ISO Turning Insert Promo

Promo Code: 2226

Featuring Our Latest Chipbreakers

For Steel: FLP, MLP, MGP, RGP

For Hi-Temp Alloys: FGS, MGS

**Purchase 20 Inserts* and
Receive 10 Inserts***

(of equal or lesser value)

FREE OF CHARGE!

*All must be qualifying inserts noted.

ISO Turning Insert Promo

COMPARABLE

FLP

- For finish machining, minimizes machining load at low depths of cut.
- Excellent chip control range.
- Wide, stable supporting area providing improved dimensional accuracy.
- Grades: TT8115B, TT8125B, TT5100

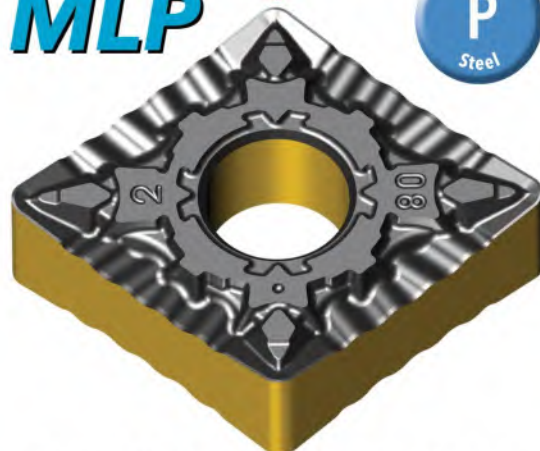

Scan/click QR
to view all FLP
inserts

COMPARABLE

MLP

- For semi-finishing to medium machining.
- Features a "wave edge" rake face design for excellent chip control on work pieces with a variable depth of cut.
- Stable machining in a wide range of medium applications.
- Grades: TT8105B, TT8115B, TT8125B, TT5100

inserts

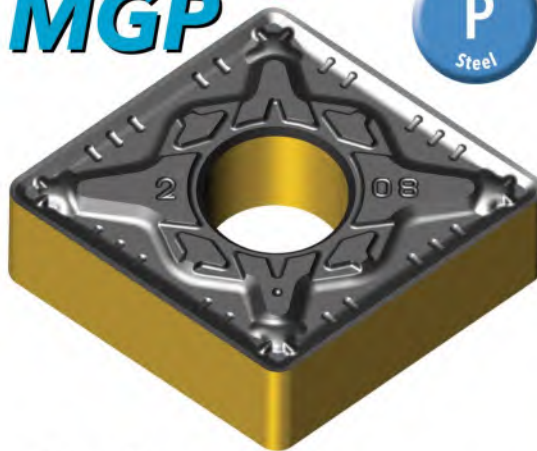

COMPARABLE

NEW!

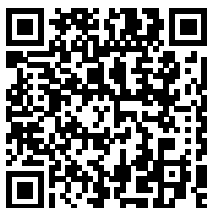

MGP

P
Steel

- For medium machining.
- Best for general machining of steels.
- Offers a healthy range of feed rate and cutting depth parameters.
- Designed with a strong cutting edge and a wide support area that promotes stable and reliable machining.
- Grades: TT2010, TT8105B, TT8115B, TT8125B, TT8135B, TT5100

inserts

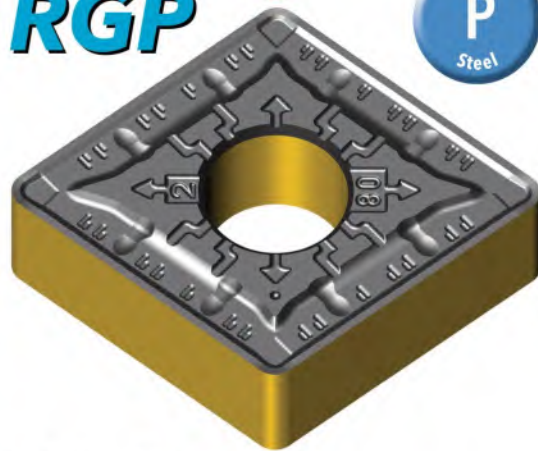

COMPARABLE

NEW!

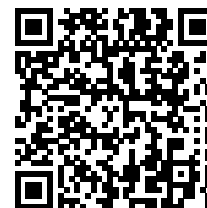

RGP

P
Steel

- For roughing.
- Reinforced cutting edge and wide chip groove.
- Can perform reliably without chipping even in extreme interrupted machining conditions.
- Grades: TT8105B, TT8115B, TT8125B, TT8135B, TT5100

Scan/click QR

inserts

FGS

NEW!

- Sharp cutting edge reduces cutting resistance.
- Ground periphery for high precision machining.
- Minimal workpiece deformation even in thin-walled parts.
- Grades: K10, TT3005, TT3010, TT3020

Scan/click QR
to view all FGS
inserts

MGS

NEW!

- Sharp cutting edge reduces forces and heat.
- High rake angle generates smooth chip evacuation.
- Wide top face provides very secure insert seating.
- Grades: K10, TT3005, TT3010, TT3020
