HIGH PURITY | CONSISTENT SIZING | REDUCED DOWNTIME | HIGH PERFORMANCE

Limited Market Release

Economical, General Purpose Waterjet Abrasive

EcoGarnet™ is GMA's economical, general purpose waterjet abrasive specially engineered through our garnet recovery and recycling program. Our garnet recovery program provides customers with a cost effective and environmentally responsible option for disposing used garnet. Due to garnet's superior toughness and low friability, GMA Garnet's abrasive can be recycled for waterjet application without compromising its reliable, high quality cutting performance. Through our advanced garnet reprocessing facilities, they are cleaned, screened and sized accurately with our stringent global quality process to ensure they are free of contaminants for waterjet cutting machines.

Features

- High quality alluvial almandine garnet
- Reprocessed from controlled sources
- Advanced wet and dry production facilities that remove unwanted dust particles
- Rigorous grading and quality control process to eliminate oversize particles.

Performance & Application	Grade	Nozzle	Orifice
An excellent general purpose abrasive for less demanding or low volume waterjet applications. Ideal for cutting thinner, softer materials such as aluminum, brass, and tile.	EcoGarnet 90	0.030" - 0.040"	0.010 - 0.014"

GMA Garnet™

EcoGarnet 90

Packaging

- 55 lb. (25 kg) paper bags on 1 metric ton or 2 metric ton pallet
- 1 metric ton or 2 metric ton bulk bags with a bottom spout and an inner plastic liner.

**Packaging options may vary by location, please contact GMA Sales Representatives for more information.*

Ideal Industry Applications

- Automotive
- Decorative or ornamental
- Light manufacturing
- Metalworking
- Research and development
- Tile cutting
- Transportation
