

# How To Setup Dynamic Filtering

1. Log into CribMaster client using an account that has administrator access
2. Go to the "Home" tab and click on the "Operation" button

3. Scroll through the list of operations and double click the one you would like to setup filtering for. In the example below you will use the "1134, AAM Housing" cost center.

4. Now click on the "Part Number Assignments" tab. This tab will list all of the items in the "Part Number" cost center. In the screenshot below I have the "1134, AAM" part number cost center selected. By checking that box I'm telling the ATR to display the "1134, AAM Housing" operations cost center when a user selects the "1134, AAM" part number cost center. This is the most confusing part of the process. Make sure to click the green checkmark to save your progress.
