SHARP 'S MARCH SPOTLIGHT

Enhance Your Operations with Sharp's Versatile KMA-5H Milling Machine

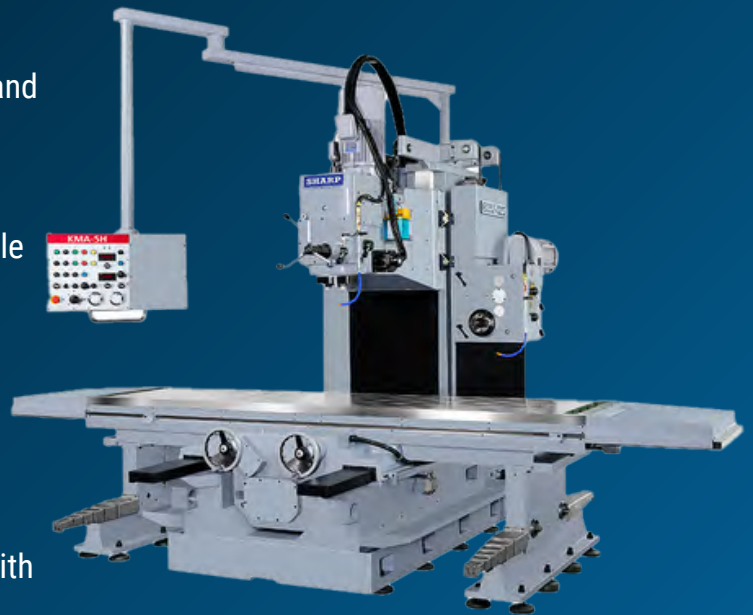

This month, we are excited to highlight Sharp Industries' KMA-5H bed type vertical/horizontal milling machine, designed to meet the diverse needs of modern manufacturing.

Key Features:

- **Robust Specifications:** Features a 29.5" x 106.3" table, 78.74" x 31.5" travel, NT #50 taper spindle, and a powerful 17.5 HP vertical spindle motor.
- **Enhanced Productivity:** The horizontal head, equipped with a 7.5 HP motor and #50 taper spindle driven by an AC servo motor on a ball screw, performs horizontal milling operations with high accuracy.

Recent Success Stories:

- **NY/NJ Port Authority:** Utilized the KMA-5H to machine large parts essential for maintaining the Lincoln Tunnel, ensuring projects are completed with unparalleled precision.
- **Ingredient (Kansas City):** Brought previously outsourced large-scale work in-house, increasing operational efficiency and reducing lead times.
- **Turn-All Machine & Gear (Ohio):** Supported growing demand for heavy part machining in 2-axis, allowing for better control over complex parts.

[Click here to see how The KMA-5H has become the go-to solution for companies seeking to improve machining efficiency and precision.](#)
