

HSS Bi-metal Band Saw Blade

DYNABAND G

Triple-Hybrid Tooth Shape

When cutting hard-to-cut materials,
reduce cutting noise and longer blade life .

1 Hybrid Tooth Shape & Original Set Pattern

Triple-Hybrid Tooth Shape

- The Gulf formed gullet improves fatigue life
- Chip Curler improves chip flow and reduces crooked cut
- High-positive rake angle reduces cutting resistance when cutting hard-to-cut materials

AMADA Original Set Pattern

- Reduce cutting resistance, noise and vibration by the original long set pattern and the optimal Hi-Lo teeth

2 AMADA'S Original Highly Efficient Edge Material

- Adopt AMADA's exclusive M71 HSS improves wear resistance

3 Excoat - DP

- Adopt coating proven by {AXCELA G}. High hardness, high resistance to temperatures, and strengthened coating adhesion.
- Improves wear resistance, reduce noise and vibrations when cutting Stainless Steels and Hot Work Steels

4 Product Specifications

- 1.5" – 050 – 2/3
- 2" – 063 – 1.5/2, 2/3
- **Limited quantities in stock, please inquire for availability**
