

Industrial Air Filtration Solutions Now Available at AHB

**Are oil mist, smoke, & airborne particles compromising
your workshop environment & your team's health?**

AHB Tooling & Machinery now offers Purified Air's ESPi Series—a line of compact, energy-efficient Electrostatic Precipitators engineered for industrial excellence.

With up to 99% filtration efficiency down to sub-micron levels, these units remove oil mist, smoke, and fume particles directly from the source—keeping your machines running cleaner and your air safer to breathe.

Why Choose Purified Air ESPs?

- Compact, modular designs for any workspace
- Low energy consumption and minimal maintenance
- Scalable from single-machine to full-facility filtration
- Configurations for vertical, horizontal, or centralized mounting
- Built-in fans for easy installation

From neat oil CNC machines to large-scale ducted systems, there's an ESPi model for every application.

Let's talk about the right clean air solution for your operation.
