

GS160 6" Precision
Milling Machine Vise
327320

Get the Most Out of **Your Workspace**

With the **GS100G** 4" Precision Milling Machine Vise, a smaller version of the 6" Vise we know you love.

NARROW BODY STYLE*
to allow more vises on a machine table.
*compared to the competition

HOLD DOWN BOLT HOLES
allow for easy side by side mounting of multiple vises on a table.

A larger, more durable
BEARING PACK
that does not protrude from
the end of the vise body.

MATCHED BED HEIGHTS within $\pm 0.0005"$
allow for multiple vises to be easily used in parallel.

GS100G

4" Precision Milling Machine Vise

This Vise is packed with industry-leading workholding features

- Larger, more durable **bearing pack** engineered to deliver a highly stable workholding system that is stronger under pressure.
- A new brush seal design **keeps debris from penetrating the nut** due to a more efficient **chip evacuation system** through both the body and ends of the vise, while not compromising on the strength of the body.
- Spherical Segment creates an **all directional alignment** and **reduces jaw lift** of the movable jaw, while the 4-bolt design of the fixed jaw enables **stable clamping**.
- **Reduced stress on body** as a result of the pull-type design features also includes a **spindle nut that does not protrude** past the end of the body during clamping.
