4" x 6" x 48"

Modular Brick

Stocked in standard 50-brick pallets

Quantity discounts available: call for special pricing.

Ship your bricks with your next order of GMA Garnet from one of our local warehouses.

Does this happen on your table all too soon?

- Modular bed bricks are fused together instead of being screwed to allow longer surface stability and brick integrity.
- Design gives an even, flat cutting surface
- Drains water easily, reduces splashback
- Tight tolerance surfaces are great foundation beds for cutting parts from materials like:
 - aluminum
 - copper
 - plastics
 - marble
 - brass
 - foam
 - laminates
 - steel
- Durable Polypropylene material allows for more cuts, reduces cutting noise and can be recycled
