

Laser Center/Edge Finder[®]

Designed to replace traditional wigglers and mechanical or electronic edge finders in most setup operations.

Precision edge finding without readjusting for radius of edge finding tool

Quickly locate center punch marks or scribe line intersections

Can be used with drill presses, to set mill head angle, realign lathe tailstock after taper cutting, lathes with 4-jaw chuck setup or to align the vice on the mill table or use the OD mount to put over the mixing tube on a Waterjet cutting machine to set up stock on the table without the use of any tools.

- No Calculations
- No Guesswork
- Works From 1"- 12" Away
