

Compact, light-weight pneumatically-operated drilling units

SELFEEDER ELECTRIC

SSE4

Includes the high-torque range not covered by SSE3.
 The long stroke type is the longest in the SSE series.
 The ES4P type has been updated by replacing the induction motor with a PM motor.

- Notes:
- Model selection should be based on the shape of the work, material, cutting characteristics, diameter and material of tools, rotational speed (cutting speed), etc.
 - The drilling capacity displayed in the above table is based on values representing a drilling depth of twice the diameter of the drill.
 - The standard attachment for the Hydro Speed Regulator is RB-3140. Please specify an optional Hydro Speed Regulator if required.
 [Optional Hydro Speed Regulator Models: RB-3160, R-3182A, R-31132A]
 - Make sure to use a collet chuck or spindle nose when the hardness of carbide drills and tool shanks is higher than that of general HSS (high-speed steel) drills.
 - Valveless specification is standard. If you require valve block specification (former standard specification), please order valve block ass'y separately. (Replacement to be made by customer)
 - Rated power at rotation speed higher than the rated torque range.
 - AL* : Aluminium(ADC12) FC* : Cast iron(FC200) ST* : Steel(S45C)

About Pneumatic Control Circuit

Please refer to the following QR code for the pneumatic control circuit to control the forward/reverse movement and speed of the Selffeeder.

Notes

- Supply clean air of 0.5 to 0.6 MPa to the Selffeeder.
- Air equipment up to the air supply port should be prepared by the customer.
- Use a meter-in flow control valve.
- When using the unit at an angle downward or vertical downward, install a pneumatic control circuit specialized to prevent the ram from falling.

Tip shape

■ Collet chuck / spindle nose (option)
Model No.: ER20 or equivalent
(chucking range $\phi 1$ to $\phi 13$)

- Note:
1. Detailed dimensions of spindle tip are as recommended for REGO-FIX ER collets.
 2. Collet, collet nut, and wrench are not included. Please order separately.
 3. When installing the Selffeeder <Electric> horizontally, the drain outlet must face downwards.

■ Adjustable Spindle Nose (option)
Model No.: KH-22E

- Note:
1. Detailed dimensions of spindle nose are as recommended by NT Tool Co.
 2. KH-E type spindle nose is applicable to NT Tool's quick-change stub holders KH-A / KH-E type.
 3. Adjustable spindle nose is not applicable for Selffeeder <Electric> with no-load rotation speed exceeding 5,000min⁻¹.
 4. When installing the Selffeeder <Electric> horizontally, the drain outlet must face downwards.

I/O Signal Specifications

I/O	Signal	Name
Input	STF	Unused
	STR	Spindle ON
	RH	Multi-step spd (1 to 15 spd) Freq set range 75 to 180Hz Can be set in 7.5Hz increments
	RM	
	RL	
	MRS (REX)	
RES	Reset	
Output	A	Abnormal Output(Relay) Normally-open contact
	B	Abnormal Output(Relay) Normally-closed contact
	RUN	In operation
	FU	Freq detection

Options

■ Hydro-speed regulator

A hydraulic feed speed control unit that can adjust the feed rate of an air cylinder to any desired speed. For details, please refer to our web page.

■ Operate Signal Kit

This kit is designed to accurately detect the operation of a Selffeeder and control synchronized operation with other devices. For details, please refer to our web page.

■ Multi-spindle head

Various multi-spindle heads are available. For details, please refer to our web page.
