

Quality Waterjet Parts at Low Prices

For over 18 years IWP has been supplying the waterjet industry with advanced, high quality parts, at low prices. IWP is focused on complex parts for extreme pressure systems – parts for the pumps, tubing, and cutting heads.

That significant experience has been employed to create parts for all the major brands of ultra-high-pressure equipment – **now including Omax-style parts** – with very low prices.

Introducing the DP3000

Cutting Head Upgrade

The DP3000 is a versatile abrasive waterjet cutting head. It has a replaceable, orifice and mixing chamber insert making it simple and quick to change from one kerf to another.

The self-aligning insert includes ruby and mixing chamber as a single unit. The mixing chamber section protects both the body and the orifice from abrasive and is designed for maximum, reliable, acceleration of abrasive. The insert wears out, not the body.

- Replacing the low-cost insert restores the head to like-new operation, inexpensively reducing abrasive consumption.
- Using a different insert size allows for easily and quickly switching from one kerf size to another.
- Now available as shown for tilting heads!

Check out the DP3000 for low cost cutting!
