

Rapid Measuring Systems

NEW One-key measurement in seconds

Simple Operation

One-Key Precision Measurement

The Fowler Rapid Measuring Machines achieve fast dimensional measurement with one-key operation using proven precision image analysis algorithms in combination with double telecentric lenses.

When in CNC mode, the operator places parts on the measuring table, presses the start button, and then the instrument measures and evaluates multiple dimensions quickly. The Fowler RM series is a one-key, image measuring machine.

Simple operation with efficient measurement.

Features Include:

- Simple 3-step operation process
- Efficient measurement with high depth of field and large field of view
- Improved optical lenses

Choose Between the RM 310, RM320, and RM8300 Models According to Your Specific Application

RM3100

5M lenses with $\Phi 100$ x 200 mm Field-Of-View.

RM3200

5M lenses with large 200 x 200 mm Field-Of-View.

RM8300

20M lenses with extra large 300 x 200 mm Field-Of-View.
