Calibration Due Date: 03/10/2017

Table with 8 columns: Seq., Reference Item, Standard, Tol. +, Tol. -, As Found, Final, Unit. Contains 10 rows of calibration data for various caliper and micrometer items.

F = Out Of Tolerance L=Out of Tolerance/Limits Gage Use R=Report Of Value A=Adjusted

Equipment Used To Calibrate Gage:

This calibration is performed in a controlled environment with guidelines compliant to ISO/IEC 17025-2005 and ANSI Z540-1-1994. This calibration was conducted using standards traceable to the SI through NIST. In tolerance conditions are based on the calibration falling within the specified limits and are not affected by the measurement uncertainty. Actual uncertainty represents the expanded uncertainty at approximately 95% confidence level using a k=2 factor. Any number of conditions may cause this calibration to be invalidated prior to the estimated due cycle. This report shall not be reproduced, except in full, without the written approval of INSIZE Calibration Services.
