J. Benchtop Mounting Adapter	856-0193	32.95

A-H Graver Handles

Six different hardwood handles with metal ferrules for firmly holding gravers.

Description	Style	Item#	3pc	EACH Prices	
				3-9	12-141

 Three-piece minimum; Please order in multiples of three.

I-L Rosewood Graver Handles

Four different rosewood handles with metal ferrules for firmly holding gravers.

Description	Item#	Each
I. Small 1/2-Head	170-2140	\$2.75
J. Large 1/2-Head	170-2141	2.75
K. Mushroom	170-2143	2.75
L. Ball	170-2142	2.50

M. Graver Handle with Tool Chucks

Wooden handle with two interchangeable tool chucks for holding gravers and other small tools up to 3mm. To swap tools, just unscrew knurled holder, remove chuck, replace with other chuck and screw holder back on. Graver not included.

Description	Item#	Each
Graver Handle w/ Tool Chucks	840-4210	\$8.95

N. GRS® Adjustable Graver Handle Set

Includes three adjustable aluminum handles color-coded for easy graver identification. To adjust, just loosen lock screw, slide graver to desired position and tighten.

Description	Item#	Each
Adjustable Graver Handle Set	170-2201	\$48.00

O. GRS® QC Handle

Rubber-covered handle with short reach and comfortable feel for engraving by hand. Includes three QC (quick-change) holders for fast tool changes. Accepts square tools up to 0.10" (2.5mm) thick, round tools up to 0.13" (3.3mm) in diameter and most gravers.

Description	Item#	Each
QC Handle	856-0264	\$34.95

A, B GRS® GraverHone VS Complete Sharpening Systems

Meet the next generation sharpening system from GRS Tools. These complete packages contain the high-torque, variable speed GraverHone VS with your choice of fixtures. Select the Dual Angle System for use with regular Gravers and select the Apex System for use with QC Gravers. Either package includes the GraverHone VS which features variable speed (400-900 RPM), dual direction and time-saving quick lock for diamond wheels (no threads). UL approved. Made in the USA.

Packages also include 3 diamond wheels, 260, 600, and 1200 grit, as well as the handy diamond wheel rack

Description	Item#	Each
A. GraverHone VS with Apex Sharpening System 110V, 60 Hz	856-0332	\$1,250.00
B. GraverHone VS with Dual Angle Sharpening Fixture, Head and Post 110V, 60 Hz	856-0334	\$1,230.00

C. GRS® Apex Sharpening System – for QC Tool Holders only

The Apex Sharpening System is the perfect fixture for anyone from the novice learning to sharpen their first graver to the veteran seeking efficient repeatability. The new shorter fixture nose and longer fixture post easily accommodate longer gravers. Locking knobs have been updated with a quality knurled steel. A quarter-turn locking system works exclusively with GRS QC tool holders to promote ultimate efficiency for loading and locking tools. The post dial has been simplified to promote finding the correct angle setting quickly. Most notably, the fixture now features the ability to switch Apex dials in seconds without tools or screws to turn. A simple switch to the Dual Angle dial and you can make any graver geometry desired. Includes: Apex Sharpening Fixture, color coded 90° dial, 105° dial, 120° dial, Dual Angle dial for unlimited graver geometries, Apex fixture magnetic post, and storage rack. Made in USA.

Description	Item#	Each
Apex Sharpening System	856-0291	\$325.00

D, E GRS® Dual-Angle Sharpening Fixture

Holds gravers with or without handles and those in QC Holders for precise sharpening. Features two large, easy-to-read degree dials for setting both elevation and rotation angles. Available with or without post.

Description	Item#	Each
D. Dual-Angle Sharpening Fixture, head only	856-0299	\$282.00
E. Dual-Angle Sharpening Fixture, head and post	856-0018	315.00

F. GRS® QC Sharpening Fixture

Holds gravers in QC holders for precise sharpening. Features two degree dials for setting both elevation and rotation angles and a post and magnetized base.

Description	Item#	Each
QC Sharpening Fixture, head and post	856-0262	\$252.00

G. GRS® Standard Sharpening Fixture

Holds standard gravers for sharpening. Features one degree dial for setting elevation angle and a post with a magnetized base.

Description	Item#	Each
Standard Sharpening Fixture, head and post	856-0200	\$174.00

A-D GRS® Power Hone Wheels

The low-cost, high-quality Diamond Wheels eliminate heat buildup in gravers and tools, last for years and stay flat for accuracy. Produce a fine, dependable finish. Excellent for sharpening carbide, cobalt and standard steel tools. The solid Cast Iron and Ceramic Laps produce a mirror finish on tools, resulting in bright cuts on your workpieces. Must be periodically charged with Diamond Spray, or Diamond Powder. Can be used with Quick-Change Wheel Conversion Set (see below).

Description	Dia. x AH	Grit	Item#	Each
A. Diamond Wheel	5" x 1/2"	260	856-0259	\$110.00
		600	856-0256	99.65
		1200	856-0032	130.00
Cast Iron	6" x 1/2"		856-0272	125.00
B. Ceramic Lap	6" x 1/2"		856-0258	305.00
C. Diamond Spray - 1 carat diamond			856-0260	32.30
Diamond Powder - 5 carats diamond			856-0271	21.55
D. Wheel Storage Rack			856-0035	24.35

E. GRS® Power Hone Quick-Change Wheel Conversion Set

Easily attaches to the Power Hone without tools. Lets you change wheels in seconds: simply lift wheel off and replace with another. Can be used with all GRS 5" and 6" wheels.

Description	Item#	Each
Quick-Change Wheel Conversion Set	856-0261	\$82.90

F. Crocker-Style Graver Sharpening Fixture

Keeps graver in a fixed position for sharpening on a bench stone. Holds graver at any angle: just set index as desired and lock in for repeated accuracy. Stone and graver not included.

Description	Item#	Each
Crocker-Style Graver Sharpening Fixture	816-1000	\$62.75

Stone and graver not included.

G. Graver Sharpening Holder

A small, inexpensive holder for sharpening. Holds gravers in either of two angled openings. Has roller on bottom for smooth action. Use with a bench stone (see p. 29 for our Ruby Bench Stones). Measures 1 3/8"W x 1 1/2"H.

Description	Item#	Each
Graver Sharpening Holder	816-1012	\$7.35

H-J Scribes

Double-ended steel scriber features one-piece steel construction and twisted center for good grip.

Carbide-tipped scriber can be used on hard metals, glass, stones, and diamond scriber can be used on all metals and most stones. Both have hexagonal aluminum handles that prevent rolling.

Description	Item#	EACH Prices	
		1-2	3+
H. Double-Ended Steel Scriber	816-0890	\$7.15	\$6.44
I. Carbide-Tipped Scriber	816-0950	5.25	4.73
J. Diamond Scriber	220-1900	10.85	9.77

K. Chinese White

A fast-drying, nontoxic, white watercolor for layout work. Forms a background so letters or designs can be drawn on the work surface prior to engraving. To use, simply moisten surface with water using fingertip or soft brush, then apply to workpiece. Sold in 0.175 oz. half-cake packaged in aluminum foil for protection from moisture.

Description	Item#	Each
Chinese White	812-0100	\$16.50

Grobet Swiss Pattern Precision Files

The world's standard for quality and performance!

Manufactured to precise production standards, using a combination of machine cutting and hand craftsmanship to produce the most accurate, best cutting and longest-lasting files in the world. They are made of the finest heat-tempered, chrome alloy steel and have the "right" feel, action and balance desired by all true craftsmen. Swiss Pattern Precision Files deliver superior performance on all metals. Simply the best you can buy. Files are measured in length from the point where the teeth begin to the end of the file. The handle section (tang) is not considered in the file length. Made in Italy.

Barrette

Tapered in width and thickness, coming to a point. Only flat side is double cut, providing safe edge and top.

Length of Cut	Width x Thickness	Cut	Item#	EACH Prices	
				1-11	12+

Barrette - Hot Die

Same as regular Barrette files except with ground backs, widely used in making and repairing extrusion dies. Double cut.

Length of Cut	Width x Thickness	Cut	Item#	EACH Prices	
				1-11	12+
4"	5 ⁵ / ₃₂ " x 3 ³ / ₃₂ "	00	635-1402	\$31.09	\$27.98

Checkering Pillar

Parallel in width and gently tapered in thickness. Overcut is parallel to file edges, and upcut is 90° to overcut. Double cut on top and bottom; both edges are safe. Useful for putting serrations on knife edges or for obtaining a checkered design similar to that found on a gun handgrip. Frequently used to create a coarse florentine finish; after initial cut, angle the file 45° or 90° and cut again.

Length of Cut	Width x Thickness	Lines per inch	Cut	Item#	EACH Prices

Knife-Edge

Tapered in width and thickness. Knife edge has the same thickness from point to shoulder. The included angle of the sharp edge is approximately 10°. Generally used to file in a slot or wedge-shaped opening. Curved knife edge allows easy filing in restricted areas. Double cut on both sides; top edge is safe while knife edge is single cut.

Pillar, Regular

A general-purpose file used primarily for working on flat surfaces. Because pillar files are available in various widths, they are adaptable to filing in slots, keyways, splines and similar areas. Parallel in width and tapered in thickness to provide perfectly flat filing. Double cut top and bottom, both edges are safe.

Pipin

Tapered in width and thickness. Combines the cross sections of round and crossing files along with the edge of a knife file. For finishing the junction of two different curved surfaces and for opening slots when a "V" shape is required. Double cut on both sides; top and bottom edges are single cut.

A-E Grobet Plastic File Handles

Virtually unbreakable plastic handles shaped and textured to fit your hand comfortably and prevent slipping. Feature tempered metal tang-holding inserts that are threaded to ensure proper alignment and positive grip. Allow easy file changes: just unscrew the file in use and screw in another. Have holes at top for hanging near your workbench.

Grobet American Pattern Files

They are uniform in cut to permit fast metal removal. Extremely durable and scientifically balanced, each file is the product of a long tradition of superior craftsmanship combined with the most advanced technology. Every file is heat-treated to exacting standards to provide top performance and long life. Files are unsurpassed in accuracy of shape and size. Handle section (tang) is not considered in file length. Made in China.

American Cut – Bastard

American Cut – Second
Swiss Cut – 0

American Cut – Smooth
Swiss Cut – 2

Flat (End Tapered)

Universally used by all machinists, this file is recommended for fast stock removal where a smooth finish is not required. Double cut top and bottom; edges are single cut. Differs from the mill file in that it has a thicker cross section.

Length of Cut	Width x Thickness	Cut	Item#	Each
6"	5/8" x 5/32"	Bastard	770-0627	\$3.00
		Second	770-0628	3.25

Grobet Swiss Pattern Needle Files

Swiss Pattern needle files are used for precision work in small areas. Finest quality files made. Made of the highest quality steel, machined and finished for precision shape, accuracy and balance. Teeth are sharp and cross-cut, assuring even filing. Recommended for both soft and hard metals, including platinum. Also used for removing, smoothing and shaping plastic and wood. Round knurled handles to provide a sure grip. Length measurements include handle. Length 4" (10 cm) has cut portion of 1³/₄" (44 mm), Length 6¹/₄" (16 cm) has cut portion, Length 5¹/₂" (14 cm) has cut portion of 2¹/₂" (64 mm), Length 7³/₄" (20 cm) has cut portion of 4¹/₈" (105 mm). Made in Italy.

Barrette

Tapered in width and thickness, coming to a point. Only flat side is cut, providing safe edge and top.

A-G Grobet Inox Needle Files – For hard metals.

Inox files provide excellent performance on hard-to-file surfaces and hard metals. Feature exceptional hardness of 72 HRC and corrosion resistance for long life. Best of all, they won't clog—one knock is enough to remove metal chips. Handles are yellow for quick identification. Measure approx. 18cm (7") long. Made in Italy. Inox hand files are also available (see p. 310).

12-Piece Set	2	705-1000	\$11.95

Swiss Pattern Escapement Files

Sometimes known as square-handled needle files, escapement files are used for filing even smaller items such as fine extrusion dies and making fine repairs. Measure 14cm (5½") long with 1½" to 2½" cut length.

Barrette

Tapered in width and thickness, coming to a point. Only flat side is cut, providing safe edge and top.

Cut	Overall inches	Length cm	Item#	EACH Prices		Cut	Overall inches	Length cm	Item#	EACH Prices	
				1-11	12+					1-11	12+
0	5½	14	725-1100	\$16.17	\$14.55	6	5½	14	725-1106	\$20.58	\$18.52

4			725-1114	\$17.64	\$15.88	6	5½	14	725-1116	\$20.58	\$18.52

Crossing

Half-round on two sides with one side having a slightly larger radius than the other. Tapered in width and thickness. Cut and usable to the point. Used primarily for filing interior curved surfaces. The double radius allows filing at the junction of two curved surfaces or of a straight and curved surface.

Cut	Overall inches	Length cm	Item#	EACH Prices		Cut	Overall inches	Length cm	Item#	EACH Prices

Swiss Pattern Escapement Files, continued

Knife-Edge

Tapered in width and thickness. Knife edge has the same thickness from point to shoulder. The included angle of the sharp edge is approximately 10°. Generally used to file in a slot or wedge-shaped opening. Curved knife edge allows easy filing in restricted areas.

Cut	Overall inches	Length cm	Item#	EACH Prices

C

Guide to Selecting Grobet Swiss Pattern Precision Files

File selection cannot be reduced to a formula or table but is based to a great degree on experience. However, the chart below gives you a great starting point for file selection.

Basic Application	Type of File Recommended
Corners-holes-edges	Three-Square
Corners-holes	Square
Corners-slots	Equalling
Curved surfaces-corners-holes	Half-Round
Curved surfaces-junctures of curved and flat surfaces-corners-holes	Crossing
Flat surfaces	Hand
Flat surfaces-corners-keyways dovetail ways-gear teeth-deburring	Barrette
Flat surfaces-slots	Pillar
Roughening surfaces for hand grips	Checkering
Rounded corners-slots-flat surfaces-junctures between curved and flat surfaces	Crochet
Rounded corners-holes-"V" slots	Pippin
Rounded inside corners-holes	Round
Slots	Screwhead
Slots	Warding
Slots-wedge-shaped openings	Knife

Keep in mind, there is more to file selection than shape alone. Selecting the correct cut to use is determined by the type of the metal you're working on, as well as the amount of material to be removed and your desired finish. For example, rapid removal of stock often indicates a cut 00, while working on narrow surfaces would suggest a cut 2 and a fine cut such as cut 4 or cut 6 would be used for final finishing operations.

Types of Files

Swiss Pattern Precision Files - The original Swiss Pattern files made in hundreds of shapes and sizes.

Swiss Pattern Needle Files - A group of files of various cross-sections with a knurled, round handle. Knurling gives the file a positive, Non-Slip grip for precision filing.

Escapement Files - Also called small Square Handled Needle Files. A group of files of various cross-sectioned shapes with a length of cut varying from $\frac{3}{4}$ " to $2\frac{1}{2}$ ", with square handles.

Rifflers - Originally used and hand forged by die sinkers, die makers, silversmiths, etc., in shapes and cross-sections appropriate to their work. Teeth are cut on small areas on each end and can have a variety of shapes. A long middle portion serves as the handle.

Grobet Inox Files

For platinum, stainless steel, exotic plastics, and other hard to file materials. The hardest surface known - Rockwell hardness 72HRc. Better performance on hard-to-file surfaces. Little or no clogging; a simple knock is enough to remove the chips. Highly resistant to corrosion. Longer life than standard files. Made in Italy.

Handles are yellow for quick identification. Inox needle files are also available (see p. 306).

Barrette

Tapered in width and thickness, coming to a point. Only flat side is cut, providing safe edge and top.

Cut	Length of cut inches	Item#	EACH Prices

B

C

D

E

A. Dead-Blow Mallets – With detachable faces

Feature cast-iron heads filled with iron shot. As each mallet is struck, shot moves forward behind the blow to dampen rebound and ensure efficient transmission of force. Includes two replaceable nonmarring polyurethane faces: medium (green) and hard (black). Impervious to oils and most solvents. Grooved hickory handles. Made in USA.

Head Dia. x L	Head Wt.	Length	Item#	Each
1" x 4 1/4"	3/4 lbs.	11"	821-9070	\$39.95

1 1/4" dia.			821-7010	\$12.00
1 1/2" dia.			821-7012	15.60

K. Brass Mallets

Feature solid brass heads that deliver a hard blow. Ideal for work that requires a solid hit, including stamping, dapping and punching. Metal handles with nonslip grips. Made in USA.

Head Dia. x L	Head Wt.	Length	Item#	Each
1" x 2 5/8"	1 lb.	9 3/4"	821-7050	\$46.15
1 1/4" x 2 5/8"	2 lbs.	9 3/4"	821-7051	55.15

Peddinghaus Hammers

German made Peddinghaus hammers are crafted using the time-tested process of forging. These high-quality hammers are not cast. Finely balanced with curved ash handles, they are the choice of metal smiths for riveting, forming, embossing, grooving and raising. These hammers are manufactured in accordance with strict ISO and DIN standards. Made in Germany.

A. Peddinghaus Planishing Hammer

Fine steel hammer with highly polished flat (24mm dia.) and bowed (24mm dia.) faces. Solid ash handle. Meets strict ISO and DIN standards. Made in Germany.

Head Length	Head Wt.	Length	Item#	EACH Prices	
				1-2	3+
80mm	6 oz.	10 ¹ / ₄ "	821-7024	\$37.95	\$36.05

B. Peddinghaus Polishing Hammer

Fine steel hammer with highly polished lightly bowed (24mm dia.) and heavily bowed (24mm dia.) faces. Solid ash handle. Meets strict ISO and DIN standards. Made in Germany.

Head Length	Head Wt.	Length	Item#	EACH Prices	
				1-2	3+
104mm	8 ³ / ₄ oz.	11 ³ / ₄ "	821-7026	\$37.95	\$36.05

C. Peddinghaus Chasing Hammer

Fine steel hammer with two satin-polished differently bowed (15 and 20mm thick) faces. Solid ash handle. Meets strict ISO and DIN standards. Made in Germany.

Head Length	Head Wt.	Length	Item#	EACH Prices	
				1-2	3+
117mm	14 oz.	12 ¹ / ₄ "	821-7025	\$37.95	\$36.05

D. Peddinghaus Goldsmith's Hammer

7/8" x 3 3/4"	12 oz.	11 1/2"	821-8242	\$44.95

G

Fretz Hammers and Miniature Stakes

Fretz Hammers feature beautiful and strong Padauk wood handles, oil finished and tapering to a slender neck for flexibility. Head is cast from 420-grade stainless steel and hardened to 50HRC for maximum durability. Faces are polished to a mirror shine.

The size of the hammer will be dictated by the size of the workpiece. Small, light projects will require small hammers (HMR-1 or 5), and big, heavy projects will require large hammers (HMR-101). Made in Vietnam.

A. Planishing Hammers

For smoothing metal: round head smooths previous raising marks, and flat head smooths marks from round head to a nearly even finish. Can also be used for sizing rings, shaping bezels and forming metal against mandrels and stakes. Made in Vietnam.

Description	Faces	Length	Item#	Each
HMR-1	3/4"	9"	821-7030	\$52.00
HMR-101	7/8"	9 7/8"	821-7035	74.50

B. Chasing Hammer

A modern design chasing hammer of medium weight. The balance of this hammer makes each hammer blow effortless. Features 1 1/32" (29mm) flat face for striking chasing tools and 1/2" (12mm) polished ball-peen face for hammering directly on metal. Made in Vietnam.

Description	Faces	Length	Item#	Each
HMR-17	1 1/8" & 1/2"	9"	821-8265	\$52.00

C. Small Embossing Hammer

For forming small raised areas by hammering from the inside in preparation for chasing or shaping. Imparts a very fine dimpled texture that can be varied by blow strength. Made in Vietnam.

Description	Faces	Length	Item#	Each
HMR-5	3/8" & 1/4"	9"	821-7034	\$52.00

D-I Fretz F-Series Mini Silversmithing Stakes

Give yourself more creative forming options!

F-series stakes to create complex shapes. Stakes are hardened to 38 HRC for easy reshaping. Holders are softer to ensure stakes fit securely. Purchase extra holders to progress from one task to the next without constantly changing stakes. Use with H-1 holder (sold separately, below). All measure approximately 3 3/4"W x 3"H. Made in Vietnam.

Description	Item#	Each
D. F-2 Double Convex, large end forms convex bracelets, smaller end forms domed rings. If you anneal in between hammering, F-2 can make some fairly dramatic curves.	814-1089	\$54.00
E. F-6 An anticlastic shell stake scaled for bracelet-size shell-form, concave or convex shapes.	814-1091	54.00
F. F-9 Has one convex side to make shallow dome. Other side is for making concave bracelets.	814-1090	54.00
G. F-1 Beak stake for making bracelets with rolled edges and transitioning flat surfaces to curved.	814-1092	54.00
H. F-7 Thin shell stake for making spiral shapes and curves.	814-1093	54.00
I. F-8 Horn stake for making beads from tubes and cones and for extreme curves in hollow rings.	814-1094	54.00

J, K Fretz Stake H-1 Holder and VB-1 Vise Block

Use the H-1 holder with the VB-1 cherry vise block for securing all F-series stakes. Vise block measures 3"L x 2"W x 1 1/2"H. Purchase extras to improve workflow. Made in Vietnam.

Description	Item#	Each
J. H-1 Holder	814-1060	\$52.75
K. VB-1 Cherry Vise Block	814-1081	19.95

A. Three-Face Triad Hammer

This clever hammer features rotating head with three different faces: brass, nylon and steel. To change faces, just pull on head and turn. Has ergonomic vibration-dampening handle for comfortable grip. Helps save drawer space. Made in Taiwan.

Description	Head Dia. x H	Head Wt.	Length	Item#	Each

Replacement Nylon Face				822-0052	4.95
Replacement Steel Face				822-0053	4.95

C. Thirteen-In-One Texturing Hammer

Make your jewelry come alive by creating designs and textures with this easy-to-use texturing hammer with 13 interchangeable faces. This great bench tool is simplistic and you can work with two designs at a time. Change the textured faces easily by loosening the nut holder and swapping out the texturing face. The 13 faces and head are tool hardened steel, nylon and brass. The head is mounted in a sturdy hardwood handle. The perfect combination to create endless custom designs with five smooth and eight textured faces. Made in India.

Description	Item#	Each
Thirteen-In-One Texturing Hammer	822-0055	\$26.95

D. Letter Stamp Set

Includes 27 steel stamps: one for each letter of the alphabet and one period. Makes 1/16" impressions. Packaged in hardwood storage case with cover.

Description	Item#	Each
Letter Stamp Set	190-0010	\$59.00

E. Number Stamp Set

Includes nine steel stamps: numbers 0-9 (use 9 upside-down to make 6). Makes 1/16" impressions. Packaged in hardwood storage case with cover.

Description	Item#	Each
Number Stamp Set	190-0030	\$20.50

F. Horn Anvil on Base

Made of hardened and tempered steel. Has round and flat horns for flattening and shaping. Measures 4 3/4"W x 3 1/4"H. Made in Italy.

Description	Item#	Each
Horn Anvil on Base	814-1025	\$58.00

E

F

A. Hexagon Anvil

Ideal for drilling, riveting and staking small parts. Case-hardened and ground flat and smooth. Has 16 holes ranging from 5/64" to 1/4" and five milled slots. Measures 1 5/8"W x 3/4"H.

Description	Item#	Each
Hexagon Anvil	814-1050	\$21.95

B. Machined Bending Block

Used for forming and shaping metal into ring shanks, bezels and much more. Has twelve semicircular grooves. Measures 120x80x30mm (4 3/4"L x 3 1/8"W x 1 1/4"H.) Made in Italy.

Description	Item#	Each
Machined Bending Block	810-2051	\$85.00

C. Lead Bench Block

Used as a stable base for cutting, stamping, forming and chasing. Measures 3 1/4"L x 3 1/4"W x 1"H.

Description	Item#	Each
Lead Bench Block	812-1640	\$18.65

D, E Steel Bench Blocks

Each provides a solid, stable base for workpiece when flattening or laying out designs. Made of high-quality tool steel hardened to 46–50 HRC and ground to a smooth, flat surface. Small block measures 2 1/2"L x 2 1/2"W x 3/4"H. Large block measures 4"L x 4"W x 3/4"H. Made in Europe.

Description	Item#	Each
D. Small Steel Bench Block	812-1650	\$16.95
E. Large Steel Bench Block	812-1655	29.95

F. Bench Block Helper w/Steel & Nylon Blocks

This three piece set includes a thick vulcanized firm rubber base which absorbs shock plus a solid steel block which is 15/16" (24mm) thick and 3" (75mm) in diameter. The third piece is a sturdy nylon block the same size that fits into the rubber base for lighter more delicate work. This is a well made set and allows one to hammer without creating excess noise and vibration at the bench. Wt. 2.5 lbs.

Description	Item#	Each
Bench Block Helper Set	812-1645	\$28.95

A - C Durston Finger Gauge & Mandrels

Durston Steel Finger Gauge Set 1-16

Stamped and manufactured from high quality steel stock, the Durston ring gauge set is precisely machined and calibrated to match the Durston ring mandrels: Steel (841-1141) and Aluminum (841-1140) to provide excellent consistency at your bench during manufacturing and also the same consistency when sizing a ring in front of your customer in the retail showroom.

Durston Aluminum and Steel Mandrels

Both the aluminum and steel ring mandrels are machined and calibrated to the Durston steel finger gauge set (820-8059) providing excellent consistency from the showroom/retail counter to the bench for repair and then to the customer. Made of quality machined aluminum or hardened steel both are easy to read as each mandrel is laser engraved with sizes 1-16 US in quarter size increments.

Durston Sizing Kits

- Showroom Kit which includes an Aluminum Mandrel (841-1140) and a Ring Gauge (820-8059)
- Bench/Showroom Kit which includes a Steel Mandrel (841-1141), Aluminum Mandrel (841-1140) and a Ring Gauge Set (820-8059)

Made in the United Kingdom.

A

B. Premium Disc Cutter

Hardened tool steel cutter, machined and tempered to perfection, for cutting flawless circles from 18-gauge and thinner soft metals (such as copper, brass, gold and silver). Set is designed to be easily separated by unscrewing a hex nut with the included hex wrench.

It is recommended to place a rubber pad under the disc cutter during use to help absorb shock. Use of cutting lubricant and a proper mallet are also suggested.

Cutter Dimensions: 4 1/16" x 2 1/2" x 1 3/8"

Wooden Base Dimensions: 5 1/2" x 6 1/2"

Disc cutter includes 11 punches: 1/8", 3/16", 1/4", 5/16", 3/8", 7/16", 1/2", 5/8", 3/4", 7/8", 1".

Description	Item#	Each
Premium Disc Cutter	812-1320	\$140.00

B

C. Chasing Tool Set

Consists of 22 different punches for making decorative designs on sheet metal. The tool ends are struck with a chasing hammer while the work is held in a pitch bowl or on a lead block.

Description	Item#	Each
Chasing Tool Set	815-2000	\$154.85

C

D. High-Speed Steel Chisels

Diesinker style with one-piece construction ground to shape from the finest round high-speed steel stock. Excellent for evenly removing large amounts of material. Will not lose temper when sharpened. Measure 6" long overall. Available individually or in a set of all 12 styles. Shapes: Sizes 1 to 4 are square, 5 to 8 are round, and 9 to 12 are point. Made in USA.

A. Roller Marking Machine

Makes precise, uniform impressions quickly and effortlessly.

This machine uses simple roller action to mark up to 46 evenly spaced characters in one impression from engraved steel rollers. Maintains consistent depth even on very thin pieces since variable pressure can only be adjusted mechanically, not by hand. Consider special ordering a die with your trademark and one or two other impressions for marking trademark and karat at once on rings, pendants, charms and stone-set rings. Accommodates ring sizes 4 and larger. Uses nylon ring supports to prevent marring and distortion of work. Includes a set of eight curved shank supports and one flat bar support.

Description	Item#	Each
A. Roller Marking Machine	856-0420	\$1,150.00

Replacement Curved Shank Support Set	856-0421	125.00

A

B. Ring and Earpost Marking Pliers

The easiest system for karat-marking rings and earposts. To stamp a ring, position it over the stamp and squeeze the pliers; anvil with felt pad prevents marring. To stamp an earpost, simply insert the earpost jaw set, position the earpost and squeeze the pliers. Stamps make 0.75mm impressions.

B

C. Ring Stamping Device

A timesaving, accurate stamping device. Accommodates standard ring stamps with approx. 5/16" square bodies. Eliminates the need to hold ring and stamp in one hand. Just position ring over the nonmarring nylon anvil to prevent slipping and tap stamp with mallet. Also ideal for flat stamping. Allows you to use your existing stamps (if not exactly 5/16" square, simply reverse sleeve or file stamp body to fit). Also works with Bent Ring Stamps listed below.

A. Sherline Metric Lathe

Lets you create precision wax, plastic and metal models and parts like a true pro. Features high-torque DC motor with variable speed control and automatic converter that adjusts between 110V/220V and 50/60Hz without any loss of torque. Made in USA.

Includes: 70mm x 152mm cross slide, 381mm steel bed to allow 203mm between centers, aluminum handwheels, pulleys, belt, faceplate, lathe dog, two dead centers, two hexagonal keys, tool post, high-speed cutting tool, 8' power cord and instructions. Measures 18"L x 7½"W x 6"H. Operating speed range: 70–2,800rpm.

Specifications:

Swing over Bed	90mm (3½")
Swing over Carriage	45mm (1¾")
Distance Between Centers	200mm (8")
Hole Through Spindle	10mm (.405")
Main Spindle Accuracy	0.0127mm (.0005")
Spindle Nose Thread	¾", 16 TPI
Spindle Nose Taper	#1 Morse
Travel of Cross Slide	110mm (4¼")
Handwheel Graduations	0.01mm (.001")

Description	Item#	Each
Metric Lathe	856-1100	\$715.00

B

B. Δ Vertical Milling Column Attachment

Turns your Sherline Metric Lathe into a small milling machine for drilling, boring and many other general tasks. Converts lathe to mill in less than one minute. Consists of dovetailed vertical column with aluminum base that fastens to lathe bed in place of headstock; headstock then attaches to dovetailed saddle on vertical column. Turn handwheel to change cutting depth in 0.01mm increments. Mount workpiece on lathe cross slide.

Description	Item#	Each
Vertical Milling Column Attachment	856-1102	\$172.75

C

D

E

C-E Sherline Chucks

Four-jaw chuck (C) holds irregularly shaped parts on or deliberately off center. Clamps tighter than three-jaw chuck. Grips from 2mm (⅜") to 38mm (1½") diameter stock with jaws in normal position, up to 70mm (2¾") with jaws in reverse position. Measures 17mm (.687") dia. through hole with ¾", 16 thread.

Three-jaw chuck (D) centers parts within a few thousandths of an inch. Grips from 2mm (⅜") to 38mm (1½") diameter stock with jaws in normal position, up to 70mm (2¾") with jaws in reverse position. Measures 17mm (.687") dia. through hole with ¾", 16 thread.

Three-jaw tailstock (E) chuck is used for accurate center-line drilling, reaming or tapping of any part mounted in the lathe. Grips from 0.8mm (⅛") to 9.5mm (⅜") diameter stock. Includes key and two arbors: #0 Morse for tailstock and #1 Morse for headstock.

Description	Item#	Each
C. Four-Jaw Chuck	856-1104	\$142.95

Gesswein® Photo Imaging Light Boxes

Ideal for capturing digital images of your jewelry!

Designed for use at home, in the workshop or wherever digital photos are needed, the Gesswein Photo Imaging boxes offer a controlled lighting atmosphere to produce the highest quality digital photos. Your jewelry will jump out and sell themselves! Whether you need photos for advertising, catalogs, website or logging repair intake; natural wrap-around lighting is the key to bringing out the best in all your images thus bringing in sales. Easy to use, one rocker switch controls fluorescent lights (5000°K +/-10%) located in the front, base and back panels while another rocker switch controls the super bright LED light panel located at the top/front of the interior of the Light Box.

As some jewelry requires less atmospheric light to control "hot" spots, each Light Box comes with 3 dimmer controls (one for each light panel). Bright white interior side panels and door provide the perfect reflective surfaces to complement the diffused lighting and thus creating a shadow-free atmosphere. Sparkle is added using the white accent light. Shoot from either the top (Brackets Provided) or from the front on a tripod (Not Included). Magnetically hinged door can easily be opened and removed should the camera be mounted on a tripod in the front.

Available in 4 models (Mini, Small, Medium and Large) see comparison chart below. Manufactured with sturdy construction and compact for easy portability. Made in China

Features and Capabilities:

- Camera Bracket short & adjustable (for most cameras)
- Camera Bracket tall & fixed (for SLR cameras)
- Magnetic Front Door and Top Aperture Cover
- Three Accent Lights to add shine and/or color (White, Green and Blue)
- A/C Power Adapter/Cord (100~240V)

Photo taken in Light Box using White Accent Light

Allows items in the light box to be placed upright without any visible holding apparatus. Especially useful for rings. Only a tiny bit of this wax is necessary.

Description	Item#	Each
Positioning Wax	817-0767	\$12.85

F. Leatherette Ring Stand

Provides a subtle, classy texturized background. The pad clips easily and securely fits all types of rings. Measures 2 1/2"W x 2 7/8"D x 1"H.

Description	Item#	EACH Prices	
		1-2	3+
Leatherette Ring Stand	857-1485	\$3.95	\$3.36

Light Box Selection Consideration

When choosing a size even a small one will work for relatively large jewelry but it is very hard to arrange something like a necklace as only the larger sizes allow you to move your hands freely and photograph more of the pieces inside. The 3 light wands are a nice addition for adding accent to the jewelry with the white being most useful. The lights are free with the each lightbox and plug into the box directly. Experiment with different ways of holding pieces instead of having to lie flat. Fishing line, wax, and ring stands all can be used to offer a great effect.

A-D Dazor® Fluorescent 43" Reach Floating-Arm Lamps

Dazor's classic 2-tube and 3-tube fluorescent lamps have been stylishly redesigned and now include mirror reflectors providing even more light than original versions. Complete with superior energy efficient electronic ballasts, these lamps are equipped with the classic patented "floating" arm allowing precise positioning with ease without drifting or bouncing. The lamps are still durable, all metal construction with single click rocker style on/off switch for instant response. Both have a 43" reach, 7' cord and 3-prong plug.

Select between 2 bulb (30W) and 3 bulb (45W) lamps in either black or white and 110V or 220V. All supplied with 15W Daylight (6500K) bulbs. Optional 15W Full Spectrum (5500K) bulbs are also available for purchase (see below). Backed by a five-year warranty. Made in USA.

Lamps come complete with a universal clamp which allows the lamp to be clamped or bolted to a horizontal surface up to a 2¼" thick. To bolt to a back splash or to the back of a jewelers workbench, (anything up to 1" in thickness), add the back splash clamp to your order. Available in white or black.

E. Dazor® Clamp On Magnifier

The 5" diameter clamp-on magnifier is designed to be used in conjunction with Dazor fluorescent or LED bench/desk lamps. The magnifier has a 2X power with a 4X power inset. The magnifier is made from optical quality acrylic and includes all mounting hardware. The magnifier can be flipped upwards when not in use. This is an ideal accessory for use in jewelry manufacturing, repair benches, electronics, dental labs or craft/hobby projects. Its clarity will be maintained if the magnifier is cleaned periodically with a lens cleaning tissue. Made in Taiwan.

F, G Dazor® Fluorescent Magnifying Lamps

Ideal for assembly, inspection and other high-precision work. Feature 5" diameter 3-diopter crown optical glass lens with shade and 22W cool white fluorescent tube for total visual freedom with minimal eyestrain. Provide 75% magnification at 13" focal distance along with even, shadow-free light from all angles. Made of steel to endure years of rough use. Can be mounted horizontally or vertically on a bench, machine or wall. Available with a 28" heavy-duty lock-joint arm with three control knobs for reducing vibration or a 42" counterbalanced floating arm for fast, easy positioning. Color: gray. Electrical: 115V, 60Hz with 9 power cord and 3-prong plug. UL approved. Backed by five-year warranty.

H, I Dazor® Full-Spectrum Tubes – For Dazor Floating-Arm, and Magnifying Lamps

Full-spectrum lighting offers several advantages over traditional fluorescent lighting. It displays colors accurately, allowing correct viewing and matching. It produces less glare, reducing eyestrain, headaches and general fatigue, increasing productivity. And it emits less heat, making for a comfortable workplace. Advocates of full-spectrum lighting go so far as to claim it provides health benefits and general feelings of well-being due to its simulation of natural outdoor light. Some even use it to treat a condition known as Seasonal Affective Disorder (SAD).

Jewelers, graphic artists, dentists and other discerning professionals use Dazor's full-spectrum lights to perform their crafts with razor-sharp precision. Now you can as well, without investing a fortune. Just replace the fluorescent tube in your existing Dazor lamp with the appropriate 15W (5900°K) standard or 22W Circline (5000°K) and you can start reaping the benefits of full-spectrum lighting today.

A, B Dazor® Halogen Lamps

Halogen lamps for producing very intense light at the focal points of assembly and inspection stations. Light from the halogen bulb is more concentrated than that from an incandescent bulb, yet the 20W halogen is a real energy-saver. The 2½" diameter head has a protective shield to guard against bulb breakage. Proper ventilation keeps reflector head cool. The 34" reach industrial-strength, flexible arm works well around most machine tools. Choose from weighted and clamp-on styles. Halogen bulb is rated to 2,000 hours. Color: black. Electrical: 115V, 60Hz with 8 foot power cord and 3-prong plug. UL approved. Backed by a five-year warranty.

C. Dazor® EcoFlex LED Lamp

The EcoFlex by Dazor is an affordable, rugged, environmentally friendly LED bench light. The sleek head rotates 340° vertically and 90° horizontally, and features four 1-watt dimmable high brightness white LEDs optically mixed to produce an even light pattern. The 25" flexible arm exceeds the depth of most jewelry benches and allows you to aim the light exactly where you need it. Dazor's clever thermal engineering allows the LEDs to achieve their rated life of 50,000 hours without the heat! More information found on gesswein.com. Made in China.

**Footcandle: a unit of illuminance on a surface that is everywhere one foot from a uniform point source of light of one candle and equal to one lumen per square foot.*

D. Econo LED Flex Light

Our LED Flex Light uses 28 SMD-LEDs (surface mount and light emitting diodes) and advanced circuitry to produce a natural bright light that is easy on the eyes and reproduces colors as they truly are. A proprietary honeycomb lens cover insets the SMD LEDs by 5mm to reduce glare. Features 2 easy-to-reach light settings, 2-5W (200-500 lumens). Choose the brightness that is best for the task at hand.

LED Flex Light is the new generation of LED lighting and is rated for up to 60,000 hours of use. One-year manufacturer's warranty. cETLus certified UL listed. 110V, 6 foot power cord. More information found on gesswein.com. Made in China.

F. Mighty Bright LED Mini Task Light

This breakthrough light excels equally as a task, craft or utility light. Two bright white, energy-efficient LEDs make the Mighty Bright LED Mini Task Light very bright, yet the non-glaring glow makes for a comfortable work light. Set the intensity by pressing the button once or twice. Each LED lasts 100,000 hours. Clip and twist the gooseneck to set the perfect angle and clip in place or use the stable free-standing base. Three AAA batteries (included) provide 28 hours of operation. If the batteries run low, simply plug in the 120V AC adaptor (sold separately) with extra long 6 foot power cord and keep on going. Imported.

Energy Efficient LED Magnifier Lamps

Green-Lite™ is the most energy efficient, highest output and longest lasting inspection lighting system in the world. Unparalleled quality!

Rather than clusters of old style LEDs, Green-Lite™ employs next generation "surface mount" LEDs (6000K) that produce more light with less glare, consume less power and last longer. The light output of the 8-watt LED array is comparable to a 150-watt halogen. The blended white light is easy on the eyes and the output level is adjustable (dimmable) for maximum operator comfort. Green-Lite™ LED technology quickly pays for itself through lower operating costs, longer lighting lifespan and improved productivity. A lower total cost of ownership provides the greenest solution of all! Manufacturer's ten-year mechanical warranty. Five-year, 50,000 hour pro-rated LED warranty. Made in USA.

A Blaze Red shown

Features:

- 4X the lumen output of standard magnifier lamps
- Multi-angle LEDs for shadowless lighting at a full range of focal lengths and heights
- Superb dimming software via convenient, reliable membrane switch
- Reduced glare, heat and energy consumption
- 4 diopter (2X) lens
- Patented "Elite" arms are slim but have the greatest holding power of any arm of this type in the world
- Proudly made in the USA and available in eight colors

Specifications:

- 43" Arm Reach
- Mounting Style Table Edge Clamp up to 2½" thick
- Electrical 120 Volt–240 Volt
- Net/Ship.Wt. 20 lbs./22 lbs.

B. MightyVue LED Pro Magnifying Lamp with Clamp

MightyVue Pro 3 LED series magnifying lamps are in a class of their own. Featuring adjustable color temperature (3500K-6500K), brightness control (max 1100lm), in addition to an attractive design, the Mighty Vue Pro series lamps are the most advanced available. Touch-sensitive brightness and color temperature controls. Large 7.5 x 6.2 inch, 3-Diopter crystal-clear glass lens for distortion-free viewing. 36 inch spring-balanced arm ensures a large working range. 360° swivel motion allows the head to be placed in any position. Covered spring arm prevents pinching hazards. 110V ~ 240V, complete with clamp and 5 foot power cord. Made in China.

E. LED Table Top Inspection Lamp

Powerful yet economical, this tabletop LED desk light is a must for any bench, table or workstation needing bright LED lighting and superb optics. This lamp boasts a 1.75X magnification with 72 bright white LED's placed around the 5" diameter magnifier giving you the ultimate clear, crisp lighting! For optimal use, the 1.75X (3 Diopeter) viewing of your task should be about 14" from the lens. Lamp flexes side to side and up and down and the viewing area (head) moves side to side with ease on a ball joint. As an extra bonus, the unit has small tool storage areas on its weighted base putting your tools at your fingertips. 110V with 5 foot power cord, UL approved. One-year manufacturer's warranty. Made in China.

Important Magnifier Characteristics

Magnification Power: The ability of a lens to increase the visual size of an object. The symbol "X" represents power (a 3X magnifier triples the size of an image).

Focal Distance: The distance a magnifier should be from an object for it to be in focus (a 10X magnifier has a focal distance of 1"). Measured from lens unless otherwise noted.

Bausch & Lomb Magnifiers

Bausch & Lomb had been renowned for excellence in scientific and ophthalmic optics for well over a century providing the following quality features:

- Application-designed optics with the right balance of magnification, field of view and depth of focus for each magnifier's use.
- Lenses made from pure optical glass or optical plastic, crystal clear and free from internal flaws.
- Lens surfaces are finished to their high standards with no wave or other types of surface defects to distort vision.

A

A. Bausch & Lomb® Hastings Triplet Loupes

The best loupes from Bausch & Lomb. Highly corrected for spherical and chromatic aberrations. Feature three layers of optical glass cemented together and large field of view out to lens edge. Swing-away nickel-plated case protects lens and serves as handle.

A-D Dino-Lite Digital Handheld Microscopes

Perfect for appraisals, repair, inspection and documentation!

Affordable, compact digital microscopes for a wide range of assembly, repair, inspection and documentation applications. Three of the **Dino-Lite** models also include measuring software that allows you to input a magnification value from the microscope zoom control and then measure length, multiple angles, and circular functions.

The **AD4113TL** boasts enhanced working distance and removable nose cone, which can be swapped with the optional 90° view adapter (810-0093) to look into tight areas with ease. While the new **Edge Series, AM4115ZT** offers high end, higher image quality, exquisite sharpness and enhanced detail (shown at right).

Features:

- Camera with powerful magnification capabilities and remarkable color resolution
- DinoCapture software for capturing both pictures and videos
- Micro-Touch trigger mechanism for shooting without a mouse
- 8 ultra-bright LEDs for strong yet clean lighting
- Compact design for portability
- Includes USB 2.0 cable for fast data transfer
- Backed by a one-year warranty
- CE approved
- Compatible with PC and Mac

*Allows point-to-point, curvilinear and angular measurements with accuracy up to 0.001".
 **Allows adjustable glare reduction, useful in many close-up applications.
 ***Allows up to 4" more distance between lens and subject.

D. Dino-Lite MSAK826 Enclosed Light box

Includes two 8" LED light bars and up to 14" vertical internal working distance. The LED Light has a long life of approximately 3 years. Replacement bulbs available. Powered by an included AC Adapter, this photo box helps to eliminate outside light pollution and other interfering factors. Compatible with all Dino-Lite handheld Scopes. For photographing jewelry, it is recommended to use our table stand (810-0091 - see above) and extended pole (810-0125 - see below). Dimensions: 7"W X 9¾"D X 12"H. Some assembly required. 110V. Made In China.

Description	Item#	Each
Dino-Lite MSAK826 Enclosed Light box	810-0120	\$199.00

E. Optional MSA2P Pole for Dino-Lite Table Stand / MSAK826 Light Box

Quickly and easily mount your Dino-Lite on your light box (See p. 332). Made of high-impact plastic.

Pole for Dino-Lite Table Stand	810-0125	\$29.00

F. Dino-Lite Light Box Adapter – Perfect for use with your MEDALight!

Mount your Dino-Lite on any light box (See p. 332). Made of high-impact plastic.

Description	Item#	Each
Dino-Lite Light Box Adapter	810-0096	\$39.00

Shown with Laptop and Tabletop stand #810-0091 (not included).

Diffuser for viewing gemstones/diamonds by removing glare. Microscope sold separately.

ProZoom Scopes on Ball Bearing Bases

A-C ProZoom™ — 4.5 Stereo-Zoom Binocular, 6.5 Digital Trinocular Microscope Systems and Binocular Microscopes with GRS Acrobat Stands

Both systems offer the performance and durability required for your most demanding inspection needs. Crystal-clear optics, combined with ultra-bright LED illumination, gives the same performance of much more expensive microscope systems and making them a favorite across many industrial applications. The 10" x 10" robustly built double-ball bearing base/arm assembly makes using either ProZoom effortless, maintaining pinpoint accuracy when locked in. Both versions offer an eye tube inclination of 45°, while the main body rotates 360° in holder. Both feature a dimmable, ultra bright, LED ring light. Both are ESD safe, 120~240V, 50/60Hz and have a shipping weight of 65lbs.

The Digital Trinocular System is a "true" trinocular design because you maintain full functionality of both eyepieces when using the video port. Comes complete with 2 Megapixel (1600x1200) USB 2.0 camera with Image Acquisition and Measurement Software Suite for high-quality analysis and documentation.

The ProZoom Binocular Microscopes combine the same crystal clear optics as the ProZoom 4.5 Stereo-Zoom binocular microscope above with the GRS acrobat stand on the following page to give you the most flexible scope at an affordable price.

Available with either the same extra-bright fluorescent ring light as the Meiji Stereo Zoom scopes on the next page or the dimmable, ultra bright, LED ring light on the Pro-Zoom 4.5 Binocular Microscope above. Additional 2X (271-3087) and 20X (271-3086) lenses are available. Please see our website.

Specifications:

ProZoom	Binocular	Trinocular

D. Bench Setter's Microscope

Lightweight yet durable, the Bench Setter's Microscope boasts an all-metal aluminum alloy body with premium components and chemical-resistant finishes providing stability and durability for a lifetime of dependable use.

The easily maneuverable boom stand with friction arms, focus block and padded headrest ensures superb flexibility and comfort. Entire assembly can be easily positioned and quickly swung away when not in use. Friction arms lock in place when needed. Focus block securely holds microscope body. Dimmable Ring Light (included) with extra-bright LED bulbs provides cool, glare-free illumination. Fits many other competitive microscopes as well. Made In China.

Features: Binocular scope body can be rotated 360° and locked in any position. Standard 10X eyepieces with magnification Range of 3.5X-45X, High-resolution optics for yielding upright and unreversed stereoscopic images, Rugged all-metal bodies and components designed to last a lifetime, Ergonomically positioned bilateral zoom controls.

Description	Item#	Each
D. Bench Setter's Microscope	271-3045	\$995.00

E. GemOro® Elite 1030 Microscope - 10X and 30X Magnification

A precision microscope at a surprisingly affordable price. Field of view 25mm at 10X. Provides true professional darkfield and brightfield with sliding baffle. Has adjustable iris diaphragm for controlling lower light. Features 360° rotating head for easy focus adjustment. Comes complete with full-view gem clip, comfort eye guards and dustcover. For added surface illumination, an optional fluorescent overhead light can be attached. Backed by a five-year mechanical warranty and a two-year electrical warranty. Imported with optics from Japan. Electrical: 110/220V, 50/60Hz. Dimensions: 4½"W x 7½"D x 12½"H. Ship wt. 10 lbs.

A. Meiji Stereo Zoom Microscopes Standard Binocular and Camera-Ready Trinocular Styles

From the premier optics manufacturer in Japan, these microscopes feature a Greenough optical design and high-resolution optics free of chromatic and spherical aberrations for yielding crystal-clear upright and unreversed stereoscopic images with rich contrast, impressive brightness and true-to-life color. Boast great depth of field and image flatness for accurate viewing and long working distances for ample workspace. Ideal for inspection of fine details.

Lightweight yet durable all-metal aluminum alloy bodies with premium components and chemical-resistant finishes provide stability and durability for a lifetime of dependable use. The 45°-inclined observation tubes with adjustable interpupillary distance and diopter tubes eliminate eyestrain.

GRS acrobat boom stand with friction arms, focus block and padded headrest ensures superb flexibility and comfort. Entire assembly can be easily positioned and quickly swung away when not in use. Friction arms lock in place when needed. Focus block securely holds microscope body. Padded headrest reduces neck and back fatigue. Comes with a protective dusk cover.

Ring light with extra-bright circular fluorescent or LED bulb provides cool, glare-free illumination. Fits many other microscopes besides those from Meiji. Electrical: 115V.

Features:

- Binocular and Trinocular styles that can be rotated 360° and locked in any position
- High-resolution optics for yielding upright and unreversed stereoscopic images
- Ergonomically positioned bilateral zoom controls
- Interpupillary distance adjustment from 54–75mm
- Dual dioptic adjustment (±5 diopters) for maintaining focus throughout zoom range

Binocular and Trinocular Components:

- 10X eyepieces with eye shields
- 0.5X auxiliary objective lens for increased working distance
- GRS Acrobat Boom Stand with focus block and headrest
- LED or Fluorescent (on/off) Ring Light, 115V

Specifications:

Body Style	Binocular or Trinocular, each with 360° rotation
Zoom Control	Dual, graduated, bilateral mount
Zoom Range	0.7–4.5X (0.35–2.25X with 0.5X objective lens)
Magnification	7–45X (3.5–22.5X with 0.5X objective lens)
Field of View	32.8–5.1mm (65.6–10.2mm with 0.5X objective lens)
Working Distance	93mm (Binocular/Trinocular with 0.5X objective lens: 150/170mm)
Interpupillary Distance	Adjustable from 54–75mm
Dioptic Adjustment	Dual (±5 diopters)

Description	Item#	Each
A. Binocular Microscope with Acrobat Stand and LED Ring Light	271-3049	\$2,128.00
Binocular Microscope with Acrobat Stand and Fluorescent Ring Light	271-3029	2,162.00
Trinocular Microscope with Acrobat Stand and Fluorescent Ring Light*	271-3067	2,742.00

*Designed for photo and video applications. When the beam splitter is engaged, it does not obstruct the eye tubes; all three viewing ports are lighted for simultaneous use. Can be used with most cameras, including digital, SLR, digital SLR and CCD. Call for available adapters.

B, C Leica® A60 Microscope and the GRS redesigned Acrobat® Versa Stand

Leica FusionOptics provides a greater depth of field and a high-resolution view of hand engraving, stone setting and jewelry repairs and tasks. The GRS Acrobat Versa stand has been redesigned, specifically for the popular Leica A60 Microscope. It features a rigid frame that makes positioning your work easy, a magnetic document holder and dust cover. The 38° viewing angle on the Leica head allows the user to maintain a natural head posture. The operating elements such as the zoom adjustment, focus knob, and ring light are intuitive and easily accessible, by left and right-handed users alike. Complete Package Includes; Leica A60 Microscope W/10X Fixed Eyepieces/0.63 Objective Lens, GRS Acrobat Versa Stand, Dual Voltage LED Optia LED Light and GRS Headrest. If you already have the older style Acrobat Stand from GRS, but you want to have upgrade to the Leica optics, you can replace your existing scope by purchasing our Leica Scope Head and Adapter package (271-3063). One-year manufacturer's warranty.

Specifications:	Standard	with Objective Lens 0.63X

A. Premium Digital Caliper – Max 6"/150mm

This extremely accurate caliper can be connected to any computer for recording or printing data. Features large, high-contrast LCD screen for easy readability. Has conversion, zero and hold functions (hold function freezes display for later viewing). Made of hardened stainless steel for durability. Uses setscrew to prevent jaws from moving. Runs for 2–3 years on an efficient lithium wafer battery (included). Measures inside, outside, depth and step. Comes in fitted plastic case with see-through cover.

Specifications:

Resolution 0.0005"/0.01mm Accuracy ±0.001"/0.02mm

Description	Item#	Each
Premium Digital Caliper	825-1635	\$180.25

B

B. Econo Digital Caliper – Max 6"/150mm

Provides full digital accuracy at a reasonable price. Features large LCD screen for good readability. Has conversion and zero functions. Uses setscrew to prevent jaws from moving. Runs for one year on 1.5V silver oxide watch battery (included). Measures inside, outside, depth and step. Comes in fitted plastic box. Made in Switzerland.

Specifications:

Resolution 0.0005"/0.01mm Accuracy ±0.001"/0.03mm

Description	Item#	Each
Econo Digital Caliper	825-1630	\$77.50

C

C. Digital Caliper with Holding Plate – Max 6"/150mm

This caliper comes standard with a stone holding plate attachment for easy measuring for loose stones, watch crystals, beads etc. Convert measurement from millimeters to inches with a touch of a button. LCD display with auto-off system. Measures inside, outside and depth. Comes with nylon case and spare battery.

Specifications:

Max. Measurement 6"/150mm Accuracy ±0.0001"/.01mm

Description	Item#	Each
6" Digital Caliper with Plate	825-1632	\$37.95

D

D. Pocket Digital Caliper – Max 4"/100mm

Provides digital accuracy and portability at a very affordable price. Features large LCD screen as well as conversion and zero functions. Uses setscrew to prevent jaws from moving. Runs for one year on 1.5V silver oxide watch battery (included). Measures inside, outside, depth and step. Comes in fitted plastic box. Made in India.

Specifications:

Resolution 0.0005"/0.01mm Accuracy ±0.001"/0.02mm

4" Pocket Digital Caliper	825-1625	\$35.00

E

E. Mini Digital Thickness Gauge – Max 1"/25mm

Compact gauge (just 3 1/2" overall) is small enough to take everywhere. Features large LCD screen for good readability. Has conversion and zero functions. Takes both inside and outside measurements in inches and millimeters. Uses setscrew to prevent jaws from moving. Runs on a 1.5V silver oxide watch battery (included). Comes with storage case.

Specifications:

Resolution 0.0005"/0.01mm Accuracy ±0.001"/0.01mm

Description	Item#	Each
Mini Digital Thickness Gauge	825-1620	\$59.95

A. Swiss Plastic/Fiberglass Dial Caliper – Max 150mm

Made of durable super polyamide plastic and fiberglass. Measuring capacity: 150mm. Dial graduations: 0.1mm. Measures inside, outside, depth and step. Comes complete with fitted plastic case. Made in Switzerland.

Description	Item#	Each
Swiss Plastic/Fiberglass Dial Caliper	825-1660	\$36.95

A

B. Swiss Plastic Dial Caliper – Max 6"/150mm

Made of tough reinforced plastic. Measuring capacity: 6". Dial graduations: 0.01" and 1/64". Measures inside, outside, depth and step. Includes fraction conversion table on back. Comes in plastic case. Made in Switzerland.

Description	Item#	Each
Swiss Plastic Dial Caliper	825-1815	\$41.95

B

C. Econo Vernier Caliper – Max 6"/150mm

Graduations with Vernier: 0.001" and 0.02mm. Depth of jaws: 1.6". Made of hardened stainless steel. Uses setscrew to prevent jaws from moving. Has black graduations on a satin chrome finish for easy inside, outside and depth measurements. Comes in plastic box.

Description	Item#	Each
Econo Vernier Caliper	825-1725	\$39.95

C

D, E Brass Sliding Calipers – inch and mm

High quality Pocket Calipers made of Brass. Both measure up to 3 1/4" (1/16" increments) and to 80mm (1.0mm increments). Notched tips are helpful for measuring internal diameters - ID. Can be used as a conversion tool for inches and millimeters. The Vernier model allows measurements to 0.1 mm - OD. Made in Germany.

A. Deluxe Combination Degree Gauge

This high-quality, precision steel degree gauge measures in millimeters and lignes. Far superior to ordinary gauges in terms of construction, readability, convenience and finish. Has screw adjustment at base for perfect accuracy even after years of use. Capacity: 13.5mm or 6 lignes (72 douziemes). Graduations: 0.1mm or 1/2 ligne (douzieme). Measures 8" long. Made in Switzerland.

Description	Item#	Each
Deluxe Combination Degree Gauge	813-0905	\$169.00

B

B. Combination Degree Gauge

Made of satin-finished steel with brass index plate. Capacity: 15mm or 6 lignes (72 douziemes). Graduations: 0.1mm or 1/2 ligne (douzieme). Measures 6 1/2" long.

Description	Item#	Each
Combination Degree Gauge	813-0900	\$41.65

C

C. Pocket Degree Gauge

An economically priced pocket-size steel gauge. Has easy-to-read black indices on polished brass plate. Capacity: 10mm. Graduations: 0.01mm. Measures 3 7/8" long.

Description	Item#	Each
Pocket Degree Gauge	813-0909	\$15.95

D

D. Mini Degree Gauge

A compact, lightweight gauge made of polished stainless steel. Features easy-to-read indices on both sides. Smaller than conventional gauges yet just as accurate. Capacity: 10mm. Graduations: 0.1mm. Measures 4" long.

Description	Item#	Each
Mini Degree Gauge	813-0850	\$12.35

E

E. Econo Micrometer

This affordable micrometer features 6.5mm diameter satin chrome measuring faces with microfine black graduations, friction thimble, locking lever and durable enamel-coated frame. Carbide-tipped for long wear. Capacity: 25mm. Graduations: 0.01mm. Includes wrench and box.

Description	Item#	Each
Econo Micrometer	825-1827	\$27.95

G-I Durston Finger Gauge & Mandrels

Durston Steel Finger Gauge Set 1-16

Stamped and manufactured from high quality steel stock, the Durston ring gauge set is precisely machined and calibrated to match the Durston ring mandrels: Steel (841-1141) and Aluminum (841-1140) to provide excellent consistency at your bench during manufacturing and also the same consistency when sizing a ring in front of your customer in the retail showroom.

Durston Aluminum and Steel Mandrels

Made of quality machined aluminum or hardened steel both are easy to read as each mandrel is laser engraved with sizes 1-16 US in quarter size increments.

- Showroom Kit includes an Aluminum Mandrel (841-1140) and a Ring Gauge Set (820-8059)

Made in the United Kingdom.

A. GXL NEXT Gold Tester

Introducing the next generation of electronic gold testers... the Tri Electronics GXL NEXT Gold, Silver & Platinum Tester has arrived! The GXL Next has the ability to test gold, silver, & platinum. Made in the USA.

Features:

- No calibration required each time tester is turned on
- Optimal electronic karat determination with full range from 6 to 24 karat (10, 14, 18, 22, 24 and all karats in between)
- Quick mode testing feature instantly measures yellow gold in 10, 14, 18, 20, 22, and 24 karats
- Touch mode testing - no push button - simply touch
- Capable of 1000+ clear and clean tests per cartridge with no mess
- Liquid testing solution is harmless and contains no toxic chemicals
- Operates on 3-AAA batteries (included). AC Adapter Sold Separately
- If sensor (test pen) is left uncapped, it will not deteriorate or dry out

Sensor Pen - Silver	817-1058	51.45
AC Adapter	817-1059	21.35

B

B. Gold Testers G-XL-18 and G-XL-24 PRO

These testers are small enough to fit in a pocket or attaché case for on-the-spot testing in the field. The G-XL-18 takes four seconds to test from 6 up to 18K yellow, white, red or green gold. Indicates "Not Gold" if the metal is plated or gold-filled and "Platinum" if pure platinum. The G-XL-24 PRO tests from 6 up to 24K yellow, white, red or green gold.

Each unit initiates an electrochemical reaction with the test piece to measure karat content within a half-karat. Displays a reading only to the nearest karat. Intended for use as a first tool for indicating karat content—does not adequately substitute for fire assaying. Runs on two 9V batteries (included).

Description	Item#	Each
B. G-XL-18	817-1022	\$425.00
G-XL-24 PRO	817-1026	405.00
G-XL-18 Gel Refill (off-white)	817-1029	18.45

Replacement Sensor Pen, G-XL-24 Pro	817-1033	58.85

C

C. Gold Testers GT-3000 and GT-4000

Portable electronic devices for efficient and quick determination of yellow, white, pink and green gold karat values. The GT-3000 tests from 6 up to 18K gold and pure platinum, and the GT-4000 tests from 6 up to 24K gold and pure platinum. Both units can also distinguish solid gold from gold-plated items.

Each unit is easy to use: place drop of conductive gel on test item, touch item with sensor pen, wait just four seconds for reading to appear on the LCD, then match reading to the chart conveniently imprinted on the Gold Tester to find correct karat value. Runs on two 9V batteries (included).

Description	Item#	Each
C. GT-3000 (6-18K)	817-1021	\$195.00
GT-4000 (6-18K, 20K, 22K, 24K)	817-1030	299.00

A. GemOro AuRACLE™ Digital AGT3 Gold and Platinum Tester

The new advanced digital AGT3 is the ultimate verification instrument for gold and platinum testing. This state-of-the-art portable handheld tester has exceptional precision, is simple to use and in seconds provides accurate results showing both the digital karat value and gold percentage – PATENTED WITH PATENTS PENDING.

Features:

- Fast and simple one step calibration
- Tests all colors of gold from 6K to 24K and tests platinum
- Alphanumeric LCD display shows both karat value and gold percentage
- Multi-test modes
- Easy one-step calibration using either 14K or 18K yellow gold
- Durable nickel-plated stainless steel testing plate
- Auto-check pen probe function
- Sleek, contoured and ergonomic design
- Easy to read LCD display
- Automatic low battery indicator
- Follow easy steps to identify non-gold, gold plate and gold filled as NA
- Simply touch pen probe to filed gold or platinum and results are shown in seconds
- Replaceable pen probe provides thousands of tests with proper care
- Compact and portable
- Powered by included 9V alkaline battery or 100V-240V AC adaptor
- INCLUDES: AGT3, pen probe, file, battery, AC adaptor and rubberized carrying case
- Shipping weight: 3 lbs.

B. GemOro AuRACLE™ AGT Blue Mobile Tester

The Auracle family of Gold Testers are now even more advanced! GemOro, the leader in precision gold testing equipment now offers the next generation of Gold Testers on the market. . .AGT Blue! The revolutionary and best performing Auracle gold testers has evolved to a new generation with this Bluetooth Mobile version making it easier and more convenient than ever before! Compact and pocket size (no wires required), the AGT Blue works with any low-energy Bluetooth Apple, Windows and Android device (phone, tablet). With its distinct technology built in, the AGT Blue will calculate your unique buying price while also generating a detailed email receipt for both your business and to your customer almost instantly. Will test all colors of gold (10K, 14K, 18K, 22K, 24K) as well as platinum.

Features:

- One touch easy calibration for consistent results
- May be calibrated using 10K, 14K, 18K, 22K, 24K or platinum
- World's best performing gold testing technology with unmatched accuracy
- Tests all colors of gold in 10K, 14K, 18K, 22K, 24K and platinum
- Follow easy steps to identify non-gold, gold plate and gold filled as NOT GOLD
- Simply touch pen probe to gold or platinum for results
- Pen probe provides thousands of tests with proper care
- No messy gel. No staining chemicals. No dangerous acid.
- Includes AGT BLUE with built-in testing plate, pen probe, file, carrying case and easy to follow tutorial instructions (mobile device not included)
- One Year Limited Warranty
- Made in Singapore

A

A. Presidium® Adamas Diamond Tester

The only diamond and moissanite tester with a replaceable tip, significantly reducing downtime. Accurate testing on colorless diamonds as small as 0.02 carats. Use the micro probe tip, (sold separately) to authenticate colorless diamond melee as small as 0.01 carats. Features a dynamic LED display and a sleek ergonomic grip. Measures approximately 7½"Lx1½"Wx1"H, weighs only 3.5 oz. Powered by 3 AAA batteries (not included) providing about 12 hours of continuous use. Includes USB cable. One year manufacturer's warranty. Made in Singapore

Features:

- In-built memory chip for up to 500 test records
- Dynamic display with super bright micro LED for clear and distinct results
- Retractable thermoelectric probe tip that ensures constant pressure between probe and gemstone, for enhanced accuracy
- Light and portable for convenience

Description	Item#	Each
A. Adamas Diamond Tester	817-1095	\$399.00
Optional Micro Tip	817-1096	69.00
Replacement Tip	817-1094	69.00

B

B. Presidium® (PMuT II) Multi Tester

Instantly separate colorless diamonds from moissanite, colorless sapphire, colorless spinel, cubic zirconia, zircon and other diamond simulants, based on their thermal and electrical properties. Its measuring probes and electronic circuitry detect data from the gemstone being tested via a customized micro-controller.

PMuT III has a retractable probe tip ensuring consistent pressure against the gemstone during testing for reliability. Probe tip size of 0.6mm, tests colorless diamonds as small as 0.02ct. Simple and easy to use with no waiting time between tests.

Complete with metal alert buzzer, low battery indicator, automatic power shut-off and protective case for portability. Ergonomic design with a rubberized anti-slip grip and an all-around LED display for easy readability, ease of handling and reading of results while testing. Runs on 3 AAA batteries (not included) or purchase the optional power adaptor (817-1093) for extended usage. Measures approx. 6½"Lx1"Wx1½"H Weighs just 3.42 oz. without batteries. One year manufacturer's warranty. Made in Singapore.

B. (PMuT II) Multi Tester	817-1097	\$209.00
Optional Power Adaptor	817-1093	19.95

C

C. Presidium® Synthetic Diamond Screener II (SDSII)

Developed by Presidium to screen out the Type Ila colorless (D to J) diamond, which is likely to be synthetic and created through chemical vapor deposition (CVD) or high pressure high temperature (HPHT) syntheses, from the natural Type Ia colorless diamond. Type Ia and Type Ila diamonds each absorb different amounts of UV light allowing the user to differentiate between these diamonds. Can use on all cuts with a flat surface, even mounted stones with an "open-back" setting, which range in dimension from 1.5 mm in width and up to 5 mm in height (approx. 0.02 to 10 carat size). Runs on 4 AAA alkaline batteries (not included). Measures approx. 5"Lx4"Wx2.5"H (130 x 100x 65mm). Weighs only 3.88 oz. without batteries. One-year manufacturer's warranty. Made in Singapore.

Features:

- Auto shutdown of interior LED light source for safe testing when lid of device is open or when Start Test button is not activated
- Low battery indicator and energy saving auto power-off

Synthetic Diamond Screener II (SDS II)	817-1092	\$599.00

D

D. Presidium® Gem Tester/Colored Stone Estimator (PGT/CSE)

This desk-top, colored gemstone thermal tester provides a quick and easy way to identify diamonds and separate 15 types of common colored gemstones* from one another based on their thermal conductivity. The PGT/CSE has a retractable probe tip (0.6mm size) which ensures consistent pressure against the gemstone during testing for more reliable results even for stones as small as 0.02ct *Does not differentiate between natural and synthetic colored gemstones.

Complete with metal alert buzzer to ensure that probe tip is in contact with gemstone during testing, easy-to-read analog dial, built-in diamond and simulant test discs for reference, tests both polished and unpolished gemstones. Simple to use, no waiting time between tests. Runs on 2 AAA alkaline batteries (not included). Measures approx. 6½"L x 3"W x 3"H. One-year manufacturer's warranty. Made in Singapore.

Description	Item#	Each
(PGT/CSE) Gem Tester	817-1098	\$199.00

A-C GemOro Ultratester 3+® Diamond & Moissanite Tester

UltraTester 3+ Diamond, moissanite & white sapphire tester identifies, detects and separates diamond from CZ and moissanite. The patented ergonomic design features new advanced exclusive ultraviolet "UV" F1 moissanite testing technology, shown to be the most effective technology for identifying the widest range of the electrically conductive moissanite material available, including the (3) AAA NiMH rechargeable batteries, micro USB cable with universal voltage AC adapter/charger, loose stone holder, and new compact rubberized portable storage / travel case and super low electrically conductive F1 moissanite. Limited Lifetime Manufacturers Warranty. Designed in the USA. Made in China.

Features:

- Precision retractable probe-tip with enhanced durability
- Fast warm-up time
- Unique beep tones & patented glowing probe tip and light pipe indication: GREEN = Diamond, BLUE = Moissanite, PINK = Sapphire and RED = Metal Alert

Description	Item#	Each
A. GemOro Ultratester 3+	817-1036	\$199.00
B. GemOro Ultradock 3	817-1038	24.95
C. Test Stone 5x Magnifier	817-1039	19.95

UltraTester II on Docking Station

D. GemOro Testerosa Diamond Tester

Identifies between diamond, moissanite and white sapphire. Including super-low electrically conductive Forever One, LED stone illumination and UV fluorescence detection light. Comes complete with a precision retractable probe-tip with enhanced durability. Features a fast warm-up time, plus a user programmable, talking (English, German, Italian, Spanish, French, Russian, Chinese, Japanese, Arabic and more) or ringtone sounds, and glowing light bar / probe tip for quick stone identification (Green = Diamond, Blue = Moissanite, Yellow = Sapphire and Red = Metal Alert). The metal alert warning feature informs you if the setting is touched. The auto-off function preserves battery life. Easily identifies genuine sapphire watch crystals too. Powered and charged (rechargeable batteries) by a Micro USB or included AC Adapter. Includes: UltraDock 3 charger, Test Stone Magnifier, loose stone holder and carrying case. Manufacturers 10 year warranty on Probe tip, Lifetime limited replacement warranty. Made in China.

Description	Item#	Each
GemOro Testerosa Diamond Tester	817-1070	\$299.00

E. DiamondNite Dual Tester – Diamond and Moissanite Tester

Performs two tests in sequence: first test determines if the stone is diamond or simulant; half a second later, second test determines if the stone is diamond or Moissanite. Saves time and money over two separate testers. Runs on 9V battery (included). Comes complete with metal holding plate for loose stones and tip cover. Measures 6³/₈"L x 1³/₄"W x 3³/₄"D. Made in USA.

Description	Item#	EACH Prices	
		1-2	3+
DiamondNite Dual Tester	817-1002	\$228.95	\$217.50

F. Gemlogis Lapis ONE Multi Tester

Highly accurate, rechargeable Lapis ONE multi tester distinguishes between diamond, moissanite, simulant and metal. Uses "Visible Violet Light" technology which excites the atoms and improves electrical conductivity to detect the Forever One™ Moissanite. Features a unique ATC Solution (Ambient Temperature Compensation) for increased accuracy and retractable tip to maintain constant pressure against the stone. Quick & accurate testing of stones as small as 0.02 regardless of shape, rough, loose or mounted. Complete with convenient carrying case, lanyard, metal stone rest and charging adapter. Rechargeable Lithium Battery provides up to 10 hours of continuous operation. Two-year manufacturer's warranty. Made in Hong Kong

Description	Item#	Each
Gemlogis Lapis ONE Multi Tester	817-1081	\$199.00

G. Diamond Tech Pro – Diamond Tester

Offers automatic and manual modes (former requires no adjustments, and latter lets you make adjustments for stone size and environmental conditions). Uses adjustable gain to test even the smallest stones. Features clear linear display, audible diamond signal, metal alert, low battery indicator and automatic shutoff. Runs on 9V battery (included). Measures 6¹/₂"L x 1⁷/₈"W x 3³/₄"D. Backed by seven-year limited manufacturer's warranty. Made in USA.

Description	Item#	Each
Diamond Tech Pro Tester	817-1008	\$108.00

A. Gemlogis Saffron Sorting Gauge

Easy-to-use Saffron Sorting Gauge provides a direct clear digital readout. All-in-one motion allows you to use one hand instead of holding tweezers in one hand and a gauge in the other. Simple sorting and measuring all in one motion!

Features:

- Solid state Digital Readout, easy to read.
- Measuring range of 0.00 to 15mm with an accuracy of 0.01 (0.02 tolerance).
- Dual measure methods...handheld or tabletop use.
- Durable angled measuring anvils to pick up stones with the greatest ease, avoiding damage to the surface.
- Uses One (1) A76 Alkaline Battery (Included)
- One-year Manufacturer's Warranty

Description	Item#	Each
Gemlogis Saffron Sorting Gauge	813-0651	\$98.00

B, C Brown & Sharpe Wire and Sheet Gauges

For measuring wire and sheet sizes. Gauge measures B&S sizes 0-36 marked on one side, sizes .325"-.005" on other. Our pocket gauge comes with a protective leather sheath and measures gauge sizes from 8 to 34 (each size also shown in mm and inches).

Description	Item#	Each
B. Wire and Sheet Gauge	813-0700	\$26.95
C. Pocket Wire and Sheet Gauge	813-0702	11.95

D. K&B Stone Gauge

A handy tempered aluminum pocket gauge for measuring loose stones and settings. Marked in carats and millimeters. Features revolving stone size gauge. Has birthstone chart on reverse. Capacity: 1/32 to 4 carats (2 to 11mm). Measures 3 5/8"L x 2 5/8"W.

Description	Item#	Each
K&B Stone Gauge	813-1000	\$7.95

E. Baker Diamond Gauge

An aluminum gauge with holes for measuring stones and round extensions for measuring mountings. Marked in carats on one side and corresponding millimeters on the other. Capacity: 1/32 to 4 carats (2 to 11mm). Measures 4" in diameter.

Description	Item#	Each
Baker Diamond Gauge	813-0600	\$15.50

F. Diamond Gauge

An aluminum gauge for measuring round and baguette stones. Capacity: 1 point to 2 carats. Measures 1 1/2" in diameter when closed.

Description	Item#	Each
Diamond Gauge	813-1120	\$6.50

G. MeasureMate® Fact Card Set and Gauge

Fact card set consists of ten durable plastic double-sided fact cards packaged in a flip-through wallet. Provides information on gemstone grades, shapes, sizes and weights; setting methods; ring, wire gauge and watch battery sizes; hardness scales; metal properties; and more. Fits in shirt pocket for easy access.

Description	Item#	Each
MeasureMate Fact Card Set	813-0561	\$9.95

H. Gem Weight Estimator

Perfect for determining sizes of both loose and mounted stones when other methods fail. Just place estimator on your stone pad, then place selected diamond on the appropriate outline, and you will instantly be able to tell the approximate weight of the stone. Works well for emerald, marquise, pear, round and baguette stones. Made of flexible, transparent plastic. Measures 9"L x 4"W.

Description	Item#	Each
Gem Weight Estimator	813-1919	\$7.15

A. Micromat Gemstone Gauge and Weight Estimator

A precision dial caliper used by jewelers, appraisers and cutters the world over to accurately estimate weights of gemstones and pearls. Takes both inside and outside measurements in millimeters. Features specially designed jaws that fit inside stone settings and prongs for precise measuring without requiring you to remove stones first. Also has ring size scale for reading USA sizes of rings placed in jaws. Includes attractive leatherette-covered metal case with thorough 42-page booklet of tables and complete instructions fully translated in three languages: English, French and German.

Description	Item#	Each
Gemstone Gauge	813-1910	\$230.95

B. Sciencetech Digital Gemstone Gauge

This digital gauge takes fast, accurate gemstone measurements in inches or millimeters. Includes high setting attachment and zeroing function for fast and easy calibration of stones in melee settings. Comes with protective case. Measuring range: 0.875"/22.25mm.

Specifications:

Resolution: 0.0005"/0.01mm. Accuracy: ±0.0025"/0.05mm.

Description	Item#	Each
Digital Gemstone Gauge	813-1911	\$153.00

C. Pearl and Stone Gauge – Works great with baguettes!

A precision-engineered gauge with measuring faces ground level with the back to stay flat for accurate measuring of pearls and stones such as baguettes. Securely holds stones without slipping. Uses rotating dial gauge for fast, easy zeroing. Has enamel-coated metal body for durability. Capacity: 10mm. Graduations: 0.1mm. Measures 3 1/8" long. Made in Germany.

Description	Item#	Each
Pearl and Stone Gauge	813-0650	\$80.95

D. Mini Digital Thickness Gauge – Max 1"/25mm

Compact gauge (just 3 1/2" overall) is small enough to take everywhere. Features large LCD screen for good readability. Has conversion and zero functions. Takes both inside and outside measurements in inches and millimeters. Uses setscrew to prevent jaws from moving. Runs for one year on a 1.5V silver oxide watch battery (included). Comes with storage case.

Specifications:

Resolution 0.0005"/0.01mm Accuracy ±0.001"/0.01mm

Description	Item#	Each
Mini Digital Thickness Gauge	825-1620	\$59.95

E. The Meleemeeter® Microgauge Template System

Ideal for gauging inaccessible mounted diamond melee. Eliminates measuring and computing of weights. Consists of 10 transparent polyester gauges with 590 melee shapes and sizes placed around the edges for maximum accessibility. Includes extensive profiles of straight and tapered baguettes, each identified by dimensions and carat weight. Use under a microscope in same position as stone under inspection. Comes in solid brass card case.

Description	Item#	Each
The Meleemeeter	813-1350	\$49.25

F. Stone Table Gauge – Millimeter

A standard millimeter scale divided into 0.05mm increments for measuring tables of stones inaccessible by micrometer or caliper. Uses a very fast and accurate scanning method to take measurements without computing between marks, as with a conventional scale. Measures from 1.00 to 10.00mm with accuracy of ±0.01mm. Must be used with 15X or higher magnification. Comes in a protective plastic case. Measures 3 1/2"L x 2"W.

Description	Item#	Each
Stone Table Gauge	813-1360	\$6.55

Gesswein® Supra® Swiss Cutters - Ergonomic Handles

Swiss Made Cutters are made of high quality ball bearing steel at 63–65 Rockwell Hardness. All cutters are available as semi-flush, flush or full flush blades. No-scratch/antiglare satin finish.

- 2-component user-friendly **Ergonomic** handles with soft comfortable gripping surface and hard plastic core. Most advanced design for comfort, accuracy and continuous use.
- Dual leaf springs are made of stainless steel.
- Lap joint with a screw to achieve a high level of strength and precision.
 - Nut is made of hardened alloy steel to resist high cutting load.
 - Screw is fine-pitched for perfect joint adjustment.
- Made in Switzerland.

Premium Ergonomic Handles

For soft, medium and hard wires

For very precise cutting of soft and medium wires

Lindstrom® Pliers and Nippers - Recognized Worldwide

Unsurpassed in quality materials, design and performance. Made of high-quality steel A grade and are ESD safe. Lindstrom 80-Series nippers they rank among the highest quality of any cutters made with cutting edge hardness of 63-65 Rockwell nippers. They are the most popular choice for the traditional user and offer unsurpassed cutting capacity, covering a wide range of wire dimensions and types. High-quality nippers for jewelry, electronics and other industries. Perfect for accessing narrow, confined spaces. Feature precision-ground, black oxidized cutting edges for exceptional cutting accuracy and durability, adjustable screw lap joints, return springs and yellow plastic grips. The Lindstrom Supreme Series Pliers and Nippers offer a wide selection of the finest lightweight pliers and nippers for general electronics work, jewelry making, repair and fine mechanical work. Adjustable precision screw joint minimizes friction and maximizes jaw alignment. Feature smooth, precision-ground jaws for gripping without marring, spring-loaded handles and white plastic grips. Made in Switzerland.

Side Cutter	1/2"	180-0343	\$6.35

M. ValueLine Plier and Nipper Set

Includes all ValueLine Pliers and Nipper above except bent chain.

Description	Item#	Each
4-Piece Set	180-0345	\$21.95

Semi-flush

A. Wolf™ Groovy Chain Nose Pliers

Single-grooved jaws produce 90° bends in wire and flat pieces. Prevent wire from twisting or slipping when filing. Hold jump rings firmly for easy alignment of ends prior to soldering. Feature durable box-joint construction with dual leaf springs and ergonomic handles with PVC grips. Made of stainless steel. Measures 5¾" long.

Description	Item#	Each
Chain-Nose	180-0382	\$18.65

B. Wolf™ Groovy Looping Pliers

Triple-grooved jaws allow you to repeat three exact sizes of loops when wire wrapping, making earring loops and jump rings. Feature durable stainless steel box-joint construction with dual leaf springs and ergonomic handles with PVC grips. Available with or without grooves; Pliers without grooves are more traditional. Measures 5" long.

Description	Item#	Each
B. Looping with grooves	180-0380	\$18.65
Looping without grooves	180-0381	15.95

C. Loop Opening Pliers

Reverse-action pliers for opening loops, rings and more. Feature yellow nonslip grips. Measures 6¼" long.

Description	Item#	EACH Prices	
		1-2	3+
Loop Opening	180-0354	\$13.50	\$12.15

D. Loop Closing Pliers

Feature smooth shaped jaws for closing loops, jump rings, bracelet links and more without distorting or marring, durable box-joint construction and PVC grips. Measures 4½" long.

Description	Item#	EACH Prices	
		1-2	3+
Loop Closing	180-0011	\$15.65	\$14.09

E. Wire Twisting Pliers

Twists wire up to .060-gauge with simple one-pull action. Produces durable strands that won't unravel. Hardened and tempered. Measures 9" long.

Description	Item#	Each
Wire Twisting Pliers	180-4095	\$22.95

F. Clip Spring Removing Pliers

Use for adjusting the length of Seiko style watch bands. The flat jaw rests atop the link, and the pointed tip fits under the clip spring. Gently squeeze the handles, and the clip spring pops up, ready for easy removal. Measure 5½" long.

Description	Item#	Each
Clip Spring Removing Pliers	820-9069	\$9.45

G. Hole Punching Pliers

Punch precise 1.5mm holes in leather watchbands. Feature return spring for smooth action and comfort handles for secure grip. Made of the finest steel for durability. Measure 5¾" long.

Description	Item#	Each
Hole Punching Pliers	820-9074	\$10.95

Xuron Micro-Shear® Flush Cutters and Pliers

Micro-Shear Flush Cutters feature a patented design that keeps blades sharper longer than conventional nippers. Blade edges bypass each other in a shearing motion rather than striking, resulting in clean square cuts with no spikes. Blades stay sharper and last much longer than conventional nippers

because there is no edge-to-edge impact. Greatly reduce mechanical shock delivered to components and require roughly 50% less effort to cut wire than conventional compression-type wire cutters. Have ergonomically shaped, non-slip Xuro-Rubber comfort grips. Made in USA.

G. Wrap-and-Tap Ring Forming Pliers

Use these heavy-duty stainless steel pliers to speed up ring and shank forming: just wrap wire or ring stock around the barrel-shaped solid steel jaw, then gently tap against a mandrel; the PVC-covered small jaw prevents marring of hollow rings and rings with one-sided designs. Form perfect rings, half-shanks and quarter-shanks from stock up to 2mm thick. Have lap joint and smooth, nonslip PVC grips. Measures 6" long. Imported.

Description	Item#	Each
14mm Barrel Pliers	180-0160	\$19.50

H. Multi-Size Wire Looping Pliers

Our versatile Multi-Size Wire Looping Pliers can make a variety of bails and loops in 6 sizes: 2.4, 3.4, 4.4, 6.4, 8.35 and 9.35mm.

These high-quality pliers are made of stainless steel with double leaf springs and box joint for stability.

Measures 6" overall length with 1-1/4" long jaws. Imported.

Description	Item#	Each
Multi-Size Wire Looping Pliers	180-0036	\$17.95

A. Bergeon Heavy-Duty Cutter – Cuts gold sprues up to 3mm

Top-quality cutters with special linkage design that multiples hand pressure many times to provide full, clean cuts. Helps reduce hand fatigue from constant cutting. Features hardened steel jaws with 7/8" (22mm) long cutting edges, extra-long handles for additional leverage and locking system for protection of cutting edges. Pointed ends allow easy access to tight areas. Cuts gold and soft wire up to 3mm thick. Made in Switzerland.

Description	Length	Item#	Each
Side Cutter	10"	181-4075	\$179.00

B. Compound Cutter – Cuts gold sprues up to 3mm

This heavy-duty tool cuts gold sprues and soft wire up to 3mm thick. Features compound joint for cutting with minimal effort and insulated plastic grips. Measures 7 1/4" long with 7/16" long jaws. Made in Germany.

B. Niles Pneumatic Sprue Cutters

Heavy-duty air-powered tools for cutting castings from sprues. Feature tapered blades that make it easy to get in between closely spaced castings. Eliminate hand and arm fatigue and increase production. Can be operated by hand when not on stand. Each includes one pair of blades, stand, foot pedal, air hose and hose connectors. Air compressor requirements: 60-85 PSI, 0.8 CFM. Made in Japan.

Specifications:	Model 25	Model 35

A. Xuron 9180NS HD Scissors/Shear

A heavy-duty pair of scissors (Non serrated blade) - excellent for jewelers and metalsmiths for cutting thin sheets of soft metal or lead up to 0.030"/20 ga. (0.8mm) thick. Also cuts jump rings leaving a flat end on both sides of the wire ring. Manufactured from heat-treated high carbon steel, this pair of scissors is durable and strong. Designed for left or right handed use, the built-in return spring always brings the blades back to the open position. Jaw size: 19mm x 10mm. Overall Length: 6"

Description	Item#	Each
Xuron 9180NS HD Scissors/Shear	181-0218	\$22.15

A

B, C Lightweight Metal Snips

For cutting templates and patterns from medium-hard metal sheet up to B&S 20 or from soft sheet up to B&S 16. Available with either straight blades for making straight cuts or curved blades for cutting circular shapes. Also choose between looped and plain handles. Measure 7" long with 1½" long blades. Made in Germany.

Description	Item#	Each
B. Straight Snips with Looped Handles	819-0150	\$16.50
Straight Snips with Plain Handles	819-0100	16.50
Curved Snips with Looped Handles	819-0200	16.50

F

F. Crown Scissors

Stainless steel scissors with small (1" long) blades and large looped handles. Can be used on soft wire and very light metals. Great for cutting around bezels. Measure 4½" long.

Description	Item#	Each
Crown Scissors	819-0115	\$4.20

G

G. Short-Blade Scissors

Feature small (1" long), sharp blades with fine points for easy cutting in the tightest spaces. Excellent for cutting thread, ribbon and bead cord. Measure 3½" long. Stainless Steel.

Description	Item#	Each
Short-Blade Scissors	819-0125	\$3.35

H. Solder Cutting Pliers

These special pliers can be used to consistently cut both sheet and wire solder. Sheet is cut in 1/16" (1.6 mm) squares and wire, up to 18-gauge (1.02 mm), in 1/16" lengths. Cut is consistent time after time. Measures 5½" overall length with plastic comfort grips.

Description	Item#	Each
Solder Cutting Pliers	180-0279	\$11.50

H

A-C Goldwashers
Precious metal recovery systems with automatic filters.

These patented automatic hand-wash sinks recover precious metal from your workshop's soapy water. Feature inexpensive, corrosion-resistant 25 micron cartridge filters, which can be easily replaced and burned. Use powerful 500W motors to pump water through separation compartments at an impressive rate of 30 liters per minute—much faster than other models on the market. Have perfectly watertight covered tanks, which eliminate liquid stagnation and all its accompanying odors. Made of stainless steel and corrosion-resistant material. Include chrome-plated taps with separate handles for hot and cold water and indicator gauges for filter replacement. Made in Italy.

Specifications:

Electrical: 110V, 5A, 1 Ph, 500W, 60Hz
 (220V, 50/60Hz available)
 Cartridge Filter 25 micron

A. MAX 30 Multi-Function Finishing Machine
Variable-speed unit for wet and dry grinding and polishing!

Mix and match wheels, belts and discs on your MAX 30 finishing machine, and run them wet or dry without any mess or time-consuming tool changes. MAX 30 is 31½" in width and can hold six different abrasives. Just position them in the progressive order that suits your grinding and polishing requirements, then proceed from start to finish, spending less time and effort. MAX 30 can accommodate up to and including 6" wheels. MAX 30 is ideal for most jewelry applications. Features digital control for running abrasive products at speeds conducive to maximum performance and life, durable stainless steel cabinet with front-entry design for easy belt maintenance, 4-gallon recirculating water pump, separate water supply hoses and valves for controlling water flow to each abrasive, clear-view spray reduction shield and four strategically positioned lights for viewing work in progress. Made in Taiwan

See the next page or go to our website for a complete line of wheels and belts specifically developed to get the absolute most out of your MAX unit.

Features

- Smooth digital control for running wheels & belts at speeds conducive to maximum performance and life
- Operating speed range: variable speed from 500 to 3,600rpm
- Digital readout of speed in rpms
- Stainless steel cabinet
- 2 internal fluorescent lights with 2 LED lights for viewing work in progress

Specifications

Electrical: 240V, 50/60Hz
 Motor: 1 HP
 Dimensions: 31½"W x 25½"D x 20¾"H
 Variable speed control 500-3,600rpm

B. MINI MAX Combo Grinder/Polisher
Variable speed with inside/outside polishing

The Mini Max Combo is ideal for wet or dry polishing applications! The left side of the machine allows for up to (3) drums/wheels (1" thickness) or (6) 3M bristle discs that when run wet increases performance and profit by means of precious metal reclamation. The right side of the unit includes a buffing station to handle the grinding, blending and polishing of the inside of rings. A must for any small shop, the Mini Max Combo allows the user to mix and match wheels, belts and the specialty inside ring buffs. Small foot print, variable speed motor, water system and LED lights for illuminating the workspace. This model is ideal for use with RA/MX polishing wheels, 3M bristle discs and straight/tapered inside ring polishers (Made out of MX material - see page 94). Accommodates up to a 4" wheel/drum/disc. Made in Taiwan

Specifications

Electrical: 110V, 60Hz
 Motor: 1/2 HP

Expander Drum 4"	3,600rpm	845-3065	\$49.95

A

A. Gesswein/DCE Vokes Dust Collector #68

The finest in the industry. Provides better suction with less noise.

Equipped with a triple inlet hopper. A quick-release sealer gear provides an airtight seal between the hopper and the dust container. Filter bags are rigidly separated to prevent blockage. The automatic shaker vigorously cleans the filter bags for approximately 60 seconds every time the fan is switched off. Supplied with filter assembly and transition inlet. Backed by a full two-year warranty.

Features:

- Shakers for filter assembly activate automatically every time unit is switched off, keeping filters cleaner so they last longer.
- Fully electronic controller (switch box).
- Wide, flush-fitting front panels for fast, easy access to fan and filter chambers.
- Multi-pad filter assembly provides maximum fabric area for optimal filtration.
- High-quality filter fabric.
- One-piece multiple filter bag system minimizes the number of seals needed between the fabric and frame.
- Flexible wire mesh pad inserts ensure maximum effective use of fabric area.
- Airtight design for maximum efficiency.
- Built-in silencer reduces noise to level well within OSHA specifications: 71 dBA.
- A choice of three inlet positions for convenient location of unit in relation to workstations and for best use of available space.

*Prices FOB Kentucky. Additional charges for other voltages and for export crating.
 ** Ships flat. Must have dock at your location. Can not use a lift gate, due to length when flat. Double check any turns that need to be made inside your facility.

If you are looking for a dust collection system that we are not showing in our catalog, please contact us with your requirements. We will work with you to make sure you have what you need.

A-D Quatro Velocity Dust Collectors

These professional units collect 99.97% of all compound dust and precious metal particulate down to submicron levels. Ideal for grinding and polishing applications. Prefilter (which prolongs filter cartridge life 2–4 years) and state-of-the-art cartridge filter ensure return air is absolutely clean. Built-in collection tray captures your precious metal dust and lets you reclaim it without removing the cartridge filter.

Backed by a one-year manufacturer's warranty. CSA and CE approved. Made in Canada. Both the 1-Port and the 2-Port can be shipped UPS.

Features:

- Unique sub-micron dust collection filtration down to .03 microns. (Category C: 99.97% dust extraction) recirculates clean air back into the workplace eliminating the need for outside ventilation.
- Inlet ports can be positioned on top or side of unit.
- Optional on/off foot switch and silencer (reduces sound 10-15%, easily attaches to unit without tools) also available.

E Quatro Multi-Station Power 6 Dust Collector

The high quality Quatro Multi—Station "Power 6" Dust Collector (6 X 1.5" Inlets) is a must for any facility needing one powerful dust collector for up to 6 work stations. Its certified HEPA filtration and high airflow brushless motor works efficiently to capture 99.97% of the dust/submicron particulates while offering "clean air" surroundings and quiet operation (59dBA). The Power 6 is ideal for all grinding and polishing applications at your bench while offering a solution for dust collection and clean air to multiple (up to 6) workstations/benches. Includes a 50 foot 1.5" hose. One-year warranty. 230V, 10A, 1Ph, 50/60Hz. 22"W x 25"D x 39"H. 200 lbs. Made in Canada.

Features:

- Allergy-Safe, high capacity sealable bag filters allow you to safely capture and contain large amounts of debris. Can reclaim your dust and particles for refining. 6 bag filters are required (854-2189) and 2 HEPA filters (854-2079).
- HEPA Filter, 99.97% efficiency on submicron particles
- Two brushless 1HP motors deliver more airflow and greater suction, 900CFM
- Intelligent controls provide constant monitoring and maintenance alerts.

Description	Item#	Each
Quatro Multi-Station Power 6 Dust Collector 	854-1402	\$3,495.00

A-C Quatro CollectAll Dust Collectors

Available in two motor options. The #854-2179 uses a 1.5 HP high-speed brushless turbine motor to produce 600CFM of airflow, providing long continuous use without the need to replace motor brushes. The #854-2187 uses two quieter running 1 HP Infinity hybrid motors to produce 450CFM of airflow and will provide 2,000-3,000 hours of use before needing motor replacement.

Both feature a three-stage filtration system that captures fumes and particulate down to 0.3 micron: bag filter captures large particles from grinding and polishing; media filter captures rhodium and soldering fumes; HEPA filter captures the smallest particulate down to submicron levels. Returns 99.97% clean air to your shop, making outside ventilation unnecessary. Perfect for small shops, malls and other places where noise can pose a problem. Includes 12' of 3" dia. flex hose and hose clamps. Backed by a one-year manufacturer's warranty. Made in Canada.

Specifications:

Inlets: Two 3" dia. inlets in top
 Airflow: (854-2179, 600 CFM, 854-2187, 450 CFM)
 Noise Level: (854-2179, 58dBA, 854-2187, 55dBA)
 Electrical: 120V, 12A, 1 Ph, 60Hz
 Dimensions, Net Wt.: 17"W x 14"D x 26"H, 75 lbs.

A. Quatro Gold Vault Extra

The affordable Gold Vault Series of Dust Collectors by Quatro has evolved to a new level! With safety always being a concern in today's workplace, Quatro has gone a step further and created an "All-In-One" unit to handle both dust debris/particles and odor while still capturing your precious metals.

The Gold Vault Extra comes in two variations: Standard powerful turbine motor that is quiet running, or the model supplied with a long lasting Infinity motor. Infinity motor model costs more but motor brushes will last 4-5 times longer than the standard motor. Both variations still carry the same small footprint for tight spaces as previous Gold Vault models. The high speed turbine style motor allows for fast efficient debris removal and the new filter system ensures 100% capture of ALL precious metals. New filter system that accommodates both dust and odor, consists of disposable filter bags followed by Odor and HEPA filters. A true All-In-One system, will prove to be quiet (49dBA) and effective with variable speed control, and includes a "T" connector and two 6' hoses for two-station use.

Optional on/off hand switch available (854-1368) or on/off foot pedal also available (854-1369). Use your Gold Vault with your 3" Diameter Hoses/Hoods by purchasing a 1½" to 3" adapter (854-1519). Original Gold Vault units can be retrofitted to accept the new filter systems (854-1545). Backed by a one-year manufacturer's warranty. Made in Canada.

Specifications (Standard and Infinity):

- Inlets: One 1½" dia. inlet in top Suction Motor: 1 HP
- Dimensions: 9"W x 9"D x 19"H Airflow: 150 CFM
- Electrical: 120V, 7A, 1 Ph, 60Hz Net Weight: 28 lbs.

Description	Item#	Each

Quatro Gold Vault Extra Infinity	854-1541	720.00
Replacement HEPA Filter	854-1543	49.00
Replacement Odor Filter	854-1544	35.00
On/Off Hand Switch	854-1368	48.00
On/Off Foot Pedal	854-1369	49.95
1.5" to 3" Hose Adapter	854-1519	13.00

B. Quatro Basic

With this tiny unit, you don't have to sacrifice air quality or recovery capability even if your space is limited. Great for grinding, polishing, engraving and much more. Ideal for tight spaces. High-speed turbine for fast collection and replaceable bag filter.

Includes 6' of 1½" diameter hose. Can be used with miniature finishers with 1½" diameter outlets. Use with 3" hoods and hoses by purchasing the optional 1.5" to 3" adapter (854-1519 see below). One-year manufacturer's warranty. Made in Canada.

Specifications:

- Electrical: 120V, 7A, 1 Ph, 60Hz Suction Motor: 1 HP
- Dimensions: 7"W x 9¾"H Airflow: 130-150 CFM
(11"H to top of inlet) x 16"D

C. Quatro Hose Adapter

Heavy duty plastic adapter fits 2½" hose and widens to 3". Use to attach any dust collector with 1½" inlet (such as Quatro Basic and Gold Vault) to a 3" hose or hood opening.

Description	Item#	Each
Quatro Hose Adapter (1.5" to 3")	854-1519	\$13.00

Face shield on stand

A

A. MicroVac III Under-Bench Dust Collector

The sophisticated, powerful MicroVac III provides quiet, efficient dust collection at your bench. Extracts 99.99% of dust from the air. Positioned vertically in an easily accessible door, a bag filter with barrier mat allows dust to settle to the bottom to maintain suction and extend filter life. An extra-fine cartridge filter captures tiniest dust particles.

Features two-stage turbine with muffler that offers enough power to collect dust from two stations at once, control knob for fully adjustable suction and auxiliary outlet that provides the option to operate both your MicroVac III and flex shaft or micromotor at the flip of one switch (manual switch allows override).

Sold with 6'L x 1 1/2" dia. hose only or 6' hose, safety-glass face shield on stand and magnetic handrest. Includes mounting plate and all hardware for optional under-bench attachment and set of filters. Has 1 1/2" dia. inlet in back. Noise level: 52-61 dBA. Electrical: 120V, 60Hz. Measures 10 1/2"W x 14 1/2"D x 15"H. Backed by a one-year warranty. CE approved. Made in Germany.

B

B. Foredom® Dust Collector

Whisper quiet at 52 dBA with powerful suction at 115 CFM. The cyclone with polycarbonate collection chamber pre-filters 99% of all debris and HEPA filter eliminates 99.98% of debris up to 0.3micron. It is a stand-alone unit for collecting dust from grinding, polishing, deburring and sanding wood, metal, die stone, plaster and many other materials. Use when working with dry materials ONLY. 2 Year Limited Manufacturer's Warranty.

Includes: 2 HEPA filters with MERV 16 rating 5' flexible 2 1/4" diameter vacuum hose. Remote on/off switch with 9' cable. Remote Connector for use with Foredom Lighted Work Chamber (850-0645, see page 402), Single station unit with casters for easy portability. 6' power cord. Made in Taiwan.

Specifications:

Weight 30 1/2 lb
 15 1/4"L x 15 1/4"W x 19 1/2"H
 Cyclone Height 16 1/2", Width 7 1/2"

A-E Quatro SPU Polishing and Dust Collecting Units

These units use 3-stage filtration systems to capture all your precious metal dust, not just a portion of it. Recover more metal for refining and keep your workplace cleaner and healthier than ever before. Choose from Two-Station and Junior Deluxe models.

An excellent choice for many large shops, the Two-Station SPU units are available with Quatro 1/2 HP two-speed double-spindle polishing motor and two tapered spindles in standard or high volume versions OR with 2 polishing motors and 2 hoods OR one polishing motor and one hood along with a split lapper and corresponding split lapper hood.

An ideal fit for small shops, the Junior Deluxe SPU comes with Quatro 1/2 HP two-speed single-spindle polishing motor and tapered spindle. Includes lighted Clearview hood, prefilter, bag filters and HEPA filter.

Clearview hoods fully enclose buff areas, trapping precious metal dust

inside. Energy-efficient, LED, low-heat lights in hoods use much less power than incandescent lights and keep your work area much brighter and cooler. Affordable, easy-to-change prefilters under the hoods collect large particles, and subsequent filters capture tiny particles (as small as 0.3 micron with HEPA filter), after which clean air is recirculated back into the room. Backed by a one-year manufacturer's warranty. Made in Canada.

Features:

- Advanced 3-stage filtration systems and powerful suction motors for maximum metal dust recovery.
- Strategically placed inlet locations right below motor spindles for optimal intake.
- Office-friendly whisper-quiet operation.
- Optional on/off foot pedal for on-the-fly polishing.

BEST BUILT
Jewelry Equipment

A. BESTBUILT Polishing and Dust Collecting Unit
For improved dust recovery and workplace cleanliness!

This completely enclosed stand-alone polishing system utilize a 1/2 HP suction motor in an almost completely sealed work area to capture virtually all your precious metal dust.

Easy to change two-stage filtration system teams a tightly woven cotton bag to collect large precious metal particles and dust with a reusable secondary pleated filter that collects particulate as small as 0.05 micron.

This unit is designed for the retail environment combining sleek modern design with function. Powerful 3/4 HP polishing motor has more than enough torque for any job. For buffs up to 8" in diameter. Made in South Korea.

Features:

- Sturdy 12 gauge steel construction
- Shatter-resistant tempered glass access doors—won't scratch or dull like plastics can—easy to clean
- Two-Stations
- Cool fluorescent light offers a great view of work in progress
- Mounted on wheels for maneuverability
- Shelf conveniently holds supplies

Specifications:

Electrical:	110V, 20A, 60 Hz
Suction Motor:	1/2 HP
Airflow:	550 CFM
Polishing Motor:	3/4 HP, double-spindle, 3450rpm
Dimensions:	Shaft Height 6½"
(W x D x H):	37" x 22" x 52"
Ship wt:	240 lbs.

	Item#	Each
A. BestBuilt Polishing System	854-1601	\$2,150.00
Pleated Replacement Filter	854-1608	99.95
Cotton & Filter Bags, Replacements	854-1611	35.00

B. The Accumulator™

Collects 90–95% of all precious metal dust particles!

A problem-solving prefilter for your current dust collection system. Protects workers and equipment from harm, collecting dust and precious metal before they reach the dust collector. How it works: (1) air with dust and debris enters the swirling vortex inside the Accumulator; (2) dust and debris separate out of air and fall into Accumulator bowl; (3) cleansed air, 95% free of dust and debris, flows out of the Accumulator and into your dust collector.

Installs between your existing dust collector and polishing stations. Adapts easily with PVC fittings and can be mounted anywhere along the line. Creates no noticeable drop in suction. Made of durable polyethylene. Choose from small (for 1 station), medium (for 1–2 stations) and large (for 1–4 stations) styles. Made in USA.

Style	Size (L x W x H)*	Hose Inlets**	Item#	Each
Small	9" x 4½" x 13¾"	1½"	854-0995	\$145.00
D. Medium	11" x 6" x 24"	2½", 3"	854-1000	159.00
Large	13½" x 8" x 30"	4"	854-1005	265.00

*Allow 2" extra height for cup removal. **Adapters available for other hose sizes.

Polishing Safety Measures

- Many polishing compounds contain respirable silica or other hazardous ingredients. Be sure to use a dust collector to pull all polishing dust away from your breathing zone, and wear a properly fitted NIOSH respirator rated for the specific dust or chemicals with which you are working.
- Any grinding operation will remove small amounts of metal from the workpiece. To protect your eyes from flying debris, always wear safety goggles or similar eye protection.
- Tie back loose hair and clothing to prevent entanglement in the polishing motor or spindle.
- Firmly twist the buff onto the tapered spindle before turning on the motor, and keep the buff centered and straight to ensure true running. With the spindle correctly installed, turning force of the motor will keep the buff safely mounted during grinding and polishing.
- Always use the lower quarter of the buff to control the action and to prevent the workpiece from being pulled from your grip. Never entwine your fingers with the workpiece; instead hold it in a manner that will prevent your fingers from being harmed should it be pulled from your grip.

A-B ARBE Benchtop Polisher/Dust Collector

Features suction motor with squirrel-cage turbine, 18-gauge steel construction for longevity, hinged front that tilts up for polishing large pieces and 1/2" lip for storing buffs and compounds. Holds buffs up to 6" in diameter, as well as long ring buffs. Includes replaceable fiberglass filter and double work light (60W bulbs not included). Available with or without (854-1262 sealed or 854-1263 open) polishing motor and tapered spindles (see pp. 400-401 for details on the motors). Backed by a one-year warranty. Made in USA.

A. Foredom® Bench Lathe – 1/6 HP; 500–7,000rpm

The high-torque permanent-magnet motor provides ample power for grinding and polishing tasks. Features variable speed control, permanently lubricated ball bearings, fully sealed motor housing, cast-iron base and power light. Includes two tapered spindles for buffs up to 4" diameter.

Available with spindles only (850-0610) or consider our 850-0619 Lathe and Accessory Set which includes lathe with tapered spindles, collet holder with 3/32", 1/8", and 1/4" collets and wheel mandrel.

Specifications:

- 1/6 HP, high torque motor
- 115 Volt, 2A, 50/60 Hz
- 125 Watts (continuous rating)
- Motor shaft diameter: 5/16"
- Shaft height: 3 3/4"
- Height: 5 1/8"
- Width: 13" between spindles
- 6"W x 5"D base
- Weight: 7.5 lbs
- CSA Certified
- One-Year Warranty

D. Foredom® Bench Lathe with Filter Hood

The portable dust collector for your bench motor!

Same Foredom Bench Lathe and spindles only with one Filter Hood. The Filter Hood is a compact, powerful unit which collects particles from grinding and polishing. Offers strong suction for collecting both dust and precious metal. Features a variable-speed motor with voltage selector switch, removable watertight metal tray, LED gooseneck lamp and acrylic safety shield. Includes three replaceable filters (each measures 5 13/16" x 5 7/8" x 1/3" thick). Replacement dust filters are available in a convenient 5 pack (850-0641). These filters remove coarse, large dust particles whereas the replacement charcoal filters, also available in a 5 pack (850-0643) removes small, fine intermediate particles. Electrical: 110/220V. Measures 6"W x 12 3/4"D x 7 1/2"H. One-year warranty. CE approved.

A,B Durston Euro Style Dust Collectors

Durston's high-tech Euro Dust Collectors are a must for any small shop looking for a simple but easy way to collect dust particles and debris caused by polishing compounds.

Both models (Single Spindle & Double Spindle) incorporate the correct system of fans for dust/particle collection while maintaining quiet and vibration free operation. Unlike other models on the market, these models run quietly as the suction motors are built in and sealed for maximum performance and no overheating.

Both models include fluorescent lighting for viewing your work and can accommodate up to an 8" buff. Built to last and made in the United Kingdom, both models are constructed from 1.5mm (15 gauge) steel for durability and longevity which Durston has become known for with all their equipment. Filters are easily removed from the side of these units not to take away valuable space and storage. Made in the United Kingdom.

Polishing Safety Measures

- Many polishing compounds contain respirable silica or other hazardous ingredients. Be sure to use a dust collector to pull all polishing dust away from your breathing zone, and wear a properly fitted NIOSH respirator rated for the specific dust or chemicals with which you are working.
- Any grinding operation will remove small amounts of metal from the workpiece. To protect your eyes from flying debris, always wear safety goggles or similar eye protection.
- Tie back loose hair and clothing to prevent entanglement in the polishing motor or spindle.
- Firmly twist the buff onto the tapered spindle before turning on the motor, and keep the buff centered and straight to ensure true running. With the spindle correctly installed, turning force of the motor will keep the buff safely mounted during grinding and polishing.
- Always use the lower quarter of the buff to control the action and to prevent the workpiece from being pulled from your grip. Never entwine your fingers with the workpiece; instead hold it in a manner that will prevent your fingers from being harmed should it be pulled from your grip.

BALDOR • RELIANCE

Motors built to withstand the most demanding workloads. Feature sealed casings to keep internal parts free of dust, prelubricated ball bearings that last for the life of the motor and on/off switch. Backed by a three-year manufacturer's warranty. Can be taken to one of over 3,000 service centers in the USA for quick repairs. UL listed. Made in USA.

A

A. Baldor-Reliance® #75 Sealed Motor – 3/4 HP; 3,600rpm

Very strong motor for buffs up to 8" in diameter. Designed for continuous operation. Has threaded tapered shaft. Supplied with threaded tapered spindle. Motor height: 10 1/2". Width to spindle end: 15 7/8". Shaft height: 7 1/8". Ship. wt: 46 lbs.

Model	Electrical	Base (W x D)	Item#	Each

Replacement LED Light with Bracket	854-2082	99.00

B. Quatro Lapper Hood

Helps contain the polishing dust and collect precious metal dust and scraps Powder coated metal hood has two side capture ports and one additional adjustable capture port to be pointed near the lap for maximum effect. Complete with LED lighting. 120V. Lapping machine sold separately. Made in Canada.

Description	Dimensions	Ship Wt. (lbs.)	Item#	Each
Quatro Lapper Hood	17½"W x 18½"D x 22"H	25	854-2072	\$329.00

C. Freedom Lighted Work Chamber

Compact, semi-enclosed unit is designed for working with small workpieces that fit in your hand. Features a compressed air nozzle with variable air flow up to 90 PSI or 6 Bars. The air nozzle pivots to funnel dust and debris away from the workpiece, through the back of the chamber. The unit has an inlet for connecting 4mm compressed air tubing and comes with a 4mm to 6mm adapter. The vacuum port on the back fits a 2¼" diameter hose for connection to a dust collector, shop vacuum or other dust collection system. Bright LED light tilts for focus. Complete with 2.5X magnifier with a 10X insert. Two hinged, polycarbonate shields a removable watertight tray and two padded arm rests for comfort. 2-Year manufacturers warranty. Made in Taiwan.

Description	Item#	Each
Lighted Work Chamber	850-0645	\$339.15

See
Jumbo Work Chamber
on page 458.

D, E Incandescent Jeweler's Hood

Powder-coated heavy-gauge metal hood with two incandescent light fixtures and 3" screened rear inlet. Requires two 60W incandescent bulbs. Works on either side of motor. Adjustable shield protects the user from flying particles. Fits on any jeweler's hood. Meets OSHA requirements. Made of clear acrylic. Made in USA.

Description	Dimensions	Item#	Each
D. Incandescent Jeweler's Hood	12¾"W x 16"D x 15"	854-3104	\$99.50
E. Jeweler's Hood Shield	6"W x 9"H x 1/8"	854-3135	26.95

F, G Quatro Blast Gate & Hose Adapter

Used for multi-station collection. Shut off suction at one station to increase suction at others. Heavy duty plastic adapter fits 2½" hose and widens to 3". Use to attach any dust collector with 1½" inlet (such as Quatro Basic and Gold Vault) to a 3" hose or hood opening.

Description	Item#	Each
F. Blast Gate, 3"	854-1518	\$47.00
G. Quatro Hose Adapter (1.5" to 3")	854-1519	13.00

A. Quatro Air Wedge Collection Port

A versatile collection port for recovering precious metal dust right at your bench. Pulls dust and contaminants away from your face before you breathe them in. Perforated base ensures particles stay within the work area. Clear plastic shield lifts off for easy access to tray below. Flange can be positioned under or behind unit for connection to hose leading to dust collector. Blast gate lets you cut off airflow when unit is not in use. Measures 12"W x 10"D x 10"H with 3" diameter inlet. Made in Canada.

Description	Item#	Each
Air Wedge Collection Port	854-1386	\$186.00

B. Quatro Airport Collection Port

Allows you to recover precious metal dust right at your bench. Features ergonomic cushioned design. Measures 12"W x 9 1/2"D x 3 1/4"H with 3" diameter inlet. Made in Canada.

Description	Item#	Each
Airport Collection Port	854-1516	\$135.00

C. Quatro Bench Pin

Keeping your work bench clean and reclaiming precious metal dust/scraps just got a whole lot easier! Standard bench pin equipped with a standard 1 1/2" inlet to hook up to any dust collector accepting this size (fits Quatro Basic Dust Collector and All Gold Vault Models). While in place on your bench, the mesh screen on top collects your dust and scraps whether you are grinding, polishing, or any other bench work needing removal of dust and scraps, and sends it completely into your dust collector bags for future refining. Made in Canada.

Description	Item#	Each
Quatro Bench Pin	854-1364	\$40.00

D. Quatro Fishmouth Collection Port

Allows you to recover precious metal dust right at your bench. Features powder-coated heavy-duty steel construction. Measures 8"W x 9 1/2"D x 5"H with 3" diameter inlet. Made in Canada.

Description	Item#	Each
Fishmouth Collection Port	854-1517	\$95.00

E. Foredom Fishmouth with Shield

Foredom's Fishmouth with bench pin, curved acrylic shield, and adjustable arm rests is the perfect addition to any bench for dust control and debris removal. It mounts to benches with a GRS style mounting bracket (GRS fixed mounting plate not included 856-0196). The exhaust port accommodates a 2 1/4" hose and comes with an elbow to position your dust collector hose in any direction.

The curved acrylic shield gives a clear view of your work and also helps to keep stray dust from flying at you. The inside of the Fishmouth has a mounting bracket for the supplied Wooden Bench Pin. Made in Taiwan.

Description	Item#	Each
Foredom Fishmouth with Shield	854-2215	\$129.95

F, G Flexible Hose and Hose Clamp

Use our heavy-duty 3" diameter hose to connect dust collection equipment. Features low-profile ribs and smooth interior for maximum suction. Sold by the foot. Secure with hose clamps or duct tape.

Description	Item#	Each
F. Flexible Hose, 1' length	854-3050	\$7.40
G. Hose Clamp	854-3060	4.25

H. Polishing Gizmo

Made of select hardwood. Wrap the chain, bracelet or ring (sizes 3-17) around the Gizmo and hold it to the polishing wheel. Large diameter exposes a greater length of chain, allowing for faster and more thorough polishing. Measures 2 1/2" dia. x 6 1/2"L. Made in Pakistan.

Description	Item#	Each
Polishing Gizmo	812-0360	\$10.95

I, J Wooden Drill Sticks

Handy for holding rings while drilling or polishing. Made in India.

A. Split Lapping Machine

Features 1/2 HP ball-bearing motor mounted at a 45° angle for great visibility. Lets you see work surface. Includes heavy-gauge steel hood with 3" inlets for your dust collector, tapered spindle and adjustable light. Measures 15"W x 18"D x 20"H. Electrical: 110V, 6.2A, 60Hz (220V, 50Hz available). Max. operating speed: 3,450rpm. Accepts 6", 7" or 8" split laps (see below and p. 99). To improve visibility of work in progress, mark split lap bevels with black crayon (sold separately). Made in USA.

Description	Ship. Wt.	Item#	Each
A. Split Lapping Machine	46 lbs.	854-1802	\$420.00
B. Optional Black Crayon		810-0425	2.39
Replacement Steel Hood only		854-1805	150.00
Replacement Tapered Spindle		840-5361	29.95

C. Quatro Lapper Hood

Quatro, the name in the industry for the best dust collectors on the market for producing the cleanest air now offers that same quality for your lapping machine. The Quatro Lapping Hood helps contain the polishing dust and collect precious metal dust and scraps while mounted on the Quatro Two-Station Dust Collector. Lapping machine sold separately. Made in Canada.

Description	Ship. Wt.	Item#	Each
Quatro Lapper Hood	25 lbs.	854-2072	\$329.00

D-G Dedeco® Silicone Split Laps

Designed to replace felt laps and rouge, these split laps provide a superior finish on gold and other metals. Each wheel is impregnated with silicon-carbide abrasive. Available in 4 color-coded grits. Max operating speed: 3,500rpm. All are 6" diameter with 1/2" arbor hole.

Color	Grit	Application	Item#	Each
D. White	120 (C)	For removing deep scratches	145-0180	\$63.50
E. Black	180 (M)	For smoothing and removing light scratches	145-0181	63.50
F. Blue	220 (F)	For high-luster polishing	145-0182	63.50
G. Pink	400 (XF)	For super high-luster polishing and final finish	145-0183	63.50

H-K Gesswein/Paramount® Felt Split Laps

Made of pure wool felt that has been steamed to shrink and thicken, then pounded into specific hardnesses. Feature consistent density throughout for identical polishing results from wheel to wheel, even wear and three to five times the life of conventional split laps. All have pinhole centers. Max. operating speed: 3,450rpm. Made in USA.

A. Quatro SolderPure Fume and Particulate Extractor

Ideal for brazing, dedrossing, electroforming, electroplating and soldering applications. Removes acid activator, electrocleaner, rhodium, solder, solvent and wax fumes from the air before you breathe them (not suitable for cyanide).

Features a four-stage filtration system that captures fumes and particulate down to 0.3 micron: prefilter captures large particles to extend life of three subsequent filters; high-capacity dust filter captures small particulate; advanced refillable media filter formulated for specific applications captures fumes; HEPA filter captures smallest particulate down to submicron levels.

Returns 99.97% clean air to your workplace, making outside ventilation unnecessary. Includes capture hood with flex arm, which can be flexed and rotated 360° to accommodate any soldering or plating layout. Includes table bracket and 8' flex hose that can be cut to desired length for remote location as well as casters for mobility. Installs quickly and easily. Backed by a one-year manufacturer's warranty. Made in Canada.

Specifications:

Airflow: 125 CFM

B, C Quatro Ductless Fume Hoods – For those without access to outside ductwork.

Units feature a two-stage filtration system that captures fumes, then recirculates clean air back into the room to save on heating and AC costs. Burnout fume hood installs right on wall behind burnout furnace. Rhodium fume hood installs directly over plating area. Each has a metal-frame filter container that holds an activated charcoal media mixture specifically formulated for the respective application. Backed by a one-year manufacturer's warranty. Made in Canada.

A. Kagan Wedding Ring Sizer

One of the finest sizers available. Enlarges and reduces on the downstroke, requiring less effort than other models. Features eight-spline mandrel for enlarging rings up to size 14 and reversible reducer plate with 12 countersunk dies (six on each side) for gently compressing rings to smaller sizes. Can be bolted to bench or used as a portable sizer. Measures 16"L x 18"H. Ship. Wt: 17³/₄ lbs. Made in USA.

Description	Item#	Each
A. Kagan Wedding Ring Sizer	856-0350	\$615.00
Replacement Eight-Spline Mandrel	856-0355	180.00

B. Premium Wedding Ring Sizer

Sizes with almost no effort. Enlarges on the upstroke and reduces on the downstroke. Features six-spline mandrel for enlarging rings up to size 15 and reversible reducer plate with 16 countersunk dies (eight on each side) for gently compressing rings to smaller sizes. Also available without reducer plate for use as an enlarger only. Can be bolted to bench or used as a portable sizer. Ship. Wt: 28 lbs. Made in Italy.

Description	Item#	Each
B. Premium Wedding Ring Sizer	856-0375	\$380.00
Wedding Ring Sizer w/o Reducing Plate	856-0370	300.00
Reducing Plate	856-0376	115.00
Replacement Six-Spline Mandrel	856-0377	148.00

C. Durston Wedding Ring Tools

Both of these heavy duty tools feature an 8 spline mandrel and 16 polished countersunk dies. They ensure exceptionally accurate ring sizing. The countersunk polished steel reducing plates will reduce bands up to 12mm wide. For non-ferrous (gold, silver, platinum and palladium etc.) rings and bands from US size 2 to 14. Includes double sided reducing plate for bands up to 12mm wide.

They both measure 16³/₄" tall with a 6³/₄" by 4³/₄" base which has holes for securing to a bench or worktable (mounting hardware not included).

Made in England.

The Ring Stretcher/Reducer and Bender: Heavy duty cast iron construction with hardened steel shaft will bend up to 4mm thick includes 2 precision hardened and ground dies.

Description	Item#	Each
C. Wedding Ring Stretcher/Reducer and Bender	856-0388	\$445.00

Replacement Bender Blocks	856-0389	120.00

E. Kagan Stone-Set Ring Stretcher

Enlarges stone-set rings using parallel rollers to stretch the shank without disturbing the stone. Includes eight dies for knife-edge, half-round, oval and flat shanks. Also works as a mini rolling mill for making filigree wire. Can be bolted to a workbench. Ship. Wt: 8³/₄ lbs. Made in USA.

Description	Item#	Each
E. Kagan Stone-Set Ring Stretcher	856-0300	\$620.00
Replacement Die Set	856-0360	395.00

A, B PEPETOOLS Super Ring Bending/Forming Set

New and improved with extra heavy-duty posts and dies! The most versatile ring bending set on the market. Makes both round and angled bends. Includes bending unit, seven dies and seven matching mandrels, steel block with screws that can be fastened to bottom of unit for vise mounting and an attractive aluminum powder coated base for easy part selection and storage.

Eccentric base and handle provide high torque, requiring user to exert less effort to bend metal. Supplied with 12, 14, 16, 20 and 22mm round dies and 60° and 90° angled dies. Made in USA.

Use with optional 5 piece die set to shape patterned metal without the scratching and distortion that often occur with standard steel dies. Die set includes 5 wear-resistant, low-friction thermoplastic polymer dies in sizes 12, 14, 16, 20 and 22mm round. Made in USA.

Description	Item#	Each

**F. Inside Wooden Ring Clamp**

Economical wooden clamp for holding rings firmly from the inside so the outside can be worked. Won't mar rings. Shaped for a comfortable grip. Holds ring sizes 5–11. Measures 5¾" long.

Description	Item#	Each
Inside Wooden Ring Clamp	812-0315	\$10.25

Gesswein® Power Ring Cutter

Gesswein has created a ring cutter for emerging high-tech metals such as SK Cobalt BioBlu™ 27 and tungsten carbide. A diamond-plated disc is the secret to cutting these metals, as well as platinum, titanium and stainless steel.

Emergency rooms and medical facilities: please note that an ordinary ring cutter cannot cut these tough metals—they are simply too hard. A diamond-plated disc with motorized drive is truly essential. Such a disc will fit on most ring cutters, but in an emergency time is critical, and a dedicated ring cutter eliminates fumbling with time-consuming retrofits. An instructional video is provided at www.gesswein.com so you can learn safe cutting techniques for these hard metals.

Continued application of water is required while cutting to keep the disc cool, preventing damage from excessive heat. Since the metal is so hard, it cannot be spread, so two cuts are necessary: one on each side of the ring. The diamond handles all the work, so only gentle pressure is required. Power Ring Cutter will remove even the toughest ring in under 4 minutes. Works with most standard power screwdrivers that can accommodate a 1/4" hex bit (optional power screwdriver sold separately). A sturdy cutter arm cradles the rotating blade, preventing harm to the finger.

View instructional video at www.gesswein.com

Features:

- Ring cutter pliers
- Two diamond-plated discs with 1/4" hex drive for power cutting of hard metals
- Steel sawblade with key drive for manual cutting of soft metals
- Lock nut with T-handle
- Water bottle for lubrication during cutting

Description	Item#	Each
A. Power Ring Cutter Set	812-1210	\$94.75

Diamond disc cuts on cobalt, platinum, titanium and stainless steel. Steel blade cuts on gold, silver and other soft metals.

Power Screwdriver **B**

C. Tungsten Ring Cracker – For Ceramic and Tungsten Rings

Ever had a customer come in with a ceramic or tungsten ring that couldn't be removed? Has this concern prevented you from selling these alternative metals? No need to worry, this tool will allow you to crack any ceramic or tungsten ring with no pain to the customer.

Center the Ring Cracker over the ring, tighten the tip (it's not sharp) and turn the knob a few times. These hard metals will crack fairly easily under pressure at a single point. The Ring Cracker is very easy to use. Anybody can assist with the removal of these alternative metals. Includes 2 pairs of safety glasses and illustrated instructions. Shipping Wt: 17 oz.

Description	Item#	Each
Tungsten Ring Cracker	812-1218	\$93.95

C

Ultra Rolling Mills

Combo

High strength housing is precision constructed out of cast-iron. This allows it to weigh less than other available mills (saving shipping costs) while providing exceptional rigidity. The rollers on all the mills are first induction hardened to 65 HRC and then highly polished to a mirror finish for the finest results. Solid brass bushings allow smooth operation and require no lubrication. All parts are manufactured and assembled in the USA. One year limited manufacturer's warranty against defects in material or workmanship applies to all mills.

Mills are offered in three basic configurations: Flat only, Combo which provides half round (elliptical) and square wire as well as flat, and an All Wire only which allows production of half round (elliptical) and square wire as well as round and comfort wire profiles.

All manual models are equipped with a 4:1 reduction gear box, high strength housing and a forged steel handle. Manual mills are available in Flat, Combo and All Wire only (90mm, 110mm, 130mm and 160mm sizes). Suggest using versatile Pepe stand (855-2088) with the smaller, 90mm, 110mm and 130mm, size mills.

All motorized mills come complete with a feed table and guard rails to protect the rollers as well as an emergency stop button for safety. The motor speed can be adjusted and that same control manages the motor fan. Motorized mills can operate in both forward and reverse. The units will feed in wire slowly, then speed up, whether in forward or reverse, providing consistent rolling.

Both the motor and its cooling fan run quietly. Motorized single mills are available in Flat, Combo and All Wire only (130mm or 160mm sizes). Motorized double mills all have one side Flat and the mill on the other side can be another Flat, or a Combo or an All Wire (double mills would both be either 130mm or 160mm sizes).

Compact design with vertically mounted motor, these mills are available in either 120V or 240V. (See gesswein.com for 240V products).

DURSTON
Rolling Mills

Durston Rolling Mills are recognized for their reliability, robust construction, high quality and fine finish. Primarily used by craftsmen involved in gold and silversmithing as well as manufacturing and wherever there is a need for wire shaping, flattening and rolling down. Durston uses state-of-the-art machinery and manufacturing techniques ensuring strict quality control. Made in the United Kingdom.

- Old world craftsmanship combined with modern technology ensures accuracy and a long life but most of all— **A Great Value!**

- Selected mills have extension rollers
- Manual 100mm, 130mm and 150mm mills have a high precision gear box for higher turn efficiency and smooth operation.

Durston Power Combo Mills incorporate safety with quality. Emergency stop button, safety bars both front and rear as well as guards over the extension rollers are safety features designed with the user in mind. All units have cast iron bases, cast iron gearbox with powerful motors and the same one-piece cast iron mill frames. Heavy-duty roller bearings effortlessly run the high quality steel rolls in forward or reverse at variable speeds. Double Combo mills provide a larger work area for flat rolling and more square wire sizes than Single Combo mills but have a larger footprint.

Durston Rolling Mills, Continued

Round Rolling Mills

Finally round wire from a rolling mill! With three mills to choose from, you'll find the one that meets your needs. All three mills include a gear reduction to make it easy to roll consistently smooth round wire along with a small flat area and side roller for four half round sizes.

Simply start with a square (or round) wire and use the mill in the same way as any other manual mill. Square wire will gradually compress to round as it passes through consecutively smaller grooves. Note that a round section will be formed before the rollers are fully closed. If you continue to roll and fully close the rollers, this will create a slightly oval wire.

To avoid flashing, rotate the wire 90 degrees on every pass. If flashing forms, reduce the amount of reduction on each pass.

Round 150

Specifications:

	Round 100	Round 130	Round 150
Gear Ratio:	4 - 1	5 - 1	5 - 1

D, E Thermoplastic Drawplates

These thermoplastic drawplates are used to draw woven wire without marring! Gently reduces chain diameter and produces a uniform diameter. Chains stay flexible. Durable, long lasting and non-marring. Made in USA.

Description	Size	Item#	Each
D. Small	1.5 - 5mm	830-1509	\$14.50
E. Medium	3 - 7.5mm	830-1510	29.00

F. Drawing Tongs

Grips wire firmly for pulling through drawplates.

Description	Item#	Each
8" Drawing Tongs	195-0249	\$23.50
F. 10" Drawing Tongs	195-0250	20.95

 Although no hazardous shipping surcharge applies, these items can only ship via UPS® Ground, no air, FedEx® or US Mail possible. Cannot ship to Alaska, Hawaii or Puerto Rico.

Gesswein® Micro Filing and Polishing Solutions

FMR Mini-Filers and Ultrasonic Handpieces

Micro polishing and deburring hard to reach areas is now made so much easier with our new systems. The FMR handpiece from DIPROFIL® in Sweden is configured to fit either a Flexible Shaft machine with QD or a Micromotor. Choose 0.5mm or 1.0mm stroke length and both handpieces have a built-in tool holder accepting up to 3.6mm diameter. Our Ultrasonic Polishers quickly debur and polish even the smallest areas using ceramic stones or diamond tips.

Reciprocating Heads for Flex Shafts and Micromotors

Quickly attaches to a Foredom QD style flexible shaft unit or a Power Hand micromotor after removing the rotary head. Built in holder accepts up to 3.6mm diameter tools including flat ceramic stones. Designed to work on small surfaces in narrow and confined spaces. Choose either the 0.5mm or 1.0mm stroke length handpiece. Recommended speed is 5,000 to 9,000rpm. Caution — maximum speed is 11,000rpm. Measures 5¼"L x 1" dia. Weighs 5 oz.

Length of Stroke	Item#	Each
A. 0.5mm FMR Mini-Filer for Flex Shaft	850-1923	\$650.00
1.0mm FMR Mini-Filer for Flex Shaft	850-1924	599.00
B. 0.5mm FMR Mini-Filer for Power Hand Micromotor	510-2266	650.00
1.0mm FMR Mini-Filer for Power Hand Micromotor	510-2264	650.00

C. Marathon Micromotor – with FMR Mini-Filer

Combining the FMR Mini-Filer with our new Power Hand M-08X micromotor (1,000-8,000rpm) gives improved control and flexibility for filing, deburring and polishing. Use the convenient dial speed control to set reciprocations from 5,000 to 8,000 strokes per minute. Foot rheostat is optional. Marathon controller features an overload protection cut-off switch, forward/reverse switch, voltage selection (110/220V), and produces 0-30V DC (continuously variable). Accepts our full range of Power Hand 3 and standard micromotor handpieces. Three NSS Ceramic Stones, Round, 3mm x 50mm, 800, 1000 and 1200 grits included. Measures 4½"W x 5¼"D x 3¾"H. Weighs 5.5 lbs. 110/220V, 50/60Hz.

Description	Item#	Each
C. 0.5mm Mini-Filer, Micromotor M-08X, Marathon Controller, 3 Ceramic Stones	510-2967	\$1,148.00
1.0mm Mini-Filer, Micromotor M-08X, Marathon Controller, 3 Ceramic Stones	510-2968	1,148.00
Variable Speed Foot Rheostat TPF-77 (optional)	510-2940	60.00

D. POWER/HAND®3 Controller – with FMR Mini-Filer

This Micro Filing System combines most advanced Power Hand 3 Controller with the FMR Mini-Filer and our new M-08X micromotor (1,000-8,000rpm). It gives improved control and flexibility for filing, deburring and polishing. The convenient dial speed control will set reciprocations to 5,000 to 8,000 strokes per minute and a digital readout shows percentage of speed. A built-in micro computer enables smooth operation and automatic torque control. Load indicator shows when too much force is applied. The self-diagnostic function checks operating conditions and activates a cooling fan if ever needed. Controller accepts two handpieces. Forward/reverse switch. Foot rheostat is optional. Accepts our full range of Power Hand 3 Handpieces as well as our standard types. Three NSS Ceramic Stones, Round, 3mm x 50mm, 800, 1000 and 1200 grits included. Measures 7½" x 7½" x 4½"H, 110V (220V available).

Description	Item#	Each
D. 0.5mm Mini-Filer, Micromotor M-08X, Power Hand 3 Controller, 3 Ceramic Stones	510-3387	\$1,465.00
1.0mm Mini-Filer, Micromotor M-08X, Power Hand 3 Controller, 3 Ceramic Stones	510-3386	1,465.00
Variable Speed Foot Rheostat VC90 (optional)	510-3306	118.00

IMPORTANT: See safety recommendations on page 448

**A, B ULTRAMAX® MF with Ultrasonic Handpiece
FMR Mini-Filer Option**

The very versatile Ultramax MF (Multi Function) Controller is supplied with an Ultrasonic Handpiece for use with Ceramic Stones and other tools for Micro Filing and Polishing. It also accepts the Mini-Filer with M-08X micromotor giving the operator two choices of how to quickly debur, file and polish. The Ultrasonic Handpiece reciprocates at 16,000 to 26,000 cycles per second — incredibly fast, with a minute stroke length of just 4 to 40 microns, all operator controlled. This allows micro polishing even in deep corners and blind holes. The MF Controller's third receptacle is for our optional Brushless Rotary Handpiece (1,000 to 50,000rpm, #500-0224, see p. 462). All of our standard and Power Hand 3 micromotor handpieces (see pages 423, 429-431) connect to the MF. Included are: MF Controller, Ultrasonic Handpiece (with 6mm thread), tool box, handpiece rest, tool changing wrenches, 1mm and 3mm flat clamp and 3mm round tool holders, and on/off foot switch. Measures 6¾"W x 9½"D x 5½"H. Weighs 5.5lbs. 90-240V, 50/60Hz.

Description	Item#	Each
A. ULTRAMAX MF with Ultrasonic Handpiece	500-0220	\$2,495.00
B. 0.5mm Mini-Filer with M-08X Micromotor, 3 Ceramic Stones	510-3308	1,072.00
1.0mm Mini-Filer with M-08X Micromotor, 3 Ceramic Stones	510-3307	1,072.00
Variable Speed Foot Rheostat for Mechanical Handpieces (optional)	500-0221	60.00

See Our Complete Line of Ceramic Stones pages 468-469

C. ULTRAMAX® UM-1200 Ultrasonic Polisher

The most affordable ultrasonic micro polisher for polishing with diamond tools and ceramic stones. The high quality UM-1200 produces 25,000 cycles per second of longitudinal vibration in a small, comfortable handpiece with an invisible minute stroke of 10 to 35 microns from low to high output levels. Maximum output power is 39W.

Includes controller UM-1200, ultrasonic handpiece with 8mm screw thread standard accessory set (two sintered and six plated diamond tools and two ceramic stones), one flat clamp tool holder 1.0mm, two round clamp tool holders 3.0mm, on/off foot switch, handpiece cradle rest, bench jig, wrench and hex key. Measures 7½"W x 5½"D x 3½"H. 90-240V, 50/60Hz. Max. Output 39W.

Description	Item#	Each
ULTRAMAX UM-1200 with Ultrasonic Handpiece	500-1200	\$1,495.00

D. FMR Mini-Filer Holder – For Ceramic Stones, 1mm

Firmly grips flat ceramic stones 1mm thick, steel jaws are 8mm wide. Made in Sweden.

Description	Item#	Each
FMR Holder - 3mm shank	403-1045	\$34.95

E. New Super Stone (NSS) Set – Round Ceramic Stones, 3mm x 50mm

New Super Stone (NSS) offers an improved cutting ability, increased heat resistance, and longer life. Made of long ceramic fibers that will not break even under the most strenuous conditions, the NSS can be used in ultrasonic polishers, reciprocating profilers or by hand.

Description	Item#	Each
Ceramic Stones, Round Set, 3mm x 50mm, 1 each 180, 300, 600, 800, 1200 grit & Holder	355-1103	\$89.00

Gesswein® POWER HAND®3 Multifunctional Micromotor System

Designed with the latest technology in micromotor systems, the Power Hand 3 can handle almost any finishing job. This interchangeable system allows the operator to choose from a selection of motors and heads to create the right tool for a variety of polishing applications. With the quick disconnect feature, the operator can switch heads within seconds.

Power Hand 3 is the third generation of its line and comes with several new features such as: convenient on/off switch on each motor case, higher torque output for heavier grinding, and slim lightweight handpiece cable. The Power Hand 3 controller features a load indicator light to warn operator of excessive pressure, and digital RPM display to indicate exact rotational speed of handpiece. Made in Japan.

A. POWER HAND®3 Controller

Power Hand 3 Controller is designed for one-person use. Has 2 output stations with switch to instantly change power from one handpiece to the other. Speed can be adjusted by the dial rheostat on the face of the unit or by an optional variable speed foot rheostat (see below). Output 3-30V DC. Wgt: 5 1/4 lbs (2.3kg)

Description	Item#	Each
A. PH3 Controller, 115V	510-3300	\$495.00
PH3 Controller, 230V	510-3302	495.00

Load Indicator

8 steps of LED display from green to yellow to red. Display lights up when too much force is being applied. For best results and long life, stay within the green.

Digital Rotation Display

2-digit display for easy adjustment of rotation speed. Dialing in the exact RPM for each tool to ensure optimal performance.

Error Code

Displays an error message for easy trouble shooting due to heat build up, overloading the handpiece, or a defective motor cord.

Self Diagnostic Function

PH3 Controller checks condition of motor and controller for safety reasons. When heating up, the fan inside starts automatically to reduce temperature.

Forward/Reverse button

To control the rotational direction for each motor. LED light indicates rotational direction.

PH2X Handpieces

Our previous Power Hand 2X handpieces with 3 prong plug will connect directly into the controller. RPM display, load indicator, and error code message will not be displayed.

Variable Speed Foot Rheostat (optional)

Now with Auto Cruise feature, it is possible to set a fixed speed with the foot pedal, allowing the operator to free their foot from the pedal.

B, C POWER HAND®3 Rotary Kits

Start with these money saving kits. Includes PH3 Controller and handpiece of your choice. All are 115V units.

Description	Item#	Each
PH3 Controller with 8X Handpiece	510-3390	\$1,175.00
PH3 Controller with 15X Handpiece	510-3391	1,175.00
PH3 Controller with 20X Handpiece	510-3392	1,175.00
PH3 Controller with 30X Handpiece	510-3393	1,175.00
PH3 Controller with 35X Handpiece	510-3394	1,175.00
PH3 Controller with 55X Handpiece	510-3396	1,175.00
C. Variable Speed Foot Rheostat VC90 (optional)	510-3306	118.00

Gesswein® POWER HAND® 3 Rotary Handpieces

Choose from six sturdy, true-running, well-balanced handpieces with powerful 30V DC air-cooled motors. Enhanced motor design increases torque by 20% and improves airflow to keep handpieces cool. They operate with minimal vibration and have flexible power cords for easy reach. All handpieces have a quick-tool-change feature and new on/off switch located

on the motor. All six handpieces are two-piece construction and can accept various Power Hand head attachments. Standard Head is included. Supplied with $\frac{3}{32}$ " and $\frac{1}{8}$ " collets, collet wrenches and replacement motor brushes. Please visit www.gesswein.com for handpiece diagram and parts list. Made in Japan.

A. High-Torque Rotary Handpieces

Designed to handle the toughest jobs. These workhorses have the highest torque rating. Available in 3 different speeds: 8,000, 15,000, and our most popular 30,000rpm. Use for hand grinding, heavy deburring, cutting, polishing and finishing all types of material. Supplied with $\frac{3}{32}$ " and $\frac{1}{8}$ " collets. Weight 9.74 oz.

Description	Speed	Torque	Item#	Each
08X	1,000–8,000rpm	9.8	510-3310	\$750.00
15X	1,000–15,000rpm	8.8	510-3320	750.00
30X	1,000–30,000rpm	6.8	510-3340	750.00

B. Standard Rotary Handpieces

These handpieces are smaller and lighter weight compared to the high-torque handpieces. They fit comfortably in the hand and are well suited for continuous use for general purpose grinding and polishing. Available in 20,000 and 35,000rpm. Supplied with $\frac{3}{32}$ " and $\frac{1}{8}$ " collets. Weight 7.76 oz.

Description	Speed	Torque	Item#	Each
20X	1,000–20,000rpm	6.4	510-3330	\$750.00
35X	1,000–35,000rpm	5.4	510-3350	750.00

C. High Speed Rotary Handpiece

The lightest, fastest and most comfortable of our straight rotary handpieces. This 55,000rpm handpiece is a great choice for tools that perform at high speeds. Use for precision work. Supplied with $\frac{3}{32}$ " and $\frac{1}{8}$ " collets. Weight 6.70 oz.

Description	Speed	Torque	Item#	Each
55X	1,000–55,000rpm	3.6	510-3370	\$750.00

Create your own handpiece!

All Power Hand 3 rotary handpieces are two-part design so heads and motors can be switched to create new combinations to best suit your particular job. Use the system configuration chart to determine what heads and motors can be used together. Note: Lower RPM motors have more available head options, while higher RPM motors are limited to either the Slender Head or Standard Head configurations.

Gesswein® POWER HAND®3 Head Attachments

These Power Hand head attachments will connect to PH3 motors and to the previous version PH2X motors. See System configuration chart on pages 424-425 to select the right head attachment for each motor. Be sure not to exceed the maximum RPM for each head attachment.

A. Standard Head – Provided with all PH3 Rotary Handpieces

This all-purpose rotary head is compatible with all motor assemblies. Supplied with a 3/32" collet; 1/8" and 3mm collets also available (see p. 434).

Description	Max. RPM	Item#	Each
Z-STX	55,000	510-2200	\$325.00

B. Slender Head – For access into deep ribs and holes

Pencil-like design only 3/8" (9.0mm) in diameter at the finger grips gives 1 9/16" (40mm) more reach than a standard rotary head. Ideal for intricate, deep, hard-to-reach cavities and delicate areas. Compatible with all motor assemblies. Supplied with a 1/8" collet; 3/32" and 3mm collets also available (see p. 434).

Description	Max. RPM	Item#	Each
Z-SLX	55,000	510-2220	\$399.00

C. Heavy-Duty Head – For use with 1/4" shanked tools

Use with large tools through 1/4" shank for greater stock removal. Compatible with M-08X, M-15X and M-30X motors. Supplied with a 1/4" collet; 3/32", 1/8" and 6.0mm collets also available (see p. 434).

Description	Max. RPM	Item#	Each
Z-HDX	30,000	510-2230	\$399.00

D. Mini Filer Heads – Reciprocating head

Mini filer heads for lightweight profiling. Slim nose design allows polishing and finishing of narrow, confined spaces. Choose from three stroke lengths. All models hold tools up to 3.5mm diameter (such as Diamond Tips on p. 109). For best results, use with M-08X motor.

Fixed Stroke Length	Max. Strokes /Min.	Item#	Each
0.5mm	12,000	510-2266	\$650.00
1.0mm	12,000	510-2264	650.00
1.5mm	12,000	510-2265	650.00

E. SZX Swing Head – For side to side stroke

This head is identical to that on our SZX Profiler. It gives a unique side-to-side reciprocating action with a stroke that is easily adjustable. It's perfect for polishing base areas in deep cavities, corners and deep slots and helps eliminate rounding of sharp corners. Prevents bottoming out in blind holes. Holds 1.5 to 5mm (3/16") diameter tools. Use on M08X motor assembly only.

Description	Max. Strokes /Min.	Item#	Each
SZX	8,000	510-2256	\$495.00

A, B Right-Angle Head

This 90° Angle Head provides more comfortable usage than a straight handpiece in some applications. Available in a money saving kit with the M-15X motor or sold alone to use with either the M-08X or M-15X motors (see p. 428). Employs double spur gear that provides durable power. Supplied with 3mm and 1/8" collets; 3/32" collet also available. Equipped with quick-tool-change feature.

Description	Max. RPM	Item#	Each
A. Z-ANX Right-Angle Head (90°)	15,000	510-2240	\$395.00
B. Z-ANX + M-15X Handpiece Kit		510-3360	685.00

C, D Contra-Angle Head

This 120° Angle Head's unique shape provides more comfortable usage than a straight handpiece in some applications. Available in a money saving kit with the M-15X motor or sold alone to use with either the M-08X or M-15X motors (see p. 428). Employs double spur gear that provides durable power. Supplied with 3mm and 1/8" collets; 3/32" collet also available. Equipped with quick-tool-change feature.

Description	Max. RPM	Item#	Each
C. Z-CNX Contra-Angle Head (120°)	15,000	510-2250	\$395.00
D. Z-CNX + M-15X Handpiece Kit		510-3361	745.00

E-G Disc Holders for Angle Rotaries – 3mm shank

Specially designed for Power Hand angle handpieces and head attachments. Shanks machined to precise dimensions to reduce vibration. Made of soft rubber to work well on flat or contoured surfaces. Precisely made to hold precut abrasive and felt discs. Or use your own abrasives cut to size, such as diamond foil, diamond sheet or diamond film (see p. 114).

Size	Item#	Each
E. 11mm round	510-0260	\$10.00
F. 21mm round	510-0265	10.00
G. 31mm round	510-0270	10.00

G-L Sandpaper and Felt Discs for Angle Rotaries

Precut to fit our disc holders, these discs have pressure-sensitive adhesive backing. Use sandpaper for rough through intermediate finish; use felt for final finish of metal surfaces.

Sandpaper Discs	80 Grit Item#	120 Grit Item#	180 Grit Item#	320 Grit Item#	Pkg. of 10

Gesswein® POWER HAND® 3 Motors

Purchase a motor separately to construct your own Power Hand 3 handpiece. Power Hand 3 motors accept all Power Hand head attachments on pages 424, 426-427. Please refer to the maximum rpm speed of the head attachment when pairing with motors. All motors feature a new and convenient on/off switch. RPM speed is indicated on the motor casings. Supplied with a pair of replacement motor brushes.

Motors accept head attachments found on pages 426-427. See System Configuration Chart on pages 424-425.

A. High-Torque Motors

For heavy grinding applications where high torque is required. When selecting a head attachment, please refer to the maximum rpm speed of the head attachment (see pp. 426-427). Weight 6.2 oz.

Description	Speed	Max. Torque (Ncm)	Item#	Each
M-08X	1,000–8,000rpm	9.8	510-3311	\$425.00
M-15X	1,000–15,000rpm	8.8	510-3321	425.00
M-30X	1,000–30,000rpm	6.8	510-3341	425.00

B. Standard Motors

Small, lightweight motors for general purpose finishing. Fits comfortably in hand. For use with Standard Head and Slender Head attachments only (see p. 426). Weight 4.25 oz.

Description	Speed	Max. Torque (Ncm)	Item#	Each
M-20X	1,000–20,000rpm	6.4	510-3331	\$425.00
M-35X	1,000–35,000rpm	5.4	510-3351	425.00

C. High-Speed Motor

The lightest, fastest, and most comfortable high-speed motor. For use with Standard Head and Slender Head attachments only (see p. 426). Weight 3.2 oz.

Description	Speed	Max. Torque (Ncm)	Item#	Each
M-55X	1,000–55,000rpm	3.6	510-3371	\$425.00

Gesswein® POWER HAND® BZX Belt Sander

Ideal for a wide variety of precision finishing applications. Use for deburring, removing EDM and machine tool marks and sanding flat and curved surfaces and narrow slots. Operates with minimal vibration and has flexible power cord for easy reach. Supplied with straight and 45° angle arms for 6 and 8mm wide abrasive belts. Arms are spring-loaded for rapid belt changes. Weighs 16 oz.

ROTARY & ULTRASONIC

Description	Item#	Each
A BZX Belt Sander w/2 arms	510-2131	\$995.00
B. Optional Straight Arm (for 4mm belts)	510-0494	119.00
C. Replacement 45°-Angle Arm (for 6 and 8mm belts)	510-0495	118.30
D. Replacement Straight Arm (for 6 and 8mm belts)	510-0496	126.50
BZX Belt Sander with PH3 Controller - 115V	510-3400	1,415.00

BZX Belt Sander Applications

E. Sanding Belts for BZX

Aluminum oxide abrasive belts specially made for use with our Power Hand BZX Belt Sander. Belts fit on either straight or 45°-angle arms.

Gesswein® POWER HAND® 3 SZX Side-to-Side Profiler

Provides unique side-to-side reciprocating action with adjustable stroke (up to 133 strokes per second). Length of stroke ranges from 0 – 1.6mm (increases with tool length). Perfect for polishing base areas in deep cavities, corners and deep slots. Helps eliminate rounding of sharp corners. Prevents bottoming out in blind holes. Weighs 13 oz. Special V-shaped chucking system firmly secures 1.5 to 5mm (3/16") diameter tools. Sold individually or as a set with Power Hand 3 controller 510-3300.

Description	Item#	Each
F. SZX Profiler	510-3309	\$795.00
SZX Profiler with PH3 Controller - 115V	510-3389	1,225.00

SZX Profiler Applications (side to side)

Safety Recommendations – For Z-2X, Z-6X and SZX Profilers.

Prolonged use of vibrating or reciprocating tools may result in vibration-induced circulation problems in the hands. Always follow safe operating procedures. Using hand protection (i.e., insulated gloves) and taking frequent breaks can help minimize but not guarantee against injury. Operating these types of tools in cold weather or with a tight grip will reduce the period of operation before risking potential injury. Individuals with a tendency to suffer from poor circulation, frequently cold fingers or itchy hands should closely monitor the condition of their hands. If symptoms appear, seek medical advice immediately.

Gesswein® POWER HAND® Reciprocating Profilers

These light (24 oz.) reciprocating handpieces come complete with powerful 30V DC air-cooled motors and sealed bearings. Use for polishing flat surfaces, deburring, filing, stoning, scraping, lapping and draw-stoning deep cavities. They operate with minimal vibrations to reduce fatigue and have flexible power cords for easy reach. Special V-shaped chucking system firmly secures a wide variety of abrasives and other tools (see p. 311 for steel files). Reciprocating stroke lengths are adjustable. Use with PH3 controller or PH2X controller, as well as ULTRAMAX DF and ULTRAMAX MF.

A. Z-2X and Z-6X Reciprocating Profilers

Both Z-2X and Z-6X provide standard back-and-forth reciprocating action. Z-2X has a 0-2.0mm length of stroke with a variable strokes per second rate up to 117. Z-6X has a 0-6.0mm length of stroke with a variable strokes per second rate up to 70. They hold 1.5 to 6.35mm (1/4") diameter tools. Secured tools can float freely and be fixed at any position through 360°. Comfortable grips allow prolonged use. See below for tool holders.

Description	Item#	Each
A. Z-2X	510-2150	\$995.00
Z-6X	510-2160	995.00
Z-2X with PH3 Controller - 115V	510-3397	1,415.00
Z-6X with PH3 Controller - 115V	510-3398	1,415.00

Z-2X and Z-6X Recipro Applications (back and forth)

A

B

C

B, C Tool Holders for Z-2X, Z-6X and SZX

These 3mm shank holders are designed to hold precut PSA felt and sandpaper pads (see below) to make your reciprocating handpieces more versatile. You can cut your own abrasives, such as diamond foil and diamond film (see p. 114), to fit the holder pads.

Style	Dimensions (mm)	Item#	Each
B. Fixed Holder	10 x 20 x 40	510-0560	\$6.95
	10 x 20 x 65	510-0410	4.95
C. Free Holder with 180° swivel	10 x 20 x 80	510-0420	18.50

D

E

D, E PSA Sandpaper and Felt Pads

Precut waterproof SiC sandpaper pads, 10 x 20mm, with pressure-sensitive adhesive backing. Precut PSA felt pads can be charged with diamond compound. Excellent for use on flat surfaces. For use with Z-2X, Z-6X and SZX handpiece holders (see above).

Description	Grit	Item#	Pkg. of 10
D. Sandpaper Pad	180	510-0200	\$3.95

	600	510-0240	3.95
E. Felt Pad	-	510-0300	6.50

Micromotor Drive Mark II Di-Profilers

Connect to any Power Hand Controller

Gesswein is proud to offer the NEW Di-Profiler Mark II systems—the most advanced handpiece systems yet. The Professional and Classic MM Drive Di-Profilers are built with a micromotor inside every handpiece and can connect directly to any Gesswein Power Hand controller. Both Professional and Classic Mark II models now incorporate the protective finger sleeve into the handpiece. Made in Sweden.

ROTARY & ULTRASONIC

A, B Professional Micromotor Drive Di-Profiler, Mark II Maximum Efficiency, Minimal Vibrations

Simply the best reciprocating handpiece in the market today, the Professional Di-Profiler combines ergonomic design and heavy duty power. A counter balance weight system located on the opposite end of the tool holder reduces vibration levels. As the tool reciprocates, the counter balance weight reciprocates in the opposite direction thereby stabilizing the handpiece. As a result, vibration in the user's hand is greatly reduced. Comes complete with operations guide, rubber sleeve, storage case, wrench and lubricating oil. Adjustable stroke length 0-6mm. 8,000rpm maximum.

Description	Item#	Each
A. Professional Micromotor Di-Profiler 1/4" chuck capacity	850-1908	\$2,395.00
B. Complete Kit (Includes Professional Di-Profiler 1/4" chuck capacity, Marathon controller and variable speed foot rheostat)	850-1942	2,395.00

Operation Guide is included with profiler for safety and operating instructions.
For information on hand transmitted vibration see ANSI Standard S2.70 2006 (R2011).

C, D Classic Micromotor Drive Di-Profiler

Comes complete with operations guide, rubber sleeve, storage case, wrench and lubricating oil. Adjustable stroke length 0-6mm. 8,000rpm maximum.

Description	Item#	Each
C. Classic Micromoter Di-Profiler 1/4" chuck capacity	850-1915	\$2,090.00
D. Complete Kit (Includes Classic Micromotor Di-Profiler 1/4" chuck capacity, Marathon controller and variable speed rheostat)	850-1947	2,095.00

Operation Guide is included with profiler for safety and operating instructions.
For information on hand transmitted vibration see ANSI Standard S2.70 2006 (R2011).

Safety Recommendations – For all Reciprocating Profilers

Prolonged use of vibrating or reciprocating tools may result in vibration-induced circulation problems in the hands. Always follow safe operating procedures. Using hand protection (i.e., insulated gloves) and taking frequent breaks can help minimize but not guarantee against injury. Operating these types of tools in cold weather or with a tight grip will reduce the period of operation before risking potential injury. Individuals with a tendency to suffer from poor circulation, frequently cold fingers or itchy hands should closely monitor the condition of their hands. If symptoms appear, seek medical advice immediately.

Input for Power Hand Handpieces

A

A. Marathon Handy 700 Brushless Micromotor System

The Handy 700 system features an advanced controller and a 50,000rpm, 230W brushless rotary handpiece for incredible power—even at low speeds! Provides ample torque at all times to ensure fast and smooth metal removal. Ideal for a variety of applications, including grinding, finishing and polishing. Use with Power Hand 3 handpieces (see pp. 423, 429-430) for profile polishing or belt sanding.

System includes Handy 700 controller and BH-60 handpiece with 1/8" or 3/32" collet, variable-speed foot rheostat (FS60), handpiece cradle rest, detachable handpiece holder and replacement fuse. Backed by a two-year handpiece warranty. CE approved.

Features:

- Incredible power—even at low speeds
- Full compatibility with Power Hand 3 brush-type handpieces
- Dial or foot rheostat speed control
- Auto-cruise function for fixed-speed operation with foot rheostat
- Easy-to-read digital speed display for precise speed and torque settings
- Forward/reverse rotation
- Error-checking/troubleshooting system with digital display
- Overload protection

Specifications:

Handy 700 Controller

Electrical: 100–120V, 40W, 50/60Hz
 Dimensions: 5 3/8"W x 9 1/16"D x 7 1/16"H
 Net Wt.: 6 lbs.

BH-60 Handpiece – Brushless

Speed Range: 1,000–50,000rpm
 Max. Power: 230W
 Max. Torque: 7.8 N-cm
 Collet Size: 1/8" or 3/32"
 Dimensions: 6 9/16"L x 1 1/16" to 3/4" dia.
 Net Wt.: 8.4 oz.

B Increase the versatility of your Handy 700.

Description	Item#	Each
A. Handy 700 System, 1/8" collet	510-2925	\$765.00
Handy 700 System, 3/32" collet	510-2920	765.00
Replacement BH-60 Handpiece with 1/8" Collet	500-0224	525.00
Replacement BH-60 Motor only	500-0225	400.00

B. BH-60 Motor Adaptor

This easy-to-use motor adaptor connects PH3 head attachments to the BH-60 Handpiece (included in the Marathon Handy 700 micromotor system). Simply remove the BH-60 head and attach the adaptor to the motor to increase the versatility of your Handy 700. Motor also sold separately (see above). Go to pages 424, 426-427 for PH3 head attachments.

Description	Item#	Each
B. BH-60 Motor Adaptor	500-0223	\$165.00

Possible configurations below

A. Marathon Micromotor System – Do-it-all System!

This extremely affordable rotary micromotor system performs a wide range of grinding, deburring and polishing operations. Includes compact controller, lightweight 35,000rpm rotary handpiece, 1/8", 3mm or 3/32" collet, variable-speed foot rheostat, handpiece cradle rest and safety glasses. Controller features a voltage selector switch, dial speed control, forward/reverse handpiece direction switch and motor overload cutoff switch. Accommodates our full line of Power Hand 3 handpieces. Electrical: 110/220V, 50/60Hz. Output voltage: 0–30V DC (continuously variable). Measures 4 1/2"W x 5 3/4"D x 3 3/4"H. Weighs 2.6 lbs. Handpiece features a well-balanced ergonomic design that fits in your hand like a pen, convenient quick-tool-change mechanism and flexible phone-type cord. Max. operating speed: 35,000rpm. Measures 6"L x 1" to 5/8" dia. Weighs 7.5 oz.

Description	Item#	Each
A. Marathon System with 1/8" Collet	510-2946	\$325.00
Marathon System with 3/32" Collet	510-2956	325.00
Marathon System with 3mm Collet*	510-2971	325.00
Marathon Controller only	510-2960	129.00
Variable-Speed Foot Rheostat TPF-77 only	510-2940	60.00

* Use your Marathon for bright cutting by ordering diamond flywheels on 3mm shanks. See page 446

B, C Marathon Micromotor Systems for Setters

Available as a complete set with the Marathon Controller, 35,000rpm Rotary Handpiece, Freedom Hammer Handpiece and On/Off Rheostat or simply the Marathon Controller with the Freedom Hammer Handpiece only.

The Marathon Micromotor Controller features dial adjustable speed control, overload cutoff switch, forward/reverse switch, and accepts a variable speed foot rheostat and a wide variety of micromotor handpieces. Electrical: 110–220V, 50/60Hz. Output voltage: 0–30V DC (continuously variable). Measures 4 1/2"W x 5 3/4"D x 3 3/4"H. Weighs 2.6 lbs.

The 35,000rpm Rotary Handpiece features a well-balanced ergonomic design that fits in your hand like a pen, convenient quick-tool-change mechanism and flexible phone-type cord. Measures 6"L x 1" to 5/8" dia. Weighs 7.5 oz.

The Freedom Hammer Handpiece is perfect for stone setting - prong work and channel. Also used for texturing and for engraving using the included graver holding attachment. Three anvils with threaded shanks, wrench, tightening pins and an adapter for non threaded anvils, motor brushes and a handpiece tray included. 2 year warranty.

Description	Item#	Each
B. Marathon Controller, Rotary Handpiece with 3/32" Collet, On/Off Rheostat, Freedom Hammer Handpiece	510-2930	\$849.00
C. Marathon Controller, Freedom Hammer Handpiece (no Rheostat)	510-2935	675.00
Optional Variable Speed Rheostat for Marathon	510-2940	60.00
Freedom Hammer Handpiece	510-1280	595.00

D. ECO-Torque Micromotor System

Our most affordable rotary micromotor system! The ECO-Torque 280 handles a wide range of rotary handpiece applications. Whether you need a system for grinding, drilling, polishing or bright-cutting, ECO-Torque 280 will get the job done. Includes a compact controller with 110/220V selector switch and forward/reverse switch, lightweight 35,000rpm rotary handpiece with 3/32" collet, on/off foot switch, dial speed control, handpiece cradle rest, replacement pair of carbon brushes and collet chuck wrenches. An optional reducing collet is available (sold separately) to reduce collet size from 3/32" to 1/16" to run friction grip 1/16" shank burs. Made in South Korea.

Description	Item#	Each
ECO-Torque 280	510-2980	\$199.95

Gesswein®/Foredom® Flexible Shaft Motors & Kits

Included uses are grinding, carving, drilling, deburring, engraving, polishing and more. Our wide selection of flexible shaft motors, handpieces and accessories allows you to grind and finish almost any material. Each motor comes complete with flexible shaft and sheath. Motors are sold individually, with handpiece, with handpiece and foot pedal or in kits that include motor, handpiece and foot rheostat. Backed by a two-year manufacturer's warranty. All motors have fully grounded wiring. UL listed. Made in USA.

Motor Specifications:	TX and TXH	SR, SRM and SRH	LX
Max. Operating Speed	15,000rpm	18,000rpm	5,000rpm
Power	1/3 HP	1/6 HP	1/10 HP
Applications	Toughest grinding & finishing	General purpose grinding & finishing	Controlled grinding & finishing

A-C Foredom® Series TX – 1/3 HP

Provides full torque and smooth, controlled acceleration throughout the entire speed range. Ideal for stone setting, wax carving, polishing, milling, drilling and other applications that call for high torque. Capable of this torque due to the fact that they use rare earth magnets in place of universal wound magnets. Offer great control under any load. Speed range: 0–15,000rpm. All 50/60Hz. Not available in 230V.

- TX is a hanging-style flexible shaft motor with 39" shaft and sheath (see p.444 for longer (66") replacement shaft and sheath). Use with TXR or SXR foot rheostat or EMX speed controller (see p. 443) and all standard quick disconnect (QD) handpieces (see pp. 438-441).
- TXH is a hanging-style square-drive flexible shaft motor with heavy-duty (HD) 60" flexible shaft with sheath liner/silencer. Ideal for the toughest applications using large stones and tools mounted on 1/4" and 6mm shanks. Use with TXR or SXR foot rheostat or EMX speed controller (see p. 443). Can only use 25H, 30H and 44HT handpieces (see p. 442).

TXH Brushes (pair)	850-4119	12.50

D. Foredom® Series LX – 1/10 HP

Great for low-speed, high-torque applications that require more control. Prevent tools from slowing under load. Speed range: 0–5,000rpm. 50/60Hz. Available either in Bench-Style or Hanging-style flexible shaft motor with 39" shaft (see p.444 for longer (66") replacement shaft & sheath) and more flexible neoprene sheath. Use with TXR, SXR or FCT-1 or EFC foot rheostats or EMX speed controller (see p. 443) and all standard quick disconnect handpieces (see pp. 438-441).

View instructional video at www.gesswein.com.

A-C Gesswein/Foredom® Series SR – 1/6 HP

These motors combine all the best features: power, reliability and reversibility. Built with a larger commutator, brushes and fan to increase performance and longevity, they provide all you need for general-purpose grinding and finishing. Reverse capability allows both left- and right-handers to control direction of debris. Speed range: 0–18,000rpm. 50/60Hz.

- SR is a hanging-style flexible shaft motor with 39" shaft and sheath (see p.444 for longer (66") replacement shaft and sheath). Use with FCT, SCT or WF-7 foot rheostat or EM speed controller (see p. 443) and all standard quick disconnect handpieces (see pp. 438-441).
- SRM is a bench-mounted flexible shaft motor with 39" shaft and sheath (see p.444 for longer (66") replacement shaft and sheath) and built-in speed control. Use with all standard quick disconnect handpieces (see pp. 438-441).
- SRH is a hanging-style square-drive flexible shaft motor with heavy-duty 60" flexible shaft with sheath liner/silencer. Ideal for tough applications using large stones and tools mounted on 1/4" and 6mm shanks. Use with FCT, SCT or EFC foot rheostats or EM speed controller (see p. 443) and 25H, 30H or 44HT handpieces (see p. 442).

Handpieces for Standard Flexible Shaft Machines – In rotary and reciprocating styles

We offer a wide selection of handpieces to fit your needs, including both rotary and reciprocating handpieces with fixed collets, changeable collets or chucks. Several come with a quick-tool-change mechanism, and many are also available with a duplex spring for better control. All quickly detach from shaft. Compatible with all flexible shaft motors except TXH, TXMH, SRH and H.

A

A. Foredom® #30 Handpiece

Our top-selling model for all-purpose use!

The #30 handpiece features a geared Jacobs chuck that accepts up to 5/32" shanks and maintenance-free pre lubricated ball bearings. Includes chuck key with handle. Choose between blue and traditional silver. Measures 1" dia. x 5"L. Weighs 6 oz.

B

B. Foredom Angle Grinder Attachment

Foredom's Angle Grinder Attachment is designed for use with the #30 Handpiece. Can be used to grind, sand, and polish on metal, wood, stone, glass, ceramics, bondo and more. This quality-machined, sturdy, and compact device works with 2" and smaller discs and 2" wheels with 3/8" arbor holes. 73 piece accessory set is sold separately: Contains comprehensive collection of abrasives for metal working.

- Optimum Operated Speed: 10,000 to 15,000rpm
- Maximum Speed: 18,000rpm for short intervals
- Measures 3 1/8" long x 2 1/2" at widest, 2 3/4" Depth
- 0.75 to 1 gear reduction.

Description	Item#	Each
B. Foredom Angle Grinder Attachment	850-1358	\$102.00
Optional 73 Piece Accessory Set	850-0514	65.00

C

C. Foredom® Power Filer

Foredom's Power Filer is a reciprocating (non rotary) tool that attaches/mates up with your Foredom #30 style hand pieces. Partnered with Foredom Flex Shafts and Hand piece, this great power product offers a great alternative to tiresome continuous hand filing operations and thus can be used to file, hone, polish and lap on straight and curved surfaces. The housing is made of aluminum and has a pistol grip for ergonomic and easy handling/operation.

For those who already own a Hand piece and Flex Shaft, we offer the Foredom Filer Kit with mounting tools, hand piece grip, and a small variety of stones. For those that may be starting out, we offer a money saving all-in-one filer kit that includes the filer, Foredom SR Flex Shaft, #30 Hand Piece and Dual Speed Range Control along with Diamond Needle File Set and small variety of stones, presented in a convenient carrying case.

Features: Holds tools with Shank Sizes of 2.35mm (3/32") to 6.4mm (1/4"). Stroke length can be adjusted from 0mm up to 5mm. Comes pre-lubricated and never requires any further lubrication. Has 2.5:1 belt drive reduction and runs at maximum input motor speed of 10,000rpm, the equivalent of 4,000spm.

1.0mm	850-1924	599.00
1.5mm	850-1922	650.00

B. Technique Rotary Handpiece

A lightweight, vibration-free, high-precision handpiece with quick-change flip-lever chuck release. Supplied with 3/32" collet. Shaped for the hand. Can be held like a pen. Has all-metal dustproof casing. Includes wrench and screwdriver. Measures approx. 1" dia. x 6"L. Weighs 4½ oz. Made in Switzerland.

Description	Item#	Each
B. Technique Handpiece	850-2054	\$185.00
Optional 1/8" Collet	850-2058	52.00
Replacement 3/32" Collet	850-2057	48.00

C. Foredom® #28 Handpiece

A lightweight handpiece for intricate work and general grinding, polishing, deburring and carving applications. Slim, tapered grip provides comfort and control. Permanently lubricated ball bearings ensure smooth operation. Includes 3/32" and 1/8" collets, pin and collet wrench. Measures 3/4" dia. x 5¾"L. Weighs 2.9 oz.

Description	Item#	Each
C. #28 Handpiece with 3/32" and 1/8" collets	850-1348	\$56.10

G. Foredom Anvil Points

These tips fit all popular brands of hammer handpieces. All 6 tips are made of heat treated solid steel with threaded shanks measuring 3/32" diameter (2.35mm). Fits 1/8–48 US and all standard 3mm threads. Fits Swiss-made Badeco hammer handpiece. Six shapes are included in the set:

- Bezel Rocker
- Slim Rectangle
- Ball Nose
- Wide Rectangle
- Cylinder
- Fine Point

Set of 6 comes in hard plastic storage box that opens to a convenient stand for easy tip selection.

Foredom Anvil Points	850-3780	\$75.00

Heavy-Duty Rotary Handpieces for TXH, TXMH and SRH only – For a variety of operations

Included uses are grinding, carving, drilling, deburring, engraving, polishing and more. All three handpieces have square drives and attach quickly with positive sheath locking mechanisms to TXH, TXMH and SRH flexible shaft motors (see pp. 436-437), as well as H flexible shaft motors. Have shielded ball bearings that require no lubrication. Feature compact, lightweight designs for accessing tight areas while minimizing hand fatigue.

A

A. Foredom® #25H Handpiece

Features one-piece spindle construction with permanently lubricated, double-sealed ball bearings for cool extended running. Includes 1/8" and 1/4" collets. Measures 1" dia. x 6 1/8"L. Weighs 8 1/2 oz.

D

E. Foredom® EMF and EM FX Dual Speed Controllers

To further enhance the Foredom Filer, we recommend the new Foredom Dual Speed Range Dial since it has a "LO" setting that restrict speed to the allowable range of the filer between 1,000 – 10,000rpm or 400 – 4,000spm. Can switch back to the optimum speed by flipping a switch and already set at the optimum speed setting. The "HI" setting permits use with rotary hand pieces at regular speeds.

J, K Replacements for Handpieces with Duplex Springs

Suitable for all Gesswein/Foredom flexible shaft handpieces except #180/00.

Description	Item#	Each
J. Inner Duplex Spring with connectors	850-2223	\$19.25
K. Outer Duplex Spring Cover	850-3802	23.50

A-G Freedom® Bench System

Keep your most frequently used tools within easy reach. Start with the Freedom Flex Shaft Hanger to hang up to 2 flex shaft motors. Add in the LED Light Bar (100-240V AC) and your choice of 4 Tool Arms: Bur Holder Arm, Magnetic Tool Arm, Cup Holder Arm and Tray Arm. All slide, swing and pivot to create a custom bench set up.

All arms are machined of stainless steel. Pull them in close or push them out of the way as needed. Buy only what you need — just 1 or 2 arms or mix and match multiple arms! Customize to your exact specifications. It's the smart way to organize your bench.

Description	Item#	Each
B. Flex Shaft Hanger – Adjustable height hanger with 2 spring hooks.	850-0531	56.50
C. LED Light Bar – Rotates, swings and raises 90°. Dimensions: 31½"L	850-0532	136.50
D. 2 tier, 95 hole, Bur Holder Arm – For ⅜" (57) and ⅛" (38) shank burs/tools.	850-0533	68.50
E. Magnetic Tool Arm – With non-scratch felt surface. 12"L x ½"W x 1½"H.	850-0535	105.50
F. Jar Holder Arm – With 6 – 1.35oz. (40ml) cups with screw-on plastic tops, 1¼ (3.7cm) in diameter. 12"L x 2¼"W x 2¼"H.	850-0534	54.50
G. Tray Arm – Has movable partitions. 12"L x 2¼"W.	850-0536	58.50

H, I Single and Double Flex Shaft Hangers

Telescoping hanger extends 42" above your work surface. Height adjustments are made easily with the thumbscrew. Includes solid mounting base to screw firmly into your work surface. 10" arm at the top allows you to swing your flex shaft motor back and forth with ease. Made in India.

Double Flex Shaft Hanger attaches to your work surface by using screws or "C" clamps (not included) and allows you to hang one or two Flex Shaft motors. Made of powder coated steel, the flex shaft hanger extends between 25½" and 40". Made in USA.

Description	Item#	Each
H. Flex Shaft Hanger	850-0509	\$19.50
I. Double Flex Shaft Hanger	850-0515	34.95

J, K Freedom® Flex Shaft Hangers

Features a 3-piece hexagonal support rod, top safety hook rod for holding one or two motors. Available with a sturdy bench clamp for attaching to any bench top up to 2¼" thick or base which screw into the top or side of your work surface. The rod height can be adjusted with the locking screw built onto the clamp.

Comes with a Handpiece Rest that slides onto the hanger pole and secures your handpieces when not in use. Also has two Spring Safety Clips that slide over the motor bale and on to the hanger rod to keep the motor(s) from jumping and twisting during start up and acceleration.

Description	Item#	Each
J. Freedom Flex Shaft Hanger with Clamp	850-0506	\$48.50
K. Freedom Flex Shaft Hanger with Base	850-0507	68.50

L, M Handpiece Holders – Accept Freedom flexible shaft handpieces

Economical holders let you grind, polish, sand and carve while both hands control the workpiece. Adjust to hold handpieces up to 10" above the work surface and rotates 360°. Clamps up to 1¾" thick.

Description	Item#	Each
L. Holder for #30, #30H, #44T and #44HT and other 1" diameter Handpieces	850-0605	\$37.95
M. Holder for #35 Handpiece	850-0607	37.95

N. Nylon Jiffy Jig – Accepts 1" diameter handpieces

A convenient block for holding jeweler's handpieces in place. Leaves your hands free for cutting, grinding and polishing operations. Just place the block in your vise, pull handpiece through it, tighten the vise and you're ready to go. Tools in the handpiece can be easily changed without removing handpiece from the block. Accepts Freedom #30 handpiece and other 1" diameter handpieces.

Description	Item#	Each
Nylon Jiffy Jig	850-0608	\$13.15

O. GRS Handpiece Storage Strip

Keep handpieces within easy reach. Four different diameter holes provide storage for multiple handpieces of varying size. Clip to the side of your work surface with the included hardware.

Description	Item#	Each
Handpiece Storage Strip	850-0604	\$11.15

A. Foredom® Mini Vise

Securely holds small parts. Has 1 3/4" slotted grooves in the base for mounting on a drill press or bench. Stationary jaw has a perpendicular V-groove, and movable jaw has a horizontal V-groove for holding round stock or tube. Jaw width: 1 3/4". Jaw opening: 1 3/4". Measures 4"L x 2 3/8"W x 1 1/2"H. Glare-free black finish.

Description	Item#	Each
Mini Vise	820-4700	\$24.50

B. Benchtop Drill Press

Small and compact describes this 110V drill press. The base measures 6 3/4" x 6 3/4" with a drill clearance of 5". Drill press has three settings that allow for a range of 0-8,500rpm. When space is an issue, this drill press will perform with ease. The Jacobs chuck accepts bits up to 6mm. One year warranty. Weighs 13 lbs. Canada safety approved.

Description	Item#	Each
Bench Drill Press	850-0595	\$79.95

C. Drill Press Vise

All aluminum vise has slots to attach to benchtop drill press #850-0595 (above) quick jaw release feature for ease of use. Jaw width 2 9/16". Jaw opening 2 3/4". Measures 9 1/2"L x 4 1/2"W x 2 1/4"H.

Description	Item#	Each
Drill Press Vise	850-0594	\$12.95

D-L Diamond Flywheels – 3mm Shank

These flywheels produce the most decorative bright cuts you've ever seen, helping your jewelry really stand out from the rest. Contain natural grade-A diamonds for fast, easy bright cutting. When used with a high-speed rotary handpiece (minimum 30,000rpm), these flywheels make bright cuts in seconds. Can be resharpened. Have 3mm shanks. We strongly recommend that you purchase a practice carbide wheel—flywheels are not covered by warranty.

Description	Item#	EACH Prices	
		1-2	3+
D. 90° Flywheel	845-1400	\$46.50	\$41.85

M. PEPETOOLS Jump Ringer JRM2 – Better Than Ever!

The perfect set for winding your own jump rings easily in consistent sizes. Use the Rotary Winder and winding rods to wrap wire into a coil, which can then be cut into jump rings using the circular sawblade in your #30 handpiece. Ship. Wt. 8lbs. Made in USA.

- Includes Rotary Winder, 20 steel winding rods, circular sawblade, handpiece holder, precision machined cutting box, and aluminum base (9"L x 4 1/2"W).
- Winding rods are 4" long in mm sizes: 2.5, 3.0, 3.5, 4.0, 4.5, 5.0, 5.5, 6.0, 6.5, 7.0, 7.5, 8.0, 8.5, 9.0, 9.5, 10.0, 10.5, 11.0, 11.5, and 12.0mm.
- Included 1 1/4" circular sawblade cuts up to 18 gauge/1.0mm soft wire. Optional 1 1/2" sawblade cuts up to 16 gauge/1.2mm.

Description	Item#	Each
M. PEPETOOLS Jump Ringer	856-0445	\$200.00
Optional Circular Sawblade 1 1/2"	856-0443	15.50
Replacement Sawblade 1 1/4"	856-0442	12.50

A. Pro-Flex Econo Flex Shaft

The Pro-Flex Motor comes complete with chuck style handpiece, electronic foot control, extra pair of motor brushes, and a one year warranty against manufacturing defects. 110V. Made in China.

Features:

- 1/8 HP, ball-bearing, 18,000rpm motor
- An electronic foot control with plastic housing for hands-free speed control.
- A key-type chuck hand piece (holds shanks up to 5/32" (4mm) in diameter).

Description	Item#	Each
A. Pro-Flex Econo Flex Shaft Set	850-0660	\$99.00
Replacement Handpiece w/ Chuck Key	850-0661	35.50

A

B. Suhner MiniFix 25-R and 9-R

The Suhner MiniFix is the most powerful flexible shaft system we offer. These motors boast 2/3 HP and 500 Watts, giving the user consistent rotational speeds even when pressure is applied. The Suhner MiniFix is the ideal choice for heavy stock removal or heavy pressure polishing using brushes or felt bobs. For big jobs, try with our new Tampico and Nylon 1/4" shank brushes. Select between model 9-R (4,000 to 9,000rpm) or 25-R (11,000 to 25,000rpm.) Made in Switzerland.

Features:

- Fully Insulated Motor 120V/50Hz
- Flexible Shaft
- FH4 handpiece with 1/4" collet
- Metal carrying case
- Set of Mounted abrasives

Description	Item#	Each

Foot Peldal	850-0226	350.00
Replacement #6 Handpiece	850-0227	480.00
Replacement #6 Shaft Assembly	850-0228	240.00

C

Flexible Shaft Drive, Mark II Di-Profilers

Gesswein is proud to offer the NEW Di-Profiler Mark II handpiece that attaches to most standard flexible shaft machines. This precise, fast-action, easy-to-operate reciprocating tool is ideal for profile polishing, filing, honing and lapping straight and curved surfaces and finishing complicated dies and molds. Each Di-Profiler allows easy stroke adjustments for fast, precise work. Spring-cushioned to prevent damage to workpiece or tool. All Mark II models now incorporate the protective finger sleeve into the handpiece. Redesigned for improved ergonomics and user flexibility. See page 449 for details. Made in Sweden.

A. Classic Flex Shaft Drive Di-Profilers, Mark II Version

The flex shaft driven Di-Profiler is the tool maker's traditional go-to machine for reciprocating applications. Connects to any standard Gesswein/Foredom flexible shaft machine except models TXH, TXMH, and H. Can be used for light and heavy duty polishing, filing, honing and lapping jobs. For best results and reduced vibration, operate between 5,000 and 7,000rpm with a stroke length between 1-3mm and 1/4" chuck capacity.

Comes complete with operations guide, rubber sleeve, storage case, wrench and lubricating oil. Adjustable stroke length 0-6mm. 8,000rpm Maximum.

Description	Item#	Each
A. Di-Profiler 1/4" chuck capacity for Flex Shaft	850-1905	\$1,295.00
B Complete Kit (Includes Di-Profiler, TX Flex Shaft, TXR-1 foot rheostat)	850-1931	1,495.00
Rubber Grip	850-1937	65.95

C. FMR Mini-Filers

Each attaches to any standard Gesswein/Foredom flexible shaft machine except models TXH, TXMH and H. Designed for light-duty profiling work. Ergonomic design results in effective finishing and polishing. Slim nose is especially useful in tight spaces. Holds tools up to 3.6mm in diameter (see diamond poli files on pp. 109-110). Max. operating speed: 10,000 strokes per minute (5,000-7,000 strokes per minute recommended). Measures 5 1/4"L x 1" dia. Weighs 5.5 oz.

Length of Stroke	Item#	Each
0.5mm	850-1923	\$650.00
1.0mm	850-1924	599.00
1.5mm	850-1922	650.00

D, E Tool Holders – For all Di-Profiler models

Description	Item#	Each
D. Universal Tool Holder (holds up to 6mm thick and 8mm wide) – 3mm shank	403-1050	\$57.50
E. Ceramic Stone Holder (holds up to 1mm thick and up to 8mm wide) – 3mm shank	403-1045	34.95

Safety Recommendations For FPS and FPC Di-Profilers as well as FMR Mini Filers and Micromotor Drive Di-Profilers

Prolonged use of vibrating or reciprocating tools may result in vibration-induced circulation problems in the hands. Always follow safe operating procedures. Using hand protection (i.e., insulated gloves) and taking frequent breaks can help minimize but not guarantee against injury. Operating these types of tools in cold weather or with a tight grip will reduce the period of operation before risking potential injury. Individuals with a tendency to suffer from poor circulation, frequently cold fingers or itchy hands should closely monitor the condition of their hands. If symptoms appear, seek medical advice immediately.

Micromotor Drive Mark II Di-Profilers

Gesswein is proud to offer the NEW Di-Profiler Mark II systems—the most advanced handpiece systems yet. The Professional and Classic MM Drive Di-Profilers are built with a micromotor inside every handpiece and can connect directly to any Gesswein Power Hand controller. Both Professional and Classic Mark II models now incorporate the protective finger sleeve into the handpiece. Made in Sweden.

ROTARY & ULTRASONIC

A, B Professional Micromotor Drive Di-Profiler, Mark II Maximum Efficiency, Minimal Vibrations

Simply the best reciprocating handpiece in the market today, the Professional Di-Profiler combines ergonomic design and heavy duty power. A counter balance weight system located on the opposite end of the tool holder reduces vibration levels. As the tool reciprocates, the counter balance weight reciprocates in the opposite direction thereby stabilizing the handpiece. As a result, vibration in the user's hand is greatly reduced. Comes complete with operations guide, rubber sleeve, storage case, wrench and lubricating oil. Adjustable stroke length 0-6mm. 8,000rpm maximum.

Features:

- Fully Insulated Motor 120V/50Hz
- Flexible Shaft
- FH4 handpiece with 1/4" collet
- Metal carrying case
- Set of Mounted abrasives

Description	Item#	Each
A. Professional Micromotor Di-Profiler 1/4" chuck capacity	850-1908	\$2,395.00
B. Complete Kit (Includes Professional Di-Profiler 1/4" chuck capacity, Marathon controller and variable speed foot rheostat)	850-1942	2,395.00

C, D Classic Micromotor Drive Di-Profiler, Mark II

Comes complete with operations guide, rubber sleeve, storage case, wrench and lubricating oil. Adjustable stroke length 0-6mm. 8,000rpm maximum.

Description	Item#	Each
C. Classic Micromotor Di-Profiler 1/4" chuck capacity	850-1915	\$2,090.00
D. Complete Kit (Includes Classic Micromotor Di-Profiler 1/4" chuck capacity, Marathon controller and variable speed rheostat)	850-1947	2,095.00

E. Protective Finger Sleeve - Retrofit previous 1/4" Models

The finger sleeve will improve guidance of the tool as there is no longer any need for putting your finger on moving tools or machine parts. Simply attach the finger sleeve to the Di-Profiler (instructions included). Now the user can place their fingers over the steady finger sleeve while the tool is reciprocating underneath. Comes with 2 1/8" extension pipe for longer tools. Compatible with all Di-Profilers.

Description	Item#	Each
Finger Sleeve Package for Di-Profiler 1/4"	850-1917	\$264.00
Finger Sleeve Package for Di-Profiler 1/8"	850-1916	223.00

Operation Guide is included with profiler for safety and operating instructions.

For information on hand transmitted vibration see ANSI Standard S2.70 2006 (R2011).

Air Grinders

Specially selected for mold, tool and die makers

These air-operated rotary handpieces are perfect for precision grinding and deburring. Use reciprocating models for honing and lapping. All require Filter/Regulator-Lubricator except NSK Presto Air Turbine.

A, B Suhner® Swiss Grinders

80,000rpm, right-angle and straight rotary handpieces

These grinders achieve maximum power with minimum air consumption. Rigid rotary-vane motors provide exceptional performance and speeds up to 80,000rpm. Excellent for carbide and CBN tools. Use for milling, grinding, engraving and polishing. Light, well-balanced ergonomic design reduces operator fatigue. Scratch-resistant insulated plastic housing reduces noise level and keeps hands warmer. Additional features include precision sealed bearings, rear speed controls and rugged construction for extended heavy-duty use. Made in Switzerland.

Choose from slim right-angle or straight grinder with rear speed controls. Both supplied with 1/8" collet and wrench. Each requires 1/8" NPT coupler and 1/4" ID hose (see p. 457 for #850-7323). Use with Filter/Regulator-Lubricator (see p. 456). Right-angle handpiece measures 6 3/4"L x 3/4" dia. Weighs 7 oz. Straight handpiece measures 6"L x 3/4" dia. Weighs 4.2 oz.

Model	Max. RPM	PSI	CFM	Item#	Each
A. Right-Angle	80,000	90	6.6	850-7320	\$818.85
B. Straight	80,000	90	6.6	850-7305	815.00
				Collets	Item# Each
				Replacement 1/8" for Right-Angle	850-7329 \$55.60
				Replacement 1/8" for Straight	850-7327 55.60
				Optional 3/32" for Right-Angle	850-7331 55.60
				Optional 3/32" for Straight	850-7325 55.60

C. High-Speed Rotary Air Grinder HS80 – 80,000rpm

High-speed, quiet-running, well-balanced rotary handpiece for deburring and finishing. Ideal for precision grinding. Includes 1/8" collet (optional 3/32" and 3.0mm collets also available). Supplied with air hose, coupler and tool changing wrenches. Requires Filter/Regulator-Lubricator (see p. 456). Measures 5 5/8"L x 1 3/16" dia. Weighs 5.7 oz. Made in Taiwan.

Model	Max. RPM	PSI	CFM	Item#	Each
C. HS80	80,000	90	1.77	850-2235	\$174.00
				Description	Item# Each
				Optional HS80 3/32" Collet	850-2236 \$6.50
				Optional HS80 3.0mm Collet	850-2237 6.50
				Replacement HS80 1/8" Collet	850-2238 6.50

D, E UHT (Ushio) Air Grinders

53,000 and 65,000rpm, slim and lightweight pencil-like design

Quiet running handpieces ideal for many applications, including precision grinding, finishing and polishing. Feature self-lubricating vanes for dependable performance. Unique 1/8" fixed collet design provides extra-long ball bearing life and reduces heat buildup.

The Contra-Angle 120° model allows access to hard-to-reach, deep areas. Both offer rear speed control and rear exhaust. Supplied with 5' of 3/16" air hose, 1/4" NPT coupler, 13" exhaust hose, wrench and pin. Use with Filter/Regulator-Lubricator (see p. 456). Contra-angle handpiece measures 5"L x 5/8" dia. Weighs 5 oz. Straight handpiece measures 5 5/8"L x 5/8" dia. Weighs 4.5 oz. Made in Japan.

Model	Max. RPM	PSI	CFM	Item#	Each
D. Contra-Angle	53,000	85	4.2	850-0905	\$335.00
E. Straight	65,000	85	4.2	850-0900	299.00

A. ROTUS Standard Hand Grinder Set – 30,000rpm

The ROTUS System is a hand-held grinder with an energy saving air motor hand piece weighing only 8.74 oz. Air driven means that there is virtually no heat generation during operation resulting in excellent durability. The motor hand piece produces 30,000 min RPM and uses minimal air consumption. The energy saving mechanism runs quietly with the included Silencer and makes it possible to operate with a 1HP (0.75kw) air compressor, 55 psi, such as our California Air Tools Compressor (265-3125) (see p. 455). Fine adjustment of variable speed can be controlled by the Foot Control and the Forward/Reverse Rotation Direction Control Ring located at the end of the motor can control the motor speed as well.

System includes: Air grinder motor includes twist free Hose and Silencer, New ring type attachment, 1/8" dia. Collet, Air Line Kit, Foot Control, Piping Hose, Lubricating Oil, and 4 Assorted Wrenches.

Max. RPM	PSI	CFM	Item#	Each
30,000	55	2.65	850-7250	\$1,090.00

B. NSK Impulse Pencil Air Grinder – 60,000rpm

Features a special vane design that maintains speed even under load, providing smooth and stable grinding action. Design allows sensitive control of cutting tool. Exhaust hose with silencer keeps noise to a minimum. Rotating joint prevents hose from twisting. Supplied with 1/8" collet and chuck key; 3/32" and 3mm collets available separately. Use with Filter/Regulator-Lubricator (see p. 456). Warranty 6 months. Subject to inspection. Measures 6 3/4"L x 1" dia. Weighs 5.9 oz.

Max. RPM	PSI	CFM	Item#	Each
B. 60,000	56-85	5.83	850-7230	\$425.00
Collets			Item#	Each
Optional 3/32" Collet			850-7232	\$48.00
Optional 3mm Collet			850-7233	48.00
Replacement 1/8" Collet			850-7231	48.00

C. High-Torque Precision Air Grinder HT60 – 60,000rpm

High-torque, quiet-running, well-balanced rotary handpieces for deburring and finishing work. Supplied with air hose, coupler and tool changing wrenches. Requires Filter/Regulator-Lubricator (see p. 456). Measures 5 5/8"L x 1 1/16" dia. Weighs 6.4 oz.

Model	Max. RPM	PSI	CFM	Item#	Each
HT60 - 3/32"	60,000	90	4.1	850-2225	\$134.00

C. HT60 - 1/8"	60,000	90	4.1	850-2230	134.00

D. Nitto Kohki Air Sonic – 35,000rpm, high-torque handpiece

The rugged Nitto Kohki Air Sonic high-torque unit provides maximum power for grinding, deburring, production grinding on small castings and removing welding slag. Rear exhaust and built-in air silencer ensures quiet operation. Supplied with 1/4" to 1/8" reducing collet sleeve, 5' of 1/4" hose with 1/2" NPT coupler, 19" exhaust hose and wrenches. Use with Filter/Regulator-Lubricator (see p. 456). Measures 7"L x 1 1/4" dia. Weighs 1 lb.

Model	Max. RPM	PSI	CFM	Item#	Each
D. L-35B	35,000	85	12.3	850-7012	\$300.00

E, F NSK Presto Air II Turbine – 320,000rpm, no lubrication required

Use the lightweight, ultra-high-speed rotary air turbine for delicate, precision applications. Features a unique dust protection mechanism that not only blows away loose powder to improve cutting efficiency but also cools the cutting tool to extend service life. Purchase handpiece and hose alone (850-7236), or purchase complete set (850-7237). Includes Handpiece with 6" hose, Air Line Kit, Foot Control (on/off) & Handpiece Holder. The Air Line Kit has the filter & regulator in it, and there are 2 air hoses (one for the air or air compressor & one for the foot pedal). Set weighs 5 lbs. Regulator weighs 1.25 lbs. Made in Japan.

C. Nitto Kohki MLS-20 Air Angle Disc Sander 22,000rpm, high-torque handpiece

The high-torque handpiece. This 22,000 rpm, powerful 2" right-angle sander has a low profile head which is ideal for sanding dies, molds, steel, aluminum and rubber or finishing welds. Lightweight (1.3 lbs.) and compact (1½" barrel diameter) for continuous sanding in small, confined areas. One-touch twist lock allows efficient abrasive disc holder replacement. The new coated gears and high-life blades are designed to offer extended run-time performance. Includes side exhaust with silencer. Safety lock helps prevent accidents. Requires ¼"-3/8" NPT air connection. Use with Miniature Filter/Regulator-Lubricator. Measures 5" L x 1½" diameter. Made in USA.

Max. RPM	PSI	CFM	Item#	Each
19,000	87	14.2	850-7014	\$395.00

D, E UHT Ushio Micro-Angle Surface Air Grinder

Quiet-running handpieces are ideal for precision grinding, finishing and polishing. Feature self-lubricating vanes for dependable performance. Read speed control and rear exhaust.

Supplied with 5' of 3/16" air hose and 1/4" NPT coupler. Airline filter/regulator/lubricator required. Both 90° and 120° handpieces optimize ergonomics and offer 7mm threaded shaft for delivering maximum torque to 30mm diameter grinding, sanding, and buffing tools. Made in Japan.

F. Air-Operated FPD Di-Profil Set – 10,000 strokes/min.

Employs a high-quality, variable-speed, air-driven reciprocating handpiece similar to our popular Di-Profilers on pp. 448-449. In addition to FPD Di-Profilers, set includes air line, filter/regulator-lubricator, lubricating oil, 5' of reinforced flexible hose, quick-disconnect hose connector, wrench, lathe adapter post and molded storage case. Accepts tools up to 1/8" in diameter. Measures 6¾" L x 1¼" dia. Weighs 2 lbs.

Strokes/Minute	Stroke Length	PSI	CFM	Item#	Each
10,000	0-6.0mm	57	0.18-2.3	850-1845	\$2,895.00

A-C Turbo Air Lappers – Reciprocating handpieces

Low-vibration, quiet-running, durable reciprocating handpiece with a short stroke. Perfect for polishing ribs, slots and other tight areas. Produces great results with Diamond Poli Files (see pp. 109-110) and Super Ceramic Stones (see pp. 468-469). These color coded models are supplied with air hose, coupler, foam sleeve and three tool holders for 1mm to 1/8" flat tools and 3mm round tools. Requires Filter/Regulator-Lubricator (see p. 248). UTR-30, measures 7 7/8"L x 1 3/32" dia., weighs 6.7 oz. UTR-70, measures 8"L x 1 1/8" dia. Weighs 6.7 oz.; UR-120, measures 8 3/16"L x 1 3/16" dia. Weighs 6.0 oz. 90 day manufacturers warranty. Made in Taiwan.

Description	Strokes/Minute	Stroke Length	PSI	CFM	Item#	Each
A. UTR-30	30,000	0.3mm	90	1.76	850-2250	\$318.00
B. UTR-70	28,000	0.7mm	90	1.76	850-2245	318.00
C. UR-120	12,000	1.2mm	90	2.83	850-2251	318.00

Description	Accepts Tools	Item#	Each
Holder #64	1mm flat, 3mm round	850-2246	\$8.50
Holder #65	1mm flat	850-2247	8.50
Holder #62	1/8" flat	850-2248	8.50

D-F UHT Ushio TurboLap Air Filers – Reciprocating handpieces

TurboLap delivers high-speed reciprocation with high torque and a short stroke. Ideal for filing, lapping and polishing molds or honing precision parts.

Makes quick work of polishing ribs, slots and intricate areas. Runs quietly and is designed to be operated for long periods without getting hot. Provides optimum results with Diamond Poli Files (see pp. 109-110) and 1mm flat Super Ceramic Stones (see pp. 468-469). Lightweight with good balance and ergonomic soft-grip design.

Three color-coded models, each supplied with hexagonal wrench, 1 Diamond Poli File, 1.5m air hose, overhose, hose bands and quick joint with filter. Accepts up to 1mm flat or 3mm round tools. Requires 1/4" NPT air connection and Filter/Regulator (see p. 248). No oil lubrication required. Measures 7" long x 1" diameter. Weighs 5.9 ounces. Made in Japan.

Description	Stroke Length	Strokes per/Minute	PSI	CFM	Item#	Each
D. Blue	0.3mm	52,000	90	1.65	850-0928	\$425.00
E. Red	0.7mm	28,000	90	1.65	850-0930	425.00
F. Yellow	1.2mm	19,000	90	1.65	850-0932	425.00

G. Super Hand Pneumatic Filer – 4,000 strokes/min.

A powerful reciprocating tool for an efficient way to file. Vibration-free due to its double-piston design. Accepts tool diameters up to 1/4". Comes complete with 6' hose with 1/4" NPT connector, four coarse files (three-square, half-round, flat and round tapered) and wrench. Use with Filter/Regulator-Lubricator (see p. 248). Measures 6 1/2"L x 1 1/2" dia. Weighs 2.4 lbs. Made in Japan.

Strokes/Minute	Stroke Length	PSI	CFM	Item#	Each
4,000	5.0mm	85.3	6	850-7200	\$320.00

H-M Turbo Lap Diamond Files

These diamond files are perfect for finishing in tight areas. The high quality diamond abrasive performs well in high speed and short stroke applications. Each diamond file has maximum thickness of 1mm and tapers down to 0.5mm thick. Each style is available in three grits.

A

A. Dremel Power Grinder #100

A 35,000rpm fixed-speed grinder. Includes seven-piece accessory set and collet wrench. Great for a variety of grinding, cutting, sharpening, cleaning and polishing applications. Features double-insulated, shatter-resistant housing with permanently lubricated ball bearings for smooth, dependable operation. Supplied with 1/8" collet (optional 1/32", 1/16" and 3/32" collets available). Collets also fit Dremel #270 and #380. Electrical: 120V, 1.2A, 50/60Hz. Measures 7 1/4" long with 6' power cord. Weight: 18 oz. UL and ETL listed. Two-year manufacturers' warranty.

Description	Item#	Each
A. Dremel Grinder #100 with accessories, 120V	850-8016	\$56.20
Replacement Type 3 Brushes*	850-8035	3.20

*For models manufactured in 1989 and after.

B

B. Dremel #3000

The Dremel 3000 is a variable 5,000 to 32,000rpm rotary grinder the result of upgrading our most popular model using user-requested features to improve the tool's design and ergonomics. Features the EZ Twist™ nose cap with an integrated wrench that allows the nose cap to be used as a wrench to tighten accessories. The ability to use all existing Dremel accessories and most attachments lets the 3000 complete a wide range of applications including cutting, grinding, sanding, carving and polishing a variety of materials. Includes storage case, sanding guide attachment and cutting attachment as well as 28 genuine Dremel accessories. Supplied with 1/8" collet. Electrical: 120V, 1.2A, 50/60Hz. Measures 7 1/2" long with a 6' power cord. Weight 20 oz. Four-year manufacturer's warranty.

Description	Item#	Each
B. Dremel #3000 with accessories, 120V	850-8027	\$120.00
Replacement Brushes	850-8032	\$5.20

C

C. Collets For Dremel Grinders – #100 and #3000

These collets fit the new style grinders as well as the Dremel #270 and 380 Grinders.

Size	Item#	Each
1/32"	850-4155	\$2.30
1/16"	850-4150	2.30
3/32"	850-4145	2.30
1/8"	850-4140	2.30

D

D. Dremel® Electric Engraver

Economical, adjustable engraver for personalizing or marking valuable articles. Create unique designs on metal, wood, plastic, ceramic, glass and leather. Features handy hanger for convenient storage, calibrated stroke adjustment dial, comfortable pencil-type grip and easily replaceable carbide point. Measures 6" overall length. Cord measures 6' long. 115V, 0.2A, 60Hz. UL listed.

Description	Item#	Each
D. Engraver, 115V	821-6010	\$31.95
Optional Diamond Point	821-6020	16.25
Replacement Carbide Point	821-6015	5.30

A. SilentAire Compressors – Quiet yet powerful!

The **Val-Air** is a premium value model with cast aluminum lid with cooling fins for improved ventilation and Filter-Regulator with auto-drain feature and condensate bottle. With a coalescent filter to 0.01 micron.

Sil-Air is the same without the aluminum lid with cooling fins or coalescent filter.

Both versions feature powerful 1/2 HP motors which provide over 2 CFM of air. They can handle up to 10 large Wax Injectors and are fully automatic. Both make about as much noise as a refrigerator, so you can work without distraction. Both measure 14" dia. x 22"H. Weigh 58 lbs. May require additional filter at the air tool to eliminate condensation that can form in very long airlines. Accepts 1/4" male fittings. 220V also available. Made in Italy.

Features:

- Tank and line pressure gauge
- Line pressure regulator
- Moisture trap and filter
- Safety valve
- Air-intake filter

Specifications:

Motor	1/2 HP
Max. Pressure	114 PSI
Tank Capacity	4 gals.
Displacement	2.15 CFM
Noise Level	40 dB

Description	FOB	Electrical	Item#	Each
A. SilentAire Val-Air Compressor	CT	110V	265-3100	\$1,245.00
SilentAire Val-Air Compressor	TX	110V	265-3101	1,225.00
SilentAire Sil-Air Compressor	TX	110V	265-3095	1,065.00
SilentAire Sil-Air Compressor	CT	110V	265-3094	1,065.00
Replacement Oil, 24 oz.			265-3103	27.00

A

B. Oil-Free Air Compressor – 3/4 HP Oil-Free Air Compressor

Engineered and built with the latest technology to provide high quality clean air. The Oil-Free Dual Piston Pump System allows the air compressor to work more efficiently, creating less noise and less wear for a longer pump life. Oil-less operation makes it virtually maintenance free! Includes tank and line pressure gauge, line pressure regulator, moisture trap with filter, safety valve, and air intake filter. Made in China.

Specifications:

Motor:	3/4 HP	Noise level:	52 dB
Max. Pressure:	116 PSI/ 8 bar	Airflow:	118 liters per minute
Tank Capacity:	6 gals.	Dimensions:	16"Dia. x 21H"
Displacement:	4.2 CFM	Weight:	61 lbs.

Description	FOB	Electrical	Item#	Each
B. Oil-Free Air Compressor	CT	110V, 600 watts	265-3120	\$625.00
Oil-Free Air Compressor	NY	110V, 600 watts	265-3122	595.00

B

C. California Air Tools 4610AC – 1 HP & Oil-Free Air Compressor

Quiet, (60 dB) oil-free and lightweight. Designed to increase duty cycle and allow for longer continuous run times. Powerful 1.0 HP motor is engineered to dissipate heat, allowing for a cooler operation while reducing wear. The Oil-Free Dual Piston Pump System is engineered for high performance and durability. Complete with two pressure control gauges, air filter, two universal 1/4" quick connectors, and thermal overload protector. 220V also available. Made in China.

Specifications:

Motor:	1 HP	Noise level:	60 dB
Max. Pressure:	120 PSI	Dimensions:	19 1/8"L x 16 3/4"W x 19 3/4"H
Tank Capacity:	4.6 gals. (Aluminum Tank)	Weight:	45.5 lbs.

Description	Electrical	Item#	Each
C. California Air Tools 4610AC	110V/60Hz	265-3125	\$355.00

C

Safety Recommendations - For vibrating and reciprocating handpieces.

Prolonged use of vibrating or reciprocating tools may result in vibration-induced circulation problems in the hands. Always follow safe operating procedures. Using hand protection (i.e., insulated gloves) and taking frequent breaks can help minimize but not guarantee against injury. Operating these types of tools in cold weather or with a tight grip will reduce the period of operation before risking potential injury. Individuals with a tendency to suffer from poor circulation, frequently cold fingers or itchy hands should closely monitor the condition of their hands. If symptoms appear, seek medical advice immediately.

Air Tool Accessories

It is extremely important that compressed air be dry, clean and regulated to a pressure suitable for the operation of any air tool. When air tools require lubrication to reduce friction, filters should be installed in the air line as close as possible to the air tool to prevent water vapor condensation.

A, B Miniature Filter/Regulator/Lubricator Assembly For air handpieces.

Combines functions of filter, regulator and lubricator. General-purpose filter removes solid and liquid particles down to 5 microns. Regulator allows outlet pressure adjustment from 5 to 100 PSI. Micro-fog lubricator provides oil mist to lubricate moving parts of air handpieces. Has 1 oz. reservoir. Use optional bracket to mount on wall or bench. Maximum inlet pressure: 150 psi. Ports: 1/8".

Description	Item#	Each
A. Filter Assembly	850-7349	\$220.40
B. Mounting Bracket	850-7335	15.70
Lube Oil, 8 oz.	850-0985	25.65
Replacement Filter	850-7369	14.50

C, D Miniature Prefilter/Coalescing Filter Assembly

Ideal for applications requiring dry and extremely clean air. Designed for air compressors rated up to 3.5 CFM. Prefilter removes liquid and solid particles down to 5 microns; coalescing filter removes particles down to 0.01 micron. Use optional bracket to mount on wall or bench. Maximum inlet pressure: 150 PSI. Ports: 1/4".

Description	Item#	Each
C. Filter Assembly	850-7353	\$109.00
D. Mounting Bracket	850-7359	16.80
Replacement Prefilter (white)	850-7337	19.95
Replacement Coalescing Filter (green)	850-7357	68.60

E, F Miniature Filter/Regulator

Combines the functions of filter and regulator. Filter removes solid and liquid particles in compressed air down to 5 microns. Regulator allows outlet pressure adjustment from 5 to 100 psi. Maintains nearly constant outlet pressure despite changes in inlet pressure. Use optional bracket to mount on wall or bench. Maximum inlet pressure: 150 psi. Ports: 1/4".

Description	Item#	Each
E. Filter Assembly	850-7333	\$85.85
F. Mounting Bracket	850-7335	15.70
Replacement Filter	850-7369	14.50

G. Large Prefilter/Coalescing Filter Assembly

Designed for large air compressors rated up to 15 CFM. Ideal for applications requiring greater airflow. Prefilter removes liquid and solid particles down to 5 microns; coalescing filter removes particles down to 0.01 microns. Requires regulator for use with most air tools. Maximum inlet pressure: 150 psi. Ports: 1/4".

Description	Item#	Each
G. Filter Assembly	850-7355	\$160.00
Replacement Prefilter (white)	850-7337	19.95
Replacement Coalescing Filter (green)	850-7365	181.65

A-K Quick Disconnect Air Hose and Fittings

Sturdy 1/4" O.D. nylon air hose with .040" wall thickness and a collection of timesaving quick-disconnect fittings. To connect, just push air hose into fitting—it automatically locks in place. To disconnect, push back plastic ring on fitting and pull air hose out. The 1/4" and 1/8" male fittings work with a variety of sandblasters, wax injectors, sprue cutters and more. Use 1/4" males for air filters, regulators and vacuum pumps.

Description	Item#	Per Foot
A. Nylon Air Hose, 1/4" O.D.	265-2286	\$0.94
Description	Item#	Each
B. QD Connector, Male, 1/4"	265-2276	\$6.85
C. QD Elbow, Male, 1/4"	265-2288	7.80
D. QD Swivel Elbow, Male, 1/8"	265-2291	5.96
E. QD Swivel T-Connector, Male, 1/4"	265-2278	7.70
F. QD Connector, Male, 1/8"	265-2277	3.75
G. Nipple Reducer, 1/4"-1/8"	265-2289	3.95
H. Plug for QD 1/4" Connectors	265-2283	1.60
I. Coupling, Female, 1/4" to 1/4"	265-2284	2.75
J. QD Union (Straight), 1/4"	265-2282	4.65
K. QD Union T, 1/4"	265-2281	6.65
QD Union Elbow, 1/4"	265-2279	5.50

L. Variable Speed Foot Control Pedal

A disk-type foot control for use with any of our air handpieces. Sensitive and variably controls airflow from anywhere the disc is depressed. Low-profile, skid-resistant bottom. Complete with 18" length of 5/32" hose and fitting for input as well as approximately 4' of 5/32" hose for outlet to air tool.

Description	Item#	Each
Variable Speed Foot Control Pedal	850-7385	\$145.00

M. Reinforced Air Hose with Fittings

This 8' long 1/4" I.D. rubber hose comes with 1/8" NPT coupler and 1/4" NPT coupler. Withstands air pressures up to 250 PSI.

Description	Item#	Each
Reinforced Air Hose	850-7323	\$28.85

N, O Barbed Fitting and Worm Drive Clamp

Fitting works with most wax injectors and small vacuum pumps. Worm drive clamp fastens air hose securely to fitting.

Description	Item#	Each
N. Worm Drive Clamp	265-2274	\$3.95
O. Barbed Fitting, 1/4" NPT	265-2272	5.95

P. Reinforced Air Hose

Sturdy 1/4" I.D. rubber air hose reinforced to withstand air pressures up to 250 PSI. Use for compressed air and vacuum pumps. Works with barbed fittings. Sold by the foot.

Description	Item#	Per Foot
Reinforced Air Hose	265-2273	\$2.50

Q, R Air Handpiece Lube Oil

Description	Item#	Each
Q. Air Handpiece Lube Oil, 2 oz.	850-0980	\$16.90
R. Air Handpiece Lube Oil, 8 oz.	850-0985	25.65

FOREDOM® Optimize your Workspace!

Foredom's Mobile Work Station is a unique and versatile solution for small crowded labs, studios and other work spaces. Built-in electrical outlets, allow multiple powered devices that would overwhelm most work surfaces or benches. A motorized lift adjusts the top platform up and down to work sitting or standing. Heavy duty casters provide ease of transport for shared use wherever needed.

Also see the MF Touch Mobile Work Stations on page 463

(Work Station Only. Equipment Sold Separately)

A. Foredom Mobile Work Station

Specifications:

- Height from floor to top of work platform:
- 43½" at highest setting
- 30½" at lowest setting
- Footprint 16" x 22" x 43½"

Top Work Platform:

- 14¾" square. It features extension trays that swing out to hold work pieces and other small objects. Each extension tray is 8" x 4¼".

Middle Shelf:

- 12¼" x 12½". It comes with a removable yoke for mounting a flexible shaft motor. Remove yoke to hold a micromotor or other similar sized equipment.

Lower Platform:

15⅝" x 9¾" tray for tools and storage. When removed, it reveals holes specifically designed for securely mounting Foredom's Dust Collector (854-2200) after you remove those casters. Made in Taiwan.

- Weight: 44 lbs
- Ship Weight: 53 lbs
- Power Cable: 6" Long

Description	Item#	Each
Mobile Work Station	810-1620	\$765.00

B. Foredom Lighted Work Chamber

Foredom's compact Lighted Work Chamber (10"W x 11"D x 11½"H) keeps dust and debris contained when grinding, sanding, polishing and drilling workpieces that fit in your hand. Complete with LED light and 2½" x 5" diameter flip magnifier. Made in Taiwan

Description	Item#	Each
Lighted Work Chamber	850-0645	\$339.15

C. Foredom Dust Collector

Foredom's variable speed MADC20 Dust Collector is whisper quiet at 52dbA with powerful suction at 115CFM. Polycarbonate collection chamber pre-filters 99% of all debris and HEPA filter eliminates 99.98% of debris up to 0.3micron. Complete with 5 feet of 2¼" diameter vacuum hose. Measures 15¼"L x 15¼"W x 19½"H. 2 Year Warranty. Made in Taiwan

Description	Item#	Each
Dust Collector	854-2200	\$679.15

D. Foredom Jumbo Work Chamber

The Jumbo Work Chamber keeps dust and debris contained when grinding, sanding, polishing and drilling. Semi-enclosed unit offers excellent visibility. Designed to provide full range of motion and comfort. Height: 21". Width: 22¾" at bottom, 12⅝" at top. Depth: 23" including 2¼" diameter hose port in back. Made in Taiwan

Description	Item#	Each
Jumbo Work Chamber	850-0659	\$382.50

A. Matt™ Gold Collector Box

Traps gold and other precious metals for easy retrieval. Has side openings that let you keep your hands and arms in a natural, comfortable working position for reduced fatigue. Protects eyes, skin and clothing from flying dust, particles and brush wires. Keeps your work area clean, reducing time-consuming cleanup and increasing productivity while maintaining a healthier work environment. Features high-impact extruded plastic housing and easy-to-remove, nonglare, clear plastic shield. Attaches to bench with integral C-clamp when needed. Stores easily when not in use. Lightweight, sturdy and completely portable. Does not eliminate the need for safety glasses. Measures 7"W x 7½"D x 8¾"H.

Description	Item#	Each
Matt Gold Collector Box	265-2343	\$74.00

B. Klear-Vue Safety Shield

Sturdy, crystal-clear, plastic shield almost 3/8" thick. Protects you from flying debris while you work at the bench. Has cutouts for your wrists that allow you to hold your hands and tools at a normal working angle. More comfortable and convenient than a grinding box—use when gold containment is not a factor. Provides an extra barrier that protects face, neck and clothing from dust and dirt kicked up by abrasive wheels, polishing compounds and more. Does not eliminate the need for safety glasses. Measures 7"W x 6 1/8"D x 9 7/8"H.

Description	Item#	Each
Klear-Vue Safety Shield	857-1000	\$82.00

C. Face Shield – Complete protection with excellent optics.

This lightweight plastic shield is a must for full face and neck protection against flying chips while grinding, drilling or polishing. Can be worn over dust masks, respirators and glasses with no obstruction of view. Features pivoting visor for easy raising and lowering, molded visor edge for reinforcement, cushioned vinyl comfort band and pin-and-hole adjustable headbands. Visor measures 8"L x 12"W x .040" thick. Does not eliminate need for safety glasses.

Description	Item#	Each
C. Face Shield	270-0210	\$21.00
Replacement Visor	270-0212	6.95
Replacement Vinyl Sweatband	270-0214	3.50

D. Flex Shaft Accessory Set

Includes 90 of our most popular polishing wheels, brushes and buffs, texturing wheels, cut-off discs and felt bobs and brushes, all with 3/32" shanks for your flex shaft. Ideal for grinding, sanding and buffing the insides and outsides of rings and other pieces of jewelry. Use polishing wheels, brushes and buffs for fine polishing, texturing wheels for brushed or satin finishing, cut-off discs for fast sizing of rings and felt bobs and brushes for accessing prongs and other tight areas. Packaged in a convenient 24-compartment plastic storage case.

Description	Item#	Each
Flex Shaft Accessory Set	850-0510	\$79.50

ULTRAMAX® Ultrasonic Polishing Systems

Reduce finishing time by more than 50%!

For more than three decades, Gesswein has brought the benefits of ultrasonic polishing to mold and diemakers. ULTRAMAX units polish slots, ribs and intricate details faster than you could ever do by hand. Feature fast reciprocation and short stroke for making quick work of the most time consuming tasks. Polish everything from milled to rough EDM surfaces to a mirror finish using all grades of finishing stones, diamond tools, ceramic stones and lapping tools with diamond compound (see pp. 104-105). **Choose from four ULTRAMAX units for the right one for your job.**

Our Df and SF units are workhorses; built for power and demanding usage. Our MF unit is an economical, versatile unit capable of ultrasonic, mechanical and brushless operations. The UM-1200 Ultrasonic Polisher is the logical choice for intermittent usage at lower power.

A. ULTRAMAX® SF Power – Ultrasonic Polishing System

Introducing the latest technology in ultrasonic polishing: the new ULTRAMAX SF POWER. The SF POWER is simultaneously the most powerful and a delicate ultrasonic polishing system. From rough grinding to ultra-fine polishing – the ULTRAMAX SF can do it all! With an incredible maximum output of 100W, the ULTRAMAX SF can remove tough, thick EDM scale with large diamond files and ceramic stones. Ultra-fine polishing is achieved with “Nano mode”, which produces a minute stroke length down to 1 micron. A built-in LCD monitor displays the frequency and output settings, and allows the user to select between 3 different power modes: Hard, Soft and Nano.

The frequency, or the number of vibrations per second, is dependent on the type of tool and will range between 17 – 31 kHz, or 17,000 – 31,000 strokes per second. Length of stroke is adjusted by the output and will range from 1 – 30 microns.

3 Modes: Hard, Soft and Nano

Hard Mode – Supplies a constant power (frequency and stroke length) as pressure is applied against the tool, thus allowing for powerful performance.

Soft Mode – Automatically reduces the power (frequency and stroke length) as pressure is applied to the tool, thus preventing over grinding and scratch marks. This mode is suitable for delicate work.

Nano Mode – Allows an ultra-short stroke length of 3 microns or less. This is meant for ultra-fine polishing applications such as mirror finishing that was once only achieved by hand.

Chose between 3 ULTRAMAX SF POWER Sets:

All-Around Set

The All-Around Set can do it all! Set includes SF POWER control box, UF-7401 and UF-9701 handpieces, (details shown on reverse) both the standard attachment tool sets that are available with tough and Nano sets

Ultramax Tough Set

The Tough Set give you the most powerful ultrasonic handpiece (up to 100W of power!) for removing tough EDM scale and heavy duty polishing applications. Includes ULTRAMAX SF POWER control box, UF-7401 handpiece, abrasive tools set and accessory set

Ultramax Nano Set

The Nano Set is meant for general purpose and ultra-fine polishing applications. Set includes ULTRAMAX SF POWER control box, UF-9701 handpiece, abrasive tools set and accessory set.

Optional Control Pedal

Specifications SF POWER (Oscillator)

Frequency: (range)	17- 31 kHz

A

A. ULTRAMAX® DF (Dual-Function) Heavy Duty Polisher

Our most powerful ultrasonic, the DF is the #1 choice for the professional mold polisher. With 45W of max output power, it can handle the most demanding work load and continual use. This dual-function unit gives the versatility of both ultrasonic and mechanical polishing. Supplied with the lightweight, vibration-free UF-9700 ultrasonic handpiece, the DF can also power our full line of Power Hand 3 mechanical handpieces (PH3 adaptor 510-3304 required).

Includes controller, UF-9700 handpiece with 6mm screw thread and the ULTRAMAX tools kit, which consists of 6/4mm tool adaptor #508-3342 (to hold M4 ultrasonic tools on p. 466), handpiece cradle rest and tool box with a 31-piece tool set of four diamond files, three diamond stones, two resin-bonded diamond stones, six ceramic stones, two lapping tools, four flat clamp tool holders, round clamp tool holder, standard handpiece protector sleeve, large beveled handpiece protector sleeve, wrenches, set of earplugs and extra fuse.

Specifications:

Vibration Frequency	20–30kHz
Stroke Length	4–40 microns
Max. Output Power	45W
Electrical	115V or 230V, 1 Ph, 50/60Hz
Controller Measures	6 ³ / ₈ "W x 11"D x 8 ¹ / ₄ "H
Handpiece Measures	5"L x 1 ³ / ₃₂ " dia.

Description	Electrical	Item#	Each
ULTRAMAX DF	115V	500-0210	\$5,395.00
ULTRAMAX DF	230V	500-0211	5,395.00
Replacement UF-9700 Handpiece		500-0205	1,695.00

Tool Set included with purchase of an ULTRAMAX DF.

B. ULTRAMAX® UM-1200 Ultrasonic Polisher

The most affordable ultrasonic polisher for polishing with diamond tools and ceramic stones. The high quality UM-1200 produces 25,000 cycles per second of longitudinal vibration in a small, comfortable handpiece with an invisible minute stroke of 10 to 35 microns from low to high output levels.

Include controller, UM-1200 handpiece with 8mm screw thread standard accessory set (two sintered and six plated diamond tools and two ceramic stones), one flat clamp tool holder, two round clamp tool holders, on/off foot switch, handpiece cradle rest, bench jig, wrench and hex key.

Specifications:

Vibration Frequency	18–25kHz
Stroke Length	10–35 microns
Max. Output Power	39W
Electrical	90–240V, 50/60Hz
Controller Measures	7 ¹ / ₂ "W x 5 ¹ / ₂ "D x 3 ¹ / ₂ "H
Handpiece Measures	5"L x 1 ³ / ₁₆ " dia.

Description	Electrical	Item#	Each
ULTRAMAX UM-1200	90–240V	500-1200	\$1,495.00
Replacement Handpiece	–	500-0101	380.00

B

ULTRAMAX® MF 3-in-1 Complete Package

With either MF TOUCH or MF STANDARD Control Box

The Multi-Function Ultramax MF TOUCH and MF STANDARD are our most versatile polishing systems. They utilize a high-efficiency microprocessor to deliver power to ultrasonic, brushless DC, and brush-type DC handpieces. The MF TOUCH system offers touch screen control and read out while the MF STANDARD has all the same functions utilizing push buttons.

The Complete 3-in-1 Packages Includes:

- MF TOUCH Control Box or MF STANDARD Control Box
- MF Ultrasonic Handpiece: provides 36W of continuously variable power for precision reciprocating action.
- BH-60 Rotary Handpiece: delivers 50,000rpm utilizing a 230W brushless rotary motor for incredible power—even at low speeds! Provides ample torque at all times to ensure fast and smooth metal removal.
- Z-6X or Z-2X Power Hand Reciprocating Profiler: comes complete with powerful 30V DC air-cooled motor and sealed bearings. Use for polishing flat surfaces, deburring, filing, stoning, scraping, lapping and draw-stoning deep cavities. They operate with minimal vibrations to reduce fatigue and have flexible power cords for easy reach. Special V-shaped chucking system firmly secures a wide variety of abrasives and other tools such as steel files.
- 3-in-1 MF Cabinet: Organize your workbench with the 3-in-1 Cabinet. With a separate handpiece holder for each handpiece it's easy to reach your handpieces when you're ready to work. Includes two drawers with plastic inserts for storing your tools and polishing supplies. The cabinet is made of 1 mm thick powder-coated steel sheet to provide a sturdy base. Excellent accessory for those who want to keep the work environment organized!
- Handpiece rest
- Tool changing wrenches
- 1mm & 3mm flat clamp tool holders
- 3mm round tool holder
- Variable speed foot pedal

A. ULTRAMAX® MF TOUCH 3-in-1

Description	Item#	Each
MF TOUCH 3-in-1 Complete (w/ Z-6X Proflier)	500-0232	\$4,395.00
MF TOUCH 3-in-1 Complete (w/ Z-2X Proflier)	500-0233	4,395.00
MF TOUCH Control Box, Ultrasonic Handpiece, and Foot Pedal	500-0237	2,995.00

B. ULTRAMAX® MF STANDARD 3-in-1

Description	Item#	Each
MF STANDARD 3-in-1 Complete (w/ Z-6X Proflier)	500-0230	\$3,895.00
MF STANDARD 3-in-1 Complete (w/ Z-2X Proflier)	500-0231	3,895.00
MF STANDARD Control Box, Ultrasonic Handpiece, and Foot Pedal	500-0220	2,495.00

Accessories and Replacements	Item#	Each
Replacement Ultrasonic Handpiece	500-0222	510.00
Replacement Brushless Rotary Handpiece	500-0224	525.00

A. ULTRAMAX® MF TOUCH Work Station

Work anywhere in your shop! The combination of the Foredom® Mobile Work Station and the MF TOUCH Complete Package 3-in-1 allows you to quickly and effortlessly maintain your molds around your shop.

The MF TOUCH Complete Package 3-in-1 includes a 36 Watt ultrasonic handpiece, a reciprocating profiler of your choice (Z-2X or Z-6X), a 50,000rpm rotary handpiece, and the 3-in-1 MF TOUCH metal cabinet. The 3-in-1 Consumable Set is also included and contains 83 polishing tools and abrasives specifically selected for the MF TOUCH Complete Package. Pint of Green Stoning Oil included.

The Foredom Mobile Work Station has a motorized lift that adjusts the top platform up and down (from 43½" at the highest, down to 30½" at the lowest) at the touch of a button. Heavy duty casters provide ease of transport throughout your work environment. Pivoting kickstand increases stability for safely managing the Work Station when at a standstill. The Work Station provides 3 electrical outlets for powering the MF TOUCH or other power tools and includes a 6 foot power cable to power the unit itself.

The top platform is a 14¾" square that features extension trays that swing out to hold workpieces and other objects, each tray is 8" x 4¼". These trays are ideal for holding any accessories or other items while operating the Ultramax MF TOUCH. The middle shelf is 12¼" x 12¾" and the bottom shelf measures 15⅝" x 9¾". The Foredom Mobile Work Station comes assembled, except for the middle shelf.

ULTRAMAX® MF TOUCH Work Station Kit includes:

- MF TOUCH Control Box
- Ultrasonic Handpiece, 36 watts
- BH-60 Brushless Rotary Handpiece
- Choice of Reciprocating Profiler Handpieces Z-6X or Z-2X
- 3-in-1 MF TOUCH Cabinet (see previous page for specs.)
- Foredom Mobile Work Station
- Handpiece rest
- Tool changing wrenches
- 1mm & 3mm flat clamp tool holders
- 3mm round tool holder
- Variable speed foot rheostat
- Pint of Supreme Green Stoning Oil
- 3-in-1 Consumable Set

Description	Item#	Each
MF TOUCH Work Station Kit with Z-6X	500-0250	\$5,495.00
MF TOUCH Work Station Kit with Z-2X	500-0251	5,495.00
Foredom Mobile Work Station (only)	810-1620	765.00

B. 3-in-1 Consumable Set

Set of polishing supplies for Ultramax MF Complete Packages

This set contains 83 polishing consumables specifically selected for the Ultramax MF 3-in-1 Complete Packages. Provides the full range of abrasive consumables from aggressive polishing and grinding, up to diamond and mirror polishing. Keep your tools in the convenient carrying case or store in the MF metal cabinet.

Includes:

- Diemaker All Grit Stone Set
- Mounted Stone Sampler Set
- New Super Stone All Grit Set
- Round Ceramic Stone Set
- Finishing Stone Holder
- 6 Grades of Diamond Compound
- Soft End Brushes
- Hard End Brushes
- Soft Cup Brushes
- Hard Cup Brushes
- Soft Wheel Brushes
- Hard Wheel Brushes
- Soft Felt Bob Set
- Hard Felt Bob Set
- GMX Soft Cylinders
- Diamond Files
- Rockwood & Soft Sticks
- Supreme Green Stoning Oil

Description	Item#	Each
3-in-1 Consumable Set	500-0234	\$395.00

B

Accessories for ULTRAMAX® DF, SF, and SF Power UF-9701 Handpiece

Create your own polishing tools by inserting stones and lapping tools into the appropriate steel clamp. Use the M6 (6mm thread) clamp tool holders in the UF-9700 ultrasonic handpiece supplied with ULTRAMAX DF and SF units, and the SF Power UF-9701 handpiece. Not for use with SF Power UF-7401 handpiece (8mm thread). For optimum machine performance, choose a medium clamp tool holder for tools up to 6.35mm in width and a large clamp tool holder for tools up to 15mm in width. Replacement screws are available from stock

See website for 8mm thread accessories for SF Power UF-7401 Handpiece

All drawing measurements are in millimeters

A. 6mm Thread Round Clamp Tool Holder

For round tools

For Dø (Diameter)	Item#	Each
A. 2.0mm round tool	508-3508	\$36.50
2.35mm (3/32") round tool	508-3509	36.50
3.0mm round tool	508-3512*	36.50
3.3mm (1/8") round tool	508-3516	36.50
4.0mm round tool	508-3520	36.50

*Supplied with ULTRAMAX DF/SF

B. 6mm Thread Medium Clamp Tool Holder

For flat tools up to 6.35mm (1/4") wide

For T (Thickness)	Item#	Each
B. 0.5mm flat tool	508-3495	\$36.50
0.8mm flat tool	508-3500*	36.50
1.0mm flat tool	508-3502*	36.50
1.5mm flat tool	508-3504	36.50
2.0mm flat tool	508-3506	36.50
3.0mm flat tool	508-3510*	36.50
3.3mm (1/8") flat tool	508-3514*	36.50

*Supplied with ULTRAMAX DF/SF

C. 6mm Thread Adjustable Clamp Tool Holder

For flat tools 0.1mm to 8.0mm wide

For T (Thickness)	Item#	Each
0.1mm to 1.5mm thick	508-3522	\$69.50

D. 6mm Thread Large Clamp Tool Holder

For flat tools 6.35mm to 15mm wide

For T (Thickness)	Item#	Each
D. 1.0mm flat tool	508-3503	\$36.50
1.5mm flat tool	508-3505	36.50
2.0mm flat tool	508-3507	36.50
3.0mm flat tool	508-3511	36.50
3.3mm (1/8") flat tool	508-3515	36.50
4.0mm flat tool	508-3518	36.50

E, F ULTRAMAX® DF/SF Accessories and Replacements

Not for use with SF Power units

Description	Item#	Each
E. UF-9700 Handpiece only (6mm thread)	500-0205*	\$1,695.00
6/4mm Tool Adapter (to hold M4 ultrasonic tools)	508-3342*	13.25
F. Handpiece Cradle Rest	510-1130*	14.60
Standard Handpiece Protector Sleeve	500-0208*	12.75
G. Variable-Speed Foot Rheostat	500-0206	\$149.00

*Supplied with ULTRAMAX DF/SF

Accessories for ULTRAMAX® MF units

Create your own polishing tools by inserting stones and lapping tools into the appropriate steel clamp. Use 6mm thread for the MF handpiece.

A. 6mm Round Tool Holders

For D \emptyset (Diameter)	Item#	Each
2.0mm Round	508-3132	\$32.00
A. 3.0mm Round	508-3133*	32.00
1/8" Round	508-3134	32.00

*Supplied with ULTRAMAX MF

B. 6mm Flat Clamp Tool Holders

For T (Thickness)	Item#	Each
0.5mm Flat	508-3120	\$32.00
B. 1.0mm Flat	508-3122*	32.00
2.0mm Flat	508-3124	32.00
3.0mm Flat	508-3126*	32.00
1/8" Flat	508-3128	32.00

*Supplied with ULTRAMAX MF

C. ULTRAMAX® MF Accessories and Replacements

Description	Item#	Each
C. MF Ultrasonic Handpiece	500-0222*	\$510.00
Variable Speed Foot Pedal	500-0221	60.00
50,000 Brushless Rotary Handpiece	500-0224	525.00
6mm to 4mm adapter	508-3114	32.00
Cradle Rest	510-1130*	14.60

*Supplied with ULTRAMAX MF

Accessories for ULTRAMAX® UM-1200 units

Create your own polishing tools by inserting stones and lapping tools into the appropriate steel clamp. Use 8mm thread for the UM-1200 handpiece

Important note: Always use bench jig when changing tools or holders to avoid damaging handpiece transducer wires.

D. 8mm Thread Round Tool Holders

For D \emptyset (Diameter)	Item#	Each
1.0mm round tool	500-0134	\$32.00
2.0mm round tool	500-0135	32.00
2.35mm (3/32") round tool	500-0136	32.00
D. 3.0mm round tool	500-0109*	28.00
1/8" round tool	500-0137	32.00

E. 8mm Thread Flat Clamp Tool Holders

For T (Thickness)	Item#	Each
0.5mm flat tool	500-0111	\$28.00
0.8mm flat tool	500-0131	28.00
E. 1.0mm flat tool	500-0108*	28.00
2.0mm flat tool	500-0132	28.00
3.0mm flat tool	500-0110	28.00
1/8" flat tool	500-0133	28.00

*Supplied with ULTRAMAX UM-1200

F, G ULTRAMAX® UM-1200 Accessories and Replacements

Description	Item#	Each
F. 8/4mm Tool Adapter (to hold M4 ultrasonic tools)	500-0129	\$35.00
G. Replacement UM-1200 Handpiece, 8mm thread	500-0101*	380.00
Replacement Standard Accessory Set	500-0140*	126.00
Replacement On/Off Foot Switch	500-0107*	45.00
Replacement Handpiece Cradle Rest	510-1130*	14.60

*Supplied with ULTRAMAX UM-1200

ULTRAMAX® Diamond Tools M4 (4mm thread)

All **ULTRAMAX® Diamond Tools** are made to match the resonant frequency of Gesswein ULTRAMAX units. For best results, use only **ULTRAMAX® Diamond Tools**. The manufacturer will not accept any liability for another brand of tools. All measurements in millimeters. All lengths given are cutting lengths. Please check drawings for overall tool dimensions.

- Mount in 6/4mm tool adapter #508-3342 for use with DF, SF
- Use #508-3114 6/4mm tool adapter for MF-ULTRAMAX
- Mount in 8/4mm tool adapter (see #500-0129 p. 465) for use with UM-1200

S. SUPER Ceramic Diamond Stones

SUPER Ceramic Diamond (SCD) Stones combine ceramic fibers with multiple layers of evenly distributed diamond particles to ensure continuous cutting action. SCD Stones will cut and polish flat to a surface, allowing fast and accurate polishing in open areas. SCD Stones are perfect for polishing ribs, hard-to-reach slots and sidewalls, and milled or EDM flat surfaces. Their strong, durable ceramic fiber construction makes them ideal for use in ultrasonic polishers and mechanical profilers or by hand. Available in flat and round shapes in four color-coded grits.

Ceramic Stones *Strong yet incredibly flexible!*

New Super Stone (NSS) offers an improved cutting ability, increased heat resistance, and longer life. Made of long ceramic fibers that will not break even under the most strenuous conditions, the NSS can be used in ultrasonic polishers, reciprocating profilers, or by hand (see Ceramic Stone Holders on p. 469).

These strong yet flexible stones are ideal for polishing small intricate areas on all types of metals producing consistent and uniform surface finishes. NSS is non-loading and can be shaped with the Super Dresser #351-0300 (see p. 26). Available in 9 easy to identify color coded grits from 80 to 1200. Made in Japan.

For our selection of Cristone Ceramic Stones see p. 27.

A. MicroFlex® UltraSense™ Powder-Free Nitrile Glove The alternative to latex!

Powder-free UltraSense is a breakthrough in nitrile technology, providing the fit and feel of latex while eliminating the possibility of natural rubber latex allergic reaction. Provides reliable barrier protection against many hazardous and infectious substances. Highly elastic for easy conformance and reduced fatigue. Textured fingertips offer excellent grip in wet or dry conditions. Ambidextrous. Beaded cuff. Polymer-coated for easy donning. Length: 245mm (9 $\frac{5}{8}$ "). Thicknesses: 5.1mil finger, 3.5mil palm. Color: blue. Sold in dispenser box of 100.

Size	Item#	BOX of 100
Small	805-1072	\$24.75
Medium	805-1071	24.75
Large	805-1070	24.75

B. MicroFlex® NeoPro® EC Glove – Ideal for rhodium plating!

Exceptional comfort in a tough synthetic glove. NeoPro EC offers the barrier protection of a synthetic with the comfort, fit and feel of natural rubber latex. Offers 90% more puncture resistance than natural rubber latex. Resists a broad range of chemicals. Ideal for rhodium plating, electrocleaning and most other plating operations. Textured fingertips provide a secure grip. Extended, beaded cuff guards against splashes and spills. Made of polychloroprene, the generic name for neoprene. Ambidextrous. Powder-free and polymer-coated for easy donning. Length: 300mm (11.8"). Thicknesses: 8.3mil finger, 6.3mil palm, 4.7mil cuff. Color: green. Sold in dispenser box of 50.

Size	Item#	BOX of 50
Small	805-1052	\$26.75
Medium	805-1051	26.75
Large	805-1050	26.75

C. Latex Gloves

Disposable latex gloves for everyday use. Prevent skin problems that arise from chemical reactions caused by constant exposure to soaps, solvents and other mild chemicals. Powdered to go on and off easily. Available in small, medium and large sizes. Sold in boxes of 100.

Size	Item#	BOX of 100
Small	805-1043	\$14.95
Medium	805-1041	14.95
Large	805-1042	13.95

D. Heat-Resistant Gloves with Aluminized Back

Gloves are manufactured from 22 oz. basket-weave fiber blended with fiberglass. Aluminized back protects against radiant heat while wool lining protects against contact heat. Specially designed for better cooling, comfort and safety. Gloves have been used in temperatures up to 800°F for brief contact. Wide cuff openings allow gloves to be dropped with the flick of the wrist in case of excess heat buildup. Measure 14" long.

Description	Item#	Each
Heat-Resistant Gloves, pair	816-1020	\$53.95

E, F Heat-Resistant Gloves

For safe, easy handling of hot objects. Gloves are fully lined with black felt and manufactured from 22 oz. basket-weave fiber blended with fiberglass. Ideal for use in temperatures up to 1,000°F for brief contact. Extra-wide cuff openings allow gloves to be dropped with a flick of the wrist in case of molten splash or excess heat buildup.

Description	Item#	Each
E. 14" Gloves, pair	816-1015	\$41.95
F. 23" Gloves, pair	816-1016	76.50

A. Neoprene Apron

Heavy-duty double-coated yellow neoprene apron for broad-spectrum protection from a wide range of chemicals, including acids, caustics and solvents. Features extra-long neck and waist ties. Measures 35"W x 45"L. Weighs 12½ oz. Recyclable.

Description	Item#	Each
A. Neoprene Apron	827-1509	29.95

B. Bib Apron with Pockets

Protects clothing and holds most frequently used tools close at hand. Includes extra-long waist strings for front tying. Made of machine washable heavyweight cotton. Available with or without pockets. Comes in royal blue with our white, screen-printed Gesswein logo. Measures 18½"W x 25"L. Made in USA.

Description	Item#	Each
B. Bib Apron with pockets	827-1201	\$19.99
Bib Apron without pockets	827-1200	17.95

C. Suede Bib Apron

This durable, comfortable apron protects clothing while you work with power equipment and hand tools. Has no pockets in which debris can be trapped. Made of tanned, split, rust-colored heavyweight suede. Includes adjustable ties with brass grommet reinforcements. One size fits all. Measures 24"W x 36"L.

Description	Item#	Each
Suede Bib Apron	827-1507	\$32.00

D. Fire-Resistant Apron

Made of fire-resistant fabric ideal for welding applications. Features full-coverage design for protection of neck, chest and lap, small chest pocket, large waist pocket, bottom flap for catching runaway parts, comfortable neck band and extra-long waist strings for front tying. Comes in navy blue. One size fits all. Measures 27"W x 36"L.

Description	Item#	Each
Fire-Resistant Apron	827-1508	\$27.80

E. Lab Coat

Full-length coat with long sleeves, notched lapel, hemmed cuffs and bottom. Includes two breast pockets, two hip pockets and reinforced side slit for easy access to inside pocket. Made of permanent-press, washable polyester/cotton blend. Comes in white with royal blue embroidered Gesswein logo. Can be burned to reclaim precious metals. Made in USA.

Description	Fits Sizes	Item#	Each
Small Men's Coat	36-38	827-1500	\$58.50
E. Medium Men's Coat	40-44	827-1501	58.50

F. Klear-Vue Safety Shield

Sturdy, crystal-clear plastic shield almost ¾" thick. Protects you from flying debris while you work at the bench. Has cutouts for your wrists that allow you to hold your hands and tools at a normal working angle. More comfortable and convenient than a grinding box—use when gold containment is not a factor. Provides an extra barrier that protects face, neck and clothing from dust and dirt kicked up by abrasive wheels, polishing compounds and more. Does not eliminate the need for safety glasses. Measures 7"W x 6½"D x 9⅞"H.

Description	Item#	Each
Klear-Vue Safety Shield	857-1000	\$82.00

A. 3M™ Half-Facepiece Respirator

Protects you from dusts, mists and airborne contaminants. NIOSH rated N95 for protection from respirable silica (in investment, quartz, tripoli and more). Also suitable for rhodium plating. Features a soft, pliable silicone face seal for a secure, gapless fit on most every face shape. Extremely comfortable to wear, especially for extended periods of use. Roomy nose chamber and special 3M Cool Flow valve ensure easy natural breathing while reducing heat and condensation in the facepiece. Complete respirator includes facepiece, two deluxe cartridges, two deluxe prefilters and two retainer rings. NIOSH approved.

B-D 3M™ Disposable Particulate Respirators

Classic disposable N95 *particulate* respirator designed to help provide comfortable and protection against certain non-oil based particles. Features Advanced Electrostatic Media, welded strap attachment, soft nose foam, and an adjustable noseclip to help ensure a custom and secure seal.

Disposable N95 *particulate flatfold* respirator features soft inner material and 3M™ Cool Flow™ Valve to provide comfortable, reliable respiratory protection. Ideally suited for work situations involving heat, humidity, or long periods of wear.

Economical N95 disposable *particulate welding* respirator provides respiratory protection for applications where metal fumes may be present. Features 3M™ Cool Flow™ Valve, braided headband and adjustable M-noseclip providing a custom and secure seal, an economical option for welders.

E

E. Disposable Face Mask with Anti-fog Shield

Protect against airborne particles, mists and fluid splashes with our disposable face mask. Inner and outer facings offer a soft protection barrier while assuring comfort and breathability.

Wraparound eye shield protects against particle. Full-width nose piece provides a custom fit. It is comfortable and fits a wide range of wearers. Lightweight, elastic earloop mask is easy to put on and remove. Filters particulate matter at 99% efficiency

Description	Item#	Each
Disposable Face Mask with Anti-fog Shield, pkg. of 25	805-0998	\$19.95

F. Corded Earplugs

These soft foam tapered plugs fit easily and securely in the ear. Made of hypoallergenic material. Have noise reduction rating of 29 dB when used as directed. Connected by a braided plastic cord that prevents loss. Easy to carry and handy to have for visitors who might be exposed to loud noise. Sold in packages of 10 pairs and boxes of 100 pairs (each pair is individually packaged for cleanliness).

Description	Item#	Each
Corded Earplugs, pkg. of 10 pairs	805-1061	\$3.15
Corded Earplugs, box of 100 pairs	805-1060	31.80

F

A. Face Shield – Complete protection with excellent optics.

Lightweight plastic shield for full face and neck protection while grinding, drilling or polishing. Can be worn over dust masks, respirators and glasses. Features pivoting visor for easy raising and lowering, molded visor edge for reinforcement, cushioned vinyl comfort band and adjustable headbands. Visor measures 8"L x 12"W x .040" thick. Does not eliminate need for safety glasses.

Description	Item#	Each
A. Face Shield	270-0210	\$21.00
Replacement Visor	270-0212	6.95
Replacement Vinyl Sweatband	270-0214	3.50

A

B. Safety Glasses

Comfortable, lightweight safety glasses with high-impact plastic lenses for full eye protection when drilling, polishing and more. One size fits all. Meet ANSI Z87.1 requirements.

Description	Item#	Each
Safety Glasses	270-0205	\$4.30

B

C. Aspen Safety Glasses

Our Aspen Safety Glasses provide eye protection against most common eye hazards of polishing and benchwork except for severe impacts. Feature polycarbonate lenses, browbar and side shields. Also offer UV protection. Meet ANSI Z87.1 requirements.

Description	Frame	Item#	Each
Aspen Safety Glasses	Clear plastic	270-0123	\$11.15

C

D. Panaspec Plus Safety Glasses

Feature impact-resistant clear polycarbonate lenses in polycarbonate frames that provide eye protection against most common eye hazards of benchwork, polishing and more. Side panels and browbar help provide protection from the side and from above the eye. Meet ANSI Z87.1 requirements.

Description	Item#	Each
D. Panaspec Plus Safety Glasses	270-0102	7.25
Replacement Lens (clear)	270-0112	3.60

D

E. Safety Goggles

A must for polishing, buffing and grinding. Comfortable and lightweight, they easily fit over glasses. Have polycarbonate lens. The sides and top are perforated to reduce fogging. One size fits all. Meet ANSI Z87.1 requirements.

C

A. Benchtop Sandblaster – Dual Entry

Compact unit with solid molded construction for eliminating annoying leaks, large viewing glass, adjustable pressure regulator and self-cleaning nozzle with replaceable orifice. Has left-hand and right-hand heavy-duty rubber gloves and foot pedal blast control. It sits comfortably atop the workbench and can be easily moved when not in use. Holds and recirculates coarse or fine media, including matte sand, crushed ruby or glass beads (see p. 478). Includes two replacement ceramic orifices, internal light bulb and 5 lbs. Quartz abrasive.

Specifications:

Media Capacity: 5 lbs.
 Air requirement: 25–100 PSI at 2.4 CFM
 Dimensions: 11½"W x 12"D x 18"H
 Ship. Wt.: 18 lbs.

Description	Electrical	Item#	Each
A. Dual Sandblaster	110V, 50/60Hz	854-0060	\$585.00
	220V, 50/60Hz	854-0065	\$75.00
Replacement Viewing Panel (no hardware)		854-0056	36.50
Replacement Nozzle Assembly Kit (two ceramic orifices and two setscrews)		854-0057	39.25
Replacement Gloves, pair		854-1278	11.75

B. Wide View Sandblaster – Dual Entry

This compact unit provides all the features you've wanted in a sandblaster: crystal-clear acrylic cabinet lets in plenty of light for easy viewing of work in progress; large lid opens wide to accommodate big pieces and is lined with replaceable Protective Shield to prevent frosting; pivoting nozzle adjusts to differently sized pieces; on/off switch located inside the cabinet offers quick flow control; rear-mounted air filter eliminates clump-causing moisture and includes a quick-disconnect fitting for your air hose; integral dust filter and lid gasket keep hazardous dust out of the workplace; and metal grate holds pieces above the abrasive media. Permits two-handed operation for easy working. Holds and recirculates coarse through fine media, including matte sand, crushed ruby or glass beads (see p. 478). Imported.

Specifications:

Media Capacity: 5 lbs.
 Air Requirement: 42–70 PSI
 Dimensions: 19"W x 17"D x 16"H
 Ship. Wt.: 19 lbs.

Description	Item#	Each
B. Wide View Sandblaster	854-0080	\$555.00
Replacement Protective Shield	854-0081	16.95
Replacement Gloves	854-0082	13.00

C. Crushed Ruby

Synthetic ruby crushed to a 212–300 micron range for imparting a unique matte finish with a subtle sparkle. Provides best results with 60–80 PSI of air pressure. Cannot be used with Microetcher due to micron size. Sold in 5 lb. package.

Description	Micron	Item#	Each
Crushed Ruby, 5 lbs.	212–300	854-1297	\$149.00

A, B Power Sandblaster #20

Our heavy-duty Power Sandblaster #20 features 6 CFM gun for fast, powerful blasting and large front-opening door and work chamber for accommodating large or multiple parts. Holds and recirculates 20 lbs. of abrasive media sold separately (see p. 478). Removes fine dust particles via a built-in dust collector with easily replaceable filter for safe, efficient, clean operation. Requires 1 1/2 HP air compressor.

Can be mounted on a bench or an optional stand at a comfortable working height. Accepts optional pencil gun attachment with 1/16" orifice and optional 12 CFM gun jet for double the blasting power (requires 3 HP air compressor). Made in USA.

Features:

- 14-gauge welded steel construction
- Heavyweight rubber gloves
- Dust collection system
- Fluorescent light
- Double-laminated safety viewing glass
- 6 CFM tungsten carbide nozzle and jet
- Trapdoor for easy media change
- Pressure regulator and gauge
- Safety foot valve blasting control

Specifications:

Airflow: 6 CFM (12 CFM with optional gun jet)

Dimensions:

Overall: 21"W x 18½"D x 38½"H
 Inside: 20"W x 18"D x 18"H
 Door Opening: 20"W x 15"H
 Viewing Glass: 18"W x 10"H
 Dust Collector: 15" dia. x 24"H
 Ship. Wt.: 165 lbs.

Description	Electrical	Item#	Each
A. Sandblaster #20 	115V, 1 Ph, 60Hz	854-0015	\$740.00
	230V, 1 Ph, 50/60Hz	854-0016	1,250.00

Optional 12 CFM Gun Jet		854-0034	18.75
Replacement 24" Gloves, pair		854-0040	36.00
Replacement Dust Filter		854-0036	18.00
Replacement Viewing Glass Shields, pkg. of 10		854-0038	6.50

C. Microetcher™ Model E

A reliable, precise miniature tool designed for jewelers. Small in size yet powerful enough for devesting castings, removing oxides, etching, texturing, preparing surfaces for soldering, creating matte surface finishes and detailing, especially in tight areas. Features a 1/2" diameter handpiece with tungsten carbide tip, extra-flexible 6' air line and sensitive finger control valve for precise on/off action. Use a Prefilter/Coalescing Filter #850-7353 (see p. 248) for your compressed air line to prevent moisture from entering the media reservoir and clogging the sandblaster. Recommended for use with Aluminum Oxide #854-1294, Jet Brite Glass Beads #810-1200 or Glass Beads #854-1291 (see p. 478). Requires 60–100 PSI air supply.

Includes:

- Handpiece with replaceable 0.048" carbide tip
- Push-button finger control valve
- Abrasive reservoir with two quick-switch interchangeable jars for rapid media change.
- 6' flexible air line with fittings

Description	Item#	Each
Microetcher Model E	854-1283	Call for Pricing

Sandblasting Medias

Sandblasting abrasive medias have many different applications, including cleaning, peening metal, removing investment from cast parts, removing imperfections, blending surfaces, deburring, finishing, decorating and descaling. Work is cleaned, deburred, decorated and cold-worked without etching, removing surface details or leaving undesirable residues.

A

A. Aluminum Oxide

Aluminum oxide, 90 micron, tan in color. Allows rapid removal of oxides, scales, cements, resins and investment. Excellent for soldering and preparing metallic surfaces for bonding. Can be used in any sandblaster. Sold in 1 lb. package.

Description	Micron	Item#	EACH Prices	
			1-4	5+
Aluminum Oxide, 1 lb.	90	854-1294	\$21.30	\$18.11

B

B. Matte Sand

Graded aluminum oxide in a 300–350 micron range for imparting a beautiful matte finish coarser than glass beads and slightly finer than crushed ruby. Produces a finish similar to the traditional quartz abrasive but contains no silica. Yields best results with 50–80 PSI of air pressure. Cannot be used with Microetcher due to micron size. Sold in 5 lb. package.

Description	Micron	Item#	EACH Prices	
			1-4	5+
Matte Sand, 5 lbs.	300–350	854-1298	\$42.50	\$40.38

C

C. Crushed Ruby

Synthetic ruby crushed to a 212–300 micron range for imparting a unique matte finish with a subtle sparkle. Provides best results with 60–80 PSI of air pressure. Cannot be used with Microetcher due to micron size. Sold in 5 lb. package.

Description	Micron	Item#	Each
Crushed Ruby, 5 lbs.	212–300	854-1297	\$149.00

D

D. Jet Brite Glass Beads

Glass beads in the 50–105 micron range coated with silicone to repel moisture. Stay separated to prevent clogging of sandblaster. Impart an attractive satin-blasted finish. Can be used with any sandblaster. Air pressure must be kept under 45 lbs. to obtain best results and prevent beads from shattering. Sold in 5 lb. package.

Description	Micron	Item#	EACH Prices	
			1-4	5+
Jet Brite Glass Beads, 5 lbs.	50–105	810-1200	\$34.00	\$32.30

E

E. Glass Beads

Glass beads, 100 micron. Actual round beads, not cupels (oval-shaped beads with seams that crack easily), so they cost less in the long run. Impart an attractive satin-blasted finish. Can be used with any sandblaster. Air pressure must be kept under 45 lbs. to obtain best results and prevent beads from shattering. Sold in 5 and 25 lb. packages.

Description	Micron	Item#	Each
Glass Beads, 5 lbs.	100	854-1291	\$18.50
Glass Beads, 25 lbs.	100	854-1292	69.95

A. SilentAire Compressor – Quiet yet powerful!

The **Val-Air** is a premium value model with cast aluminum lid with cooling fins for improved ventilation and Filter-Regulator with auto-drain feature and condensate bottle. With a coalescent filter to 0.01 micron.

Sil-Air is the same without the aluminum lid with cooling fins or coalescent filter.

Both versions feature powerful 1/2 HP motors which provide over 2 CFM of air. They can handle up to 10 large Wax Injectors and are fully automatic. Both make about as much noise as a refrigerator, so you can work without distraction. Both measure 14" dia. x 22"H. Weigh 58 lbs. May require additional filter at the air tool to eliminate condensation that can form in very long airlines. Accepts 1/4" male fittings. 220V units also available. See website for details. Made in Italy.

Features:

- Tank and line pressure gauge
- Line pressure regulator
- Moisture trap and filter
- Safety valve
- Air-intake filter

Specifications:

Motor	1/2 HP

Oil-Free Air Compressor, Drop Ship	110V, 600 watts	265-3122	595.00

B

C. California Air Tools 4610AC – Ultra Quiet & Oil-Free Air Compressor

Ultra-quiet, (60 dB) oil-free and lightweight. Designed to increase duty cycle and allow for longer continuous run times. Powerful 1.0 HP motor is engineered to dissipate heat, allowing for a cooler operation while reducing wear. The motor operators at only 1680 RPM creating less noise and less wear. The Oil-Free Dual Piston Pump System is engineered for high performance and durability. Made in China.

Features:

- Two pressure control gauges
- Comes complete with Air Filter
- Two universal 1/4" quick connectors
- Thermal Overload Protector
- Time to fill tank - 130 Seconds. Recovery time from 90 PSI to 120 PSI - 30 Seconds

Specifications:

Motor:	1 HP	Noise level:	60 decibels

C

A, B Knew Concepts Precision Saw Frames

Cam Lever Tension

New and improved saws from Knew Concepts. Designed for rapid, repetitive blade changes, when piercing for example. The tension does not change when re-setting the blade. Simply flip the cam lever forward to release tension, re-position and clamp the blade, and flip the lever to the rear, and you are sawing at proper tension.

Knew Concepts Saws are designed for maximum rigidity to eliminate or minimize blade breakage. Frames are made of heat treated aluminum with cutouts to further reduce the weight making these the lightest and most comfortable saw frames in the industry.

The unique blade-tensioning system makes mounting the sawblade extremely fast and easy (and without the usual dents in your sternum).

Clinical trials have shown that the color red promotes accuracy so Knew Concepts has chosen this color for their saw frames. Available in 2 depths, 3" and 5". Both frames accommodate standard 5¹/₈" jeweler's sawblades.

Description	Item#	Each
A. 3" Saw with Cam Lever	812-1297	\$66.95
B. 5" Saw with Cam Lever	812-1298	70.95

C. Matt™ Miter Box and Saw Set

Includes extruded aluminum miter box with stop-lock and steel back saw. Slices wax bars, rods and ring tubes into tablets with perfectly straight and parallel walls or tapered sides. Miter box holds the ring tube firmly in place to eliminate hand strain. Stop-lock lets you cut multiple tablets of the same thickness. Rugged steel sawblade cuts through tubes with very little effort, leaving a smooth finish. Miter box measures 6"L x 2"W. Sawblade measures 6¹/₂"L x 2"D.

Description	Item#	Each
C. Miter Box and Saw Set	265-2346	\$56.95
Replacement Sawblade	265-2348	17.00

D. Razor Saw

A must for cutting metal, wood and plastic rod and tubing. Features specially hardened, rigid thin blade with fine teeth (32 teeth per inch) ideal for making straight cuts. Lets you cut with light pressure to prevent tubing collapse. Measures 9¹/₈" overall length. Blade measures 4¹/₂"L x 7/16"D.

Description	Item#	Each
Razor Saw	812-1281	\$6.50

E. Gesswein® Lube-Stik

Use on grinding, cutting, drilling, piercing or similar tools to speed up production and increase tool life. Reduces friction and heat buildup so that tools stay sharper, work faster and cut smoother. Easy to use—just run your tools into the soft lubricant every so often. Can also be used to reduce the effort needed for drawing operations. Supplied in a handy push-up dispenser tube.

Description	Item#	EACH Prices

B. Super Pike Sawblades

These quality Swiss blades stand out as the finest quality and stay sharper far longer (sharper teeth) than competitive saw blades. Manufactured slightly differently with an added heat treatment process which makes these blades harder and quite flexible, but not more fragile thus allowing you to saw harder materials. These blades are also given a thin coating that acts like a cutting lubricant making them cut with less resistance. Made in Switzerland. Sold by the gross (144 each).

C

A. Pneumatic Stone Setting Machine – The unit of choice for setting diamonds, colored stones and even synthetics with impressive speed and precision.

Available as a table top unit, this machine is a must for all jewelry manufacturers. Represents a big leap forward in stone setting technology letting you quickly and easily tube set, burnish, bezel and bead set both flat and curved surfaces, as well as channel set in single and double rows. Simplifies many complicated procedures, taking the guesswork out of difficult jobs. Offers the precise control you need each and every time to set stones perfectly.

Comes with appropriate holders for both ring and flat items. The Table Top model includes two rollers and two punches for setting round stones. Sizes 1.75, 2.00, 2.25, 2.50, 2.75 and 3.00mm are available standard diameters but other sizes are also available. Please discuss your requirements when placing your order.

Features:

- Easy to learn and operate, even for novices—requires no special stone setting experience.
- Lets you set stones quickly and consistently, making it perfect for high-volume production.
- Eliminates the need for time-consuming manual setting.
- Has precision-machined tooling for easy changing.

Specifications:

Electrical: 220V, 1 Ph, 100W, 50/60Hz
 Dimensions: 15³/₄"W x 9"D x 23⁵/₈"H
 Air Requirement: 90 PSI
 Pressure Readout: Analog
 Net Wt./Ship. Wt.: 115 lbs./132 lbs.
 Item# **265-0348**

Please Call for Pricing

B. Premium Loose Stone Detector – Identify loose stones quickly and definitively.

Efficiently isolate stones that are loose from those that are not. Invaluable for checking settings after ring sizing. Works especially well for clusters of many small stones, such as pavé settings. Saves time over traditional methods.

Easy to use: slide your ring onto the padded mandrel, turn on unit and experiment with different vibration frequency and power settings until you are positively satisfied that every setting is sound. Includes a magnifier with flexible stand for taking a good, close look at potential problem areas as the detector vibrates. Combine that with your own light source, and no loose stone will escape your attention (see lighting pp. 335-339).

Compact enough (13"W x 9"D x 7¹/₄"H) to store out of the way. Finished in matte black to eliminate most distracting reflections. Electrical: 110~240V, 50/60Hz. Weighs 22 lbs.

Description	Item#	Each
Premium Loose Stone Detector	857-0030	\$3,995.00

C, D Marathon Micromotor Systems for Setters

Available as a complete set with the Marathon Controller, 35,000rpm Rotary Handpiece, Freedom Hammer Handpiece and On/Off Rheostat or simply the Marathon Controller with the Freedom Hammer Handpiece only.

The Marathon Micromotor Controller features dial adjustable speed control, overload cutoff switch, forward/reverse switch, and accepts a variable speed foot rheostat and a wide variety of micromotor handpieces. Electrical: 110~220V, 50/60Hz. Output voltage: 0~30V DC (continuously variable). Measures 4¹/₂"W x 5³/₄"D x 3³/₄"H. Weighs 2.6 lbs.

The 35,000rpm Rotary Handpiece features a well-balanced ergonomic design that fits in your hand like a pen, convenient quick-tool-change mechanism and flexible phone-type cord. Measures 6"L x 1" to 5/8" dia. Weighs 7.5 oz.

The Freedom Hammer Handpiece is perfect for stone setting - prong work and channel. Also used for texturing and for engraving using the included graver holding attachment. Three anvils with threaded shanks, wrench, tightening pins and an adapter for non threaded anvils, motor brushes and a handpiece tray included. 2 year warranty.

A, B SonoCraft Burnishers – Ultrasonic Porosity Removers

SonoCraft units were designed especially for professional jewelers to remove porosity and other surface imperfections quickly and easily. But they are also amazing surface finishers with excellent reach into the tiniest areas: polishing under cathedral settings and cleaning up half round rails. You can polish and burnish areas that are almost impossible to reach by hand which traditionally had to be done with a magnetic tumbler. Both units include power pack, lightweight handpiece, on/off foot switch, wrenches and instructions. Select between two powerful units:

The **ST-50** comes with one burnishing tip and works on softer metals such as gold and silver. It operates in a continuous mode with a constant fast impact governed by a Variable Rheostat dial. Used for burnishing and polishing.

Our **ST-60** includes five tips and works on the softer metals as well as hard metals such as platinum. A very versatile machine, the ST-60 has four ultrasonic modes:

Single Hit Mode: Tightens beads on to stones with minimal or no touch-up needed.

Intermittent Mode (Slow): Slowly repeating impacts for light engraving.

Intermittent Mode (Rapid): Rapidly repeating impacts for engraving.

Continuous Mode: Constant fast impact for burnishing and polishing.

Benefits:

- Advanced ultrasonic technology drastically reduces finishing time for increased productivity.
- Automatic frequency adjustment provides optimal efficiency for excellent finishing results.
- High output power handles all kinds of metals with ease.

Specifications:

	ST-50	ST-60
Works on	Gold, Silver (soft metals)	Gold, Silver, Platinum (hard metals)
Max. Power Output	30 Watts	40 Watts

C. Setting Burnisher Set

Set of 18 setting closers, or burnishers, ranging in size from 1/2 point to 1.75 carats. For burnishing tubes over stones. Includes heavy-duty handle and attractive hardwood box. Made in Europe.

Description	Item#	Each
Setting Burnisher Set	811-2165	\$159.00

A. Prong Opening Pliers

Open prongs without fracturing stones. Use grooved jaw to hold prong in place and angled jaw to slip under prong and raise it. Avoid putting pressure on top of stone to prevent marring and scratching. Feature box joint for stability, perfectly aligned tapered jaws, double leaf springs and cushion grips. Measure 4 1/2" long. Made in Germany.

Description	Jaw Length	Item#	EACH Prices	
			1-2	3+
Prong Opening	1 5/16"	180-0020	\$25.60	\$23.04

B. Prong Closing Pliers

Close prongs over stones without slipping. Use curved, tapered jaws with grooved tips to hold prong securely. Feature box joint for stability, perfectly aligned jaws, double leaf springs and cushion grips. Measure 4 1/2" long. Made in Germany.

Description	Jaw Length	Item#	EACH Prices	
			1-2	3+
Prong Closing	1 5/16"	180-0025	\$25.60	\$23.04

C, D Stone Setting Pliers

Ideal for tightening prongs. Feature box joints for stability. Available in deluxe and economy styles. Measure 4 3/4" long.

Description	Item#	EACH Prices	
		1-2	3+
C. Deluxe German	181-2900	\$37.95	\$36.05
D. Economy Imported	181-2950	12.95	-

E. Prong Pusher

Steel tool with flat end for pushing crown points or prongs onto stone. Also for forcing bezel around stones. Mounted in wooden handle. Measures approximately 3 1/2" long.

Description	Item#	EACH Prices	
		1-2	3+
Prong Pusher	816-0100	\$2.75	\$2.48

F. Bezel Pusher

For pushing and rolling bezel around stone. Polished and grooved tip. Measures approximately 3 1/2" long. Made in USA.

Description	Item#	Each
Bezel Pusher	816-0110	\$12.65

G. Precision Prong Lifter

This highly tempered prong lifter provides easy access to small prongs. Measures only 4"L x 0.079" (2mm) thick, so it's easy to maneuver in even the tiniest settings. Durable and precise. Made in USA.

Description	Item#	Each
Precision Prong Lifter	816-0092	\$13.35

H. Bezel Roller

Has a half-round, highly polished steel head for rolling bezels around stones in rings, pendants and broaches. Measures approximately 4" long.

Description	Item#	EACH Prices	
		1-2	3+
Bezel Roller	816-0120	\$3.25	\$2.93

A. Foredom LX Deluxe Stone Setting Set

Contains just about everything you need to get to work—motor, rheostat, 2 handpieces and accessories. With a total Retail Value of \$554.00, this convenience is also a smart, economical decision. Motor and Rheostat carry a 2 Year Warranty.

Components:

Series LX Motor - This permanent magnet motor is specifically designed for high torque/low speed applications, offering more power for jobs like stone setting, wax modeling, and pearl drilling. Feature full power and torque from start up and throughout the entire speed range up to 5,000rpm. Comes equipped with a motor bale for hanging, and a standard 39" long key tip inner shaft and special/more flexible neoprene outer protective sheath.

TXR Rheostat - The TXR looks the same as our standard foot operated rheostat but it has special electronics that converts AC current from an electrical outlet to DC current, the type required by Series LX and TX motors. Features solid state circuitry in a heavy duty plastic housing with an extra wide footprint, low profile, and non-skid pads on the bottom. Measures 7" long, 4½" wide, 2⅜" high.

#18 Quik Change™ Handpiece - For use with only 2.35mm (⅜") shank burs. A press lever action is all that is required to change accessories. It features a very slim grip and pre-lubricated ball bearings that do not require any lubrication. Measures 7" long, 19/32" dia. Weighs: 3.65 oz.

#15 Hammer Handpiece - Reciprocating action for use at low speed (0-5,000rpm) by jewelers for stone setting and decorative work. Comes with an anvil point. Requires periodic lubrication. Hammer has ⅓" stroke and its impact can be adjusted from light to heavy by turning the silver knurled adjusting ring. Optional points are available: 6 different shaped Anvil Points in our 850-3780 set.; Pave Point (850-1275), and Stylus with Carbide Tip (850-1274). Measures 6¼" long, ¼" dia. at tip. Weighs: 3.65 oz.

Set comes complete with a 13 piece assortment of step drills and steel engraving burs in small round bur holder and Flexible Shaft Grease.

Description	Item#	Each
Foredom LX Deluxe Stone Setting Set	850-1222	\$498.10

B. Gem Setting Graver Outfit

Includes six shaped gravers for setting diamonds and other stones in modern settings, six comfortably shaped wooden handles for working ease and a model plate that shows various steps needed for project completion.

Description	Item#	Each
Gem Setting Graver Outfit	166-8000	\$76.95

C. Round Tennis Bracelet Holder

This versatile bracelet holder saves time when setting stones. Eliminates messy shellac and firmly holds bracelets up to 7mm wide without marring or distorting. Lets you easily set stones in prong, channel and pavé settings with the assurance that bracelets will always stay in place. Provides extra space for accommodating clasps. Made of sturdy aluminum. Hex wrench included. Measures 3½" diameter.

Description	Item#	Each
Round Tennis Bracelet Holder	840-4205	\$26.95

D. Setter's Tube Holder Set

Set of seven spring-tempered three-jaw collets with wooden handle. Holds tubes from ⅓" to ¼" in diameter while stone setting without causing them to collapse.

Description	Item#	Each
Setter's Tube Holder Set	840-4225	\$17.90

E. Claw Setting Jig

Easily makes small or large four-, six- and eight-prong claw settings for 0.15-2 carat stones. The base unit holds the chosen jig, and the length of wire used is based upon the size of the stone to be set—larger, deeper stones require longer wires. Filing and soldering can be done with the setting still on the jig.

Description	Item#	Each
Claw Setting Jig	816-1465	\$24.50

A. Busch Beading Tools

Simply the Best! Busch Beading tools form high-quality beads on prongs to create a precise finish to ensure that stones are held securely in place in their mountings. These superior tools from Busch are designed with filigreed beading edges to better protect gemstones and to deliver highly polished beads. The opening at the end of the tool, also known as the calotte, produces a highly polished, consistently round, perfect bead every time. Busch Beading Tools are also scored 10mm from the end of the tool so you can easily snap off the end thus allowing you to have a shorter tool should this be desired. Sold in packages of 10 or 100. Also available in convenient sets consisting of 1 each of the 6 smallest sizes or 1 each of the 6 largest sizes. Made in Germany.

A. Millrite Plus Millgrain Machine

The Millrite Plus Millgrain Machine cold forms designs on rings, even on angled or perpendicular surfaces, without removing any precious metal. This machine accepts both 1/8" square-shanked lathe millgrain tools and French millgrain tools. It also includes collets for ring sizes 2 - 13. The machine is quality crafted of aluminum alloy with spring action tool holders that ensure clean, crisp, even impressions. Includes 2 millgrain tools (F8 millgrain + 1 French millgrain wheel with holder) Size: 8" x 8" x 7". Weight: 26 lbs. Made in USA.

RinGenie - Engraving and Setting Tool

Right out of the box, the RinGenie has everything you need to make quick and easy work of layout, engraving, inlaying, stone setting, bright cutting, bead setting and any other task a jeweler or engraver may encounter. Unlike other engraver's blocks, its 360 degree rotating spindle makes it easy to move freely or at finely set intervals providing amazing versatility and unparalleled precision. Plus its numerous mounting options make it easy to approach your work at any angle. Hand and power engravers work equally well with the RinGenie.

No matter what your project demands, the RinGenie is engineered to boost speed and accuracy at every phase of the process.

Work faster, work smarter. Be more productive and more creative with the RinGenie.

RingGenie Deluxe Set Features/Benefits:

- Made of aircraft quality aluminum, hard coat anodized for wear resistance, with stainless steel spindles.
- Body measures 4¹/₁₆" wide; 5³/₈" wide including outside adjustment knobs.
- The RinGenie is a money making time saver.
- Layout with precision and speed.
- Accuracy in drilling and milling.
- Precise channel cutting.
- Fine incremental settings with 360 degree rotation.
- A perfect complement to hand or power engravers.
- Easy spindle locking thumb screw
- Use with metal or wax.
- Optional adapter for your BenchMate (see fig. B)
- Optional Side Helper for engraving/setting on sides of rings. (see fig. E)

Includes:

- Drill/Mill/Layout Assembly Tool
- Scriber Assembly
- 3/32" Diameter Hardened Drill Bushing
- 1 Alignment Plate
- 2 Tightening Rods
- 1 Side Pointer
- 1 Drag Adjustment Screw
- 8 Plastic Collets in sizes 5, 6, 7, 8, 9, 10, 11 and 12
- 16 Aluminum Collets in sizes 5, 5.5, 6, 6.5, 7, 7.5, 8, 8.5, 9, 9.5, 10, 10.5, 11, 11.5, 12 and 12.5
- 1 Custom Fitted Wood Case
- Instructional DVD

RingGenie All-in-One Set

Includes everything in the Deluxe Set Plus:

- BenchMate Adapter
- Side Helper
- 3" Vise + Adapter
- Universal Adapter + Adapter Holder

"The RinGenie doesn't replace any human skills it only aids in helping take the ones that a craftsman has to a higher level by its user friendly way of helping to maneuver the piece one is working on."

Robert N. Vertel, owner of Dokan Jewelry Designs LLC, MI

J

A. Curved and Slim Burnisher

Curved and slim for hard-to-reach areas. Polished steel tip and wooden handle. Great for jewel settings. Blade measures 1 3/4" long. Made in USA.

Description	Item#	EACH Prices	
		1-2	3+
Curved and Slim Burnisher	811-1880	\$14.35	\$12.92

B, C Steel Burnishers

Polished steel tips with wooden handles. For use on bezels and larger surfaces. Measure approximately 6" overall length. Blades measure 2 long. Made in USA.

Description	Item#	EACH Prices	
		1-2	3+
B. Straight Burnisher	811-2100	\$12.75	\$11.48
C. Curved Burnisher	811-1900	12.75	11.48

D. Margin Roller Burnisher – 3/32" Shank

For burnishing over scratches in gold, making it possible to salvage many pieces without gold loss. Can also be used for burnishing over microporosity in castings. The 3/16" (5mm) head consists of five steel rollers that act as rotating mallets. Measures approximately 1 3/4" long with 3/32" shank for use with handpiece.

Description	Item#	EACH Prices	
		1-2	3+
Margin Roller Burnisher	811-2150	\$21.95	\$19.76

E-I Tungsten Carbide Burnishers and Scrapers

Feature highly polished tungsten carbide tips. Ideal for safe burnishing of platinum because tungsten carbide is noncontaminating. Also produce a brilliant finish on gold. Measure approximately 6 3/8" overall length. Tips measure 1" long. Select between 2mm, 3mm or 4mm burnishers or 3mm and 5mm triangular cut scrapers. Scrapers are extremely sharp on all three sides and come to a sharp point. Also deal for cleanly removing flash and other casting defects from hard-to-reach areas. Measure approx. 6 3/8" overall length, including handle. Tips measure approximately 7/8" long.

Description	Item#	Each
E. 2mm Burnisher	811-1849	\$19.50
F. 3mm Burnisher	811-1850	19.50

A. JETT BALLISTIC™ Make your own custom tools!

From the creators of Jett Sett comes the Next Generation in fixturing compound...JETT BALLISTIC What makes this product different than anything else on the market is the fact that Jett Ballistic is infused with Kevlar®, an additive that produces a stiffer compound that delivers more durability to your production fixtures.

Here are just some of the things you can make with JETT BALLISTIC:

- Fixturing devices for holding, setting and engraving any jewelry item.
- Custom-grip file and graver handles.
- Nonmarring surfaces for pliers and vises.
- Custom hammer heads that won't mar the metal you hammer.

Easy to use. Simply place a small amount of JETT BALLISTIC into heated water. Remove and mold the putty-like to your specifications. It's that easy! Reusable, dip back into heated water to go back to the soft putty state. Supplied in a 1Lb Jar.

Description	Item#	Each
JETT BALLISTIC, 1 lb. Jar	816-1575	\$35.00

B. JETTBasic

A slightly more tacky form of JETT BALLISTIC. Adheres well to smooth surfaces such as bezels when hot. Hardens and loses tackiness when completely cool. Clear in color, can also be used to make customized tool handles. Sold in 1 lb. bags.

Description	Item#	Each
JETTBasic, 1 lb. pkg.	816-1591	\$21.95

C. GRS® Thermo-Loc®

Very tough work-holding plastic. Softens with heat to clay-like pliable consistency so you can form it around an endless variety of workpieces. Turns rock-hard once it cools to hold items securely. Economical and practical—can be reused again and again. Neutral gray in color to prevent eyestrain, even under bright work lights. Heat in a microwave oven on the pad included with the Starter Kit, in a conventional oven, in hot water or with a heat gun (be sure to follow proper heating instructions).

Description	Item#	Each
Thermo-Loc, ½ lb.	816-1592	\$25.60
Thermo-Loc, 1 lb.	816-1593	43.75
Thermo-Loc, 5 lbs.	816-1594	166.00
Thermo-Loc Starter Kit (includes 1 lb. Thermo-Loc and microwave-safe 6" x 6" pad)	816-1597	49.95

D. Diamond D Cement

Shellac mixed with wax to make it stronger and less brittle. When melted and applied to a wooden dowel, it securely holds diamonds and other stones for polishing. Also holds jewelry that's too small for conventional clamps. Easy to melt and use repeatedly. Can be pulled from setting when work is complete. Sold in 3 oz. cakes.

Description	Item#	Each
Diamond D Cement, 3 oz. cake	811-2600	\$28.55

E. Orange Flake Shellac

Used to hold small objects firmly for stone setting and engraving. Softens when heated. Hardens quickly in cold water. Articles can be removed by dipping in alcohol.

Description	Item#	Each
Orange Flake Shellac, 1 lb.	816-1100	\$32.00
Orange Flake Shellac, ½ lb.	816-1101	16.50

F. Layout Wax Sheets

Place one of these transparent wax sheets on top of your jewelry drawing, then position the stones. Provides an excellent way to visualize your finished design prior to stone setting. Thickness: 24-gauge. Measure 4" x 4". Sold in boxes of 32.

Description	Item#	Each

A

A. Noble Easy-Flow White Sheet Solder – For Repair Work

This solder is of lower gold content than the quality of gold for which its use is recommended. There are variations in the exact tone in order to match the karat of the piece to be soldered. All flow easily and uniformly and provide a joint that is as strong and permanent as the metal itself. Sold per dwt. Caution: Contains cadmium; fumes are hazardous, use NIOSH approved respirator and fume hood such as our Solderpure (see p. 407).

Description	Approx. Karat	Melting Point °F (°C)	Flow Point °F (°C)	Item#	Dwt
White Low	1K	1,190 (643)	1,325 (718)	830-1921	\$5.90
10K White	5K	1,205 (652)	1,320 (716)	830-1924	37.25
14K White	9K	1,200 (649)	1,315 (713)	830-1927	45.95
18K White	10K	1,360 (738)	1,450 (788)	830-1930	65.00

Prices subject to change with market prices.

B

B. Silver Solder Pastes – Cadmium/indium-free!

Excellent for soldering fine silver chains and intricate silver jewelry where precise application of solder is critical. Alloy and flux are premixed in paste form and packaged in convenient dispensing syringes. Alloy will not settle to the bottom of the syringe tube. Syringes eliminate waste and improve the appearance of the joint area. Each dwt. of paste contains 55% metal and 45% binder per 1cc syringe.

Description	Melting Point °F (°C)	Flow Point °F (°C)	Item#	Dwt
Silver Easy/Soft	1,125 (607)	1,205 (652)	831-1010	\$28.95
Silver Repair (less silver content)	425 (218)	473 (245)	831-1030	23.10

Prices subject to change with market prices.

C

C. Silver Sheet Solder

Available in three grades, Easy 65%, Medium 70%, and Hard 75% silver.

Description	Melting Point °F (°C)	Flow Point °F (°C)	1 Troy Oz.#	Pkg.	¼ Troy Oz.#	Pkg.
Easy	1,240 (671)	1,325 (718)	830-2050	\$28.57	830-2049	\$7.14
Medium	1,275 (690)	1,360 (738)	830-2100	30.20	830-2099	7.55
Hard	1,365 (740)	1,450 (788)	830-2150	32.82	830-2149	8.20

Prices subject to change with market prices.

D

D. Silver Solder Wire

Round 20-gauge (0.032" dia.) silver solder wire. Cadmium-free. Sold in 1/2 oz. packages.

Description	Silver %	Melting Point °F (°C)	Flow Point °F (°C)	Item#	Pkg.
Extra-Easy	56	1,145 (618)	1,205 (652)	830-2151	\$13.35

Medium	70	1,275 (690)	1,360 (738)	830-2153	15.53
Hard	75	1,365 (740)	1,450 (788)	830-2154	16.41

Prices subject to change with market prices.

E

E. Solder Cutting Pliers

These special pliers can be used to consistently cut both sheet and wire solder. Sheet is cut in 1/16" (1.6 mm) squares and wire, up to 18-gauge (1.02 mm), in 1/16" lengths. Cut is consistent time after time, Measure 5 1/2" overall length with plastic comfort grips.

Description	Item#	Each
Solder Cutting Pliers	180-0279	\$11.50

A-C Gesswein® Plumb Solders – Cadmium/indium-free!

Manufactured for Gesswein under strict quality guidelines so that composition, temperature and color are consistent and uniform from lot to lot. Contains no cadmium, no indium. Available in sheet, chips and paste. Sheet is sold by the dwt. Chips measure 1 x 1mm and are packaged 1 dwt per vial. Each dwt. of paste contains 55% metal and 45% binder per 1cc syringe.

Description	Melting Point °F (°C)	Flow Point °F (°C)	A. Sheet		B. Chips		C. Paste

D. Platinum Solders

1200 Easy contains 0% platinum and is basically a repair solder made of palladium/white gold. 1400 Medium contains 5% platinum with the balance made of palladium/white gold. Normally used in assembling findings. 1700 Hard contains 25% platinum with the balance composed of palladium/white gold. Used for ring sizing and other jobs where joints will be visible. Sold in 1 dwt sheets.

Description	Flow Point °F (°C)	Item#	Each
1700 Hard	2,910 (1,600)	830-2162	\$96.88
1400 Medium	2,660 (1,460)	830-2161	108.82
1200 Easy	2,190 (1,200)	830-2160	87.06

Prices subject to change with market prices.

E. Platinum Solder Paste

Paste solder is ideal for soldering chain and intricate jewelry items where precise application of solder is critical. Now paste solder is available for platinum! Use 1000 for hidden joints (color is a bit too dark to use on visible joints). Use 1300 for production and for a good color match on joints that will be visible in the finished product.

Description	Flow Point °F (°C)	Item#	Each
Platinum Solder Paste 1000, 1 dwt syringe	2,010 (1,110)	831-1031	\$35.00
Platinum Solder Paste 1300, 1 dwt syringe	2,280 (1,250)	831-1032	122.50

Prices subject to change with market prices.

F. Yellow Ochre

Mix with water or alcohol to create a paste that may be brushed onto a workpiece to prevent solder from flowing where you don't want it to. Helps to protect previously soldered areas, moving parts of a catch, etc. Net Wt. 1/2 lb.

Description	Item#	Each
Yellow Ochre	821-2750	\$12.05

G. Cordless Rechargeable Soldering Iron Set

Easily solder in the tightest places with no restricting cord. Iron weighs less than 5 oz and measures 8 1/4" long (with tip installed). Includes a built-in light allowing visibility in hard to reach areas and dark corners. Will solder up to 125 joints before recharging. Partially recharges in 1-2 hours, fully recharges in 3 to 4 hours. Comes complete with soldering iron, charging stand, battery, one fine and one heavy-duty tip and instructions. 110V, UL listed.

Description	Item#	Each
Quick-Charge Soldering Iron Set	816-1920	\$71.85

**A. Tix® Solder**

Considered to be one of the "hardest" soft solders available. Melts at 275°F and has a holding power of 4,300 lbs. per square inch. Adheres to all ordinary solderable materials and may be used with a soldering gun or torch. Stays white and does not tarnish. Package of 20 rods (3" length, 19-gauge).

Description	Item#	Each
Tix Solder, 20 rods	830-2000	\$18.35

A

**B. Tix® Flux**

A noncorrosive liquid flux that works with any soft solder. Harmless to skin and clothing. Washes off with water, even when dry. 1/2 oz.

Description	Item#	Each
Tix Flux, 1/2 oz.	830-2340	\$5.65

B

C

C. Tix® Anti-Flux

Liquid that brushes on to prevent solder from flowing to unwanted areas. Can be used for hard or soft soldering. 1/2 oz.

Description	Item#	Each
Tix Anti-Flux, 1/2 oz.	830-2345	\$5.65

D

**D. Stay Bright Soldering Set**

Cadmium-free, nontoxic silver bearing solder with a melting point of 430°F. May be used with soldering gun or torch. Includes 1/2 oz. of solder and 1/2 fluid oz. Stay Clean Flux.

Description	Item#	Each
D. Stay Bright Soldering Set	830-2300	\$30.75
Stay Clean Flux 4 oz. refill	830-2350	13.50

E. Soft Soldering Flux

For use with solders with melting points under 450°F. Will not flame.

Description	Item#	Each
4 oz.	830-4050	\$10.15
1 pint	830-4100	13.70
E. 1 quart	830-4150	21.90

E

F

**F. Pinpoint Dispenser**

This handy plastic squeeze dispenser has a needle-point applicator for precise application of flux. No more mess—eliminates dried up flux brushes and dripping flux. An excellent applicator for applying flux to small areas where a flux brush will usually cause a mess; ideal for soldering earring posts, building up prongs, sizing rings and making many similar small repairs. 2 oz. capacity.

Description	Item#	Each
F. Pinpoint Dispenser	830-4520	\$4.79
Pinpoint Dispenser w/16 oz. Anti-Oxidizing Flux (see p. 501)	830-4515	20.00

G

**G. Dispenser Bottle with Pump**

Plastic bottle holds flux, solvents or other liquids. Special stainless steel lid allows pumping of solution into shallow well on top of bottle. One-way valve keeps solution in well, prevents contamination and eliminates odors. Ideal for dispensing solutions that would otherwise evaporate. 4 oz. capacity.

Description	Item#	Each
Dispenser Bottle with Pump	830-4525	\$26.45

H

**H. Superior Flux #6**

This paste flux for silver brazing and soldering stays exactly where you want it and helps hold solder in place. Contains no potassium bifluoride and will not release boron trifluoride gases during brazing. Gentle on metals. Easier on the hands than regular silver fluxes. Conforms to AMS 3410, AWS A5.31-91 and Type FB3A. Temp. range: 900-1600°F (485-870°C).

Description	Item#	Each
4 oz. Jar	830-4200	\$9.95
H. 8 oz. Jar	830-4201	16.65

I. Flux Dispensing Pens

The Bonkote Pen system provides the most accurate flux application in a pen that is easy to clean and maintain. Dispense flux with ease, even in the most challenging of jobs. Made in Japan.

	Pen & Tip Item#	Each	Replacement Tip Item#	Each
Micro	830-4581	\$21.50	830-4585	\$16.50

Micro Thin Thick Flat

⚠️ UPS® hazardous shipping surcharge applies. Ships via UPS® Ground only, no air, FedEx®, or US Mail shipments. Cannot ship to Alaska, Hawaii or Puerto Rico.

A-D Gesswein® Hard Soldering Flux

Yellowish-green self-pickling flux for brazing and annealing gold, silver, platinum and other metals with high melting points. Holds solder chips in place. Preserves color and temper of metal. Temp. range: 1,100-1,600°F.

Size	A. 4 oz.	B. 1 pint	C. 1 quart	D. 1 gallon
Item#	830-4250	830-4300	830-4350	830-4400
EACH Price	\$4.50	\$6.50	\$10.95	\$29.95

E-G Handy® Flux

A white paste flux used for hard soldering of silver, gold, platinum, copper, nickel and other nonferrous metals. Apply with borax brush. Holds solder chips in place for easier soldering. Withstands prolonged heating without breaking down. Temp. range: 1,100-1,500°F.

Size	Item#	EACH Prices	
		1-2	3+
E. 7 oz.	830-4465	\$6.85	-
F. 1 lb.	830-4470	11.50	\$10.35
G. 5 lbs.	830-4475	34.50	31.05

H. Borax

Specially prepared for making flux for jewelry soldering. Dissolves easily to make a paste. Inhibits the formation of oxides on metal surfaces and allows solder to flow more easily. Helps prolong the life of melting crucibles. Borax has pH of 6-7. More alkaline than boric acid (pH 3-4).

Size	8 oz. Powder	5 lbs. Powder	50 lbs. Powder
Item#	811-0700	811-0701	811-0702
EACH Price	\$6.50	\$23.95	\$185.00

I. Magic Borax (Granular) Powder

Granular Magic Borax Powder is an excellent, general-purpose flux. Inhibits the formation of oxides on metal surfaces thus allowing solder to flow more easily. Excellent also for glazing clay crucibles to extend crucible life. 16 oz. container.

Size	Item#	EACH Prices	
		1-2	3+
16 oz.	811-0705	\$7.75	\$7.36

J-M Gesswein® Anti-Oxidizing Flux

Completely protects the finish of the piece being soldered from firescale, reducing the need for time-consuming pickling, stripping and, in some cases, sanding and filing. Repolishing becomes easy after soldering. Prevents discoloration and oxidation of all metals that contain copper. Especially recommended for soldering silver. Makes hard soldering tasks easier than ever before. Nonhazardous and nontoxic. Temp. range: 1,100-1,500°F.

Size	Item#	EACH Prices	
		1-2	3+
J. 4 oz. spray bottle	830-4500	\$7.60	\$7.22
K. 16 oz.	830-4505	19.95	18.95
L. 1 gal.	830-4510	74.00	70.30
M. 16 oz. with pinpoint dispenser	830-4515	20.00	-

N. Magic Boric Acid Powder

High-grade, superfine boric acid powder. Can be used as high-grade flux and deoxidizing agent. Dissolve with denatured alcohol in our Glass Cups (830-2320) to make soldering flux. 16 oz. container.

Size	Item#	EACH Prices	
		1-5	6+
16 oz.	830-4575	\$9.25	\$8.79

O. Gesswein® Rectifying Solution

Alcohol-based flux for soldering and annealing. Inhibits firescale. Dip part into Rectifying Solution, set on soldering block and ignite. Alcohol will burn off and leave white borax residue. Part is now ready to be soldered or annealed. Temp. range: 1,100-1,600°F.

Size	Item#	EACH Prices	
		1-3	4+
1 quart	830-4551	\$20.95	\$16.76

P. Boric Acid Powder

Technical grade. Dissolve in Denatured Alcohol in our Glass Alcohol Cup (below) to make soldering flux. Boric acid has pH of 3-4. More acidic than borax (pH 6-7).

Size	1 lb.	5 lbs.	25 lbs.
Item#	830-4569	830-4570	830-4572
EACH Price	\$79.95	\$79.95	\$79.95

Q. Glass Alcohol Cup

For alcohol, solvents, flux or other solutions. Cover fits tightly to protect against evaporation or contamination. Cut glass container. Measures 2 7/8" dia. x 1 7/8" H, capacity 1 1/2 oz.

Description	Item#	Each
Glass Alcohol Cup	830-2320	\$17.65

A, B Hemostats

Precision tools ideal for holding small items for soldering. Feature box-joint construction, serrated pointed jaws and heat-resistant two-position self-locking handles. Available in two styles: straight and curved. Made of highly polished stainless steel. Measure 6" long.

Description	Item#	EACH Prices	
		1-2	3+
A. Straight	181-5005	\$6.50	\$5.85
B. Curved	181-5000	6.50	5.85

C. Third Hand

Cross-locking tweezers, 6½" long, mounted on heavy, nontipping round base. Base's ball joint attachment permits positioning of work at any angle. Handy for positioning pieces to be joined by solder or adhesive, freeing hands from work. Base may vary.

Description	Item#	EACH Prices	
		1-2	3+
Third Hand	816-1800	\$12.10	\$11.50
Replacement Tweezers	195-1400	2.95	2.66

D. Third Hand – Ball Style

This remarkable third hand features incredibly flexible positioning and ease of use to speed up your soldering jobs. Twist and turn the ball joint to any position and it stays fixed without slipping. This economic alternative to the magnetic third hand, automatically provides the right amount of tension to hold and move your work without continuous adjustment. Includes 6" self-locking tweezers.

Description	Item#	Each
Single	816-1822	\$12.00

E. Double Third Hand

Round weighted base with cross bar, two spring-loaded clips, and multiple ball joints for infinite positioning ability. Frees both hands for work. Other accessories such as cross-locking tweezers may be added to increase the versatility of this convenient holding tool. Base measures 3" dia. x ¾"H.

Description	Item#	Each
Double Third Hand	816-1900	\$19.95

F, G GRS® Soldering Stations

Compact benchtop fixturing devices for handling all your soldering jobs. Available in two styles: Short-arm features double-jointed arms with spring-loaded third hands. Deluxe features triple-jointed arms with spring-loaded third hands and rear tabs for mounting on GRS BenchMate (see p. 572). Both have 6" x 6" nonasbestos soldering boards and metal frames with rubber feet. Made in USA.

Description	Item#	Each
F. Short-Arm Soldering Station	816-1914	\$114.00
G. Deluxe Soldering Station	816-1915	159.00

H. Platinum Soldering Station

Platinum soldering must be carried out in an area separate from other metals or solders to prevent contamination of the platinum. Tweezers and solder picks must be made of a non contaminating material such as tungsten carbide. Our Platinum Soldering Station includes: GRS Deluxe Soldering Station (above), 2 pairs of GRS Tungsten Carbide Tweezers Tips (to replace tips in soldering station), 4" x 4" Wesgo Soldering Board (sits on top of GRS board) and Tungsten Solder Pick for worry-free platinum soldering.

Description	Item#	Each
Platinum Soldering Station	816-1916	\$270.00

A. Improved Adjustable Scraper

Hollow three-square double-ended blade measures 3½" long; extend length to fit the job. A simple adjustment knob on the knurled handle allows the blade to slip inside both for safety and for maintaining the tool edge when not in use. Handle has a highly polished finish and measures 3½" long. France.

Description	Item#	Each
Improved Adjustable Scraper	816-0130	\$41.75

B. Bench Knife

An all-purpose bench knife for opening watch cases, scraping and cutting. Has 1¾" thick steel blade mounted in a hardwood handle. Measures 5¼" long.

Description	Item#	Each
Bench Knife	260-3059	\$4.35

C, D Wood Handle Scrapers

High-quality, chrome alloy steel three-square blades are securely mounted in hardwood handles. Approx. overall length 6½".

Description	Blade Length	Item#	Each
C. Hollow-Blade Scraper	2½"	816-0150	\$10.75
D. Solid-Blade Scraper	3"	816-0160	16.55

E. Titanium Solder Pick

Features a Titanium rod to which solder cannot adhere and a nonconductive handle with hexagonal head so pick won't roll away when you put it down. For gold and silver—do not use on platinum. Measures 6¾" long.

Description	Item#	EACH Prices		
		1-2	3-9	10+
Titanium Solder Pick	830-2212	\$5.80	\$5.51	\$5.22

F. Tungsten Solder Pick – Ideal for platinum.

For spreading molten solder and maneuvering it to just the place you want it. Solder will not adhere. Made of a special high melting point tungsten. Will not contaminate or discolor molten gold or silver solder. Wood will not heat up. Measures 6½" long.

Description	Item#	EACH Prices		
		1-2	3-9	10+
Tungsten Solder Pick	830-2210	\$10.20	\$9.18	\$8.50

G. Niobium Solder Pick – Ideal for platinum.

For high-temperature soldering jobs, our Niobium Solder Pick withstands temperatures up to 4,470°F. Noncontaminating for platinum soldering and welding. Can be bent to the desired angle without breaking. Wooden handle. Measures 6½" long.

Description	Item#	EACH Prices		
		1-2	3-9	10+
Niobium Solder Pick	830-2216	\$7.10	\$6.75	\$6.39

H. Solder Pick

Made with a special alloy, the point can be bent to any shape without breaking. Hardwood handle insulates. Metal ferrule. For gold and silver. Measures 6½" long.

Description	Item#	EACH Prices		
		1-2	3-9	10+
Solder Pick	830-2211	\$2.82	\$2.54	\$2.35

I. Titanium Soldering Picks

Feature long-lasting extra-fine titanium tips that collect exact amounts of solder for precise application. Grooved aluminum handles dissipate heat quickly to protect user. Hexagonal heads prevent rolling. Set consists of three colors to allow easy differentiation and help prevent metal contamination. Measure 6¼" long. For use with gold, silver and other metals; not for use with platinum.

Description	Item#	Each
Set of three	830-2219	\$8.75

A

A. Cross Hole Deburring Tool – 3mm Shanks

These specialty rods are designed to remove the hard to reach burrs created by cross-drilled holes. Available in 4 shapes: Oval, Cross, Ring, and Thin, and a variety of diameters for different cross hole sizes and shapes.

The cutting wires are made from a slightly flexible, twisted piano wire and measure approx. 0.027" in wire diameter. The wires are more aggressive than brushes, yet less aggressive than traditional cutting burs. These deburring tools work best on harder metals such as steel. Recommended for use in a rotary power tool. 1,000 Max RPM. All rods measure 4" in OAL. 3mm shank diameter.

Two kits are available. Cross Hole Small Kit * consists of one each of the smallest of the 4 shapes. Cross Hole 6mm Kit † consists of one each of the three 6mm size tools. Made in Japan.

Type/Shape	ℓ	ℓ1	ℓ2	Ød	Ød1	Item#	Each

B

B. Precision Deburring Tools

Double-ended tools with revolving hardened steel discs for deburring a variety of delicate parts. Feature knurled handles for secure grip. Sold individually and in a set with one of each with storage pouch. Made in Switzerland. Measure approx. 3³/₈" in length.

Tool#	Disc Diameter	Item#	Each
1	0.060" and 0.070"	846-2039	\$14.95
2	0.082" and 0.092"	846-2040	14.95
3	0.106" and 0.116"	846-2041	14.95
4	0.134" and 0.150"	846-2042	14.95
5	0.160" and 0.185"	846-2043	14.95
6	0.198" and 0.208"	846-2044	14.95
D. 6-Piece Set		846-2045	74.75

A. Shaviv Hand Deburring Tools

Shaviv is the internationally recognized choice of leading companies in the mold & die, automotive, aviation, plastics, electronics assembly and other industries.

Shaviv "B" style and "E" style blades are used for efficient deburring. "B" style blades are 2.6mm thick steel for: aluminum, stainless steel, copper, brass, cast iron and plastics. "E" style blades are 3.2mm thick and are useful for heavier duty applications. See chart below for specific blades and their applications.

Sets:

Mango II B Handle with 4 Multi-Purpose "B" Blades

Contains the Mango II B extra-close-reach handle with one each of the B10, B11, B20, & B25 blades.

Mango II E Handle with 5 Heavy Duty "E" Blades

Contains the Mango II E extra-close-reach handle for heavy duty use and one each of the E100, E111, E120, E200, & E300 blades.

Mango II M – The Two in One Telescopic Handle

Contains the Mango II M telescopic long-reach handle for variable extended reach up to 4".

Accommodates both B+E style blades. Included are one each of the B10, B20, B30, E100, E111, and E200 blades.

Sets:	Item#	Each

A, B Rotating Solder Tables

Solder & anneal single or multiple parts without having to move your torch.

These handy rotating tables permit 360° access to your parts so that you can work without having to move your torch. Bearings in the base provide smooth, easy movement. The tables are only 1" high, which makes it comfortable to use them on a bench top. Square table is supplied with one 6" x 6" Ceramic Soldering Pad (#830-2222) and also accommodates our Solderite Soldering Pad (#810-0100). Round table is supplied with grooved diameter ceramic soldering disc (#830-2238).

Description	Item#	Each
A. Square Table	830-2228	\$33.50
B. Round Table	830-2237	30.95
Square Solderite Pad, 6" x 6"	810-0100	11.75
Replacement Ceramic Pad, 6" x 6"	830-2222	13.50
Replacement Ceramic Round Disc, 4½" dia.	830-2238	10.75

C. Two-Way Ceramic Soldering Board – Flat/Grooved

Hard ceramic soldering board that is flat on one side and deeply fluted on the other side. Fluted side is ideal for soldering fine chains because air is allowed to circulate under the area not being soldered, reducing the diffusion of heat. Excellent thermal shock resistance. Measures 7"L x 7"W x 7/8"H. Can be heated to 2,000°F.

Description	Item#	EACH Prices	
		1-2	3+
Two-Way Board	830-2220	\$28.95	\$26.06

D, E Annealing Pans with Pumice

Allows positioning of work while annealing or soldering on heat-reflecting pumice. All pans rotate 360° on ball bearings and come with an adequate supply of lump pumice.

Description	Item#	Each
D. 12" dia. Annealing Pan	830-4000	\$75.75
E. 7" Annealing Pan w/ Tweezer	830-3994	35.95
7" Annealing Pan w/o Tweezer	830-3995	28.50
Pumice, 2½ lbs.	830-4001	29.95

F-H Ceramic Soldering Boards

All are nonasbestos and hard. Retain heat nicely and can be easily cleaned. Rubber feet raise boards above work surface. Very durable and smooth. Can be heated up to 2,000°F.

Size (L x W x H)	Item#	EACH Prices	
		1-2	3+
F. 6" x 6" x ½"	830-2222	\$13.50	\$12.15
G. 6" x 12" x ½"	830-2224	17.00	15.30
H. 12" x 12" x ½"	830-2227	26.39	23.75

I. Wesgo® Soldering Boards

Made from the same super refractory material as our popular high-temperature Wesgo crucibles for demanding thermal shock environments. Great for high-temperature soldering jobs such as platinum soldering. The material can be used at 2,642°F (1,450°C) for intermittent service (for platinum soldering, etc.) or at 2,012°F (1,100°C) for more continuous duty. Free of metal-contaminating impurities; contains no readily reducible oxides. Wesgo Soldering Boards offer extremely low thermal conductivity and no loss of strength at high temperatures.

Size (L x W X H)	Item#	Each
I. 4" x 4" x 3/8"	830-2400	\$84.00
4" x 12" x 3/8"	830-2410	219.00

A. Solderite™ Hard and Soft Soldering Pads

Nonasbestos soldering pads which are durable, smooth, and heat-reflective. Fairly hard so that they will not flake or crumble. Highly flame-resistant and noncombustible, these long-lasting, all-purpose pads can be used to protect surfaces from burning. Measure 1/2" thick.

Our popular Solderite Pad is also available in a soft version. You can easily push pins, heads or components into Solderite Soft for quick and easy alignment. Composed of the same material as hard Solderite and will provide the same superior heat reflection, insulating qualities and fast cool-down time. It won't break, crack or crumble as so many other soft products will. Asbestos-free, OSHA approved. Measure 3/4" thick.

Size (L x W)	Hard Item#	Soft Item#	EACH Prices	
			1-2	3+*
6" x 6"	810-0100	810-0335	\$11.75	\$10.58

12" x 12"	810-0300	810-0337	32.75	29.48

*Quantity discount for orders of one item# only, not assorted.

B. Honeycomb Blocks

Very popular ceramic soldering block that contains hundreds of tiny holes to accelerate heat loss from parts being soldered. Holes also provide anchor points for pins or wires used to hold parts in place on the surface. Withstands heat up to 2,100°F.

Size (L x W x H)	Item#	Each
5 1/4" x 3 3/4" x 1 1/2"	830-2230	\$8.50
5 1/2" x 7 3/4" x 1 1/2"	830-2235	12.50
4 1/2" dia. x 1 1/2" Round	830-2236	12.00

C. Charcoal Soldering Blocks

Made from select, close-grained, knot-free wood. Creates a reducing atmosphere and reflects heat back onto workpiece for effective soldering conditions. Soft enough to allow work to be pinned or pressed into its surface. Available in three sizes. Wrapping binding wire (see p. 508) around the perimeter of the blocks will help them last longer.

Size (L x W x H)	Item#	EACH Prices	
		1-2	3+
3 3/4" x 2 1/4" x 1 1/4"	810-2300	\$9.50	\$8.55
4 1/2" x 3" x 1 1/4"	810-2200	14.50	13.05
7" x 4" x 1 1/4"	810-2100	28.95	26.06

D. Premium Charcoal Blocks

Extra-fine grain charcoal is compressed for a denser charcoal block that holds up better and lasts longer than standard blocks. Our Premium Small Block is 3 times heavier than a standard block of the same size. Our Premium Medium Block weighs almost twice as much as a standard medium block. No chemicals added. Imported.

Size (L x W x H)	Item#	EACH Prices		
		1-2	3-9	10+
3 1/8" x 2 5/16" x 1 1/8"	810-2404	\$10.40	\$9.36	\$8.32
5 1/2" x 2 3/4" x 1 1/4"	810-2405	14.95	13.46	11.96

E. Magnesia Block

Porous, fibrous, fireproof material used as a surface for soldering. Reflects heat. Soft enough to allow work to be pinned or pressed into its surface. Longer lasting than charcoal. Nonasbestos.

Size (L x W x H)	Item#	EACH Prices	
		1-2	3+
6" x 3" x 2"	810-2400	\$4.75	\$4.04

F. Hi-Temp Soldering Boards

This aluminum oxide board is designed specifically for the high temperatures required when working with platinum. Safe for temperatures up to 3,500°.

Size (L x W x H)	Item#	Each
4" x 4" x 1/2"	830-2240	\$23.50
6" x 6" x 1/2"	830-2245	35.00

A-C Pickle Pot – 1 Quart

Made of holistic copper lining, this pickle pot works effectively to remove firescale and oxidation from silver, gold, and other non-ferrous metals. Contains an accurate temperature control to prevent over-boiling. The copper lining eliminates any corrosion even when using acidic solutions. Comes supplied with a plastic basket as shown in the photo.

The "Green" Kit also comes with 2lbs of Gesswein's Citpic, which is safer than most pickle compounds. Citpic is a mild organic citric acid that is colorless and odorless, but still effective for removing firescale and flux after soldering applications. A pair of non-corrosive Copper Tongs are also included.

Specifications Overall Size: 7.7" (195mm) Dia x 6.5" (165mm) High; Pot Size: 4.1" (105mm) Dia x 4.7" (120mm) High; Basket Size: 3.15" (80mm) Dia x 3.74" (95mm) High; 120V, 1.5 Amp, 50/60Hz

Description	Item#	Each
A. Pickle Pot	821-2445	\$225.00
B. "Green" Kit	821-2448	230.50
C. Replacement Basket	821-2446	11.50

D. Magic Pickle Compound

Magic Pickle compound is a dry granular compound that is ideal for cleaning and removing surface oxidation and fire scale from Silver, Gold, Copper and most other non-ferrous metals. The end result is a clean, bright surface. Requires heat to activate. One tablespoon to one pint of liquid. 24 oz. container.

Description	Item#	EACH Prices	
		1-5	6+
Magic Pickle Compound	821-2655	\$7.75	\$7.36

E. Place-It – The soldering fixture.

Safe, asbestos-free material that holds parts together during soldering, welding and brazing. A putty-like material that quickly hardens in any desired form or shape. Will not shrink on setting. Will not rob heat from joints. Ready to use. Withstands heat up to 3,200°F.

Description	Item#	Each
Jar, 4 oz.	810-0360	\$31.75

F. Heat Stop

Our most popular nonasbestos, nontoxic paste that protects precious metals, gems, glass, wood, etc. from heat damage during soldering. Protects up to 1,500°F. Effective up to 2,400°F. May be removed with water after soldering. Net Wt. 14 oz.

Description	Item#	Each
Heat Stop, 14 oz.	813-1850	\$19.75

G. Heat Shield

Protects jewelry components under direct flame so that it's not necessary to remove stones before soldering. Protects up to 5,000°F. Prevents oxidation. Odorless and nontoxic. Washes off with water. Net Wt. 1 lb.

Description	Item#	Each
Heat Shield, 1 lb.	813-1822	\$14.95

H. Kool Jool

Protects against heat while soldering. Lets you solder without removing stones (except opal, turquoise, emerald and other sensitive stones). Thick gel stays where you place it. So easy to use, it's also nontoxic and odorless. Rinses off with water. Net Wt. 8 oz.

Description	Item#	Each
Kool Jool, 8 oz.	813-1855	\$8.88

I. Soldering Grain

Irregularly shaped grains used to hold items for soldering. Acts like a third hand. The granular form allows objects otherwise difficult to position for soldering to be embedded with only the part to be soldered left exposed. Will not discolor gold or silver. Reusable and odorless. May be used wet or dry. If used wet, place in a heat-resistant, nonrusting container. Net Wt. 12 oz.

Description	Item#	Each
Soldering Grain, 12 oz.	830-2310	\$14.95

A

A. Pickler – 12 oz.

Provide a safe and convenient way to heat Gesswein Pickling solution. Our 12oz. capacity pickler achieves pickling temperature in minutes and maintain it without boiling. For removing oxides from the surface of silver, gold, copper and most other nonferrous metals. Supplied with one polypropylene basket for retrieving cleaned workpieces.

Model	Electrical	Dimensions (D x H)		Item#	Each
		Inside	Outside		
A. 400	115V, 125W, 50/60Hz	3" x 4 1/4"	4 7/8" x 5 1/2"	821-2450	\$149.95
Description		Dimensions (D x H)		Item#	Each
Replacement 400 Basket		2 5/8" x 4"		821-2600	\$20.85

B. Gesswein® Pickling Compound

A dry granular acid compound for cleaning and removing surface oxidation and incrustation from silver, gold, copper and most other nonferrous metals. Produces a clean, smooth, bright surface without affecting the tolerance of metals. Long-lasting compound withstands heat up to 300°F (150°C). Use 5 lbs. to make up to 2 gallons.

Description	Item#	Each
B. Gesswein Pickling Compound, 5 lbs.	821-2650	\$22.95
Gesswein Pickling Compound, 25 lbs.	821-2652	49.95

B

C. Citpic – The safer pickling compound.

Citpic is safer to use than standard pickling compound yet just as effective for removing firescale and flux after soldering applications. Citpic is a mild organic citric acid, colorless and odorless. It's gentle on skin and fabrics but tough on firescale and flux residue.

Heat Citpic in your pickle pot for fast, safe, effective cleaning of platinum, gold, silver and steel. You can even use steel tweezers and binding wire—Citpic won't cause copper contamination. Citpic is long-lasting and retains its effectiveness even after repeated use.

Description	Item#	Each
Citpic, 2 lbs.	821-2675	\$12.50
Citpic, 50 lbs.	821-2677	225.00

C

D. Acid Neutralizer

Dissolve approx. 2 oz. in 1 cup of warm water to make neutralizer solution. After removing items from pickling solution, place them into neutralizer solution to stop the pickling process. Wait 30 seconds, remove and rinse well. Do not heat. Sold in 6 oz. container.

Description	Item#	Each
Acid Neutralizer	821-2685	\$4.65

D

E-G Firescoff™ - Prevents Firestain

Revolutionary heat-activated ceramic spray coating. Combines a scale preventer and high-performance non-fluorinated flux for both hard and soft solder in one formula. Leading jewelers and jewelry manufacturers have switched from boric acid, paste flux and pickle solution to Firescoff because it's faster, provides more gemstone protection and cleans up easier. It's also alcohol and fluoride free, offering a real safety improvement over traditional methods. Cleans up easily in warm water, less than two minutes in an ultrasonic cleaner. 1 oz. size protects approx. 60–75 rings.

H-J Firescoff™ Rh for Rhodium

Firescoff™ Rh ceramic coating technology protects and prevents rhodium plated jewelry from turning black during resizing or repair. Avoid the need, time and cost required to strip and re-electroplate rhodium coatings. Multiple repairs are accomplished with a single application. This fluoride free and alcohol free liquid maintains original metal color and patina. Easy warm water cleanup, no pickling needed. Available in 3 sizes, a 1-ounce (30ml) sample size, 4 ounces (125ml) Ideal for bench jewelers needing to protect 200+ pieces; and for multiple jewelers or large shops 34 ounces (1000ml). Bulk refill also available.

J

A. Heetrix

The cleaner, safer way to solder your jewelry.

Space-saving Heetrix is a soldering station that rotates 360° to use in any position you want, then swings out of the way when you aren't using it. Includes a 3³/₄" diameter Hard Solderite disc with a depression underneath that can hold soldering grain (see page 509 830-2310, grain sold separately) for embedding items that need heat protection. Also includes a 4¹/₂" long stainless steel, insulated, cross-lock tweezers in a Third Hand. This all-in-one soldering system is incredibly convenient, which is no surprise since it was designed by master jeweler Jay Whaley. Everything you need to solder is kept neatly in one place which you can swing in and out as needed. Comes with two mounting options: C-Clamp for benches up to 2¹/₄" thick or peg-mount (requires drilling a hole into bench top). Dimensions: 7¹/₂" L x 6" W x 2" H. Net Weight: 3 lbs.

Replacement Solderite Disc	812-0852	6.90

See also AQUAFLAME
for soldering and welding
on page 555

B. Hydroflux Welder System

The cleaner, safer way to solder your jewelry.

Hydroflux is a complete torch system that manufactures its own fuel from distilled water. Uses hypodermic-type tips to create flames ranging from a pinpoint for fine soldering up to a broad flame for sizing large men's rings.

Hydroflux's hydrogen/oxygen mix produces a clean non-contaminating flame ideal for platinum soldering and welding. Produces flame temperatures up to 4,850°F (2,675°C). Ideal for malls, homes and anywhere compressed gas and oxygen tanks are a concern.

Hydroflux comes complete with one torch with 4' flexible hose, eight-piece tip set, chemicals and in-line dryer. Sight gauges indicate when additional flux and water are needed. Hydroflux is easy to use and easy to set up with complete instructions included. Cabinet measures 16"W x 9"D x 10"H. Ship. wt: 45 lbs. Made in USA.

Cotton Fiber Filter	830-0837	9.15

B

C. Electric Soldering Machine

Electric soldering eliminates the hassles associated with flame soldering: no more firescale, no hazardous compressed gas, minimal oxidation and very little cleanup. Solder right next to most stones and pearls without removing them. Retip prongs, size rings, solder jump rings fast, and do assembly work. Easy to use with a little practice: simply position your work and solder chip in the versatile holders, dial up the power (max. temp. 2,000°F) and step on the foot pedal. The joint is as strong and as permanent as any solder joint made with a flame—but much easier to make. The unit is designed so that both hands can rest comfortably on your workbench.

Comes complete with control box and foot pedal, three large and two small carbon rods, contact rod, small and large clamps and stand for large carbon rods. Measures 10¹/₄" W x 6⁷/₈" D x 4¹/₈" H. Weighs 12 lbs. Made in USA.

Description	Item#	Each
Electric Soldering Machine, 110V	830-2030	\$395.00
Electric Soldering Machine, 220V	830-2035	\$25.00
Replacement Rods, set of 5	830-2040	32.95

C

D, E Copper Tong

Designed especially for use with pickling and acid solutions. Will not contaminate solutions nor corrode. Fishtail tips are thinner to pick up small or flat items. Measure 9" long.

G-TEC Superior Torch Performance • Save Money • Safe Workshop

G-TEC Torch Boosters replace acetylene, propane and other fuel gas cylinders. They connect to your low-pressure utility natural gas pipe and boost pressure high enough to make gas flow through a flashback arrestor check valve and give you a hot flame on the torch.

- Never run out of fuel
- Clean natural gas flame improves work quality
- Don't waste time changing empty cylinders
- Make flashback arrestors effective

G-TEC Torch Boosters – Natural gas is up to 10 times cheaper than acetylene and half the cost of propane.

For equal BTUs natural gas costs much less than either acetylene or propane, and because you are connected to the utility natural gas pipe you never have to replace empty cylinders.

Turn the Torch Booster on in the morning and off at the end of the day and that's all you need to do. Torch Boosters automatically supply the right amount of natural gas.

G-TEC boosts utility natural gas to 25 psi, then a natural gas regulator (sold separately) lowers pressure to between 3 and 7 psi, the recommended pressure for most bench torches. The TB-30 and TB-60 models provide the sustained higher pressures needed for casting torches. You can even boost the pressure to 10-15 psi to cast platinum with high-quality results. Platinum casters report better results when heating with natural gas; there is less stress on the metal, less porosity and an overall better quality cast.

Torch Boosters are whisper-quiet and can be installed right next to your bench. G-TEC Torch Boosters are certified by CSA International. OSHA and local fire codes require the use of combination flashback arrestor check valves to protect the gas meter from a torch flashback. The problem is that flashback arrestor check valves need at least 3/4 psi gas pressure to work properly, otherwise they block gas flow. With high pressure natural gas from a G-TEC Torch Booster there is enough pressure to make the flashback arrestor check valve work properly, and still provide a robust flame on the torch.

Quiet and easily maintained.

G-TEC Torch Boosters run in virtual silence and have a very small footprint. Can be easily installed by a licensed plumber in any facility.

For larger units and for assistance with New York City's special regulations, please call our Technical Department at 1-800-544-2043 (Mon-Fri, 9am-5pm EST) for additional information.

Please note: A natural gas regulator is required for G-TEC units. We recommend our #830-1014 Harris Natural Gas Regulator.

Airsep Oxygen Generators

The safe and efficient alternative to oxygen cylinders!

Equipped with their own air compressors, these generators require no special installation. Simply connect the oxygen outlet to your oxygen distribution system and the power cord to a grounded electrical outlet. Just turn the unit on and set your oxygen delivery flow.

A, B Onyx and Topaz Plus Oxygen Generators

AirSep Oxygen Generators provide instant oxygen on demand, eliminating the oxygen deliveries or the transportation and storage of pressurized, volatile oxygen cylinders on premises. Provides all the oxygen needed for most jeweler's torches.

- Generates 93% nominal oxygen concentration.
- Generate oxygen at half the cost of cylinders or liquid oxygen.
- Two models are available: the portable Onyx (on rollers) for one-person and smaller shops and the commercial grade Topaz Plus for production shops. Topaz Plus is wall mountable and includes oxygen delivery and cycle pressure gauges, and high temperature, ozone-resistant process tubing.
- Larger models available. Contact us for details.

Both the Onyx and Topaz Plus utilize molecular sieve to separate compressed air into nitrogen and oxygen, allowing the oxygen to pass through to your torch line. The molecular sieve is completely regenerative and will last indefinitely making AirSep the most user-friendly oxygen generator on the market. The generators require minimal regular maintenance, limited to cleaning the system's particulate filter and replacing filter pads.

CSA and CE approved. 1 year manufacturer's parts and factory labor warranty.

The Little Torch™

When you pick up The Little Torch, you know immediately that you are holding a superbly balanced torch that will enable you to extend your skills far beyond all previous limits. Whether you are in the first stages of learning your craft or have mastered it completely, The Little Torch will open a new world of possibilities for you. Features a rugged aluminum alloy body that weighs only 1.5 ounces and a thin, flexible, lightweight hose that provides added maneuverability.

Offers unmatched versatility—can be used with several fuels, including acetylene, hydrogen, propane, propylene, MAPP and natural gas. Produces a perfectly controlled, completely stable flame hot enough to melt gold, silver, platinum, glass and even ceramic. Can also be used with special heating tips to melt up to 3 oz. of gold or silver. One year manufacturers warranty.

Tip Size	Gas Pressures (PSI)	
	Oxygen	Fuel Gas
2	2	2
3	4	4
4	4	4
5	6	6
6	6	6
7	8	8

Flame drawings are not actual size. Each tip is capable of a variety of settings, with flame sizes larger and smaller than those shown.

A, B The Little Torch™ Deluxe Sets

Each set includes The Little Torch handpiece, five brazing tips, 8' oxygen and 8' fuel gas twin hose with 9/16" connectors, two single-stage regulators (one for oxygen, one for fuel gas), one (empty) oxygen tank, one (empty) fuel gas tank and a carrier.

Description	Item#	Set
A. For Oxy/Acetylene, plastic carrier	830-1020	\$740.00
B. For Oxy/Propane, metal carrier with 5 lb. tank	830-1018	719.00

C. The Little Torch™ Medium Sets

Includes The Little Torch handpiece, 8' Oxygen and 8' fuel gas twin hose with 9/16" connectors and five brazing tips and two single-stage regulators (one for oxygen and one for fuel gas).

Description	Item#	Set
C. Medium for Oxy/Acetylene (MC tanks)	830-1010	\$370.00
Medium for Oxy/Acetylene (B tanks)	830-1011	370.00
Medium for Oxy/Propane	830-1015	370.00

D. The Little Torch™ Starter Set

The starter set includes The Little Torch handpiece, 8' oxygen and 8' fuel gas twin hose with 9/16" connectors and five brazing tips.

Description	Item#	Set
Starter for Propane or Natural Gas	830-1002	\$145.00

E. The Little Torch™ Set for Disposable Cylinders

Perfect for locations where larger compressed air tanks are not permitted. Includes The Little Torch handpiece, #5 tip, 8' oxygen hose, 8' fuel gas hose, preset oxygen regulator, preset propane regulator, wire stand for disposable oxygen and MAPP/LP cylinders and instruction manual. Disposable cylinders not included.

Description	Item#	Each
E. The Little Torch Set for Disposable Cylinders	830-1245	\$246.75
Replacement Oxygen Regulator	830-1027	54.95
Replacement Propane Regulator	830-1029	54.95

F. The Little Torch™ Hose – 8 feet long

Available in connected Twin Line or individual Oxygen or gas hoses with connectors.

Description	Item#	Set
F. Twin Line (green and red) hose with connector	830-1042	\$61.95
Replacement Green (oxygen) hose with connector	830-1043	30.25
Replacement Red (fuel gas) hose with connector	830-1044	30.25

A-E Little Torch™ Regulators

For single torch use. Compact regulators provide accurate control of oxygen and acetylene or propane for welding, soldering, brazing and heating operations. Contain protective check valves and maintain uniform pressure. Easy-turning T-bars. Made in USA.

Description	CGA Connection	Item#	Each
A. For Oxygen	540	830-1021	\$124.95
B. For Acetylene MC Tank	200	830-1022	132.95
C. For Acetylene B Tank	520	830-1024	124.95
D. For Propane	510	830-1023	119.00
E. For Hydrogen	350	830-1016	127.50

F-K Little Torch™ Brazing Tips

Because of their extraordinarily small orifices, tips 2 and 3 are fitted with synthetic sapphires to assure accurate performance and control.

Tip	Oxygen Pressure (PSI)	Fuel Gas Pressure (PSI)	Item#	EACH Prices	
				1-2	3+
F. 2*	2	2	830-1102	\$26.75	\$24.08

P. 6	6/6	830-1450	22.65
Q. 7	8/8	830-1451	22.65

*For acetylene or hydrogen only.

R, S Little Torch™ Heating Tips

For melting up to 3 oz. gold or silver and other work. These tips are specially designed with 4 orifices to produce 4 flames that come together to form one flame. Equal in size to tip 4. Maximum temperature is 3,600°F for propane, 6,000°F for all other fuels.

For	Item#	EACH Prices	
		1-2	3+
R. Propane or Natural Gas	830-1116	\$57.50	\$51.75
S. All other fuels	830-1115	44.15	39.74

T. Holder for The Little Torch™

Holds The Little Torch at the perfect angle, making it handy and safe to use. Keeps up to six tips conveniently organized. Made with a sturdy cast base and heavy-duty (4mm) steel rod, this torch holder is virtually indestructible. Made in USA.

Description	Item#	Each
Holder for The Little Torch	830-1307	\$12.95

U. Magnetic Torch Stand and Tip Organizer

Solid metal stand with weighted base. Includes holes drilled and numbered for tips 2-7. Just a twist of the wrist removes the torch from the magnet. Magnetic clip mounts easily on The Little Torch body (torch and tips sold separately). Measures 4 1/2" high.

Description	Item#	Each
Magnetic Stand	830-1250	\$39.95

The Small Torch™ by Gentec

This lightweight, durable torch features user-friendly control knobs for quick, precise, one-handed flame adjustments and nickel-plated brass handle with stainless steel inner gas tubes for superior strength. Designed specifically for brazing and soldering at the bench as well as melting small amounts of metal. Provides stable, concentrated feather flames up to 6,000°F. Compatible with accessories listed below and other popular brands of accessories. Backed by a two-year manufacturer's limited warranty. UL approved. Made in China.

D-F Smith Casting Torch

Whether you need to melt 1 oz. or 12 oz., this versatile torch does the job. Consists of handle and your choice of two different heavy-duty copper 63.5°-angle tips (sold separately). Handle features rugged two-tube silver-brazed construction, forged brass butt and precision-machined brass head. Threaded and soldered inner tube for prevention of cross-leaking. Ball-type needle valves resist uneven wear and allow easy flame adjustment. Drag nut adjustment on knobs for preferred valve resistance. Measures 1 5/16" dia. x 7"L. Weighs 14 oz. Backed by a lifetime warranty. UL listed. Made in USA.

G. Leak Detector Fluid

Safety is always priority when working with torches! Apply this fluid every time you change your torch, hook up a new tank or torch, or simply when you want to check for any leaks that may have formed in any of the connections. Should a leak be present, the liquid will bubble within seconds of application alerting you of a leak. Contains 8 fl. oz. Please Note: CAUTION! Do not use standard soap solutions to test for leaks; these solutions may contain combustible ingredients. Made in USA.

A. Swiss Torch

The best-selling jeweler's torch in Europe, this versatile and reliable lightweight torch has interchangeable heads for precision light work to casting to larger flames for melting. Use it with propane or natural gas. Not for use with ACETYLENE. The standard torch comes with standard head with three nozzles of graduating tip sizes, each produces a strong and pointed flame. The head features two handy dials (for fuel and oxygen) at the top of the torch where your thumb can easily reach both for tight control and on-the-fly flame adjustments. Made in Switzerland.

PLEASE NOTE: Swiss Torch Casting Head Compress Air (830-1485) is for propane/natural gas and MUST BE USED WITH compressed air ONLY and NO OXYGEN.

Do not use the Swiss Torch with ACETYLENE otherwise damage will occur.

Description	Item#	Each
A. Swiss Torch Kit w/Standard Head and 3 Standard Tips	830-1482	\$250.00
B. Swiss Torch Body Only	830-1480	129.00

G. Swiss Torch Head Compressed Air	830-1485	107.00

See page 520 for Primo™ Fire Resistant Torch Hoses.

H, I Gentec Casting Torch

Casting torch for use with oxygen/propane or oxygen/natural gas. Features a high-quality forged brass handle with "tube-in-a-tube" design for high strength. Combine with Heating Tip to create a versatile casting, soldering and melting torch. Handle measures 6" long.

Description	Item#	Each
H. Casting Torch Handle only	830-1621	\$105.95
I. #6 Heating Tip with Tube	830-1622	53.90

J, K Original HOKE®-JEWEL Torch

For soldering, brazing, welding and melting. All parts are machined from solid brass stock and seamless brass tubing and completely nickel-plated. Tip tube (neck) is fixed and nonadjustable. Valves are easily and smoothly operated by fingertip. Uses standard 1/4" hose (not included). Includes tips ranging in size from pinpoint to large brush. Measures 9" long. Adapter set includes six micro-tips which produce a nonoxidizing flame so less time is needed in the pickler. Not recommended for use with acetylene

Description	No. of Tips	Item#	Each
Natural Gas	3	830-0221	\$36.75
J. Propane/Butane	4	830-0222	46.00

*Includes pilot that provides continuous flow of gas for quick ignition.

A. Harris® Check Valves for Regulators

Oxygen and fuel gas kept separately are not explosive. When mixed in a hose or regulator and then ignited, they can explode. Check valves prevent backup of gases into regulator so they cannot mix. Harris Check Valves may be installed on any regulator outlets with standard $\frac{9}{16}$ "-18 tpi. connections.

Model	Item#	Each
A. Oxygen	830-1417	\$26.20
Fuel Gas	830-1416	26.20

B-E Harris® Single-Stage Regulators with Check Valve

For general use when using one torch. Features all-brass construction to hold up even in corrosive atmospheres. Extra-large $2\frac{3}{4}$ " pressure gauges so you can easily read PSI even when you are at a distance from the cylinder. Large $2\frac{3}{4}$ " diaphragm ensures constant delivery pressure. A check valve is installed on all regulators. Oxygen Regulator is equipped with a Harris Surge Guard for protection against sudden overflow of oxygen into the regulator. Standard $\frac{9}{16}$ " connections. UL listed.

Model	CGA	Item#	Each

D. Acetylene for large tanks	510	830-1389	184.00
E. Propane	510	830-1411	212.50

*Includes adapter to convert MC regulator to B tank.

F-H Harris® Two-Stage Regulators with Check Valve

Especially useful when operating more than one torch from the same cylinder. The first stage reduces the inlet gas pressure to relatively constant levels. The second stage further reduces the gas pressure and delivers the gas to the work precisely at the set point pressure. Helps to provide flame stability as the pressure levels change. Features chrome body with large, brass, easy-to-read $2\frac{1}{4}$ " pressure gauges. All regulators include a check valve. Oxygen Regulator is equipped with safety Surge Guard to prevent sudden overflow of oxygen into the regulator. Standard $\frac{9}{16}$ " connections. UL listed.

Model	CGA	Item#	Each
F. Oxygen	540	830-1415	\$379.05
G. Acetylene	300	830-1413	379.05
H. Propane	510	830-1414	379.05

I. Smith Flashback Arrestors for Torch or Regulator

Flashback arrestors with built-in check valves for preventing flashback fires and reverse gas flows. Feature sintered stainless steel filter, high-quality brass construction and rugged corrosion-resistant case. Easy to install on any torch with standard B ($\frac{9}{16}$ ") fittings or regulator. Sold in sets of two: one for oxygen and one for fuel gas. UL listed.

Description	Item#	Set of 2
I. Flashback Arrestors, set of 2, for torch	830-0816	\$75.00
Flashback Arrestors, set of 2, for regulator	830-0812	75.00

J. Y-Connectors

For multiple torch hookups. Complete with shutoff valves. All connections $\frac{9}{16}$ ".

Model	Item#	Each
J. Oxygen	830-0780	\$47.45
Fuel Gas	830-0785	47.45

A-D Tanks and Cylinders

Tanks and Cylinders include valves and are shipped empty.

Description	Capacity	Overall Ht.	Item#	Each
A. Oxygen Tank	60 cu. ft.	23 $\frac{1}{2}$ "	830-0755	\$195.85
B. Oxygen Cylinder	20 cu. ft.	18"	830-0756	139.95
C. Acetylene B Tank	40 cu. ft.	23 $\frac{1}{4}$ "	830-0760	153.50
Acetylene MC Tank	10 cu. ft.	16"	830-0761	87.00
D. Propane Cylinder #5	5 lbs.	12 $\frac{1}{2}$ "	830-0766	143.95

E. Tuline Hose

Prevents tangling of torch hoses. Consists of two color-coded reinforced hoses (green for oxygen and red for fuel gas) that are uniquely coupled to prevent tangling and can be separated by simply pulling them apart. $\frac{1}{4}$ " I.D. Measures 25' long. Complete with fittings.

Description	Fittings	Fuel Gas	Item#	Each
Premium Grade T	$\frac{9}{16}$ "	All fuel gases	830-0805	\$99.00

F. Slip-On Hose Connectors

All consist of a nut with stem for use with standard I.D. hoses.

Description	Gas	Item#	Each
$\frac{9}{16}$ " RH nut & stem for $\frac{1}{4}$ " I.D. hose	Oxygen	830-0353	\$2.31
$\frac{9}{16}$ " LH nut & stem for $\frac{1}{4}$ " I.D. hose	Fuel	830-0354	2.31

G-H Reinforced Rubber Hose

Available in Grade T red for propane, acetylene or natural gas. Also available in Grade R green for oxygen. Twin Line consists of one red (gas) hose and one green (oxygen) hose - both Grade R. $\frac{1}{4}$ " I.D. Sold by the foot. Please specify minimum continuous length.

Description	Fuel Gas	Item#	Per Foot
G. Red Hose - Grade T	Propane, Acetylene, Natural Gas	816-2351	\$2.95
H. Green Hose - Grade R	Oxygen	816-2350	2.95
Twin Line - Both Grade R	Oxygen + Acetylene Only	816-2352	5.00

I-K Primo™ Fire Resistant Torch Hoses

Safety is always top priority when operating a torch! Primo has gone that extra step and created Fire Resistant Torch Hoses for Little Torch, Swiss Torch, and Meco Torch. These premium high quality replacement torch hoses are lighter in weight than most competitive hoses and much more flexible in use. This equates to better productivity on the bench. Each hose is complete with quality stainless steel clamp and sold brass fittings making the hookup to your torch fast and easy. Tank end connectors are North American B $\frac{9}{16}$ "

Description	Hose ID	Torch End Connector	Length	Item#	Each

			8ft.	830-1054	51.50
			10ft.	830-1055	58.50

L. Carrier for Oxy/Acetylene Tanks

Makes it easy to move entire torch outfit from one place to another. Wheels and single handle provide excellent maneuverability. Built-in box holds wrench, extra tips, and other small accessories so that they are within easy reach. Hose wrap keeps lines neat. Holds our #830-0760 Acetylene B Tank and #830-0755 Oxygen Tank. Measures 19"W x 37 $\frac{1}{2}$ "H. Ship. Wt: 20 lbs.

Description	Item#	Each
Carrier for Oxy/Acetylene Tanks	830-0750	\$102.00

M. Torch Wrench

A multi-use wrench for nuts on torches, regulators and tanks. Measures 8 $\frac{1}{2}$ " overall.

Description	Item#	Each
Torch Wrench	830-0790	\$15.50

A, B Lighters

Electric Torch Mate simply and automatically lights any torch—using only one hand. Rest the torch on the lighter's ignition switch, and small spark from the electrode immediately lights the torch. This handy benchtop accessory comes complete with two AA batteries.

Torch Lighter produces a spark by friction, supplied with one flint.

Description	Item#	EACH Prices	
		1-2	3+
A. Electric Torch Mate	830-0407	\$36.15	\$32.54
B. Torch Lighter	830-0410	4.45	-
Flints, pkg. of 5	830-0411	4.15	-

C. Blazer Micro Torch

Hand-held butane refillable micro torch. Built-in Piezo Quartz Crystal Electronic Ignition is activated with one push. Gas flow is easily adjusted to provide a variety of flame sizes from a maximum length of about 3½" down to a pinpoint. The 26-gram fuel chamber, when filled, can provide heat up to 2,500°F for 90 minutes.

Easy-to-grip size. The main tank body features a diamond grid design for a superior, and extra safe, grip and also includes a detachable base for hands free table-top work. Made in Japan.

We recommend using a triple refined, premium grade butane gas specially designed for use with micro torches. Otherwise the small parts and orifices can become clogged with the dirt and grime found in standard brands of butane gas.

Description	Item#	Each
Blazer Torch without refill	830-0010	\$61.60
Butane Refill Cartridge, 9 fl. oz. 	830-0012	5.70

 **UPS® hazardous shipping surcharge applies. Ships via UPS® Ground only, no air, FedEx®, or US Mail shipments. Cannot ship to Alaska, Hawaii or Puerto Rico.**

D. Harris® Torch Tip Cleaners

Set of 13 tip cleaners with individual tip cleaner numbers and drill sizes embossed in case. Covers drill sizes 49 to 77.

Description	Item#	Each
Harris Torch Tip Cleaners	830-1418	\$18.85

E, F Torch Holders

Convenient and safe way for hanging your torch when it is not in use. Mount anywhere on workbench and accommodate most torches except The Little Torch.

Description	Length	Item#	Each
E. Bracket-Type Holder	11"	830-1305	\$5.85
Short Bracket-Type Holder	3½"	830-1301	8.50
F. Hook-Type Holder	12"	830-1300	3.95

G. Soldering Glasses

Made of black lightweight plastic. Feature adjustable earpieces for comfortable fit and easily replaceable polycarbonate lenses. Lens #7 is approved by the Platinum Guild for platinum soldering. Lens #10 is used for casting. Lens #5 can be used for gold and silver. CE approved. Meet ANSI Z87.1 requirements.

Description	Item#	Each
G. Soldering Glasses with #5 Lens for Gold & Silver	816-1784	\$15.95
Soldering Glasses with #7 Lens for Platinum	816-1785	17.10
Soldering Glasses with #10 Lens for Casting	816-1786	16.15

Tumblers

From finishing castings or small parts to removing burrs and sharp edges on a few pieces or on thousands, Gesswein carries a tumbler to suit any application. Choose from:

Magnetic Finishing – Newer technology featuring fast centrifugal action to finish non-ferrous parts only. Small stainless steel pins (0.3 to 0.5mm in diameter) will polish the tiniest intricate details without lodging. Magnetic tumblers provide a uniform finish in a fraction of the time compared to vibratory or rotary tumblers. Cycle times are generally 30-45 minutes long.

Vibratory Finishing – Debur and finish small or large, detailed or plain parts to a uniform finish. Media moves from the edge of the bowl to the center in an ellipse, abrading and finishing in and around parts. More versatile than a rotary tumbler, Vibratory Tumblers can utilize both abrasive and polishing medias.

Barrel (Rotary) Finishing – The traditional method of tumbling updated to include easier loading and no leaks. Steel Shot is the preferred media which has the advantage of peening and work hardening the parts to a shiny finish. Generally lower operating costs than other methods of tumbling.

A

A. Stainless Steel Shot Pins – For Magnetic Tumblers

Rods in two diameters for reaching into and polishing the tiniest details and settings without lodging. All 5mm long. Blunt ends. 0.5mm is supplied with most magnetic tumblers, 0.3 mm is available for finely detailed parts.

Diameter	Item#	Each
0.5mm Shot, 0.5 lb.	852-1094	\$15.95
0.5mm Shot, 2.2 lbs.	852-1097	55.00
A. 0.3mm Shot, 0.5 lbs.	852-1096	29.90
0.3mm Shot, 2.2 lbs.	852-1099	116.75

B

B. Magnetic Separator Gun – For Steel Shot

Quickly and easily separates metal media from parts—a great time-saver. Eliminates the tedious task of picking media off parts by hand. The gun comes with a collection bowl that holds the media until the job is completed. May be used dry or with media in water. Measures approximately 9" in length.

Description	Item#	Each
Magnetic Separator Gun	852-0320	\$112.75

C

C. Burnishing Compound M – For Stainless Steel Shot

Burnishing Compound M for non-ferrous metals is a liquid burnishing compound for magnetic finishing. This product was specifically designed to keep the magnetic stainless steel pins clean and prevent formation of a "smut" that is often seen with this type of media in a magnetic process. Product can be used to provide cleaning/burnishing of metals such as gold, platinum, silver, brass, copper, aluminum and stainless steel. Product is a non-corrosive acidic mixture. Does not turn water black as others do! Sold by the gallon.

Description	Item#	EACH Prices	
		1	4+
Burnishing Compound M	852-0885	\$40.95	\$36.86

D

D. Burnishing Compound #44S – For Stainless Steel Shot

Specially formulated chemistry for use with stainless steel shot. Use just 1/2 tsp. per 6" diameter bowl in Magnetic Tumbler. Nontoxic, nonhazardous—can be disposed directly to sewer system.

Vibratory Tumblers

Vibratory tumbling can dramatically reduce or even eliminate costly hand-finishing time and, at the same time, maintain the high-quality finish that you require on your parts. Parts are evenly distributed throughout a cascading media, producing an even, identical finish on each piece. There is never any distortion of your parts.

All of the RAYTECH tumblers are heavy-duty for continuous use. Each comes equipped with a drain and hose for flow-through system operation except model #5. Each unit is individually inspected prior to shipping and is backed by a one-year guarantee. Whether your polishing or deburring needs are for an occasional small quantity or for thousands of parts daily, Gesswein has a wide choice of top-quality vibratory tumblers for your exact application.

Specifications

Model	Working Capacity* (cu. ft./gals.)	Max. No. Ladies' Rings**	Vibrations per Min. (60Hz/50Hz)	Bowl Dimensions

5	0.05/0.4	25	3,000/2,500	8"	3"	3 3/4"

Media Capacities

Vibratory Tumblers must be filled with the correct amount of media in order to achieve the proper tumbling action. Under filling will result in diminished performance of media. Overfilling, especially with Steel Shot, can strain the tumbler motor. Use the following chart as a guide. All media capacities are listed in pounds.

Model	Ceramic Light	Plastic Medias			Dri-Shine		Steel Shot
		Blue	Green	Lt. Green	I	III	
40	30	22	18	22	16	13	100
25SS	17	12	10	12	10	6	50
18	9	8	8	8	4	3	25
10	7	5	4	5	4	2.5	0
5	3.5	2.5	2.5	2.5	2	1.25	0

* Media plus parts. A proper ratio of media to parts (approx. 10 to 1) must be maintained in order to cushion the parts and protect them from striking each other.
 **Approximately 1" diameter.

A. Vibratory Tumbler #5

Ideal for small sample test batches as well as for finishing of small parts. Complete with bowl and cover. Will tumble approx. 25 average size ladies' rings. Bowl diameter is 8" with a .05 cu. ft. (3 pts.) capacity. Measures 9" overall height. Cannot be used with Flow-Through System. Made in USA.

Bowl Dia.	Voltage	Item#	Each
A. 8"	115V, 50/60Hz	852-0710	\$104.95
8"	230V, 50Hz	852-0700	125.00
Replacement Bowl & Cover		852-0905	22.95

B. TV-5 Stone Finishing Kit

TV-5 Stone Finishing Kit includes all you need to start finishing agate and similar hard stones (not recommended for soft stones): Vibratory Tumbler #5, extra bowl and four-step finishing media (100/120 grit silicon carbide for rough grinding, 700 grit silicon carbide for fine grinding, lolox 50 for prepolishing and Raybrite TL for final polishing). Finishes 8-10 lbs. Made in USA.

B. TV-5 Stone Finishing Kit - 8" Bowl	852-0715	\$129.95
Replacement Bowl & Cover	852-0905	22.95

Stones not included.

A. Dri-Polisher Vibratory Tumbler

The Dri-Polisher Vibratory Tumbler imparts a bright, high shine on smooth jewelry surfaces. Polishes bracelets, rings, earrings and medium to heavy chains. Comes complete with Dri-Shine III, a crushed cob media treated with red rouge, suitable for gold, gold alloys, silver and silver alloys. Easy to operate: just fill with media, insert jewelry and turn on. Use with dry medias only. Holds 60 small ladies' rings. Measures 10" dia. x 11½"H. Made in USA.

Bowl Dia.	Voltage	Item#	Each
A. 10"	115V, 50/60Hz	852-0746	\$150.00

Replacement Bowl & Cover		852-0915	88.95

C. Vibratory Tumbler #18

All the features of the larger tumblers in a midsized unit. Ideal for running small production lots. Strong enough to tumble 25 lbs. of steel shot. Will accommodate up to 90 average size ladies' rings. Flow-Through System (see p. 526) is recommended in order to keep parts clean and bright. Bowl diameter is 12" with a capacity of .15 cu. ft. (3.5 qts.). Measures 16" overall height. Ship. Wt. 13 lbs. Made in USA.

Bowl Dia.	Voltage	Item#	Each
C. 12"	115V, 50/60Hz	852-0751	\$525.00
12"	230V, 1 Ph, 50Hz	852-0752	550.00
Replacement Bowl & Cover		852-0917	199.95

D. Vibratory Tumbler #25SS

For use with all medias including steel shot. Designed with a heavy-duty drive and suspension system. Action is infinitely adjustable through a full range of speed: from a gentle cascade for delicate parts up to a brisk, aggressive tumbling action for rough castings. Will tumble 125 average size ladies' rings. Bowl diameter is 14" with a capacity of .25 cu. ft. (7.5 qts.). Tumbler #25SS includes a discharge port for easy unloading. Measures 16" overall height. Ship. Wt. 22 lbs. Made in USA.

Bowl Dia.	Voltage	Item#	Each
D. 14"	115V, 50/60Hz	852-0723	\$665.00

Replacement Bowl & Cover #25SS		852-0919	255.00

Made in the USA

A

A. Vibratory Tumbler #40

Adjustable counterweights allow you to control the amplitude (strength of vibration) from a gentle cascade for delicate parts up to a brisk, aggressive tumbling action for rough castings. Includes a 17" diameter, cross-linked polyethylene bowl with a .35 cu. ft. (2.3 gals.) capacity. Will tumble 200 average size ladies' rings. To run Steel Shot, use the optional Shot Bowl, which holds 100 lbs. of shot plus parts. Tilt version features a hinged bowl with handle to allow forward tilting and easy removal of parts and media. Measures 24" overall height. Ship. Wt. 51 lbs. (Tilt version 56 lbs.) Made in USA.

Bowl Dia.	Voltage	Item#	Each
A. 17"	115V, 50/60Hz	852-0726	\$1,210.00
17"	230V, 1 Ph, 50Hz	852-0727	1,235.00

B

B. Flow-Through Systems

A Flow-Through System automates your Vibratory Tumbler by automatically dispensing a solution of water and burnishing compound into the tumbler bowl. All plastic, ceramic and steel medias require a slow, steady drip of water and burnishing compound in order to keep parts and media clean, cool and lubricated and to assure a bright, clean finish on the parts. Upper container of Flow-Through gravity-feeds solution into the tumbler bowl by means of an adjustable needle valve. Spent water drains out of tumbler into lower container. Complete with two containers for solution and a heavy-duty steel base with brackets to lock Tumbler in place. Base raises Tumbler to convenient working height. Ship. Wt. 65 lbs. Made in USA.

Description	Item#	Each
For Tumblers #40/#75	852-0934	\$625.00

C

C. Metal Finishing Sets for Vibratory Tumbling

There isn't a better or more complete set of everything you need to handle most of your vibratory finishing needs for raw castings and most jewelry parts. Our Metal Finishing Sets include a complete supply of our three most popular medias—Green and Light Green Plastic Pyramids and Dri-Shine III—plus a supply of Burnishing Soap B. Use Green Pyramids (p. 528) for first cut, Light Green Pyramids (p. 528) for second cut and Dri-Shine III (p. 537) for a bright, high finish on gold and yellow metals. A complete tumbling cycle takes an average of 24 hours—5 hours with Green Pyramids, 3 hours with Light Green Pyramids, and 16 hours with Dri-Shine III.

A. Steel Shot Compound #50 – For Carbon Steel Shot

Burnishing compound with a rust preventative to keep your shot (and jewelry) clean and bright. A unique feature of Compound #50 is that it may be used to protect your shot from rust and corrosion after tumbling. Simply empty excess water and add Compound #50 directly to shot. Compound #50 leaves a protective coating you can feel. Your shot is protected for weeks at a time without storing it underwater! Sold in quart containers. Not recommended for use with Stainless Steel Shot.

C. 1 pint	852-0875	\$8.25
1 gallon	852-0880	39.95

C

D. Soap Detergent Powder for Rotary Tumbling – For Carbon Steel Shot

Gesswein Soap Detergent Powder acts as a lubricant as well as a cleaner. 3 lb. jar. Recommended for use with Carbon Steel Shot. Not for use with Stainless Steel Shot.

Qty.	Item#	Each
3 lb. jar	852-1250	\$29.95

D

E. Soap Powder – For Carbon Steel Shot

Formulated for use with carbon steel shot in rotary tumblers, these powders are nonhazardous and lighter in weight than liquids, reducing shipping costs. Not for use with Stainless Steel Shot.

- Compound #750 is designed to clean shot that has darkened due to oxidation. Contains a rust inhibitor that protects shot during storage.
- Compound #910 is used during tumbling to keep shot clean and to brighten gold and silver jewelry. Recommended for use in a rotary tumbler, barrel tumbler.

Description	Qty.	Item#	Each	Description	Qty.	Item#	Each

F, G Soap Powder A – For Cutting Media

Recommended for fine finishing and burnishing brass, bronze and similar materials with plastic and ceramic media. This soap has grease cutter for oil-coated workpieces. Not for use with Stainless Steel Shot.

Qty.	Item#	Each
F. 8 oz.	852-0865	\$4.95
G. 1 lb.	852-0870	6.95

F

G

H. Compound 20L – For Cutting Media

Concentrated, all-purpose liquid compound for all cutting media. Specifically designed for tumbling systems to condition water, clean and lubricate plastic and ceramic media and parts, and suspend grit. Not for use with Stainless Steel Shot.

Qty.	Item#	EACH Prices	
H. 1 quart	852-1020	1-3	4+
5 gallons (ship. wt: 47 lbs.)	852-1021	135.00	-

H

A

A. Ceramic Media for Light Bur Removal

Efficient, long-life aluminum oxide in a hard ceramic bond for light bur removal and smoothing of rough castings. Deburs both soft and hard metals such as aluminum and steel. 30° ends reach into grooves, corners and openings. Density: 100 lbs. per cu. ft. Shape: 30° cylinders, 5/16" x 9/16".

Qty.	Item#	Pkg.
5 lbs.	852-0432	\$18.00
10 lbs.	852-0433	\$2.00

B

B. Blue Plastic Pyramids

Aluminum oxide (approx. 220 grit) in a plastic bond. Aggressive cutting media with good but minimum stock removal. Excellent as a first cut-down step for rough castings, stampings, etc. More aggressive than Green Media. Density: 62 lbs. per cu. ft. Shape: pyramid, 1/4".

Qty.	Item#	Pkg.
5 lbs	852-0435	\$28.95
10 lbs.	852-0436	53.95
50 lbs.	852-0437	239.00

C

C. Green Plastic Pyramids

Plastic bond impregnated with fine silica (approx. 320 grit). Provides a light cutting action. Often used as a first cut-down step for delicate and intricate parts, for castings, and for removing sharp edges on stampings. Leaves a smooth, matte finish. Included in all Metal Finish Sets. Density: 56 lbs. per cu. ft. Shape: pyramid, 1/4".

Qty.	Item#	Pkg.
5 lbs.	852-0438	\$27.50
10 lbs.	852-0439	53.00
50 lbs.	852-0440	250.00

D

D. Light Green Plastic Pyramids

Plastic bond with super fine silica (approx. 400 grit). Provides an extra-fine cutting action for smoothing surfaces. A prepolysh media that leaves a very smooth, matte finish ready for the final polish. Included in all Metal Finish Sets. Density: 62 lbs. per cu. ft. Shape: pyramid, 1/4".

Qty.	Item#	Pkg.
5 lbs.	852-0441	\$29.95
10 lbs.	852-0442	53.95
50 lbs.	852-0443	230.95

E

E. Earring Post Protectors

These silicone rubber sleeves protect ear posts when setting, tumbling or plating. Sold by the gross (144 each).

		1-49	50+
Earring Post Protectors	852-1155	\$8.10	\$6.08

A. Dri-Shine I

Crushed walnut shells with red rouge. Excellent for gold and other metals. Imparts a rouge powder to the surface of the workpiece, which helps to prevent tarnish. Density: 35 lbs. per cu. ft. Shape: irregular particle, 2mm. Made in USA.

Qty.	Item#	Pkg.
5 lbs.	852-0444	\$12.95
10 lbs.	852-0445	22.95
50 lbs.	852-0446	89.95

A

B. Dri-Shine III

Crushed corncob with stain-free rouge. Our most versatile formula for obtaining final finish on gold and other metals. A clean media which leaves no residue. Polishes only—does not remove metal. Run dry for 16 to 48 hours to achieve a bright luster that is close to a hand-buffed finish. Recharge as needed with Simichrome Polish (see p. 107). Included in all Metal Finish Sets. Density: 30 lbs. per cu. ft. Shape: irregular particle, 2mm. Made in USA.

Qty.	Item#	Pkg.
5 lbs.	852-0447	\$12.95
10 lbs.	852-0448	23.95
50 lbs.	852-0449	99.95

B

C. Dri-Shine VII

Dri-Shine VII is crushed, finely graded nutshell media precharged with enhancers for a bright final finish. Made in USA.

Description	Item#	Each
Dri-Shine VII, 5 lbs.	852-0450	\$42.95

C

D. Ground Cob

High quality, pure refined ground cob. For drying jewelry parts. Absorbs moisture and prevents water stains. Made in USA.

Qty.	Item#	Each
3 lb. Box	812-0800	\$6.80
40 lb. Bag	812-0700	54.25

E. Tumble Finishing for Handmade Jewelry:

Mass Finishing on a Small Scale – 4th Edition, By Judy Hoch

This handbook shows jewelers how to save time and money while mass finishing handmade jewelry. Provides descriptions of basic equipment and supplies, including rotary and vibratory tumblers, magnetic and centrifugal disc finishers, medias and compounds. Helps readers choose the right process for each application, ensuring optimal results. Passes along the author's firsthand knowledge about preventing disasters and solving problems, all in an easy-to-read informal style. Contains black-and-white photos. A great book for novices. Softcover, 47 pages.

Description	Item#	Each
Tumble Finishing for Handmade Jewelry - Book	811-0041	\$15.00

E

Media Capacities

Vibratory Tumblers must be filled with the correct amount of media in order to achieve the proper tumbling action. Under filling will result in diminished performance of media. Overfilling, especially with Steel Shot, can strain the tumbler motor. Use the following chart as a guide. All media capacities are listed in pounds.

Model	Ceramic Light	Plastic Medias			Dri-Shine I	Steel III	Shot
		Blue	Green	Lt. Green			
40	30	22	18	22	16	13	100
25SS	17	12	10	12	10	6	50
18	9	8	8	8	4	3	25
10	7	5	4	5	4	2.5	0
5	3.5	2.5	2.5	2.5	2	1.25	0

* Media plus parts. A proper ratio of media to parts (approx. 10 to 1) must be maintained in order to cushion the parts and protect them from striking each other.
 **Approximately 1" diameter.

A-G Steel Shot – Small shapes for intricate burnishing.

Media for rotary (barrel) and vibratory tumblers. Burnishes your jewelry to a bright high luster without scratching. Corrosion-resistant stainless steel shot requires no special rust inhibitors or cleaners. Economical carbon steel shot requires rust-preventive compounds for use and storage. Available in packages of individual shapes and two mixtures: rotary and vibratory. Rotary mixture works in rotary tumblers. Contains 20% round balls, 40% diagonals, 20% ball cones and 20% pins. Vibratory mixture works in vibratory tumblers. Contains 40% diagonals, 30% ball cones, 20% round balls and 10% oval balls. Note: 2 lb. packages have 1/2 lb. of each shape. Density: 330 lbs. per cu. ft.

Description	Pkg. Size	Stainless Item#	Each	Carbon Item#	Each
A. Round Balls, 1/8"	2 lbs.	852-1071	\$52.50	852-1045	\$15.50

*Not recommended for use in Vibratory Tumblers.

H. Steel Shot Cleaner – For Carbon Steel Shot

Discolored Carbon Steel Shot can discolor the jewelry you tumble in it. Gesswein Steel Shot Cleaner restores your shot to its original shiny luster. Even if your shot has turned gray or black, in most cases Gesswein Steel Shot Cleaner can brighten it again. Keep a gallon on hand and use it at the first sign of discoloration. Not recommended for use with Stainless Steel Shot (use Coca-Cola to clean stainless steel shot, see "Tech Tips" tab above.) Sold in gallon containers.

H

Description	Item#	Each
Steel Shot Cleaner	852-1032	\$32.75

I. Magnetic Separator Gun – For Steel Shot

Quickly and easily separates metal media from parts—a great time-saver. Eliminates the tedious task of picking media off parts by hand. The gun comes with a collection bowl that holds the media until the job is completed. May be used dry or with media in water. Measures approximately 9" in length.

Universal Jewelry Polishing Set	852-0045	\$195.95

A-C Motorized Rotary Tumblers

Rotary tumbling is an ideal polishing method for both gold and silver.

Our high quality rotary tumblers have been designed for heavy-duty use as well as for flexibility, with interchangeable barrels of different sizes. Each model features a high/low speed switch for a choice of aggressive or milder tumbling action. All barrels are constructed of tough, heavy-duty plastic. Leakproof, plug-type lid is located on side of barrel for easy access. Barrels have no linings to corrode or rust. You'll save time and money on expensive relining charges.

Barrels are available in 5 capacities from .02 to 1 cu. ft., but not all barrels can be used on every tumbler. Our rotary tumblers are sold without barrels; this way, you can choose only the barrels that will meet your specific requirements. See Rotary Tumbler Barrel Chart (below) for restrictions. All units listed are 110V, 6A, 690W, 60Hz. Made in USA.

Motorized Rotary Tumblers (barrels not included)

Style	A. Mini 2-Bar	B. 2-Bar	C. 3-Bar
Dimensions (without barrels)	23 1/2"L x 16"W x 13"H	36"L x 19"W x 13"H	36"L x 19"W x 13"H
Length of rotary bars	9 1/4"	24"	24"
Distance between bars	4 1/2"	7 1/2"	3 1/2"
Ship. Wt.	43 lbs.	63 lbs.	69 lbs.
Item#	852-0102	852-0100	852-0105
Each (base only, no barrels)	\$995.00	\$1,045.00	\$1,185.00

220V, 50Hz and 220V, 60Hz available by special order.

Rotary Tumbler Barrels (shown on tumblers above)

Include aluminum lids with black rubber seal and wing-nut for leak-free tumbling.

Style	#1	#2	#3	#4	#6
Capacity/Steel Shot Capacity*	.02 cu. ft./3 lbs.	.12 cu. ft./15 lbs.	.2 cu. ft./30 lbs.	.5 cu. ft./50 lbs.	1.0 cu. ft./150 lbs.

Each	\$73.50	\$115.50	\$150.50	\$190.50	\$299.50

*The amount of shot listed fills each barrel about 50%. Optimal working capacity of each barrel should be approximately 60-65% full, including shot and jewelry items.

D. Auto-Reversing Rotary Tumbler

This tumbler allows you to see the tumbling process in action without having to open the barrel. Features auto-reversing function for thorough processing and separate controls for cycle speed and duration. Holds up to 30 rings. Easy to use: fill barrel to roughly 50% capacity with your choice of steel shot, add water to roughly 75% capacity, add 1ml of cleaning or polishing compound, place jewelry in barrel and run tumbler. Remove jewelry from barrel when done and rinse with water. Capacity: 4 1/2 lbs. Electrical: 120V, 5A, 25W, 50/60Hz. Measures 10 7/8"W x 9 7/8"D x 11 7/8"H with 8" dia. x 7 1/2"W clear barrel that has a 4" opening. Weighs approx. 17 1/2 lbs. Made in Taiwan.

Replacement Barrel	852-0112	155.00

E-G Economy Rotary Tumblers – Three sizes from which to choose!

Each of our economical rotary tumblers has a sturdy steel base, continuous-duty fan-cooled motor with overload protection, and watertight black rubber barrel with snap-on lid. All 3 sizes are perfect for rock tumbling and for tumble polishing jewelry with steel shot. All are 115V, 1/75 HP, .54A, 60Hz.

Supra® Swiss High-Precision Tweezers

Handcrafted to perfect tip symmetry and balance, polished edges, superior no-scratch/anti-glare satin finish. Many styles and materials are available for the special needs of industry, jewelers, watchmakers, electronic and medical device manufacturers.

SA = Stainless Steel Anti-magnetic. Good corrosion resistance. The alloy is low carbon and contains 16.5% to 18.5% chromium plus nickel and molybdenum.

NC = Super Alloy. SIX times harder than anti-magnetic Stainless Steel these premium tweezers have high shape retention characteristics and are especially high corrosion resistance. Ni-Cr-Mo composition, fully non-magnetic and can be used up to 800°C.

BR = Brass. Especially useful for handling scratch-sensitive mechanical parts such as watch components, magnets, etc. Non-magnetizable with good to excellent corrosion resistance.

C = Carbon Steel. Our cutting tweezers retain sharpness with these heat treated blades. Used in Electronics, Jewelry and Watchmaking. Made in Switzerland.

A. Style #00

Strong, flat edges, thick tips.

Supra® Tweezers with Replaceable ESD-safe Plastic Tips

These high-precision tweezers feature stainless steel bodies with replaceable Electrostatic Discharge ESD-safe plastic (PA66/CF30 polyamide 66 reinforced with 30 wt% carbon fiber) tips. Heat stabilized with very high rigidity and excellent tensile and flex strength. Good heat capability with continuous use temperature of 266°F (130°C). Not recommended for continuous use with strong acids, alkalis, hot water or steam. Chemically resistant to oils, grease, fuels and non polar solvents. Typical applications include handling of sensitive components and devices such as electronic components, micro-mechanical parts, glass and ceramic substrates, capillary, etc. Made in Switzerland.

A. Supra® Tweezers #3C with Extra Fine Tips

Anti-magnetic anti-acid stainless steel body with ESD-safe tips as described above. #3C is 110mm (4¼") overall length. Tip measures 0.03" (0.8mm) wide x 0.05" (1.3mm) thick.

Description	Item#	Each
A. 3CCF	195-1330	\$24.95
Replacement Tips (Pair)	195-1331	9.55

B. Supra® Tweezers #5 with Very Fine Tips

Anti-magnetic anti-acid stainless steel body with ESD-safe tips as described above. 130mm (5") overall length. Tips measures 0.02" (0.5mm) wide x 0.025" (0.6mm) thick.

C

C. LaVaque Head & Shank Tweezers with Visual Alignment

If you've ever soldered a head onto a shank only to find it misaligned by a few degrees, you'll love these tweezers. Feature patented LaVaque visual alignment for soldering settings accurately the first time, every time. Curved, grooved tip securely holds the shank in place while the transparent glass base secures the head, allowing you to see from the top and all sides for perfect alignment. Replaceable high-temperature glass withstands direct flame and soldering temperatures required for gold and silver, lasting for dozens of jobs. Not recommended for platinum and other metals that require higher soldering temperatures.

		1-2	3-9	10+
Cup-Shaped Pearl Tweezers	195-0310	\$5.95	\$5.36	\$5.06

A. Vacuum Tweezers

Pick up small stones easily and efficiently! Gesswein's Vacuum Tweezer offers unmatched precision over standard tweezers. The self-contained miniature vacuum pump has 2 handpieces (pens) for picking up loose stones, diamonds, cabochons and faceted stones without damaging them. Because there are no tweezer tips on the girdle of the stone, placement is easier, faster and more precise. This is especially useful when setting small stones and when setting stones in wax.

Comes complete with 4 stainless steel tips (2 Each of 1.2mm and 0.9mm) for holding stones of various sizes. Vacuum is created by placing the forefinger over a hole in the handpiece. To break the vacuum, place the stone where you want it to be placed and simply lift your finger from the hole. The vacuum generator measures just 5" long x 3¼" wide x 2" high with an airflow of 125 cu. in./min. 110V. Shipping Weight: 1.2 lbs. Made in Thailand.

Includes :

- Vacuum Unit with 2 Inlet Holes
- 2 pencil-thin, lightweight aluminum pens
- 4 stainless steel tips (2 Each of 1.2mm and 0.9mm)
- 2 flexible air tubes each measuring 36" in length

Description	Item#	Each

F. 6" Magnetic Ball Vice	814-0101	1,200.00

G. Foredom® Mini Vice

Securely holds small parts. Has 1 3/4" slotted grooves in the base for mounting on a drill press or workbench. Stationary jaw has a perpendicular V-groove, and moveable jaw has a horizontal V-groove for holding round stock or tube. Glare-free black finish.

Specifications:

Jaw Width	1 3/4"
Jaw Opening	1 3/4"
Dimensions	4"L x 2 3/8"W x 1 1/2"H
Ship. Wt.	1/2 lb.

Description	Item#	Each
Mini Vice	820-4700	\$24.50

H. Drill Press Vice

All aluminum vise has slots to attach to bench top drill press (850-0595 p. 446). Quick release feature for ease of use. Jaw width 2 9/16". Jaw opening 2 3/4". Measures 9 1/2"L x 4 1/2"W x 2 1/4"H.

Description	Item#	Each
Drill Press Vice	850-0594	\$12.95

A. Rotating Bench Vice - 3 1/4" Jaw Opening

Base mount for mounting vise on the workbench or table. Table clamp screw that opens to a maximum depth of 2". The clamp vise head can rotate 360 degrees and tilts approximately 90 degrees with lockable handle. Steel jaws have 1 horizontal and vertical V-groove on each. Made in Pakistan.

Specifications:

Jaw Width : 3 1/4"	Clamping Height: 2"	360 Swivel & ~ 90 Degree Tilt
360 Swivel & ~ 90 Degree Tilt	Table Clamp Height : 2"	Weight: 16.25 lbs
Clamping range: 4 1/2"	Table Clamp Depth : 2"	

Description	Item#	Each
Rotating Bench Vice - 3 1/4"	820-4040	\$175.00

B. Panavise Model 301 - 2 1/2" Jaw Opening

An all-purpose vise that tilts, turns and rotates. Vise head can be turned 360°, tilted 90° and locked in any position. When head is locked in desired position, stem can be rotated or locked in place. All movement is controlled by one convenient variable pressure knob. Nonmarring nylon jaws open to 2 1/2".

Description	Item#	Each
B. Panavise Model 301	814-0200	\$55.00
Replacement Nylon Jaws, set of 2	814-0805	2.95

C. Base Mount #311 for Panavise Model 301

Platform base mount for attaching Panavise Model 301 securely to the edge of a workbench or counter. Attaches with a clamp screw that opens to a maximum of 3 1/2" (89mm). Comes with three screws for securing Panavise to base mount.

Description	Item#	Each
Base Mount #311 for Panavise Model 301	814-0700	\$51.00

D. Panavise Model 381 - 2 1/2" Jaw Opening

An all-purpose vise with the same features as Model 301—with the added benefit of portability. A half-turn of the mount lever permits easy mounting of the vise on any smooth, nonporous surface. Suction holds vise to surface until lever is released.

Description	Item#	Each
D. Panavise Model 381	814-0190	\$75.00
Replacement Nylon Jaws, set of 2	814-0805	2.95

E. Swivel Bench Vice - 2 1/2" Jaw Opening

Dual guide rods ensure parallel closing of jaws, rigidity and steady action. Smooth jaws help prevent marring of soft metal. Features sturdy construction with anvil top and enamel-finished body. Fits benchtops up to 2" thick. Can be rotated laterally 360° and locked into position. Jaws are 3" wide and open to 2 1/2". Ship. wt: 5 1/2 lbs.

Description	Item#	Each
Swivel Bench Vice	820-4054	\$79.75

F. Mini Bench Vice - 1" Jaw Opening

Great for small, precision work. Jaws are 1" wide and open to 1". C-clamps to bench or tabletop up to 1 1/8" thick. Body is cast iron with heavy red enamel coating. Ship. Wt: 1 lb.

Description	Item#	Each
Mini Bench Vice	820-4052	\$7.95

G. Freedom® Soff Jaws

Attach to any 3" or 4" bench vise via built-in magnetic strips. Made of resilient ethylene vinyl acetate (soft rubber-like material). Grip odd shapes with ease. Prevent marring of polished and painted surfaces and threaded parts. Measure 3 1/2" long.

Description	Item#	Each
Rubber Soff Jaws, pair	820-4705	\$8.95

A. Rotating Bench Vise - 3 1/4" Jaw Opening

Sturdy high-quality vise especially suited for tool and die makers and for electronic and general metalworking. The vise head can be rotated a full 360° and tilted from a flat 180° horizontal to a full 90° vertical, then locked securely in place, allowing your work piece to be easily swiveled and angled into the best working position. Supplied with steel jaws. Optional nylon jaws are available. One side of the steel jaws has two V-shaped grooves for holding wire and round or tube stock. Movable vise jaw slides in a brass guide. Jaw clamping screw and joint locking screw work on bronze lead nuts. 3 1/4" jaws and 4 1/8" clamping range. Includes base mount with clamp screw for secure mounting on the edge of a workbench or counter up to 3" thick. Base mount can also be removed for fixing the vise with screws directly to benchtop. Made in Italy.

Bench Vise Jaw Width	Clamping Range	Clamping Height	Net Wt.	Item#	Each
A. 3 1/4" (82mm)	4 1/8" (105mm)	2 7/32" (56mm)	14 lbs.	820-4058	\$576.00
Optional Nylon Jaws for #820-4058				820-4062	67.50

B-D GRS® Engraver's Blocks

The Magnablock and the Small Block are extremely well-made devices used to hold objects firmly for engraving, stone setting and general-purpose work. Each holds both large and small items. Adjustable friction lock from zero to full lock for crown rotation control. Nonglare satin finish on body, black oxide finish on jaws for protection. Precision-machined parts for smooth, efficient operation. Solid steel construction provides heavy weight and adjustable drags for keeping the workpiece in the proper position. Uses two industrial ball bearings and a large roller thrust bearing to eliminate side play and wobble. Includes rubber ring pad with Nylon glides, upper jaw plates, five pins and wrench. Made in USA.

Features:

Adjustable friction lock from zero to full lock for crown rotation control. Nonglare satin finish on body, black oxide finish on jaws for protection. Precision-machined parts for smooth, efficient operation.

Specifications:	Magnablock	Small Block
Spherical Diameter	5 3/4"	5 1/8"
Jaw Size	3"W x 1 3/4"H	2 1/2"W x 1 1/2"H
Max. Jaw Opening	3 1/2"	3"
Net/Ship. Wt.	30/33 lbs.	19/22 lbs.

C. Deluxe Universal Battery Change Set

A handy set for changing watch batteries. Includes everything needed to do the job quickly: case knife for pop-off case backs, spring bar changing tool, scratch brush for cleaning battery cavities, plastic tweezers for handling batteries, screw-back case-opening wrench, 1.0mm and 1.6mm flat-head screwdrivers, 1.2mm Phillips screwdriver and 5" x 5" polishing cloth. Faux leather, zippered case.

Description	Item#	Each
Deluxe Universal Battery Change Set	820-9041	\$26.30

D. Battery and Pulse Tester

A great jeweler's aid. Tests a watch to see whether the step motor is not working or the battery is dead—without opening the watch. Also tests the coil. Just rest the watch across the sensor and watch the readout. Requires no training. Includes 9V battery.

Description	Item#	Each
Battery and Pulse Tester	820-9047	\$39.95

E. Battery Tester

An economical yet accurate tester for checking batteries under design and load conditions. Tests alkaline, carbon zinc, silver oxide, lithium, nickel cadmium and mercury batteries. Includes easy-to-follow instructions.

Description	Item#	Each
Battery Tester	820-9048	\$10.95

F. Battery Clamp Assortment

This assortment contains 50 clamps for many of the most popular watches. Allows you to replace worn or broken clamps in minutes.

Description	Item#	PKG of 50
Battery Clamp Assortment	820-9045	\$28.95

G. Battery Clamp Screw Assortment

This assortment contains 100 screws that will fit most watch brands.

Description	Item#	PKG of 100
Battery Clamp Screw Assortment	820-9046	\$19.95

E

F

A. L-G Watchcase Wrench

For waterproof cases. Opens any size and shape case. Features knurled polygon for any number of slots, notches or holes. Tight, nonslip grip will not scratch. Cover can be left in wrench, ready for replacing. Includes four sets of interchangeable jaw pins. Made in USA.

Description	Item#	Each
A. L-G Watchcase Wrench	820-9020	\$85.95
Replacement Pins, set of 12	820-9021	34.95

B. Waterproof Watchcase Wrench

This JAXA-style case wrench meets the highest standards. Includes four sets of pins (three of each style). Packaged in a hardwood box. Imported.

Description	Item#	Each
B. Waterproof Watchcase Wrench	820-9025	\$16.85
Replacement Round Pins, set of 3	820-9026	1.45
Replacement Flat, set of 3	820-9027	1.45
Replacement Square, set of 3	820-9028	1.45
Replacement Curved, set of 3	820-9029	1.45

C, D Watchcase Holders

Both have metal bases with four plastic pins for securely holding watchcases without marring.

Description	Item#	Each
C. Watchcase Holder	820-9030	\$6.95
D. Large Watchcase Holder	820-9035	15.95

E. Rubber Sport Watch Holder

Generally a regular (leather/steel) watch will easily lay flat, but the straps on a rubber sport watch band curl up and make it difficult to work on the watch. This handy watch holder holds rubber watch straps in place while repairing or changing a battery without having to remove the band. Comes with a nylon die that will not mar or scratch crystals.

Description	Item#	Each
Rubber Sport Watch Holder	820-9056	\$17.95

F. Clip Spring Removing Pliers

Use for adjusting the length of Seiko style watch bands. The flat jaw rests atop the link, and the pointed tip fits under the clip spring. Gently squeeze the handles, and the clip spring pops up, ready for easy removal. Measure 5½" long.

Description	Item#	Each
Clip Spring Removing Pliers	820-9069	\$9.45

A. Snap-Back Case Opener

The ultimate in a snap-back case opener. This tool will open even the stubborn friction-fit or snap-back watch cases with a simple turn of the threaded thumb screw. User control of blade alignment and depth ensures no damage to delicate watch inner workings. Replaceable blade.

Description	Item#	Each
A. Snap-Back Case Opener	820-9058	\$101.95
Replacement Blade	820-9059	12.95

View additional details

A

B. Snap-Back Case Knife

Special Swiss case knife with hard plastic handle and fixed tempered blade (does not fold into handle). Measures 4" long.

Description	Item#	Each
Snap-Back Case Knife	260-3058	\$28.75

B

C. Snappy Watchcase Opener

Makes watchcase opening a snap! Just position the point between the case back and the case, and push slowly to lift off the back. Easily controlled so blade will not pop into watch movement. Spring-loaded for easy operation. Made of steel with red plastic handle. Measures 5" long. For watchcase closing, use Case Closing Pliers #820-9065 (see p. 550).

Description	Item#	Each
Snappy Watchcase Opener	820-9060	\$13.38

C

D. Medium-Duty Bench Knife

Has slim 1 3/4" long blade set firmly in hardwood handle. Measures 5" long.

Description	Item#	Each
Medium-Duty Bench Knife	260-3057	\$13.95

D

E. Case Knife

Features universally popular shape that gives watchmakers the proper grip for prying open snap-on case backs. Hardwood handle and precisely beveled, tempered steel blade make case opening easier. Measures 4 1/2" long.

Description	Item#	Each
Case Knife	820-9055	\$4.50

E

F. Heavy-Duty Bench Knife

An all-purpose bench knife for opening watchcases, scraping and cutting. Has 1 3/4" long steel blade mounted in hardwood handle. Measures 5 1/4" long.

Description	Item#	Each
Heavy-Duty Bench Knife	260-3059	\$4.35

F

G. Victorinox® Original Swiss Army Knife**The first and finest!**

Includes a cutting blade, scissors, file, tweezers, pick and key ring attachment. Made of stainless steel. Has royal blue enamel handle inlaid with metal Gesswein logo. Measures 2 1/4" closed.

Description	Item#	Each
Victorinox Original Swiss Army Knife	827-1000	\$18.75

G

A. Watchcase Press – Nylon Dies

The best inexpensive case closer available. Includes 14 snap-on nylon dies 7 hollow and 7 flat for 16-36mm diameter cases. Will not scratch or mar crystals. Made of sturdy cast metal. Works with watch lying facedown so user can see case back being closed.

Description	Item#	Each
Watchcase Press	820-9050	\$39.65

B. Watchcase Press – Aluminum Discs

This combination case closer/crystal press beats anything in its price range and beyond. It features: 14 reversible turned aluminum dies with 28 sizes smoothed to a high polish so they will not scratch. Dies screw onto the upper and lower part so that they can be inverted for case closing or crystal fitting. Cast metal body with angled leverage arm for proper closure. Don't destroy watch cases or case backs by using the wrong tool. Our Combo Closer will give you years of satisfaction and service. Shipping weight: 5 lbs.

Description	Item#	Each
Watch Case Press - Aluminum Disc	820-9052	\$54.95

C. Case Closing Pliers

A handy tool for safely closing watchcases. Parallel closing jaws with hinged, rubber-padded discs prevent damage to the watchcase and crystal. Measure 7 1/2" long.

Description	Item#	Each
Case Closing Pliers	820-9065	\$19.75

D. Vinyl Watch Tape

Used as a cover over watch faces and bracelets for protection from scratches during handling or transportation. Although it is called "tape" it has no adhesive. Clings to glass, plastic and metal without glue or gum. Leaves no residue!

Sold in approximately 150 foot in rolls. Available in two widths: 50mm for small to mid-size watches and 80mm for larger watches.

Description	Item#	Each
Vinyl Watch Tape 50mm	820-9290	\$24.95
Vinyl Watch Tape 80mm	820-9295	27.95

E. Flat Case Back Gasket Assortment

This 54-piece assortment includes three pieces each of 18 sizes (15.00-32.00mm ID in 1mm increments). Gaskets measure 2mm wide x 0.5mm thick. Each size comes in its own envelope.

Description	Item#	Each
Flat Case Back Gasket Assortment	808-0010	\$24.95

F. Watch Gasket Assortments

Available in four different thicknesses. Each 144-piece assortment includes four pieces each of 36 sizes (14.50-32.00mm ID). Fits Citizen, Seiko and most modern quartz watches.

Description	Thickness	Item#	Each
F. Watch Gasket Assortment	0.40mm	808-0001	\$14.95
	0.50mm	808-0002	14.95
	0.60mm	808-0003	14.95
	0.70mm	808-0004	14.95

G. Thin O-Ring Assortment

This 144-piece assortment includes four pieces each of 36 sizes (14.50-32.00mm ID) in three thicknesses: 0.40, 0.50 and 0.60mm. Envelopes are color-coded by thickness.

Description	Item#	Each
Thin O-Ring Assortment	808-0005	\$59.95

A. Cotter Pin Assortment Set

This comprehensive set gives the jeweler 180 cotter pins (5 each of 36 different sizes) to adjust metal bands either during the sale or for aftermarket service. Many watches need links added or removed to customize size, and this process requires replacement cotter pins such as these to ensure proper strength of the band.

Description	Item#	Set
Cotter Pin Assortment	820-9220	\$29.95

A

B-D Wood Sticks

Great multipurpose items. Can be used as a disposable mixing stick or applicator when gluing. Great for use as a dop stick for placing small parts. Use to accurately apply luminous pigment to watch hands. Available in round soft sticks, 6" in length. Select between pegwood and white birch. Pegwood sticks are easily shaped to fit your specific need. Packaged in bundles of 24.

200-Piece Regular Set	820-9210	14.95

**G-I Metal Spring Bar Tool**

Tips are stronger than those of conventional spring bar tools but have the same thread for interchangeability. Measures 5 1/8" long.

Description	Item#	Each
G. Metal Spring Bar Tool	820-9192	\$8.25
H. Replacement Forked Tip	820-9194	1.48
I. Replacement Straight Tip	820-9193	1.48

**J. Pin Pusher**

Handy for pushing stubborn pins out of watch bracelets when changing links for sizing. Slightly flattened tip prevents slipping. Made of hardened tool steel with hardwood handle. Measures 4 3/4" long.

Description	Item#	Each
Pin Pusher	820-9070	\$4.20

A. Mesh Bracelet Cutter

A beveled-cylinder cutting tool useful for cutting not only mesh bands but also solder wire and small pieces of sheet metal. Provides maximum cutting leverage with its long handle. Cuts much faster than hand saws. Measures 6"L x 4"W.

Description	Item#	Each
Bracelet Cutter	840-4215	\$55.50

B. Link and Spring Bar Remover

An indispensable tool to the watchmaker. Ideal for removing stubborn links and Westar-type spring bars. Includes 0.40, 0.60, 0.80, 1.00, 1.50 and 2.00mm pins for use in all bracelet types. Also includes screwdriver with 2.50mm tip for screw-type spring bar removal. Weighs just over 1 lb.

Description	Item#	Each
B. Link and Spring Bar Remover	820-9275	\$25.50
Replacement Pin Set (6)	820-9276	6.50

C. Pin Removing Set

Perfect for removing friction pins from watch bracelets. Includes grooved wooden block for holding bracelets securely without marring, small ball-peen hammer and 0.80mm and 1.00mm pin removing punches. Just tap punches lightly to remove pins.

Description	Item#	Each
C. Pin Removing Set	820-9075	\$23.35
Replacement 0.80mm Punch Tip	820-9076	0.89
Replacement 1.00mm Punch Tip	820-9077	0.89

D. Watch Link Pin Remover Set

With its sleek design and compact style, the watch link pin remover set comes complete with 10 pins in sizes: 0.40, 0.60, 0.70, 0.80, 0.90, 1.00, 1.10, 1.20, 1.50 and 2.00mm. Pins are easily interchangeable in the tension fit handle provided. Set is packaged in a premium wood box with magnetic closure. Made In India.

The next generation in Micro Welding/Soldering

Aquaflame Torches – at the heart of the workshop

The Aquaflame Torch systems are a must for any jeweler/repair facility. Made of the highest quality components the Aquaflame torch systems are proudly made in the United Kingdom with CE approval. Aquaflame is a complete soldering system—bottled gas with pressurized fuel tanks are a thing of the past. Minimal maintenance is required and to prove the exceptional construction and use, Aquaflame Torch Systems boast a full 2 year warranty!

Why Aquaflame? The powerful yet compact generator converts distilled/deionized water into hydrogen and oxygen gases by electrolysis. A wide range of tips are provided from 0.50mm to 1.50mm to perform standard soldering tasks such as re-sizing or re-tipping. The larger tips and extra power of the 800 and 1200 models make them capable of soldering platinum.

A clean precise environmentally friendly flame is obtained by using Methyl-Ethyl-Keytone (MEK). MEK leaves no residue on the surgical steel tips. The operator will find the light-weight torch handle easy to hold and for safety, it contains a built-in Flashback Arrestor. When using liquid flux or flux based paste solders, you will see less fire scale which is commonly found when working on silver.

Though extensively used in the jewelry industry, Aquaflame Systems are also used in the dental and other technical manufacturing industries making them ideal for precision soldering and micro welding. Aquaflame Torches are also widely used for acrylic flame polishing (edge polishing on

acrylic) in plastic fabrication as this method requires no other materials or compounds and can finish intricate shapes quickly and easily.

The Aquaflame is available in (3) models. The Model 500 is ideal for soldering Silver, Gold, Stainless Steel Medical Instruments and some Titanium Alloys. The Models 800 and 1200 are ideal for the above-mentioned metals plus are better suited for soldering Platinum and additional operators can be added by ordering 830-1084.

Complete with 2 year manufacturer's warranty—servicing required every 12 months for warranty to apply. See our website for service kits—for Model 500 (830-1080), for Model 800 (830-1081), and for Model 1200 (830-1082). Made in the United Kingdom.

the PUK 5 Jewelry Welder

Precision welding at its finest... developed for goldsmiths.

LAMPERT.

PUK 5 shown with SM5 Microscope Optic Package

Made in Germany!
3 Year Warranty!

Weld on findings, easily add metal, weld adjacent to stones and pearls, weld silver (alloys), fill porosity, attach workpieces prior to soldering, weld seams, and much more - all no problem with the PUK 5.

Compact and versatile impulse welding device:

The PUK 5 is very close to laser welding in terms of working method and range of applications. On workpieces with a thickness of 0.2 mm or greater, it is an effortless process to produce robust welds.

The PUK 5 precision welder puts a whole host of possible applications for jewelry production at your fingertips. Create structures made from sheet or wire elements, tack welds and repairs to jewelry parts, restore missing parts or fill pores by applying welding wire - and many more options, the PUK 5 is able to produce anything from the smallest of repairs to volume production.

PUK's operating principle is as simple as it is ingenious:

If the tip of the electrode on the welding hand piece touches the workpiece, the welding process starts automatically. At the contact point, under an inert gas atmosphere, a melting process with a diameter of between 0.3 and 3.0 mm takes place (depending on material and setting). In addition to many precious metal alloys such as gold, silver and platinum, many non-ferrous metals such as copper and tin alloys, many steels, titanium and aluminum alloys are suitable for welding. All alloys suitable for laser or TIG welding can also be welded with the PUK 5.

Superior characteristics

- Consistently reproducible high-quality welding results with all materials suitable for welding
- Precise positioning of the spot welds
- Very low, controllable development of heat
- Welding possible on even the thinnest of materials
- Welding in protective atmosphere
- Tested product safety: CE conformity
- DIN CERTCO certified eye protection in all Lampert optic systems
- Very low initial costs and for consumer materials, maintenance-free technology - excellent price/performance ratio
- Three year manufacturer's warranty

Compact size

- Fits into every workshop

Patent-pending system for welding process monitoring

- Software for contact monitoring of the hand piece
- Prevention of welding errors through interruption of weld if excessive pressure is applied to the electrode
- Prevention of tungsten inclusions on sensitive surfaces or on workpieces and materials that still require further processing
- Uniform processing creates a quality weld
- Consistent quality for larger quantities

Faster progress to better results

- "Blind operation" with single-handed operation. Concentration remains focused on the workpiece.
- Simple and intuitive to operate
- Preselection of two different welding cycles

Smoothing function responds to rising temperatures on the welding area

- Further improves the flow properties of certain metals (e.g. of highly conductive metals such as silver)

Even higher-performance LED lighting in our new premium welding microscopes

- More uniform illumination of the working area - more flexible use of the microscope. These microscopes can also be used as fully equipped workplace microscopes - not just for welding.

Individual device set-up using the settings menu

- Preselection of welding cycle, calling operating levels up on screen and hiding them again, program memory, expert level, tack welding...

Due to the technical nature of these products, some details may change. Please see our website for the most up-to-date information.

the PUK 5 Jewelry Welder System Packages

A

A. PUK 5 Control System Includes

- PUK 5 Control Unit
- Precision Handpiece
- Argon flow regulator with 9 foot hose
- Set of electrodes with diamond grind wheel, (2) Alligator clips and Fiberglass brush

Description	Item#	Each
PUK 5 Base Unit with Accessories	830-1534	\$3,500.00

Available Packages – to suit your welding applications...

B. Articulated Microscope

- Microscope lens with 10-fold magnification, individual adjustment
- Powerful LED lighting in the head of the microscope that can be controlled with 4 brightness levels, optimum illumination of the working area.
- Hydraulic articulated arm, rotary and pivot action in every direction, making work particular ergonomic, even on bulky objects.
- Bench stand for individual bench mounting.
- Individually adjustable headrest
- Microscope can be used as a workplace or observation microscope.

Description	Item#	Each
Articulated Microscope Only	830-1538	\$2,200.00
B. PUK 5 + Articulated Microscope	830-1543	5,700.00

B

C. SM5 Microscope

- High-caliber microscope with 10-fold magnification, individual adjustment
- Powerful LED lighting that can be controlled with 4 brightness levels, optimum illumination of the working area. LED lighting integrated in the housing of the eye protection system.
- The SM5 can be turned in no time at all into a workplace microscope, simply by swiveling away the hand piece arm from the field of view.
- Hand supports for comfortable and precise operation
- Height and tilt adjustment assure optimum workplace comfort and an ergonomic working position.

Description	Item#	Each
SM5 Microscope Only	830-1537	\$1,295.00
C. PUK 5 + SM5 Microscope	830-1542	4,795.00

C

D. SM03 Microscope

- Low cost for the budget minded person (entry level)
- Microscope lens with 10-fold magnification, individual adjustment
- LED lighting in the hand piece retaining arm, optimum illumination of the working area

Description	Item#	Each
SM03 Microscope Only	830-1536	\$1,100.00
D. PUK 5 + SM03 Microscope	830-1541	4,600.00

D

E. Classic Optic Visor

- Magnifying glass light, equipped with magnifying lens, 2.25-fold magnification (5 dpt)
- Glare-free LED lighting, 7.5 W
- The optic unit is particularly well suited to large workpieces that cannot be processed under the microscope.

Description	Item#	Each
Classic Optic Visor Only	830-1535	\$650.00
E. PUK 5 + Classic Optic Visor	830-1540	4,150.00

the PUK U5 Industrial Welder

The Latest Technology for Mold and Die Repair...

LAMPERT.

Pre-programmed and ready to use...
for Steel, Aluminum, and Copper

Steel

Aluminum

Copper

The PUK U5... developed for Mold and Die Repair.

Incorporating the latest technology, the PUK U5 offers an easy to use solution for precision mold and die repairs. Utilizing micro TIG technology, the welder produces small, consistent spot welds that penetrate the mold surface. The welded areas are strong and can withstand the pressures and working conditions during the molding process. All heat is concentrated at the spot of the weld thereby eliminating the possibility of distortion and metal stress caused by overheating. Backed by a three year manufacturer's warranty.

The Applications:

- Repairing parting lines, mold seams, edges and three point corners
- Filling in pores and deep scratches on the mold surface
- Weld into slots, corners and ribs
- Repair slides, ejectors, and core pins
- For use on all common tool steels, stainless steels, aluminum and copper

PUK U5 Complete Package:

The system comes complete with microscope, LED light, electrode handpiece, sets of 0.6mm and 0.8mm electrodes, electrode sharpener, ground cables, argon gas regulator, tack resistance welder, and foot pedal.

Description	Item#	Each
The PUK U5 - Mold and Die - 110V	830-0957	\$8,995.00
The PUK U5 - Mold and Die - 220V	830-0958	8,995.00

Save Money

- Keep mold repairs in house! Stop sending out for laser welding.
- Affordable alternative to a laser welder, at a fraction of the cost.

Save Time

- Repair your molds the same day.
- No pre-welding heat treatment required.
- Welds quickly: 1 spot weld every 0.8 seconds!
- Small spot welds polish out quickly.

Easy to Use

- Pre-programmed presets for most common applications. Takes out calculations and guess work.
- Extremely accurate weld placement. Sharp electrode tip touches the exact location of weld spot.

Mobility

- Take the U5 welder to the press for repair.
- Magnetic microscope attaches directly to mold while still in the press.

Minimal Heat

- Prevents damaged caused by overheating of mold, increasing tool life.
- All heat is concentrated only at the spot of the weld.

The Microscope... Maximize Mobility

Weld anywhere on any type of mold large OR small! The adjustable and magnetic microscope base affixes to any metal surface. The microscope arm is extremely flexible to allow for comfortable welding on almost any mold surface. Keep the microscope at your bench or take it to the mold for a quick in-press repair. The 10X microscope comes complete with integrated LED lighting for proper illumination of the welding surface. A protective eye shutter built into the microscope provides protection for eyes. Field of view 20mm.

Pre-programmed and ready to use...for Steel, Aluminum, and Copper

Take the guess work out! Simply select the pre-program for your mold repair application and start welding! Each pre-program is set to the optimal weld pulse and time lapse for the specified mold repair application. Or if you prefer, manually override the pre-programmed settings to dial in your preferred setting.

Select with Touch Screen

PUK 5 and PUK U5 Replacement Parts

A

B

C

D

E

F

G

H

I

J

A. Argon Gas Regulator - The PUK flow regulator enables the exact setting of the recommended 2 liters per minute flow rate. It's precise and easy but above all, it's reliable! The argon gas allows for clean, oxidation free welds.

Argon Gas Regulator (for PUK 3, 4, 5, U4, U5)	830-1516	\$270.00
---	-----------------	-----------------

B. Argon Screw Nut

Argon Screw Nut (for PUK 3, 4, 5, U4, U5)	830-1521	\$8.50
---	-----------------	---------------

C. Electrode Collets - available in either 0.6mm or 0.8mm sizes.

Electrode Collets - 0.6mm Collet (for PUK 3, 4, 5, U4, U5)	830-0931	\$30.00
--	-----------------	----------------

Electrode Collets - 0.8mm Collet (for PUK 3, 4, 5, U4, U5)	830-0933	\$30.00
--	-----------------	----------------

D. Electrodes - 0.5mm Set (comes with Diamond Wheel), 0.6mm Electrodes or 0.8mm Electrodes: 10 pre-sharpened electrodes for immediate use. The thin electrode increases precision by touching the exact spot of weld. Just prior to weld, the electrode pulls back into the handpiece allowing for a clean and precise weld spot.

D. Electrode Set - 0.5mm Electrodes with Diamond Wheel (for PUK 3, 4, 5)	830-0978	\$49.95
--	-----------------	----------------

Electrodes - 0.6mm Electrodes (for PUK U4, U5)	830-0932	\$5.00
--	-----------------	---------------

Electrodes - 0.8mm Electrodes (for PUK U4, U5)	830-0934	\$60.00
--	-----------------	----------------

E. Handpiece Nozzel (Ceramic Tip)

Snap on Nozzel (for PUK 3, 4, 5, U4, U5)	830-1524	\$49.95
--	-----------------	----------------

F. Electrode Sharpener - For simple and rapid sharpening of PUK electrodes. The diamond disc rotates when the button is pressed allowing for quick and convenient electrode sharpening.

Electrode Sharpener (for PUK 4, 5, U4, U5)	830-1528	\$155.50
--	-----------------	-----------------

G. Electrode Sharpener Diamond Wheel - Replacement diamond wheel for Electrode Sharpener. See video on gesswein.com for instructions.

Electrode Sharpener Diamond Wheel	830-1531	\$17.50
-----------------------------------	-----------------	----------------

H. Microscope Glass

Microscope Glass (for PUK 3, 4, 5, U4, U5)	830-0966	\$21.50
--	-----------------	----------------

I. Microscope Rubber Eye Flaps

Microscope Rubber Eye Flaps (for PUK 3, 4, 5, U4, U5)	830-1512	\$28.00
---	-----------------	----------------

J. Extension Package for PUK U5 - For some large molds and in-press repairs, a few extra feet of reach may be necessary. This package includes: Extended handpiece cable (measures approximately 84" (2.5m) compared to the 48" handpiece cable included with the PUK U5.) Extended magnet cable (measures 84" in length.) Microscope extension cables (add on an additional 77" in length to the standard PUK microscope.)

PUK Extension Package (for PUK U5 only)	830-0939	\$999.00
---	-----------------	-----------------

K. PUK U5 Transport Case - The durable and functional Transport Case makes moving the PUK U5 convenient. Whether you are carting between molds or between buildings the PUK U5 will be safe and secure. It also works well for stowing your PUK U5 when not in use.

PUK U5 Transport Case (for PUK U5 only)	830-1558	\$695.00
---	-----------------	-----------------

Please see our website for our precious metal welding wire offerings.

Sold in packages of 25 as indicated by  please order in these multiples.

- A. Pin Vise, Double Ended** Wire holder capacity: 0"-0.064". Overall length 4.25".
 Pin Vise, Double Ended (for PUK 3, 4, 5, U4, U5) **820-4650** **\$11.15**
- B. PUK Wire Holder** Made of aluminum anodized, the PUK Wire holder feeds wires from 0.004" to 0.025". During the welding process, the ergonomic holder is comfortable to grip and the wire feeds effortlessly by means of two wheels. Measures 5.5" x .25" Diameter and weighs 1.5 oz. Made in Germany. Wire holder capacity: 0.004"-0.025"
 PUK Wire Holder (for PUK 3, 4, 5, U4, U5) **830-2500** **\$99.00**

Established in 1961, Sisma is a worldwide recognized name for the design and production of extremely high precision machinery. We are proud to offer their Laser Welders for the jewelry and industrial markets. Innovative by vocation, Sisma combines an independent and cutting edge design and production organization with a wealth of highly specialized human resources, thus guaranteeing top product quality as well as thorough and prompt assistance throughout the world.

Sisma's philosophy, aimed at satisfying the specific needs of customers, is the result of an inborn strategic imperative that contributes to affirming the role of Sisma as a maker of excellence in the world of industrial mechanics.

At Sisma, their extensive experience and technical know-how blends with productive efficiency and innovative spirit which promptly answers to the ever changing marketplace. The power to create special, customized machines is but another jewel in Sisma's crown of excellence. Look no further... Sisma is the machine of choice for the above-mentioned markets all over the world. Machines are proudly manufactured in Italy to ISO 9001 Standards. Made in Italy.

Sisma Laser Welders for Jewelry

SISMA Series LM-D

Select between the "Easy Access" (LM-D Ready) models available in 150J or 180J maximum pulse energy that feature a broader opening which is covered with hanging rubber strips for your protection.

The next step up is the traditional standard model (LM-D Original) that features a high quality Leica Microscope head and is available in 180J or 210J maximum pulse energy.

Last in the series is the upgrade to the standard model (LM-D Vision) that features an intuitive 10.1 LCD Screen for easy visibility and simplified use and is available in 180J or 210J maximum pulse energy.

Key Features:

- Dedicated Filter that guarantees complete recovery of precious metals.
- Enhanced Cooling System: +60% cooling capacity compared to previous models which allows for reliable operation in high temperature space (except LM-D Ready).
- Smart Spot Technology for repeatable Welding Process; great depth of field and stable laser shot every time (except LM-D Ready).
- Units come with argon & air compressor ports.

LM-D Scope
180 / 210

Sisma Enclosed Laser Welders are excellent for jewelry and other small pieces.

LM-D Ready

Laser Welders for Mold Repair

Sisma offers a range of laser welders engineered specifically for the repair and maintenance of molds. The range includes the best-selling SWA series for all mold sizes, the SWT series for medium and small molds, and the LM-B series for small molds. Sisma laser welders are used in premier mold & die shops around the world, carrying an excellent reputation for the highest precision and ease of use. All are made at Sisma's headquarters in Italy, and are backed by a 1-year manufacturer's warranty.

SISMA LM-B 180 and 210

Sisma's High precision Nd:Yag laser Class 4 welding system, the LM-B. Specifically designed for mold repairing. Featured characteristics are ease of use, reduced maintenance and smooth axis movement. The LM-B uses a working motorized table with X-Y-Z axes complete with joystick. View work pieces easily with the 10X stereo microscope with optical protection. Two-year warranty including the flash lamp. Made in Italy.

Key Features:

- Smart Spot technology: great depth of field and stable laser shot starting from the first pulses. For a repeatable welding process.
- ECO mode that switches off unused system components during idle times, thus guaranteeing lower power consumption
- USB and Ethernet conn: for easy download/upload of welding programs, software and firmware updates and remote control through smartphone, tablet or computer
- Full digital control: accurate diagnostics, higher pulse stability and longer lamp life.
- Quick setting of welding parameters by means of the multifunctional mouse

SISMA SWT 100 and SWT 150

Class 4 and Class 1

SWT Class 4 welding laser systems are specifically designed for the maintenance of small/medium-sized molds up to 400mm square (approx. 15.75" square). The robust design and sturdy working table allows the operator to work in outstanding comfort and with minimal vibration. Characterized by a high capacity and axis stroke, the systems have a direct resonator with 3 motorized axes X-Y-Z which are controlled by a joystick. The system contains an optical head with F150 focal lens and a 10X STEREO microscope. The system's ergonomic features allow prolonged or occasional use. The Class I version provides a welding system for closed mold repair. The movement of the axes has been designed to ensure durability over time as well as fluid and precise machining. Internet connection for easy check and/or remote service assistance. In/out input of data through a USB key. Two-year warranty including the flash lamp. Made in Italy.

Key Features:

- Advanced software functions such as welding on circumference, line, filling, and rotating spindle management
- High laser beam quality: new optical design ensures high performance
- Available with fiber laser source: maintenance free and low power consumption
- Internet connection for remote control
- Ergonomic design
- Heavy duty machinery, fluid and precise movements over the high carrying capacity and high axes stroke.
- Safety features include proper functioning verification and control.

SISMA SWA 150 / SWA 300
830-1710 / 830-1715

SISMA SWA 150 and SWA 300 – With Motorized Welding Arm

Flexibility of the SISMA SWA Class 4 system! The "SWA" is designed for welding and repairing small and large pieces and molds. The laser transport in optical fiber provides great flexibility without significant power loss. Designed and constructed for making modifications and repairs on molds damaged by wear or use.

Material is added allowing repairs to be made without preheating the dies and with minimal heat transfer during the deposit process. Laser welding avoids classic damage caused by TIG welding such as: geometric distortions, burning of the edges and decarbonization. The properties of the laser beam make it possible to weld complex molds with deep and narrow grooves or inner and outer edges.

All steels, bronze and copper alloys, aluminum and titanium can be welded. The hardness of the welding layers can reach very high values depending on the type of filler wire used. Simple operating procedures and accurate visual control of the weld material using a stereomicroscope make this technology accessible to everyone, not just qualified engineers.

The SWA units are powered by a flash lamp-pumped Nd:YAG laser generator with laser pulse transmission through optical fiber and is equipped with a system for movement along the motorized x, y, and z axes controlled by a joystick and button panel. The laser source has been designed to guarantee high operating stability at both low and high power; fiber transport of the laser pulse provides a smaller beam diameter along with high stability of the laser spot, both in the initial transients and at various thermal loads of the laser source.

The fully integrated cooling system is suitable for extended use. Complete with optic head with focal lens F120 and 10X stereomicroscope. Quick selection/setting of work by means of a color touch-screen display and with a memory up to 250 welding parameters. Axis X-Y Z motorized; Axis X stroke 300 mm; Axis Y stroke 150 mm and Axis Z stroke 500 mm. Axis Z is controlled by means of a joystick rotation. One-year warranty. Made in Italy.

Key Features:

- Feeder with integrated water-air cooling system (Without external chiller)
- New interface card for integrators
- Potentiated diagnostic
- In/out data by means of a USB key
- "Pulse Shaping" function for complex welding operations
- Optic fiber length 3 m, core diameter 800 micron
- Axis Controller

A. Watchmaker's Workbench

A classic, high-quality workbench for watchmakers, jewelers and engravers. Constructed of the finest hardwood, making it perfectly suitable for storefront use. Features solid wood top with railing, full-length side and back panels, fifteen drawers in a range of heights for keeping tools organized and a handy 18" wide cloth tray for catching bench sweeps. Measures 38½"W x 20"D x 38"H. Ship. wt: 140 lbs. *Ships via truck only.* Made in USA.

Description	Item#	Each
Watchmaker's Workbench,	810-1601	\$799.00

See pp. 335-339 for Workbench Lighting.

B. Enclosed Watchmakers Bench

Rugged and elegant, the new Watchmakers Workbench is a must for any repair shop or storefront. Features Solid wood top with railing, full-length side and back panels, fifteen drawers in a range of sizes to keep your tools organized, 19" (482.5 mm) catch tray for bench sweeps Made of a solid wood construction, this quality bench measures 39¼" Wide X 21½" Deep X 39" High (Approx. 1m X 0.5m X 1m). Ship. wt: 130 Lbs. Some assembly required. *Ships in two boxes via UPS or FedEx. Oversize shipping rates apply.* Made in China.

Description	Item#	Each
Enclosed Watchmakers Bench	810-1602	\$485.00

Made in the USA

C. Solid Wood Workbench

A fine workbench with a natural finish at an affordable price. Features sturdy wood top with 1" railing, full-length side and back panels, two-tier tool tray, three side drawers and metal-lined pan for catching bench sweeps. Includes two pullout armrests, bench pin and two mandrel holes. Assembly required (instructions supplied). Measures 38¾"W x 19½"D x 39"H. Ship. wt: 84 lbs. *Ships in two boxes via UPS or FedEx. Oversize shipping rates apply.* Imported.

Description	Item#	Each
Solid Wood Workbench	810-1785	\$290.00

D. Workbench – Laminated top!

A great heavy duty workbench perfect for small spaces, 1½" thick, laminated top, 3 spacious drawers, two aluminum catch trays, two pull-out arm rests, pre-drilled slot for a bench pin and a large pull-out workspace. Comes in 1 box; unassembled. Measures 35½"W x 21½"D x 35½"H. Ship. wt: 130 lbs. Made in USA.

Description	Item#	Each
Workbench,	810-1608	\$530.00

A. VariBench Table Perfect for Sisma Welders

This is the only table you will ever need for your Sisma Laser welder! The VariBench is a variable height bench that is custom made to fit all tabletop models made by Sisma. Power – 100/240Vac, 50/60Hz, 8/3.3 amp, 80 watt. Operated by a powered rocker switch, this table can be raised or lowered to your exact height specifications for an ergonomic and comfortable welding height. Height without caster – 27” to 47”, Height with caster – 31” to 51”. Load Max – 246 lbs. / 120kg. The VariBench is set on casters with a beautiful hardwood table top and was designed to precisely fit the machine. Weight – 75 lbs. Essential where space is a commodity. Made in USA.

Description	Item#	Each
VariBench for Sisma Laser Welder, 	830-0788	\$1,295.00

B. SmartStool 61™

The high-quality swiveling chair with ergonomic, adjustable design for unmatched comfort and convenience. Boasts separate controls for seat and backrest height and angle, ultra-soft seat cushions for superior comfort, adjustable foot-ring for lower leg support and steel base with anti-scuff nubs. Measures 18½”W x 20¼”D x 34¼”–39½”H. Seat height from floor: 16”–21¼”. Ship. wt: 47 lbs.

Description	Item#	Each
SmartStool 61	810-1808	\$502.00

C. Adjustable Bench Chair

An economical yet sturdy swiveling chair. Provides ample support for reduced fatigue. Features separate controls for making seat and spring back adjustments, Naugahyde cushions and durable rubber cushioned casters for smooth rolling. Seat height from floor: 16”–24”.

Description	Item#	Each
Adjustable Bench Chair	810-1800	\$282.00

For more chair options visit www.gesswein.com

D. Deluxe Extra-Large Saddle Stool

Seat measures 16” long by 18” wide and the seat is 3 inches thick to provide maximum comfort. The star base is 24” wide and provides extra stability. Foot-rest ring that is 18” in diameter and the height-adjusts from the floor 8” to 13 ½”. Seat height ranges from 19” to 26”. Five smooth rolling casters allow for easy mobility. Made in China.

Description	Item#	Each
Saddle Stool	810-1812	\$199.00

A-B Modular Tool Holder System

Consists of completely modular bur and tool holders that you interlock to form the most efficient configuration for your bench. Lets you design a tool holder for any work surface, no matter how small. Modules slide together and apart neatly for easy reconfiguration. Made of hard, thick plastic durable enough to withstand years of wear and tear.

Description	Item#	Each
A. 2" Square w/ 25 holes, 2.35mm (3/32")	840-0150	\$2.25
B. Wedge (holds Squares/Trays at good working angle)	840-0170	2.95

C. Handy Block – For 3/32" or 1/8" Shanks

Cured hardwood block with 88 holes for burs or tools with 3/32" or 1/8" shanks. Slanted design lets you see all items at a glance. Stay-put rubber pads prevent sliding. Measures 6" x 4 1/2".

Description	Holes	Item#	Each
Handy Block	3/32", 1/8"	814-1215	\$15.25

D. Bench Duster – Wooden Handle

Contains four rows of 1 1/2" long medium natural bristles. Ideal for cleaning dust from surfaces. Measures 9 3/4" long.

Description	Face Size (L x W)	Item#	EACH Prices		
			1-2	3-11	12+
Bench Duster	4" x 3/4"	115-2260	\$10.25	\$9.23	\$8.20

E. Wooden Bur Boxes – For 3/32" Shanks

Sturdy, attractive wooden boxes for holding burs or tools with 3/32" shanks.

Description	Item#	Each
E. 200-Hole Box	814-1200	\$25.75
100-Hole Box	814-1205	14.95
36-Hole Box	814-1210	7.95

F-H Rotating Bur Holders – For Burs and Tools

Tiered plastic stands rotate on ball bearings for smooth action. Measure 7" dia. x 4"H.

- Style 126**
- 45 holes for burs with 1/16" shanks
 - 69 two-step holes for burs with 3/32" or 1/8" shanks
 - 12 holes for burs with 1/4" shanks

- Style 112**
- 92 holes for burs with 3/32" or 1/8" shanks
 - 13 holes for burs with 1/4" shanks
 - 7 holes for 1/16" to 5/32" drills
 - 2 3/4" dia. x 3"H center cup for hand tools

Description	Shank Size	Item#	Each
F. Style 126	1/16", 3/32" or 1/8", 1/4"	850-0004	\$16.55
G. Style 112	1/16" to 5/32", 3/32" or 1/8", 1/4"	850-0006	16.55
H. Style 112	1/16" to 5/32", 3/32" or 1/8", 1/4"	124-4720	12.75

A. Bench Pin

Standard reversible wooden bench pin for both single and double workbenches. Made to fit tightly but may require some minor adjustments. Used for support when filing or sawing. Measures 6 $\frac{1}{4}$ "L x 2 $\frac{5}{8}$ "W x 1 $\frac{1}{8}$ " thick. Tang measures approx. 1 $\frac{1}{2}$ "L x 2 $\frac{5}{8}$ "W x 1 $\frac{1}{2}$ " thick.

Description	Item#	EACH Prices		
		1-11	12-143	144+
Bench Pin	814-1000	\$3.85	\$3.47	\$3.27

A

B. Bench Pin and Anvil

A portable, versatile device for hammering, sawing, filing and flattening. Securely attaches to bench or table with 1 $\frac{1}{2}$ " overhang up to 1 $\frac{3}{4}$ " thick. Anvil area measures 2 $\frac{3}{4}$ " x 3". Wooden bench pin measures 4"L x 2 $\frac{1}{4}$ "W. Tang measures approx. 1 $\frac{1}{2}$ "L x 2 $\frac{1}{4}$ "W x $\frac{3}{8}$ " thick.

Description	Item#	Each
Bench Pin and Anvil	814-1010	\$15.95
Replacement Bench Pin	814-1011	2.70

B

C. Bench Pin and Holder

Can be easily screwed into edge of workbench. Bench pin measures 4"L x 2 $\frac{1}{4}$ "W x 1" thick with 1 $\frac{1}{4}$ "L x 2 $\frac{1}{4}$ "W x $\frac{3}{4}$ " tang. Holder measures 4" wide with 2 $\frac{1}{4}$ "W x $\frac{3}{4}$ "H opening and thumb screw for securing bench pin firmly in place.

Description	Item#	Each
Bench Pin and Holder	814-1005	\$8.95
Replacement Bench Pin	814-1006	2.70

C

D. Ring Sizing Bench Pin

Screws to top of bench. Shaped especially to hold rings. Has channel for guiding sawblade. Measures 5 $\frac{1}{2}$ "L x $\frac{3}{4}$ "W x $\frac{3}{8}$ " thick.

Description	Item#	Each
Ring Sizing Bench Pin	814-0990	\$3.25

D

E. Slotted Bench Pin with Clamp

This reversible wooden bench pin clamps to the edge of any workbench with a surface up to 1 $\frac{7}{8}$ " thick. Has a deep V-slot and a straight slot for drilling, sawing and securing ring clamps. Measures 7 $\frac{1}{2}$ "L x 2 $\frac{1}{4}$ "W x $\frac{1}{2}$ " thick.

Description	Item#	Each
Slotted Bench Pin with Clamp	814-0995	\$5.90

E

F. Rubber Bench Filing Block

Provides a 3 $\frac{1}{4}$ " extension off the workbench. Consists of rubber block, iron frame and steel anvil. Rubber block serves as a rest for work to be filed, prevents work from slipping and protects objects from being marred. Measures 5"L x 2 $\frac{1}{4}$ "W.

Description	Item#	Each
Filing Block	814-0985	\$19.50
Replacement Rubber Block	814-0986	4.15

F

GRS® BenchMate™ A unique work holding system that no jeweler should be without!

The BenchMate complete holding system makes jewelry fabrication and repair faster and easier. Mounts on the front of the workbench at a convenient height to provide support for workpieces, reducing slippage and user fatigue. Completely adjustable pivoting holder positions workpiece and holds it securely while engraving, setting, soldering and more. Removable hand rest provides extra stability, helping you do better work with less effort. Precision-machined steel construction ensures longevity. Tough plastic jaw inserts help prevent marring. Can be used with both hand and power tools. To make your BenchMate "Left-Hand" simply turn your ring holder 180° and add a Left-Hand Arm Rest #856-0175. Made in USA.

A-D GRS® BenchMate™ Basic Package

The NEW GRS Encore BenchMates have been redesigned with the Bench jeweler in mind! The Encore series now comes in two variations; Encore QC and Encore QCX. The QC now has an arm that measures 6" and has a cut-out for superior access angles and better clearance when using your bench tools. Arm adjustable for maximum comfort.

The QCX is more advanced and delivers the widest range of motion from any hands-free work-holding tool on the market. Can easily be centered under a microscope without losing sight of the workpiece.

Each variation comes in two packages; Basic and Setters. Basic Encore QC/QCX includes newly redesigned BenchMate, fixed mounting plate and Encore Accessory pack. Setter Encore QC/QCX includes newly redesigned BenchMate, fixed mounting plate, horizontal ID ring holder, vertical ID ring holder and Encore accessory pack. All can be adjusted for right or left hand use.

Description	Item#	Each

A-C GRS® BenchMate™ Multipurpose Vise

Attaches to BenchMate or directly to your bench. Tilts left and right and rotates on vertical axis so you can find the best working angle. Features holes in top for holding pins or the padded ring clamp from GRS 30-Piece Attachment Set #856-0277 (see p. 286). Made of satin-finished steel. To mount, fit in Fixed Mounting Plate, secure to Benchtop Mounting Adapter, then screw into bench. Made in USA.

Description	Item#	Each
A. Multipurpose Vise	856-0172	\$195.00
B. Fixed Mounting Plate	856-0196	21.25
C. Benchtop Mounting Adapter	856-0193	32.95

D. GRS® BenchMate™ Inside Ring Mandrel

Expands to hold rings securely.

A valuable, timesaving addition to the workbench. Holds rings from the inside to provide improved access for a variety of applications, especially setting. Easily handles hard-to-hold tapered and delicate designs that can be crushed by ordinary ring clamps. Includes seven different mandrels for holding ring sizes 4-13 without marring. Select the closest mandrel for each ring, then expand it by turning the screw until the ring is secure. Fits into any original BenchMate collar or can be used by itself. Can NOT be used with Encore Series. Made of solid steel. Made in USA.

Description	Item#	Each
Inside Ring Mandrel	856-0210	\$95.05

E, F GRS® BenchMate™ Engraver's Block Shelves

Two different heavy-gauge metal shelves for securely holding your engraver's block at the absolute perfect working height. Let you maintain correct posture for minimizing fatigue throughout the workday. Use Standard Shelf for any engraver's block. Use the Large Shelf with Height Adjustment Bracket for GRS Positioning Vise #271-3025 (see p. 546). Height Adjustment Bracket also sold separately (see "G" below) for retrofit onto Standard Shelf to give you better flexibility. Made in USA.

Description	Item#	Each
E. Standard Shelf	856-0198	\$49.95
F. Large Shelf with Height Adjustment Bracket	856-0173	91.50

G. GRS® BenchMate™ Height Adjustment Bracket

Simply attach this sturdy steel bracket to your Standard Shelf (see above) for improved range of height adjustment. Made in USA.

Description	Item#	Each
Height Adjustment Bracket	856-0174	\$59.95

H. GRS® BenchMate™ Insulated Solder Clamp

Won't absorb heat!

Features unique jaws made of non asbestos solder board material. Perfect for gripping items securely without marring. Keeps heat isolated within the workpiece—where it belongs for maximum safety. One jaw is stationary, and the other opens and swivels for conforming to uneven surfaces. Made in USA.

Description	Item#	Each
Insulated Solder Clamp	856-0212	\$65.90

I. GRS® BenchMate™ Tungsten Tweezers Tips

Replace the standard tips of your BenchMate third hand for soldering platinum without risk of contamination. Medium points. Sold by the pair. Made in USA.

Description	Item#	PKG
Tungsten Tweezers Tips, pair	856-0191	\$26.90

A, B Wooden Tool Holder/Organizer

Let Gesswein help organize your bench! The 6-sided bur & tool holder is made of solid durable wood and rotates like a lazy susan. It's ideal for safe keeping of your various bench tools such as gravers, files, burs and mounted abrasives. Holds an amazing amount of tools in a small 7 1/2" x 7 1/2" footprint. Each of the 6 sides plus the top have a variety of hole sizes to fit just about any tool. Sides have a total of:

- (42) 7.5mm holes
- (48) 4mm holes (which will hold 1/8" and 4mm shank tools)
- (288) 3mm holes (which will hold 3/32" and 3mm shank tools)

Additionally 2 sides feature a 3 1/8" long magnetic strip to hold pliers or other tools.

Top has (37) 12mm holes: 18 shallow holes for graver handles and small tools and 19 holes in the center that perforate the top and extend 8" down into the caddy so you can store long files, gravers, etc. The top can also be removed so you can store larger items inside.

The bur & tool holder stands 9 1/2" high overall and requires a minimum 7 1/2" x 7 1/2" in order to rotate, more with tools in it. Shipping weight: 6 lbs.

Small Caddy has all the features of the large caddy but scaled down to a smaller size: 6"L x 6"W x 8"H. Shipping weight: 3.15 lbs.

All accessories sold separately.

Description	Item#	Each
A. Wooden Tool Holder	816-4058	\$50.95
B. Small Wooden Tool Holder	816-4059	46.95

C. Benchtop Organizer

Fits perfectly on the back of a bench or on a work table. Contains space for findings, tools, accessories and organizes it all. Four drawers are included for stow away items. A great compliment to any work area. Measures 18" L x 4 1/2" W x 7 1/2" H. Shipping weight: 3.5 lbs.

Description	Item#	Each
Benchtop Organizer	816-4056	\$47.95

D. Plier and Tool Organizer

Beautifully made yet practical wooden organizer with seven open compartments for pliers, open space below for various small tools and a drawer for those small parts so essential to every bench. Made of hardwood (except pressboard pliers spacers) with dovetailed joints and varnished finish. Measures 7 1/2"W x 6 1/2"D x 3 3/4"H.

Description	Item#	Each
Plier and Tool Organizer	816-4057	\$21.15

E. Magnetic Tool Holder

A handy 12" strip with permanent magnets for holding pliers, screwdrivers, tweezers and other tools. Helps keep bench clutter-free. Allows easy access to tools. Screws into surface for sturdiness.

Description	Item#	Each
Magnetic Tool Holder	840-0008	\$35.25

F. Handpiece Storage Strip

The Handpiece Storage Strip keeps handpieces within easy reach. Four holes provide storage for multiple handpieces of varying size. The storage strip includes clips that fit the side of some commercial benches. It can also be mounted to a flat surface with the included hardware.

Description	Item#	Each
Handpiece Storage Strip	850-0604	\$11.15

A. White Cotton Gloves

Keep your jewelry, silverware and small parts fingerprint-free to maintain high luster finish. Very good for handling merchandise for packing. Available in light and medium weight cotton. Small gloves measure 8", medium 9" and extra large are 10" in length.

E. Large Tray Set (five 2" dia. trays)	816-4060	2.95

F. Vacuum Tweezers

Offering unmatched precision over standard tweezers, this self-contained miniature vacuum pump has 2 handpieces for picking up stones and small parts without damaging them. Picks up both cabochons and faceted stones. Because there are no tweezers tips on the girdle of the stone, placement is easier, faster and more precise. This is especially useful when setting small stones and when setting stones in wax.

Comes with 4 stainless steel tips of varying diameters for holding smaller or larger stones. Vacuum is created by placing the forefinger over a hole in the handpiece. To break the vacuum, simply lift your finger from the hole. The vacuum generator measures just 5" long x 3¹/₄" wide x 2" high with an airflow of 125 cu. in./min. 110V. Shipping Weight: 1.2 lbs. Made in Thailand.

Includes :

- 110V vacuum unit with on/off switch
- 2 pencil-thin, lightweight aluminum pens
- 4 stainless steel tips of varying sizes
- 2 flexible air tubes each measuring 36" in length

A, B 3M® Tarni-Shield

Designed to inhibit corrosive gases from tarnishing or staining metal items in transit or storage. Works on silver, copper, gold, brass and solder by absorbing and trapping atmospheric pollutants such as hydrogen sulfide, sulfur dioxide and acetic acid. Easy to use: to protect a metal item, just add Tarni-Shield to the shipping container. Available in strips or tabs. Strips measure 2" x 7" and are sold in packages of 8 or 1,000. Use one strip to protect up to 420 cubic inches of container space. Tabs measure 1" x 1" and are sold in packages of 1,500. Use tabs in small containers.

D. Anti-Tarnish Filtration Unit

Never polish your showcase jewelry again!

This simple, effective unit prevents tarnish on sterling silver and all other metals. Place one in a 4' showcase or two in a 6' showcase, especially if opened frequently. If you move your jewelry to a safe each night, place one or two units in there, as well. Includes one filter. Runs 24/7 on two "D" batteries (not included). Used by NASA, the Guggenheim Museum and the British Royal Mint, to name a few.

Not designed for open areas. Note that cabinets and cases with wooden bases may require extra protection from Anti-Tarnish Foil Barrier Film to reduce outgassing common to wood, which greatly contributes to tarnishing if left unchecked.

Features:

- Safe for all jewelry
- Leaves no residue or deposit
- Nontoxic and environmentally safe
- Hides easily behind a necklace stand
- Operates silently

Measures 3¼"W x 3½"D x 4"H. Filter and batteries should be changed every three months.

Apron, 35"W x 45"L	827-1509	\$29.95

Keep Your Customers Coming Back! Gesswein Has the Answer!

Retailers are always looking for a way to keep their customers coming back—check out these great add-on or gift with purchase items.

A, B Glass Nail Files - Made with Swarovski® Elements

Introducing tempered glass nail files made with Swarovski Elements. Elegant yet practical, these files make a great 'add-on' or 'gift with purchase'. Simply place the glass file display on your sales counter and watch the sales happen.

How can I market glass nail files?

10 reasons why you can't miss.

1. A proven seller, makes a great add-on or gift with purchase that you can make at least keystone. They will come back for more and thus keeps your customers coming back into your jewelry store and does not take away from any other purchase.
2. Decorated with genuine elements by Swarovski.
3. Eye catching display that will draw their attention and thus want one!
4. Made of tempered glass for extra strength and safety. Hard cases available for added security.
5. Hygienic, can be washed by using water. Let your customers try one and they will be impressed by its beauty!
6. Can be used on acrylic nails, just simply wet the file!
7. Permitted on airplanes since the file is glass and not metal.
8. Works safely on baby's nails since the sides are not sharp.
9. Will maintain performance since the surface does not wear out.
10. Makes a routine item fun and exciting... remember many customers will buy more than one at a time.

Display Set - Includes acrylic counter display with card, 30 Glass Nail Files with sheaths and 6 hard nail file cases.

15 Piece Refill Pack — Once you start selling the Gesswein Glass Nail Files, refill your counter top display with ease. Includes 15 Glass Nail files with sheaths.

Hard Cases - 6 pack - To prolong the life of your nail file, Gesswein offers hard nail file cases, available in 6 colors (May vary). Available in a set of 6.

Troy Weight

24 grains	1 pennyweight
20 pennyweights	1 ounce
12 ounces	1 pound
The troy ounce is about 10% heavier than the avoirdupois ounce.	
Troy ounce x 1.0971 = avoirdupois ounce.	

Weight Relationships

1 carat	1/5 gram
3,086 grains	
1 avoirdupois lb.	14.58 troy oz.
7,000 grains	
1 troy lb.	13.17 avoirdupois oz.
5,760 grains	
1 gram	5 carats
15.432 grains	
1 avoirdupois oz.	.911 troy oz.
28.25 grams	
1 troy oz.	1.097 avoirdupois oz.
31.10 grams	

Douzieme Gauge

The gauge is divided into 72 sections or douziemes.	
1 douzieme =	1 gauge =
.0074 inch	
1 ligne =	12 douzieme =
.0888 inch	

Avoirdupois Weight

27 1/3 grams	1 dram
16 drams	1 ounce
16 ounces	1 pound
The avoirdupois pound is about 2 1/2% heavier than the troy pound.	
Avoirdupois ounce x 0.91146 = troy ounce.	

Temperature Conversion Formulas

To convert from Celsius to Fahrenheit:

$$(^{\circ}\text{C} \times 1.8) + 32 = ^{\circ}\text{F}$$

To convert from Fahrenheit to Celsius:

$$(^{\circ}\text{F} - 32) \div 1.8 = ^{\circ}\text{C}$$

Volume

(Cubic measure calculation)	
Cylinder	$\pi r^2 h$
Cube/Rectangle	L x W x H
Cone	$1/3 \pi r^2 h$
Sphere	$4/3 \pi r^3$

Area Calculations

Circle	πr^2 (2πr = circumference)
Square	L x W
Triangle	W x 1/2H

Temperature Conversion Table

Read the reference temperature in boldfaced type in the center column. The corresponding Celsius temperature is at the left, and the corresponding Fahrenheit temperature is at the right.

Temperature Conversion Formulas:

$^{\circ}\text{C} = \frac{5}{9}(^{\circ}\text{F} - 32)$

$^{\circ}\text{F} = \frac{9}{5}^{\circ}\text{C} + 32$

$^{\circ}\text{C}$	Ref.	$^{\circ}\text{F}$	$^{\circ}\text{C}$	Ref.	$^{\circ}\text{F}$	$^{\circ}\text{C}$	Ref.	$^{\circ}\text{F}$	$^{\circ}\text{C}$	Ref.	$^{\circ}\text{F}$	$^{\circ}\text{C}$	Ref.	$^{\circ}\text{F}$	$^{\circ}\text{C}$	Ref.	$^{\circ}\text{F}$	$^{\circ}\text{C}$	Ref.	$^{\circ}\text{F}$

Ordering from Gesswein is Easy!

Phone Orders: 800-243-4466 (Monday–Friday, 9am–5pm EST)

Fax Orders: 888-454-4377 (24 hours a day, toll-free)

E-mail Orders: sales@gesswein.com

Web Orders: www.gesswein.com

For fastest ordering, please use our 7-digit item numbers.

For in-stock items, orders in by 3:00pm EST are usually shipped the same day.

Thank You for Your Order!

As our business grows, so does our volume of incoming phone calls. We know your time is valuable, so to make sure you always have access to toll-free lines when placing your order, without the annoyance of busy signals, we have reserved a set of toll-free lines for orders only.

Our toll-free numbers can be used in all 50 states. Your order will be taken directly by an Inside Sales representative, entered immediately into our computer system, carefully picked, packaged and shipped.

How to Place an Order

Simply visit our website, phone, fax or E-mail your orders or requests for price quotes. **Orders in by 3:00pm EST are usually shipped the same day.** Of course, nonstock items and special-make items require additional time.

Visit our E-commerce website at www.gesswein.com to view the latest products, sale items and pricing and to place orders on-line whenever convenient for you.

When you phone, please have your account number ready. This will help us enter your order quickly and give you current pricing and availability.

Each item in this catalog is coded with a seven-digit item number. Please use these numbers when placing your orders to ensure that the correct products are sent to you. Having these numbers also speeds up the order entry process. If you don't have your account number or the item numbers, we are ready to assist. Simply let us know what you want and we will make it happen! If you cannot locate an item in our catalog, please be sure to let us know. We might be able to find it specially for you!

Credit Cards

We currently accept Visa®, MasterCard®, American Express®, Discover® cards and PayPal™ for payment. For your security, credit card transactions are verified with the credit card company and/or issuing bank. Card number, expiration date, CVV and billing address are checked for your safety.

Prices

For your convenience, we have included prices of our cataloged products. *Please use as a guide only.* Fluctuations in raw material costs, manufacturing costs or foreign currency exchange rates may require price adjustments without notice. Our buyers constantly seek better prices without sacrificing the quality for which Gesswein is known. When successful, we pass the savings on to our customers, adjusting prices accordingly. Our prices do not include shipping and handling charges. All prices are in U.S. funds. Please feel free to call or fax for price quotes. We collect appropriate state and local sales taxes as required by the current laws of each state.

Opening an Account

If you wish to open an account with us and you have a good rating with Dun & Bradstreet (D&B®) or the Jewelers Board of Trade (JBT®), we will immediately establish an open account with 30 day terms. If you are not listed with either agency, please send us three trade references and one bank reference or request an account application and return it to our office in Bridgeport, CT. We will immediately contact your references and inform you of our decision as soon as they respond (which can take approximately two weeks).

Terms of Payment

Open Accounts We reserve the right to impose a service charge of 1½% (18% APR) on all accounts not paid within 30 days.

All Other Accounts Our terms are net, payable in advance by check, money order, bank wire transfer, Visa®, MasterCard®, Discover® or American Express®. Payments accepted in U.S. funds only.

Leasing Options Available For equipment purchases totaling \$5,000.00 or more, you might want to consider leasing options. While Gesswein does not operate an in-house leasing program, we are certainly happy to work closely with your leasing firm of choice or we can suggest one that we work with regularly. Contact us for details at 203-366-5400.

Paul H. Gesswein & Company Inc., Home Office, Bridgeport, Connecticut, USA

An Important Note About Our Products

All products sold by Gesswein are intended for use by professional tradespeople, not the general public. Additional documentation may be requested before shipment can be made. Those not knowledgeable in the usage of hazardous equipment and materials should not purchase these products since noncompliance with safety regulations can be dangerous to health and property.

Safety Data Sheets

Safety Data Sheets (SDSs) are available upon request for all products that contain hazardous ingredients. SDSs contain important information such as safety recommendations and emergency procedures. The fastest way to access SDS information is through our website, www.gesswein.com. Click on the SDS button found on our home page, select SDS and search alphabetically for the product. You can also call us Monday–Friday, 9am–5pm EST at 800-544-2043 or 203-366-5400.

Eye Protection

Goggles or safety glasses with shields are recommended when using abrasive products for polishing, grinding or cutting.

Hand Protection

Gloves are recommended but not required when using most abrasive products. Follow the manufacturer's guidelines.

Hearing Protection

Earmuffs or earplugs may be required when using some abrasive products. See OSHA 29 CFR 1910.95 for statutory noise limits and requirements.

Respiratory Protection

Consider the abrasive product and material to be ground, then select and use equipment in accordance with OSHA 29 CFR 1910.134 in the USA or CSA Z94.4-M1982 in Canada.

Engineering Controls

Provide process enclosure or local ventilation to keep dust below applicable limits and to meet hearing protection requirements.

Operating Practices

- Safe operating practices must be a part of every operation.
- Be sure to read all safety information provided with applicable products.
- Always check products for damage before use.
- Before mounting wheels, use a tachometer to measure spindle speed.
- Ensure that the mounting flanges, backplate or adapter supplied by the machine manufacturer are used and kept in good condition. ANSI Safety Requirements B7.1 provide wheel mounting requirements. Check mounting flanges for equal, correct diameter, and use blotters when supplied.
- Always mount, true and dress wheels in conformance with the guidelines published in ANSI Safety Requirements B7.1.
- Never exceed the maximum operating speed for any product.
- Avoid dropping or bumping wheels.
- When not using wheels, store in their original packaging materials to prevent chips and cracks and to allow easy wheel identification.

Vibrating and Reciprocating Tools

Prolonged use of vibrating or reciprocating tools may result in vibration-induced circulation problems in the hands. Always follow safe operating procedures. The use of hand protection (i.e., insulated gloves) and taking frequent breaks can help minimize but not guarantee against injury. Operating these types of tools in cold weather or with a tight grip will reduce the period of operation before risking potential injury. Individuals with a tendency to suffer from poor circulation, frequently cold fingers or itchy hands should closely monitor the condition of their hands. If symptoms appear, seek medical advice immediately.

Icons Usage

-  Although no hazardous shipping surcharge applies, these items can only ship via UPS Ground, no air, FedEx or US Mail possible. Cannot ship to Alaska, Hawaii or Puerto Rico.
-  UPS hazardous shipping surcharge applies. Ships via UPS® Ground only, no air, FedEx®, or US Mail shipments. Cannot ship to Alaska, Hawaii or Puerto Rico.
-  Shipment by truck is required.
-  Indicates a minimum order is necessary; in this case orders would be in multiples of 6.

Shipping Policy

Shipping and handling charges are all F.O.B. shipping point. A small handling fee is presently charged on all original orders. The method of shipment will be left to our discretion unless you request a specific method.

Truck Shipments

(All items indicated with this  icon will ship via truck.)

All shipping and handling charges are F.O.B. shipping point. If you request a specific carrier, we will be happy to send your shipment collect via that carrier. Otherwise, we have negotiated lower rates with select carriers and will pass savings on to you. Orders are shipped freight prepaid, and the freight appears on your invoice. If the trucker will have to off-load your shipment to a smaller delivery truck (e.g., if you have limited access to your door because of a narrow alleyway), there may be a delay in delivery. Please make us aware of any potential problems so we can take steps to minimize delays.

Truck Shipment Charges – in Addition to the Freight Charge

(subject to change without notice)

The following services can generate extra charges above the normal trucking rates:

- Residential delivery (minimum \$60.00)
- Liftgate service (minimum \$50.00 to \$80.00 based on carrier)
- Inside delivery. Inside delivery is simply placing the shipment inside your door. If you require further assistance, it can be arranged at a premium rate. (minimum \$100.00)
- Hazardous goods surcharge (minimum \$30.00 per shipment)
- Redelivery due to customer unavailability (minimum \$100.00)
- Any changes to shipment after pickup from F.O.B. point (minimum \$100.00)
- Limited access charge (minimum \$60.00 based on new info)

US Postal Service® (USPS) Shipments

All postage and handling charges are F.O.B. shipping point. Orders are shipped postage prepaid, and the postage appears on your invoice. No hazardous goods or liquids can be shipped by US Mail. Please be aware that USPS shipments are not trackable. No COD Shipments.

FedEx® Shipments

No hazardous items may be shipped via FedEx.

Please note: additional handling charges may also apply when factors regarding package size, unusual/remote delivery locations are factored in by the shipper.

FedEx offers a wide range of guaranteed delivery options to fit your needs. However, not all areas have every service available. Ask your Inside Sales representative to confirm your ZIP code for a specific time-of-day delivery commitment:

FedEx First Overnight® – Delivery by 8:30am.

FedEx Priority Overnight® – Delivery by 10:30am.

FedEx Standard Overnight® – Delivery by 3:00pm.

FedEx 2 Day® – Delivery by the second business day.

FedEx Express Saver® – Delivery within three business days.

FedEx Ground – Delivery to continental U.S. within one to five business days and three to seven days for Alaska and Hawaii.

UPS® Shipments

All shipping and handling charges are F.O.B. shipping point. Orders are shipped freight prepaid, and the freight appears on your invoice along with your UPS tracking number.

UPS Ground service is offered for all 50 states plus Puerto Rico. However Since Alaska, Hawaii and Puerto Rico Ground service actually travels via aircraft, certain items are prohibited from shipment to these areas.

UPS® also charges surcharges for hazardous products, unusual remote locations and for residential deliveries of packages that are considered oversized. These vary based on the ZIP code, length of package and method of shipment.

UPS offers a wide range of guaranteed delivery options to fit your needs. However, not all areas have every service available. Check www.ups.com or ask your Inside Sales representative to confirm your ZIP code™ for a specific time-of-day delivery commitment.

UPS Express Critical® – Next-flight-out service can be same-day if conditions are met.

UPS Next Day Air Early A.M.® – Delivery by 8:00, 8:30, 9:00 or 10:00am depending on location. Some locations not available

UPS Next Day Air® (aka UPS RED) – Delivery to every address coast-to-coast and Puerto Rico by 10:30am, noon or end of day depending on location. Alaska and Hawaii may require additional days.

UPS Next Day Air Saver® – Delivery to specific destinations throughout continental U.S. by 3:00pm, 4:00pm or end of day.

UPS 2nd Day Air A.M.® – Morning delivery on the second business day to most metro-commercial addresses throughout U.S., depending on location.

UPS 2nd Day Air® (aka UPS BLUE) – Delivery by the second business day to every address coast-to-coast and Puerto Rico.

UPS 3-Day Select® (aka UPS ORANGE) – Delivery within three business days throughout 48 contiguous states.

Shipping Damage

Orders always leave our facility in excellent condition. Our shipping terms are F.O.B. shipping point, which means you assume ownership the moment your order is picked up by the carrier. Therefore, in the unfortunate circumstance that you find any damage to your shipment, **you as the owner must file a claim with the carrier.** Gesswein will be happy to assist you in any way possible, but you must file the claim yourself.

- If you see any obvious outside damage to a shipping carton, you must write "Damaged" on the carrier's delivery sheet.
- Save all cartons and packing materials. Do not return shipment.
- If, after initial inspection of the shipment, you discover concealed damage, you must promptly contact the carrier for inspection and **save all shipping materials.**
- Gesswein will not assume responsibility for any losses that occur due to your failure to follow these steps.

Truck Shipments

All carriers are liable for any damages that occur during transit. Please be sure all cartons that are listed on your freight bill have actually been delivered. If you find a shortage or suspect a carton might have been damaged during transit, you or the trucker must make a notation of this on the delivery receipt. Do not sign the receipt without a notation. **Retain all cartons and packing materials until after the inspection is completed.**

If shortages or damages are discovered after the packages are opened (concealed loss or damage), notify the carrier within 15 days and request an inspection. **Also retain all cartons and packing materials** until after the inspection is completed. Gesswein will not assume responsibility for any losses that occur due to your failure to follow all of these steps.

UPS® Shipments

United Parcel Service is liable for any loss or damage that occurs during transit. If a shipment is not delivered to you in proper order, make a notation on the delivery receipt. Contact your local UPS® office within 10 days so that we can submit a claim on your behalf and arrange for a replacement. **Save all cartons and packing materials** until after the inspection is completed.

If shortages or damages are discovered after the packages are opened (concealed loss or damage), notify the carrier within 15 days and request an inspection. **Also save all cartons and packing materials** until after the inspection is completed. Gesswein will not assume responsibility for any losses that occur due to your failure to follow these steps.

FedEx® Shipments

FedEx® is liable for losses or damages that occur during transit. If the shipping cartons are obviously damaged, you must write this on the driver's copy of the delivery receipt. You have 10 days to inspect for hidden damage, so don't delay. **In either case, all cartons and packing materials have to be available for inspection.** Please keep in mind that FedEx® requires written notification of possible claims within 10 days of shipment. **Gesswein will not assume responsibility for any losses that occur due to your failure to follow all of these steps.** (Hazardous items cannot be shipped by air.)

Shipping Hazardous Materials

When shipping of hazardous materials is prohibited by specific means, we will ship by the best method possible. UPS® Ground and most trucking firms charge an additional fee for the transport of hazardous materials, including but not limited to acids and corrosive materials. UPS® limits the quantity and type of hazardous items that may be shipped in one carton. Therefore, multiple cartons may have to be used for your order. UPS® assesses their hazardous surcharges per carton. Most trucking firms charge per shipment. No hazardous items may be shipped via FedEx® or USPS®. **Hazardous items can not be shipped by air.**

Hazardous goods can only be shipped by those companies authorized to do so. Therefore, a return of hazardous items to Gesswein can be made only if your company is an authorized shipper of such goods. Call tags and pickups cannot be issued.

The following icons are used in this catalog to denote hazardous materials and how they can be shipped.

 Although no hazardous shipping surcharge applies, these items can only ship via UPS® Ground, no air, FedEx® or US Mail possible. Cannot ship to Alaska, Hawaii or Puerto Rico.

 UPS® hazardous shipping surcharge applies. Ships via UPS® Ground only, no air, FedEx®, or US Mail shipments. Cannot ship to Alaska, Hawaii or Puerto Rico.

Safety Data Sheets

Safety Data Sheets are available at your request for all products that contain hazardous ingredients. SDS contain important user information such as safety recommendations and emergency procedures.

The fastest way to access our SDS information is via our website, www.gesswein.com. You can also call us Monday through Friday from 9am–5pm EST at 203-366-5400.

Important Warning – Please Read!

All products sold by Gesswein are restricted for use by professional tradespeople only. Additional documentation may be required before shipment can be made. Our products are not intended for use by the general public. Those not knowledgeable in the usage of hazardous materials and equipment should not purchase these products since noncompliance with safety regulations can be dangerous to health and property.

All the data in this catalog is true to our knowledge at the time of writing but subject to change without notice to provide best quality and selection.

Worldwide Service

Our international sales staff are ready and waiting to serve you: they routinely schedule shipments to customers all over the world. Coordinating their efforts with expert knowledge of customs regulations, they ensure orders are expedited and delivered on time.

Our service goes well beyond the point of sale. We pack shipments with care, arrange for letters of credit, prepare all necessary documentation and select the most affordable shipping method.

Returns:

If for any reason you wish to return merchandise, simply refer to your packing slip. If you require assistance, contact our Customer Service associates at 1-800-243-4466, and they will be happy to help. Please have your packing slip or invoice handy. All returns must be shipped prepaid and be in unused and resellable condition. Please make sure you carefully package the merchandise to avoid damage during shipment. We do not accept collect nor C.O.D. shipments. Any items we authorize to be returned at our expense should be via the carrier that we specify.

Return Restrictions:

- We reserve the right to charge a re-stocking fee for cataloged products returned after 30 days.
- Nonstock items ordered specially for you are subject to a re-stocking charge.
- Items made to your specifications are not returnable.
- Returns will be credited in the same manner as paid.
- **Hazardous items can be returned only if you are an authorized hazardous goods shipper.**

Gesswein Represents:

Quality and Value – We offer distinguished products of the best quality as well as affordable products of great value.

Service – A philosophy and way of life. It cannot be attributed to a single department, program or policy, but rather to all the things we do to ensure customers are satisfied. Service means giving customers more than they expect, responding to their needs immediately and shipping their orders promptly.

Honesty – To our customers, ourselves and each other. We are in the business of earning and safeguarding trust, so we must always act honorably.

Respect – We demand respect for our customers, each other and the company. Mutual respect leads to understanding, which in turn leads to efficiency.

Teamwork – Our people are totally committed to working together as a team to reach our common goals.

Investment – We invest resources back into the company in order to keep inventory at optimal levels, to fund a technical support staff and to educate our people so they can better serve our customers.

Gesswein Represents:

Quality and Value – We offer distinguished products of the best quality as well as affordable products of great value.

Service – A philosophy and way of life. It cannot be attributed to a single department, program or policy, but rather to all the things we do to ensure customers are satisfied. Service means giving customers more than they expect, responding to their needs immediately and shipping their orders promptly.

Honesty – To our customers, ourselves and each other. We are in the business of earning and safeguarding trust, so we must always act honorably.

Respect – We demand respect for our customers, each other and the company. Mutual respect leads to understanding, which in turn leads to efficiency.

Teamwork – Our people are totally committed to working together as a team to reach our common goals

Investment – We invest resources back into the company in order to keep inventory at optimal levels, to fund a technical support staff and to educate our people so they can better serve our customers.

Icons Usage

-  Although no hazardous shipping surcharge applies, these items can only ship via UPS® Ground, no air, FedEx® or US Mail possible. Cannot ship to Alaska, Hawaii or Puerto Rico.
-  UPS® hazardous shipping surcharge applies. Ships via UPS® Ground only, no air, FedEx®, or US Mail shipments. Cannot ship to Alaska, Hawaii or Puerto Rico.
-  Shipment by truck is required.
-  Indicates a minimum order is necessary; in this case orders would be in multiples of 6.
